LIST 2719

THIS LIST COVERS STOCK OFFERED BY

CLARKE NURSERY CO.

SAN JOSE, CALIF.

SEASON 1927-1928

PLEASE NOTE

All summer quotations not accepted to date are hereby cancelled.

TERMS. To buyers of known or established credit, 60 days from date of invoice. Otherwise cash with order or 25% with order, balance C. O. D.

GRADING. Plants that are wider than they are tall are graded by width.

QUANTITIES. Five or more plants of one kind and size will be supplied at 10 rate; 50 or more at 100 rate; 500 or more at 1000 rate.

POTS. Prices on pot grown stock do not include the pots and unless otherwise instructed plants will be removed from pots before shipping. If wanted in the pots they will be charged for at cost, but can be returned if desired and credit will be given.

PACKING. Will be charged for at cost as usual. Plants will be packed to secure lowest possible freight classification consistent with the nature of goods shipped.

SHIPPING. Our responsibility ceases when goods are delivered to transportation company in good order. They travel at buyer's risk. Please state distinctly whether you wish goods shipped by freight or express and where water shipment is possible be sure to specify by water or rail as you may prefer.

NOMENCLATURE. All plant names, both botanical and common, have been revised to conform with 1923 edition of "Standardized Plant Names," if listed in that book. The only exceptions are a few uncommon items and novelties which that work does not include, and the addition of a few common names widely used on the Pacific Coast. This standardized nomenclature should unquestionably be followed by everyone from now on.

This list covers items of which we now have a fairly good supply unsold. Many other things can be furnished in moderate quantities and quotations will be made on request. So if you want any ornamental stock not listed here write us about it.

This list is for the trade only and all prices are strictly net.

We are members of

CALIFORNIA ASSOCIATION OF NURSERYMEN

NOVELTIES

Special attention is called to the following novelties and specialties. Prices will be found in the body of the price list.

CONIFERS

CHAMAECYPARIS lawsoniana stewartii. Our best golden-hued conifer. All winter when Golden Arbor Viteas lose their color this is at its brightest.

CHAMAECYPARIS lawsoniana wisselii. **WISSEL CYPRESS.** Growth narrow and erect. Color sage or blue green. Foliage moss like. Rare and beautiful.

CUPRESSUS glabra stricta. A chance seedling. Growth much like Italian Cypress but becomes thicker at base. Color bright silvery blue. All plants offered are grafted, hence uniform.

CUPRESSUS sp. SILVERSPRAY CYPRESS. An interesting and beautiful Cypress with strongly drooping branches. Foliage glaucous. If main stem is kept staked it appears like a living fountain. Very fine. Species not known.

PINUS armandi. **ARMAND PINE.**

A new pine from China said to attain large size. Growth here seems practically dwarf. Its long silvery needles and odd habit give it great value for rockwork, Japanese Gardens and as a pot plant of very unusual appearance.

THUJA orientalis beverleyensis. Not a novelty, but still far from common. Growth erect and slender. Color vivid gold except in winter. As it does not sunburn it is entirely supplanting the old *Thuja aurea conspicua* to which it is superior in every way.

BROAD LEAVED EVERGREENS

PYRACANTHA crenulata flava. A new Firethorn having lemon yellow berries which color early. Very distinct from older sorts.

PYRACANTHA kansuensis. Has the smallest leaves and smallest berries of all the Firethorns which gives it a graceful appearance lacking in other kinds. Bears a profuse crop of orange yellow berries coloring about Nov. 1st.

VIBURNUM rhytidophyllum. Has been in the trade for several years but still very little known. Striking appearance mainly due to the long heavy, wrinkled leaves. Flowers freely and bears red berries turning black when dead ripe.

FLOWERING FRUIT TREES

As a class these are about the most charming and beautiful trees that can adorn a garden. They are all beauties. We call particular attention to:

CHERRY *Prunus campanulata.* Described in price list. Truly a wonder.

CHERRY "Park Weeping." Much superior to the old "Weeping Roseflowering Cherry," whose flowers are too pale.

PEACH. Weeping Varieties. Genuine novelties and extremely scarce. They are top worked on peach stems.

DECIDUOUS TREES

CRATAEGUS Carrieri. A medium size tree with rich dark green foliage. Its greatest beauty is in the berries which are extremely large, brilliant red and borne in clusters of 10 or 12.

ROBINIA hispida macrophylla. This is probably the most beautiful flowering tree that can be grown in this country. It is far superior to the old "Rose Acacia," which is beautiful enough. The flowers are the size and shape of sweet peas, borne in large clusters and a lovely shade of soft pink. Top grafted it makes a fine round headed tree or budded low a handsome shrub.

ROBINIA kelseyi. Erect quick growing small tree. Bears a profusion of reddish purple flowers.

ROBINIA pseudacacia decaisneana. **PINK LOCUST.** Not at all a novelty in California where it is well known and widely used. Mentioned here to attract the attention of nurserymen elsewhere as it seems to be little known outside the state. It resembles the Common Black Locust in most respects but is of even faster growth, has fewer thorns and the clustered flowers instead of being white are a fine pink.

SALIX babylonica annularis. Ringleaf Weeping Willow. Not new but rare. Growth more erect than Common Weeping Willow but with same drooping branches as it attains age. Its marked characteristic is the shape of the leaves. Each one is curled into a complete circle or ring giving the tree a most unusual and attractive appearance.

DECIDUOUS SHRUBS

FORSYTHIA intermedia spectabilis. Far ahead of all the older Forsythias. Will outbloom any of them two to one. The color is a deep golden yellow, not pale like most. Further, it has long erect shoots which are covered with flowers the second year. Not only a fine garden shrub but should be very valuable for those who grow for the florist trade.

LILACS. We have specialized in Lilacs since we started and have one of the very best commercial collections in the country. We have dropped all but the best of the older sorts, as the new ones are so superior. In the Spring of 1926 we introduced 12 new kinds and this season are offering 10 more for the first time. These are the latest European novelties. Both sets include several of the new "Early Flowering Lilacs," a distinct race which flower 2 or 3 weeks ahead of the ordinary kind. A marked feature of many of these new kinds is their great vigor. There is no use of being satisfied with inferior sorts, 30 or 40 years old, when this magnificent collection is available.

CLIMBERS

WISTERIA multijuga longissima. A form of the Japanese Wisteria with exceptionally long clusters. The first crop will usually run 3 ft. which increases to 4 ft. as the plants get stronger. Ultimately some 5 ft. clusters will develop and the old original vine has actually produced a few clusters which reached the startling length of 6 ft. This may sound exaggerated, but is not.

WISTERIA. Mrs. McCullough. A distinct unknown variety. The color is a genuine deep purple which others are not, regardless of names. Clusters are short but full, finely formed and with very large individual flowers. First of all to bloom.

WISTERIA. West Adams. So-called from the original vine growing at West Adams Nursery, Los Angeles. Mr. Nishida says the Japanese name is Cho-shun-fuji. It is a deep colored form of *W. multijuga* with clusters up to about 3 ft. long.

MISCELLANEOUS

HESPEROYUCCA whipplei. This is our native yucca whose enormous flower spikes lend so much beauty to the foothill region of the southern half of California. Is not long in coming into bloom. Flower spikes often 10 or 12 ft. tall with hundreds of flowers.

CONIFERS

Unless otherwise noted all plants in this section will be balled at prices quoted.

Early Double Pink			
6 to 8 ft.....	1.50	1.25	
3 to 4 ft.....	1.00	.75	

FLOWERING CHERRIES

Campanulata—A magnificent new species from Formosa. Far earlier than any other Cherry and even earlier than any Flowering Peach. Flowers are single, trumpet or bell-shaped and genuinely red. The best novelty in flowering trees in years.

4 to 6 ft.....	2.50	2.00	
3 to 4 ft.....	2.25	1.75	
2 to 3 ft.....	2.00	1.50	

Double Pink—An excellent but unidentified double Japanese variety.

4 to 6 ft.....	2.00	1.50	
3 to 4 ft.....	1.75	1.25	
2 to 3 ft.....	1.50	1.00	

James H. Veitch—(*Prunus serrulata sachalinensis fugenzo*. Synonyms: *Kofugen*, *Benifugen*, *Fugenzo*.) Large, double pink, ruffled petals.

4 to 6 ft.....	2.50	2.00	1.50
3 to 4 ft.....	2.00	1.50	1.25
2 to 3 ft.....	1.50	1.25	
1½ to 2 ft.....	1.25	1.00	

Mt. Fuji—(*Prunus lannesiana sirotae*.: *Shirotae*.) Double white.

4 to 6 ft.....	2.25	1.75	
3 to 4 ft.....	1.75	1.25	
2 to 3 ft.....	1.50	1.00	

Victory—(*Prunus serrulata sachalinensis albo-roseo*. Syn.: *Shirofugen*). Bears both white and pink flowers; extremely large and very double.

4 to 6 ft.....	2.50	2.00	1.50
3 to 4 ft.....	2.00	1.50	1.25
2 to 3 ft.....	1.50	1.25	
1½ to 2 ft.....	1.25	1.00	

Weeping, top grafted

"Park Weeping"—An improvement on the common, old fashioned weeping cherry. Flowers deeper pink; growth better.

4 ft. stems, 1 yr. heads.....	2.00	1.75	
-------------------------------	------	------	--

FLOWERING PEACHES

Assorted varieties as below

6 to 7 ft.....	1.25	1.00	
4 to 6 ft.....	1.00	.80	.75
3 to 4 ft.....	.85	.70	.60
2 to 3 ft.....	.65	.50	

Burbank—double pink.

Double white.

Clara Meyer—double pink

Versicolor—red and pink.

Camelliaflora—double red.

Weeping Flowering Peaches

1 year heads, 3 to 4 ft.....	1.25	1.00	
Double red. Versicolor—red and white.			
2 year heads, 4 to 5 ft.....	1.50	1.25	
2 year heads, 3 to 4 ft.....	1.25	1.00	
2 year heads, 2 to 3 ft.....	1.00	.75	
Double red. Versicolor—red and white.

CRATAEGUS, HAWTHORN			
The 2 year trees offered below are splendid. They were cut back to a uniform height at 1 year and carry beautiful, symmetrical, well developed heads on perfectly straight stems. This stock should bloom next spring. We have never grown or seen better trees of any kind. They will please anyone. The 1 year trees are mainly straight whips.

GENERAL COLLECTIONS OF NAMED VARIETIES OF LILACS

Double:

- CHAS. SARGENT—Violet mauve blended sky blue; enormous flowers and clusters.
 GEORGES BELLAIR—Buds bright carmine, opening to reddish purple; dwarf habit.
 HIPPOLYTE MARINGER—Purplish-mauve; compact flowers; very free.
 JEAN BART—Rosy-violet, buds carmine.
 LA TOUR D'AUVERGNE—Dark lilac, good.
 LEON GAMBETTA—Pink-lilac, early; round, regular imbricated flowers.
 MAXIMOWICZ—Violet-heliotrope, reverse silvery; enormous flowers.
 MISS ELLEN WILLMOTT—Snow white; elegant spikes; fine large flowers.
 ROSEA GRANDIFLORA—Rosy-lilac; fine panicles; early.
 VICTOR LEMOINE—Azure-mauve, fading paler; beautiful large flowers.

Single:

- CHRISTOPHER COLUMBUS—Light lilac, buds purple; very fine and large.
 CONDORCET—Semi-double, bluish mauve; flowers and thyrses large.
 DE MIRIBEL—Dark bluish-violet; long compact panicles; very fine.
 DR. BREITSCHNEIDER—Purple in bud, opening pale pink; late.
 DR. LINDLEY—Brilliant violet-purple, buds red; very beautiful.
 EDMOND BOISSIER—Purple lilac, purplish-carmine buds; flowers large.
 GLOIRE DE LORRAINE—Dark lilac; late.
 LUTECE—Pink; very late.
 MARIE LEGRAYE—White; very early.
 NIGRICANS—Lilac; fine.
 PERLE VON STUTTGART—Pure White.
 SOUV. DE LUDWIG SPAETH—Dark Purple.

NEW VARIETIES—1926 Set

The varieties marked * belong to a new class of Lilac, the "Early Lilacs," a cross between one of the early flowering Lilacs and Syringa Giraldi; this latter Lilac has been recently introduced from China and is remarkable for its flowering a week or two before the other sorts. This cross originated a new race of tall growing Lilacs which expand their flowers before those now known.

*BERRYER—Semi-double; long thyrses of mauve flowers.

*CLAUDE BERNARD—Double or semi-double; bright mauve lilac.

EMILE GENTIL—Double; large imbricated flowers, bright cobalt-blue; a very rare shade among Lilacs.

JEAN MACE—Double; broad, compact panicles, irregular flowers, changing to bluish; an early and very floriferous variety.

*LAMARTINE—Single; large clusters of rosy-mauve flowers; a very strong grower.

MARECHAL LANNES—Double; a most beautiful variety with very large individual flowers; semi-double to double; bluish violet.

*MIRABEAU—Single; mauve, the earliest of all.

*PASCAL—Single; pure lilac; very free.

PRESIDENT FAILLIERES—Double; immense clusters; pale lavender.

PRESIDENT LOUBET—Double; large purple flowers with red buds, a very distinct variety.

*VAUBAN—Double; tender pinkish mauve.

VESTALE—Single; large pure white panicles, perfectly shaped flowers.

NEWEST VARIETIES—1927 Set

Offered for the first time; only one year buds available this season.

Varieties marked * are "Early Lilacs," as described above.

*BUFFON—Single; mauve pink; elegant flowers with reflexed lobes.

*DESCARTES—Single; mauve pink. Exceedingly free blooming.

DIDEROT—Single; claret purple. Flowers large in enormous clusters up to a foot long.

EDITH CAVELL—Double; milk white. Buds tinted deep cream. Handsome clusters with fine individual flowers.

HUGO KOSTER—Single; dark reddish purple, individual flowers large.

*LOUVOIS—Single; violet purple suffused blue. Flowers very large in ample clusters.

MONTAIGNE—Double; pinkish mauve. Very large clusters.

MONT BLANC—Single; pure white. Clusters large, flowers enormous. Possibly the best white to date.

WALDECK-ROUSSEAU—Double; deep violet flowers, borne in long trusses.

ROSES

We grow and handle roses very extensively, both budded and on their own roots.

Our assortment of varieties is one of the most complete in the country including all the old ones that are good and practically everything in American and European.

Everyone interested in or handling roses should have our list. If you have no copy on file write us for LIST 2711 and we will mail it promptly.
