Vestal's Guide for Fall Planting

Lawnmaking in the Autumn

Lawns endure each year two periods of trial, mid-summer and mid-winter, during which they are likely to suffer severe damage. In compensation they enjoy two seasons of excellent weather—excellent, that is, for grass. These are the autumn, and the spring.

The mid-summer ordeal of hot and dry weather is complicated by the strain of seed forming. At the time decreed by nature, grass "goes to seed," whether the plants be young or old. This takes strength and stops growth. It is particularly trying on young plants from spring-sown seed, which have had little time to become stocky and sturdy. It makes them spindly and weak, poorly prepared to resist the strain of the summer's drouth.

FALL IS THE TIME TO SOW GRASS.

In the autumn there is no seeding, no drouth, no excessive heat. Seed sown in the fall germinates in time for a long stretch of favorable weather in which to become established before winter sets in. The winter ordeal is not so severe as the summer; and after it comes a long, cool spring, for further growth before mid-summer and seeding time arrive. Fall, therefore, is the best time to sow grass, so much so that experts of the Department of Agriculture advise never to sow in the spring, when it is possible to sow in the autumn.

THE VALUE OF TESTED SEED.

Our lawn mixtures are cleaned and re-cleaned. Then our seeds are tested for germination to insure that they have in them the power to grow. Our blends are composed of several grasses, each of which has a purpose; some to make a quick show, some to make a quick turf the first summer, a little clover to help enrich the soil and fill in bare spots and always English Rye Grass of the finest quality to take hold in its own way, to spread and finally to dominate in the permanent turf.

Pure seed such as we sell goes twice as far as the adulterated mixtures generally obtainable at bargain prices; and our seed should be mixed with sand when sown to help scatter it.

See that the seed is well covered. Rake it into a new seed bed and roll so that the soil is firmed over the seed. Where seed is sown on an old lawn always cover it with a top dressing of sand or soil and fertilizer. Seed thrown on the top of hard ground has no chance to grow and will merely wash off.

Lawns sown in the fall generally need a light protection for the winter—a top dressing or light mulch, or a covering of straw.

Quantity to Use. On new lawns use 1 quart of seed for 300 square feet. To replenish lawns where turf is thin use half quantity.

Southern States Evergreen Lawn Grass Seed For the convenience of those of our customers who object to the Bermuda Grass, we have decided to offer them this year Southern States Evergreen Lawn Grass Mixture. A mixture of the best grasses that exist for general planting in the Southern States. Most lawn grass mixtures are of little use in the South, as they burn out in dry summers.

Vestal's Evergreen Lawn Grass Seed is a well balanced scientific blending of the best American grasses which will flourish under varied and adverse conditions of soil and are by nature adapted to hot, dry climates. It quickly produces a firm, deep velvety and elastic turf and holds its beautiful emerald green color throughout the season.

By using Vestal's Evergreen Lawn Grass Seed and with some care and attention to watering, an all-the-year-round lawn can be maintained in the Southern States where lawns generally do not thrive. For a plot 15x20 feet, or 300 square feet, use one quart. Price, delivered free, 60 cents per quart; \$1.50 for 3 quarts; \$2.50 for 6 quarts.

GIANT NARCISSUS OR TRUMPET DAFFODILS

Of all bulbous plants, the Daffodils will stand more vicissitude of soil and climatic conditions than any other class. All they need is a good start to make themselves naturally and gloriously "at home" in any location. Their delicate scented flowers are very welcome in the winter pots and boxes; but out-of-doors, in gardens, lawn, or wildwood, they find their greatest perfection.

Some of the Narcissus bloom as early as the Crocus, making the garden look very cheery and bright with their gold color in spring. The flowers assume many forms and present many charming combinations of white, gold, primrose, orange, sulphur, and pure yellow. Some are quite fragrant; all are very hardy, with the exception of the clustered Polyanthus varieties, which though extensively grown for cut flowers are not for outdoor planting.

Known as Giant Jonquils, having Gigantic Trumpets and Massive Perianths.

Superfine Mixtures of Double Flowering Tulips

We offer only the Superfine Mixtures—the Best Obtainable.

Double Tulips produce very large double flowers, many of which are as large and showy as a Peony. They are becoming more and more popular each year, which they justly merit. A very pretty show can be made by planting several colors, such as yellow, white, rose and crimson in the same bed. The bright colors of the large double blossoms contrast splendidly and make a charming display.

We have imported a large stock of unnamed early flowering Tulips for bedding, which we price so low as to make a large mass of these showy flowers a matter of trifling expense. They are excellent bulbs, and will bear handsome blooms. Double and single collections are kept separate. Several hundred bulbs at the quotations below involve less expense than is required to secure a few summer bedding plants, and in the matter of display they are fully as valuable during their season as an equal number of ordinary blooming plants.

Price, 75 cents per dozen; \$6.00 per hundred.

Lilium Candidum

Large Double Flowering Peonies

Peonies will grow anywhere—reasonably speaking. They thrive in partial shade, but best results are obtained when they are planted in deep, rich soil *about 2 inches below the surface* and have a sunny location. Plenty of water during the growing season is an added stimulus, and if liquid manure is applied at intervals of ten days, the grower will be amply repaid for his trouble in the increased size and coloring of the flowers. When placing manure around the plants, care should be taken not to put any on the stems, as this will sometimes cause the plants to cease blooming.

FELIX CROUSSE. An exceptionally fine Peony and one of the leading red varieties. It is extremely brilliant in color, a vigorous grower, free bloomer, and slightly fragrant. *90 cents each.*

FESTIVA MAXIMA. Immense, pure snow-white, perfectly double flowers with an unexpected and beautiful flake of carmine in the center; a perfect Peony. *Price, 75 cents each.*

QUEEN VICTORIA. Large globular flower with milk-white guard petals. Center cream. Fragrant. *Price, 60 cents each.*

LOUIS VAN HOUTTE. Rich violaceous red; medium size but free in bloom. Color is very brilliant. Fragrant. *Price, 75 cents each.*

PRESIDENT TAFT. A vigorous, strong grower, a profuse bloomer, every shoot being crowned by a big bloom. The flower is really of enormous size; there may be peony flowers as large, but none larger. The color is a delicate hydrangea-pink, completely enveloped in a halo of angelic white. The fragrance is delicious. A glorious, gorgeous flower, very large and double. *Price, \$1.50 each.*

Although capable of establishment in any kind of soil, they will attain greater perfection of growth and flowering in a damp or marshy situation. PALLIDA DALMATICA. A rare, delightful variety, especially fine for massing as well as for cutting. Tall growing; with very large full-formed flowers of soft lavender, the falls being of deeper hue. *Price, 25 cents each.*

RHEIN NIXE. Although dainty, and of delicate hue and texture, this recently new kind is quite conspicuous. White; the falls heavily blotched and feathered purple; large golden beard. Makes a fine companion for Loreley. *Price, 35 cents each.*

They are suitable alike for winter blooming or for growing outdoors, either in beds or in pots, boxes or vases, as the case may be. A collection of flowering plants is not complete without Fuchsias, and the extremely low price at which splendid sorts are offered permits of a choice collection of different varieties. *Price, 15 cents each; 4 distinct kinds for 50 cents.*

PINK BRAZILIAN PLUME PLANT

(Justicia Carnea)

This plant is a native of Brazil and of the easiest possible culture, and seems to do equally well in all kinds of soil, and in any situation requiring very little attention; it is, in fact, one of the few plants that everyone can grow successfully. It is a strong, rapid grower, and throws long shoots, each of which is tipped with the beautiful pink plume-like flowers, the ends of every petal drooping in a most charming manner. This new sort begins to bloom when the plant has only three or four leaves and is never out of flower afterwards. If pinched back occasionally it makes a very dwarf stocky plant, frequently covered with 20 to 50 large pink flowerheads, lasting a long time. The foliage is also more persistent and highly ornamental, being heavy in texture and very velvety. *Price, 30 cents each.*

RED BRAZILIAN PLUME PLANT

(Justicia Sanguinea)

The same in every way as the Pink Plume Plant, except that the flowers are a deep cerise pink. *Price, 30 cents each.*

Poinsettia

POINSETTIA PULCHERRIMA

This is the plant which produces the large clusters of red leaves or flowers which are seen in all the flower stores at Christmas. We offer fine plants. *Price, 50 cents each.*

Brazilian Plume Plant

ORNAMENTAL POMEGRANATE

DWARF EVERBLOOMING

(A New Christmas Plant)

Makes a beautiful dwarf shrub for mild climate, also a desirable pot plant for colder climates. Foliage glossy green with ruddy autumn tints, flowers a pleasing brick red and produced in greatest profusion from the ends of the drooping branches. They come into flower early, but if wanted for Christmas blooming the first flowers should be kept nipped until well into October, when they will begin to take on a general crop, which will make them bloom in December and for several months afterwards. Small glossy red fruit, very attractive. *Price, nice well started plants, 50 cents each.*

Ornamental Pomegranate

JERUSALEM CHERRY

Forms a dwarf, branching plant, with small, oval-shaped leaves, and a great profusion of handsome, bright scarlet berries. Height, 1 foot. Succeeds well outdoors in summer. In fall before frost pot up plant and bring indoors for winter decoration.

Price, 35 cents each.

Bougainvillea

BOUGAINVILLEA

CRIMSON LAKE. This is one of the most notable vining plant introductions of years. Its numerous clustered, crinkly, paper-like bells in their emerald setting, are an incomparably brilliant crimson-lake color.

Their foliage is attractive in form, and shiny; the entire effect of leaf, twigg growth and luxuriant bloom giving them an air of tropic elegance unequaled by any other indoor vine. Their bright festoons are wonderfully effective along the walls in conservatories and sun-rooms, or when trained on wire trellis forms, they can be kept down to dwarf, compact formation for use in tubs or large crocks. *Price, 1 year plants, 50 cents each; large plants, two to three feet high, \$2.00 each.*

The Wonder Vine

PHILODENDRON

"THE WONDER VINE"

(Also known as Devil's Ivy.)

We cannot say too much in praise on the value of this vine for use in fern dishes, wall pockets, baskets or any place where anything else will not thrive. It is by far the best plant for use in the home as under-watering, over-watering or any adverse conditions will little affect it. For fern dishes, plant a sufficient quantity in dish and pin the vine to the soil with greening pins and it will root at every joint and form a compact mass of green heart-shaped leaves. Give it a trial and see for yourself. Everyone knows the value of English Ivy in the home, yet the Philodendron surpasses it by far. *Price, 50 cents each.*

WHEN TO ORDER

Send in your order for bulbs, plants, etc., as soon as you receive this catalog. Most bulbs offered in this list are spring bloomers and should be planted from September to December. We are prepared to fill orders at once, with few exceptions, and these will follow a little later.

HOW TO SEND MONEY

Remittances should always Accompany Order.

They may be made at our risk by any of the following methods: (1) Postoffice Order, (2) Bank Draft, (3) Express Company's Money Order, (4) Cash by Express in amounts of not less than \$5.00, (5) Cash in Registered Letters. The rates charged for Postoffice Orders and Express Money Orders are now so low that this is the best way to remit where they can be obtained. BEAUTIFUL DECORATIVE FERNS

These beautiful plants for home decoration vie with the Palms for first place in the esteem of flower lovers. They are finely cut and oddly shaped. Ferns give a graceful effect produced by few other plants and they do exceedingly well in the parlor and conservatory. The Nephrolepis family, of which the well-known Boston is a member, has furnished us many beautiful species of late years. We recommend all the varieties listed.

Boston Fern

ASPARAGUS FERNS

Their beautiful sprays of lovely, feathery foliage can be cut freely for bouquets, etc.

ASPARAGUS PLUMOSUS. Climbing Lace Fern. An extremely graceful window climber. The fine, feathery foliage is always bright and green. *Price, 15c and 25c each.*

WANDERING JEW

Most beautifully variegated purple, scarlet and white. *Price, 10 cents each; \$1.00 per dozen.*

STROBILANTHUS DYERIANUS

An excellent bedding plant as well as a beautiful foliage plant for pot culture. It forms a compact bush 18 inches high, with leaves six to nine inches long; of a beautiful metallic purple, shading into light rose, with a light green margin. The flowers are violet blue, borne in immense racemes. *Price, 25 cents each.*

THE BOSTON FERN. This popular Fern has proved one of the best decorative plants of recent introduction. The fronds are much larger than the Sword Fern., and do not stand so stiff, but droop gracefully. Excellent for making large specimen plants, also for hanging baskets. *Price, nice young plants, 25 cents and 50 cents each.*

DWARF BOSTON. Fitting companion for the Boston; dwarfier, more compact in growth, darker shade of green, very gracefully arched. Very desirable as a house plant. *Price, 25c and 50c each.*

NEW FERN JOHN WANAMAKER. Long, narrow, gracefully drooping fronds. It is not so compact in growth as Scholzelii, and therefore does not decay in the center, and is a durable house fern. It is a rapid grower, making an abundance of fronds, and is quite distinct from any other Fern. *Price, nice plants, 25 cents each; larger plants, 50 cents each.*

WHITMANII (Ostrich Plume Fern). More of a dwarf habit than the Boston Fern. The fronds are of entirely different nature. Each frond is subdivided on the order of the Compacta Fern, thus producing a very beautiful effect. Its decorative ability is excellent. *Price, 25 cents, 50 cents and 75 cents.*

NEPHROLEPIS SPLENDIDA. This is the most wonderful Fern of them all. It combines the good qualities of the four most popular sorts. It has the grace of a "Boston," the wavy effect of a "Roosevelt," the fluffy effect of an "Ostrich Plume," and the uniqueness of the "Fish Tail." *Price, 25 cents each; larger, 50c.*

NORWOOD FERN. A dwarf compact form of Whitmanii, carrying its fronds stiff and erect on wiry stems that do not break down. Makes ideal specimens. Called by some florists Fluffy Ruffles Fern. Very showy. *Price, 25c, 50c and 75c.*

NEPHROLEPIS SPARROWII. We take great pleasure in offering to our customers for the first time this new and valuable variety, a true sport of the Neph. Superbissima (or Fluffy Ruffles) Fern. It has the dark green foliage of its parent, which, with its beautiful crested fronds, makes it a most unique, distinct and desirable Fern. One of the most distinguishable features of this new Fern is its robustness, which makes it a very rapid and easy grower, a Fern the amateur can grow with success. We recommend this new variety most highly. *Price, young plants, 25 cents; larger plants, 50 cents.*

Parlor Foliage Collection

In this collection we give you a strong plant of the best of all Ferns, "Whitmanii," also a plant of the new Fern, "Wannamaker," together with a Boston Fern and a plant of the Lace Fern for 75 cents.

OUR NEW ROSE **JOSEPHINE VESTAL**

"A Rose of Attractive Coloring"

In this magnificent Rose, we find a Rose of attractive coloring. In our estimation, this new Rose has the brightest future of any Rose introduced for the last quarter century. The color is one so difficult to describe that any description can only be a partial one, and gives but a faint idea of the superb beauty and richness of the shades. It might be described as salmon-flesh tinted Rose, with a touch of yellow at the base. Buds of unusual attractiveness, opening full and double, like the old Malmaison, but decidedly brighter; unusually long and beautifully pointed with petals of wonderful depth and substance, retaining their shape longer than most Roses. The variety is of fine branching habit and ideal growth, a beautiful and most bushy Rose. Its color is not its only charm as its fragrance fills the room with a delicate pure Rose perfume. It ranks one of the best of the garden Roses. Habit excellent, growth strong, and almost thornless, produces flowers on long stems, well up above the foliage, and in great profusion all summer. Hardy in almost all localities. Grand for outdoors. Price, two-year plants, \$1.50 each.

MME. ALEXANDRE DREUX

REV. F. PAGE ROBERTS

Large, long buds coppery red, opening into golden yellow double blooms stained outside with red. A truly striking distinct Rose, and we recommend it for its unique coloring. Price, two-year plants, \$1.50 each.

Wm. R. Smith

CITY OF LITTLE ROCK

A surprisingly beautiful novelty now being introduced for the first time. It is distinct, and beautiful in color, a bright rosy-pink or rose-shaded with Hydrangea-pink. The buds which open perfectly are long and of ideal form. The growth is vigorous and the flowers are produced profusely. Its pronounced fragrance will attract all Rose lovers.

ALEXANDER HILL GRAY

It is wonderfully floriferous, every shoot being crowned with a flower bud, which develops into a bloom of very large size, great substance and perfect formation with high pointed center from which the petals gracefully reflex. The best and largest pure yellow Tea Rose yet introduced.

PRESIDENT CARNOT

This Rose continues to hold its own in popular favor. The flowers are large, full, double, well shaped, with heavy, thick, shell-like petals; buds very long and pointed—perfection in every line. Delicate, rosy blush color, shaded a trifle deeper at the center of the flowers.

MARIE GUILLOT

White, tinged with delicate shade of lemon; large, full and beautifully imbricated in form. One of the finest white Teas. The perfection of form in Tea Roses; highly fragrant.

RHEA REID

A Rose of the type of American Beauty, but of the easiest culture. It never mildews or black-spots and opens its large flowers perfectly under all weather conditions. In color it varies with the temperature, in summer a bright cherry-rose while in winter it is a rich crimson-scarlet.

COMMONWEALTH

This new Rose has large, long, pointed buds, and large open double flowers, borne singly on medium strong stems. The color is an even deep pink, what would be called a solid color, that is, without much shading. Ample foliage with few thorns. A vigorous upright grower and delightfully fragrant.

VICTOR

A sweetly fragrant Rose, having fine bronzy buds. The flowers are large, full and globular, and are carried well above the foliage upon rigid and strong stems. The color is a deep rose and carmine, edges of petals carmine-lake.

MADAME PAUL EULER

The color is a lovely shade of rose-pink, petals waved or undulated on the edges, giving it an elegance of form seen in no other Rose. Good for forcing or outdoor growing.

RADIANCE

A brilliant rosy-carmine, displaying beautiful rich and opaline-pink tints in the open flower. Radiance is a Rose that does well everywhere, a fine grower and free bloomer, and no prettier pink Rose grown.

MAMAN COCHET

A most wonderfully beautiful Rose of great value. The beautifully elongated buds and full blown double flowers are exquisitely charming, while the fragrance is rich and delicious. The color is fleshy pink, with the inner side of petals silvery rose.

LADY URSULA

Color a most beautiful shade of flesh-pink, of great substance and good form; petals large, circular and delicately perfumed. A grand grower, producing its round, full blooms in wonderful profusion.

COLUMBIA

Of distinctive merit, being an extremely strong, rank grower, blooming with the greatest freedom, the buds are carried on long, stiff, erect stems, largest size imaginable, open flowers often measuring six inches across, full of petals and of wonderful depth, which it retains in perfect formation. Very fragrant. Color, clear imperial pink, deepening as it opens to glowing pink.

Kaiserin Augusta Victoria

This marvelous Rose has had many rivals for the place it still retains as the greatest white Rose in existence. Strong, sturdy grower, flowering with the utmost freedom. It holds first place as the most popular of white Roses for general planting. Color, delicate creamy-white, with a delicious magnolia-like fragrance, exquisite buds, absolutely hardy.

WM. R. SMITH

A vigorous, healthy grower, excellent in quality and beautiful in bloom. Whether you live East, West, North or South, whether you wish one Rose or a thousand, here is a Rose which will thrive abundantly in almost any reasonable location. The flowers are large, full and double, and most exquisitely formed. The petals are so firm they look like wax, softly curled, colored cream with flesh tint tips, buff yellow base and the center a heart of pink. Perfect buds.

FRANCIS SCOTT KEY

In describing this Rose we might say it is large and very large. Some of the flowers have as high as sixty petals and sometimes more, opening to a very high center. In color it is a most magnificent red. It is very easy to cultivate and requires little or no care. This makes an ideal Rose for your garden and is extremely showy when a number of these plants are massed together.

VESTAL'S HARDY CLIMBING ROSES

These are the Roses so necessary for the home, giving it, no matter how humble, or pretentious, a touch of beauty not to be had by any other form of adornment. They also have a most useful side, in that they give most delightful and refreshing shade when used on the porch, veranda or pergola. They are used very extensively in covering unsightly spots in the grounds, for screening out-buildings. Are especially recommended for trailing down over embankments and for cemetery planting.

CLIMBING KILLARNEY. Produce beautiful blooms, identical with the bush Killarney.

MARECHAL NIEL (The Most Popular of All). This is one of the Roses that starts rather slowly, and for that reason the best success will be had with the larger plants. This superb Rose is especially recommended for the Southern states, where it requires but little outdoor protection. Rich golden-yellow.

CLIMBING COLUMBIA (A Remarkable New Climbing Rose). It is identical with the great "Columbia," having all the parent's desirable features and in addition it is a wonderful climber, growing ten to fifteen feet in a single season. Blooming, as it does continuously, bearing blooms of immense size, often measuring six inches in diameter, this at once becomes the greatest of all pink, hardy, everblooming, climbing rose. Color is the same as "Columbia," glowing pink, fragrance delicious. A most remarkable rose.

AMERICAN PILLAR. One of the most valuable and attractive of the Hardy Climbers, flowering profusely in large, compact clusters. The single flowers range from 2 to 5 inches in width. Brilliant carmine rose, with a slight cream variegation and yellow stamens at center.

PAUL'S SCARLET CLIMBER. Vivid scarlet shaded slightly crimson, but almost a flaming scarlet, a most pleasing and striking color. Makes a brilliant display for a long time in the garden. The petals do not fade like many climbing Roses, but retain their bright color, and remains in bloom for from two to four weeks. The Rose received the gold medal and cup for the best Climbing Rose at the National Rose Society's exhibit.

FREEDOM (Climbing White American Beauty). Cross of Silver Moon and Kaiserin Augusta Victoria. A hardy, disease resistant variety similar to Kaiserin but of more vigorous growth and greater freedom of bloom. It is much more double than Silver Moon with but a single flower to a stem. Has excellent keeping qualities.

CLIMBING AMERICAN BEAUTY. A seedling from American Beauty with Wichuraiana and Tea blood in its veins. The introducers say of it: "Same color, size and fragrance as American Beauty with the addition of the climbing habit. Good foliage, and better blooming qualities. Blooms three to four inches across; has proved perfectly hardy, and stands heat and drought as well as any Rose in our collection."

CHRISTINE WRIGHT (The Climbing Pink American Beauty). A charming new hardy climber which embodies the strong climbing qualities of the class; the shiny, leathery foliage and healthfulness of the Wichuraianas; and the blooming size and freedom of its Testout blood. The flowers come solitary and in clusters, nearly double, 3 to 4 inches across, in a delightful wild-rose shade of pink.

DR. W. VAN FLEET. Flowers when open run four inches and over in diameter. The center is built high, petals beautifully undulated and cupped. The color is a remarkably delicate shade of flesh-pink on the outer surface, deepening to rosy flesh in the center. The flowers are full and double, of delicate perfume; buds pointed.

SILVER MOON. Single flowers, extra large and freely produced on long, strong stems; excellent for cutting. Color is brilliant silvery-white with a mass of golden-yellow stamens in center.

MRS. ROBERT PEARY. A strong and rapid grower, coming to perfection in the open ground. The buds are long and pointed, finely modeled and gracefully finished, while the fragrance is indeed delicious. The flowers when open are of splendid substance, extra large, deep and double, produced on long, stiff stems. Color pure white.

ROSERIE. This splendid new Rose is derived as a sport from Tausendschon; and while showing exactly the same vigorous growth, clean foliage and great freedom of bloom as the parent, its flowers are a deep, glowing pink.

MARY WALLACE. (New). Although a good pillar rose, it becomes self-supporting and makes an ideal door-yard bush. The flowers are semi-double, bright clear rose-pink with salmon base. These are often four inches wide; and appear intermittently during the season, following their first glorious outburst in late spring.

ROSES FOR FALL PLANTING

Where the winters are not too severe, the fall planting of Roses continues to grow in popularity, especially with those who have tried our stock. These plants we have thoroughly prepared for shipping and planting at any time and the sooner you send the better.

Order as early as possible (today); plant promptly on arrival; let the roots get well established this fall. Before the ground freezes hard, mound up the soil six inches high, thus protecting each plant for the winter. In the spring remove the covering gradually when danger from frost is past—then will come your surprise and pleasure. The new growth and abundant bloom will be far in excess of that from plants set out next spring; so, if you live in a mild climate, begin your next year's Rose beds now, and begin with these specially prepared Roses. For fall planting we recommend the planting of two-year-old Roses only.

Some Shrubs That Bloom

In corners of the grounds, at curves in the walks and driveways, and at the house foundations are excellent places to plant shrubs. They should always be in groups, unless their ultimate size will be quite large. Lilacs may be used in specimen plantings, but low-growing shrubs, such as the Spireas, etc., should be set in clumps. In grouping it is always good policy to plant the taller growing varieties back of the lower sorts. This gives a "step-down" effect, and seems to join the house to the lawn.

DOUBLE ALTHEAS

BARBERRY THUNBERGII

(DWARF BARBERRY)

Very attractive, neat and dense in growth, yet graceful because of its drooping branches. It produces yellow flowers in the summer which are followed by scarlet fruit, borne in dense profusion on the long stems and clinging throughout most of the winter. The leaves color to scarlet and gold. This is a very attractive shrub for planting as single specimens on or about a lawn, or for planting in the corners near by the house or porch along the base of the wall to take away the bleak, barren effect of the wall. Dwarf Barberry is also used extensively for planting on borders in connection with other shrubs, for owing to its dwarfish habit, if planted in the front of other shrubs, it takes away any ragged effect, making only a mass of green visible to the eye. It is also used extensively for planting in the corners where sidewalks meet. For a hedge not over two or three feet high this makes a very desirable shrub. We recommend it highly. *Price, plants two feet high, 50 cents each; \$5.00 per dozen; \$35.00 per 100.*

GOLDEN ELDER

(SAMBUSCUS)

Just because we have always thought of Elderberries as a fruit that was good for pies and wine the plant has been neglected as a decorative shrub, but the golden leaved variety is especially charming. Its foliage contrasts well, and the sweet scented fairy like racemes of creamy white flowers, followed with the black fruit keeps up the interest and brings the feathered tribes to be your visitors. If you wish an abundant fruit crop find a damp place for them. *Price, 75 cents each.*

LAVENDER

The Choicest STRAWBERRIES and How to Enjoy Them

There is room for a strawberry bed in even the smallest garden, or there *should* be! Considering the ease with which these most delicious of all berries are grown, in most any soil and (with the help of the "Everbearers") throughout the season, the gardener who is *not* growing them, is depriving himself of a genuine succession of delights.

All varieties of Strawberries give the greatest yield and the largest berries when grown in rich soil; hence, no pains should be spared in preparing the bed carefully before planting, by digging or plowing deeply and turning under a liberal supply of well-rotted manure. Pulverize the surface soil thoroughly with harrow or rake and, if a top dressing of ground bone is applied, it will be found a great benefit at fruiting time.

For hill culture in the family garden, plant in rows two feet apart and the plants a foot apart in the rows, cutting off all runners as they appear. If to be allowed to grow in matted rows, set the plants in rows three feet apart and the plants one foot apart in the rows.

For field culture, to be cultivated with horse and hoe harrow, plant in rows three and a half feet apart and the plants one foot apart in the rows, requiring 12,445 plants per acre.

All the varieties offered have perfect flowers, hence do not need the association of any other variety in order to be fruitful.

Price, postpaid, by mail, 25 for 50 cents; 50 for 75 cents; 100 for \$1.25; by express, not prepaid, 100 for \$1.00; 500 for \$4.00.

AROMA. A good grower and a reliable variety. Berries are of large size, rich in color, with smooth surface and prominent yellow seeds, and a high aromatic flavor.

IMPROVED KLONDIKE. This variety is noted for its large yields of beautiful berries, uniform in shape, rich blood-red in color and having a flavor that is neither sweet nor sour, but mildly delicious.

LADY THOMPSON. Early, strong upright plants, root deeply; many long runners. Thrives in all soils, but best in rich loam or sand. Berries medium to large, regular, glossy pink solid, meaty, excellent.

EXCELSIOR. This variety is one of the very best extra earlies yet introduced, and is a vigorous, healthy grower—unusually productive for so early a sort—outyielding other standard earlies two to one, while the fruit averages large, is very handsome and firm.

PREMIER. Very early. Berries are large, beautifully formed, bright red all the way through. A money-maker, producing heavy crops of firm, delicious-flavored, handsome fruit. We endorse Premier strongly.

EVENING STAR. A promising midseason to late. Berries are as large as Aroma; has the shape of Gandy, of which it is a seedling; is more productive. Plants of healthy growth, and a No. 1 variety.

SENATOR DUNLAP. Thoroughly tested and proved one of the best standard varieties wherever tried; strong, hardy, deep-rooted plants; a great bearer of bright, glossy red berries of first class quality.

GANDY. A reliable late variety, berries bright crimson, very uniform in size and shape, large and firm, plants vigorous and healthy.

ST. LOUIS. One of the largest and finest berries grown, and being a heavy yielder as well, steadily is winning its way to a prominent place in the confidence of Strawberry growers. In shape the berry is conical and long, having an obtuse point. In color it is dark, lustrous shade of crimson, and is studded with brilliant, golden seeds, all of which tends to make it one of the handsomest berries.

NICK OHMER. Of largest size, a giant among strawberries; robust, healthy habit; dark, glossy red fruit; firm and productive.

MICHEL'S EARLY. One of the earliest varieties grown. The plant is a very robust grower, strong and healthy; one of the best of the early fertilizers, as it blooms early and late.

FALL BEARING STRAWBERRIES

Fall-bearing Strawberries seem to be no longer an experiment, as they are becoming essential all over the country, and are making good every place they have been tested. If these varieties are disbudded, until say August 15 to September 1, and allowed to fruit they will give large quantities of ripe berries until checked by hard freezing. The variety we offer we consider the best.

PROGRESSIVE. This is the strongest growing plant of all the fall-bearing varieties we have seen. The plants are very large and heavily rooted, producing a phenomenal crop of medium to large fruits, of a dark red color both inside and out. Price, 25 for 75 cents; 50 for \$1.25; 100 for \$2.00, postpaid.

WHY NOT PLAN RIGHT NOW TO GATHER YOUR OWN!

ST. REGIS EVERBEARING RASPBERRY

Undoubtedly the most dependable of all the Everbearing sorts known to date!

A unique red Raspberry, and, all things considered, the most valuable one that has appeared in the last quarter of a century. It was introduced by us in 1910 and by sheer merit has forged ahead by leaps and bounds, until it now stands at the top of the list of red varieties. The berries, though not of largest size, are bright red and of excellent quality. It ripens very early—in advance of all other red varieties—and the canes, in addition to being very drouth-resistant, are exceedingly prolific.

St. Regis Raspberry

Besides giving an immense crop in summer, it also gives an autumn crop, continuing to produce perfect berries in generous quantity until the ground freezes. Unlike most other Raspberries, it yields a moderate crop of berries the first season if planted in early spring.

St. Regis sends up suckers or young plants excessively, and unless these are kept down (to a single row of plants or three to four plants to the hill), with hoe or otherwise, treating the surplus ones as weeds, the crop of fruit will be small, both in quantity and size of the berries. Price, \$1.50 per dozen; \$7.50 per 100.

THREE BEST RASPBERRIES

This fruit comes in just after Strawberries, and when properly cultivated is quite prolific. Plant on strong soil, fertilize freely, and mulch heavily. Pinch off canes when three feet high, tie up and cut out old wood each year. Price, six for 75 cents; 12 for \$1.25; \$7.50 per 100.

THE GREAT COLUMBIAN RASPBERRY. Hardy and vigorous, often growing eight to ten feet in a season, and standing any degree of frost and drouth. It is propagated by tips, and its productiveness is most astonishing. We know of no variety that can compare with it. The berries are large, dark purple, firm as to texture, with an agreeable, pure, rich flavor, which is brought to its highest flavor when canned or cooked. The most prolific of any sort known, the fruit fairly hanging in masses. A row or hedge of it is a sight to behold.

CUTHBERT RED. Scarlet crimson, large, conical, handsome, firm and juicy. Canes are strong, vigorous, upright and hardy. The best and most widely planted red Raspberry for home gardens.

CUMBERLAND. A healthy, vigorous grower, throwing up stout, stocky well branched canes that produce immense crops of magnificent berries. Fruit very large, firm, quality about same as Gregg, keeps and ships as well as any of the blacks. The most profitable market variety. Mid-season.

EARLY KING RASPBERRY

A perfect beauty when picked, coming early and fruiting long; an immense cropper. The bright red berries, as large as a copper penny, very firm and fine flavored, pick nicely and do not crumble. Becoming too ripe does not affect the color at all. They are indeed a showy fruit, perfectly hardy and healthy in every way. Price, \$1.50 per dozen; \$10.00 per 100.

BLACKBERRIES

EARLY HARVEST (Very Early Blackberry). The Early Harvest is the very first Blackberry to ripen. Fruit medium size, roundish, oblong, flesh is soft, juicy, mild, pleasant, tender and very good. The vine is vigorous, upright and hardy.

ELDORADO (Mid-Season Blackberry). The Eldorado is a large, oblong, conical berry; small seeds and core; flesh tender, sweet and juicy. Jet black color when ripe. Vine is upright, hardy, vigorous and productive.

SNYDER. One of the hardest, most dependable Blackberries. Good quality, good size, good shipper. Can always be depended upon. Price, six for 75 cents; 12 for \$1.25; 100 for \$7.50.

DEWBERRY VINES

The Dewberry is closely related to the Blackberry, but larger and much earlier. Some remarkable profit-records have been made with the Dewberry where there is a demand for an earlier and larger berry than the Blackberry.

LUCRETIA. The Lucretia is the best of all the Dewberries, glossy black, very large, coreless, juicy and sweet. The vine is vigorous and spreads over the ground. Fruit ripens about ten days or two weeks before the Early Harvest Blackberry. Price, six for 75 cents; 12 for \$1.00.

Lucretia Dewberry

Grape Vines

There is scarcely a yard so small, either in country or city, that room for one to a dozen or more grape vines can not be found. They do admirably trained up by the side of any building, or along the garden fences, occupying but little room and furnishing an abundance of the healthiest of fruits. Make the soil mellow and plant the vines somewhat deeper than they stood in the nursery. Plant about eight feet apart, by the fence or building. For vineyard, make rows eight feet apart, six to ten feet in rows. Grapes are ornamental as well as fruitful. Plant them wherever you have a place where vines can be tied. You can plant them against buildings, over arches, on trellises, etc. These vines grow fast, they have large leaves, and make welcome shade in summer. Price, 40 cents each; \$4.00 per dozen.

AGAWAM. An old favorite. Berries large, meaty; dark purplish-red with thin bloom; ripens late and can be kept until mid-winter.

BRIGHTON. The best red grape for home use and market. Exceptionally fine flavor; very sweet, juicy and aromatic. Vigorous vine, sets large crops.

CAMPBELL EARLY. Bunches medium to large, berries large, glossy, black with a beautiful blue bloom. Pulp sweet and juicy. Good. Seeds small and few in number. Season ten days earlier than Concord. New and promising.

CONCORD. The standard of excellence among black grapes. It is the most important table grape east of the Pacific Coast. Berries jet black, sweet, juicy; excellent flavor; hardy; productive.

CACO. A new red grape that is succeeding remarkably well. It is a cross between the Catawba and Concord. Berry is very large and of fine flavor. Bunch is not as large as some others, but take it all together, it is a good one to plant.

LUTIE. A rich red grape that is good everywhere and under all conditions. Vine vigorous, heavy bearer; fruit delicious in quality, seldom rots, and ripens in mid-season. We recommend this wonderful red grape.

MOORE EARLY. Black, similar to Concord, but of larger berry and somewhat smaller, looser bunch. Vine moderate grower but heavy producer. Ripens a week or more ahead of Concord.

A very popular home and market grape.

NIAGARA. Occupies the same position among the white grapes as Concord among the black. Bunch and berries large,

greenish white, changing to pale yellow when fully ripe. Skin thin but tough, quality much like the Concord.

POCKLINGTON. A late ripening white grape, similar to Niagara, but ripening later and more foxy in flavor.

WORDEN. Similar to Concord, but ripening several days earlier. Superior in hardness, health and productiveness to others of its season. A very fine grape for home or market.

WOODRUFF RED. Very handsome and appealing bright red grape produced in large clusters. Vine vigorous, hardy, healthy, productive. Berries large, rather tough and of very decided foxiness. Greatly relished by those who like a foxy grape.

WYOMING RED. Light red. This ripens with the Delaware which it much resembles in appearance, though the bunch and the berries are larger. The berries are sweet and pulpy, and the vine is a good strong grower.

DELAWARE. The bunches are small, compact, and sometimes shouldered; berries are small with thin but firm skin; flesh juicy, very sweet and refreshing and of the best quality for both table use and for wine. Ripens with Concord or a little before; vine is hardy, productive and a moderate grower.

DIAMOND (Moore Diamond). Few grapes surpass Diamond in quality and beauty of fruit. Its chubby bunches of big, green berries, are most attractive. When fully ripe they have a tinge of golden. Just enough of the richness of Old World grapes combined with native fox grapes to give them a wonderful flavor. Very productive.
