WOOD'S CROP SPECIAL

Giving Timely Information and Prices of Seasonable Seeds

PUBLISHED BY T.W. WOOD & SONS SEEDSMEN RICHMOND VA.

VOL. XXI.

NOVEMBER—DECEMBER EDITION

1926

LEAP'S PROLIFIC WHEAT

Crops like this make wheat profitable. Better seed will produce results.

What to Plant in November

Be sure that you have sufficient acreage put into feed and forage crops this fall. There is no better time than right now to diversify, and the wide awake farmer will use every available piece of land to grow more feed and larger cash grain crops this month.

WHEAT should prove a paying crop, due to the fact that weather conditions in the great western wheat growing section have retarded seeding, and with the reduced acreage that is quite evident we will see wheat bring profitable prices at next harvest.

Cash Grain Crops for Southern Farmers

WHEAT—Indications are that this should prove the most profitable cash crop.

ABRUZZI RYE—Always readily salable at prices on a parity with wheat.

Feed Crops for All Needs

OATS—Grow enough for your requirements.

HAIRY VETCH—Seeded with oats, barley and rye will increase the feeding value of the crop. Vetch is a wonderful soil improver.

BEARDED WINTER BARLEY—A valuable feed crop, with feeding qualities about equal to corn.

WOOD'S GRAIN PASTURE MIXTURE—The quickest growing pasture crop, fine for hogs, sheep and poultry.

RYE—For grazing and winter cover crops.

Make preparations for putting in a permanent pasture next spring. Rye and vetch planted now and turned under in the spring will put your land in fine condition for starting a permanent pasture.

Grasses and clovers can now be sown in the spring that will make a permanent pasture in any section of the Southern States, with a carrying capacity equal to the fine pastures of the North. In addition, the South has the advantage of open seasons, permitting grazing in the winter when it is impossible in the colder latitudes.

Talk with your County Agent or have your State Experiment Station tell you what grasses and clovers have proven best adapted to your locality; and don't hesitate to write us. We are always glad to answer inquiries.

Abruzzi Rye and Seed Wheat

The Best Grain Crops for November Planting

As a cash crop for fall planting these two crops will likely bring better returns than all others. It is most essential that our Southern farmers use every effort towards diversification of crops, and with this in view, we are strongly recommending these two leaders for fall seeding.

Our **Pedigree Abruzzi Rye** is the genuine strain, grown under contract from seed that we furnished last fall. If you intend to grow this crop for grain you cannot afford to take chances on the seed, as the genuine Abruzzi Rye commanded a premium of fifty to seventy-five cents per bushel over the ordinary rye this year, besides the grain yield is materially larger. If you intend to use rye as a cover and grazing crop only, our **Piedmont Winter Rye** will meet your requirements, and can be secured at quite a reduction under the market price of the Abruzzi Rye. We only recommend the **Rosen** and **Western Winter Rye** for use as an economical winter cover crop. The Western Rye is fully two weeks later in maturity than the Abruzzi or Piedmont, and later starting its growth in the spring.

Wood's High-Grade Seed Wheat has been in very good demand this fall, and are of the opinion that farmers are becoming more and more convinced that to obtain larger grain yields that they must resort to the use of better bred and better cleaned wheat for seed purposes. **Wood's Seed Wheat** is selected from the best wheat crops raised in Virginia and cleaned to the highest degree, showing a purity of practically 100% and germination averaging 95%.

We are pleased to state that the very heavy call for Seed Wheat treated with copper carbonate as a preventive against stinking smut has necessitated us putting in a second machine to meet this demand. Our first machine installed has been running to full capacity since its installation. Leading wheat growers are fully convinced that this is the safest method to use as a preventive against smut, and is real crop insurance.

Blue Ribbon Time

Farmers and gardeners in different places write us of the ribbons—and more substantial prizes—they have won at fairs this year on products raised from **WOOD'S SEEDS**. We are glad to see the fairs increasing in numbers and importance, and we take this opportunity of congratulating the successful exhibitors.

The Virginia State Fair this year had a well-filled County Exhibit Building. Prizes were awarded for specimens of products, but there was no prize competition between counties. Decision between them would have been difficult; they were all splendid.

Nansemond County's exhibit called the county poet into service, parts of the exhibit being sandwiched between cards bearing these nuggets of wisdom; they furnish food for thought;

**A fertile, weedless, well-drained soil,
Saves our farmers lots of toil.**

**Soy beans and corn and hay
Keep the mortgages away.**

**Raising these and lots of stock
Keeps the farm from out of hock.**

**Peanuts, cotton and tobacco
Make our bank account a whacker.**

**The sow with all her little pigs
With joy sets us dancing jigs.**

**Farms with "garden sass" replete
Old H. C. L. are bound to beat.**

**Little orchards pruned and sprayed
Give us 'zerves and marmalade.**

**Diversifying money crops
Saves our farmers many flops.**

A Field of Certified Leap's Prolific Wheat Grown in Virginia

Wood's Poultry Foods

The Standard of Quality

Made in Richmond

WOOD'S PAMUNKEY and HOLLYBROOK POULTRY FOODS are all made by us in Richmond, fresh daily, under the supervision of experienced men who have flocks of their own and who know the needs of the poultry raiser. The best of formulas and ingredients are used in making **WOOD'S POULTRY FOODS**, and they are of the best quality and splendidly balanced poultry rations.

Proper feeding is one of the most important factors in egg

production. On poor rations hens will live and even keep in fair health; but well-balanced, palatable feeds are necessary to get good results. The additional cost of a good ration, compared with a poor one, is repaid many times by the extra eggs obtained. Such good rations are **WOOD'S POULTRY FEEDS**. Remember that well-bred hens are veritable egg producing machines when properly fed balanced rations and properly housed and looked after.

More Eggs—More Money With Hollybrook Poultry Foods

This is the month of high priced eggs, and every care should be given to your laying fowls to see that egg production reaches its highest point so as to insure profitable returns.

All culling should be finished by this time and only those pullets and hens kept which have well developed bodies as to size and which carry some surplus of body fat. This means continuous egg production through the winter.

WOOD'S POULTRY FEEDS, properly fed, will certainly insure profitable returns. Feed **PAMUNKEY** or **HOLLYBROOK SCRATCH FOOD** in connection with **PAMUNKEY LAYING MASH** or **HOLLYBROOK LAYING FOOD**. Allow laying

pullets and hens continuous access to these dry mashes and they will quickly turn to laying and make good egg producers.

Proper feeding is one of the most important factors in egg production. Don't experiment with cheap feeds. They never pay. Our poultry feeds are used by some of the largest and most particular poultry raisers in Virginia and the Southern States. **Hollybrook Feeds** certainly get results. Read below what two experienced poultry raisers say.

This is the month for **HOLLYBROOK EGG FORCING FOOD**. The use of this will certainly increase your egg output to a wonderful degree. Write for "Feeds and Needs."

What They Say

Dear Sirs,—I have been using your feed for about a year, and I must say I surely have had good results. I get three times the eggs from the same number of chickens since I have been getting feed from your company.

I can specially recommend **Hollybrook Egg Forcing Food**, also **Hollybrook Laying Food** as the best I ever used for dry mash. **Pamunkey** and **Hollybrook Scratch Foods** are both good. I can highly recommend all your poultry feeds I have used, as my flock is doing so much better in every way—more eggs and more healthy.

Tazewell County, Va.

Very truly yours,

H. U. BABYLON.

Gentlemen,—I have used your **Hollybrook Brand** of Poultry Feeds for some time and can say that they will rank with the best of them.

I do not raise exhibition birds, but breed for high egg production. At our show in November I won first on all entries in the egg laying classes.

Botetourt County, Va.

Very truly yours,

W. G. YORK.

OBERCO (Organic) MINERALS

Mash feeds should contain at least 10% of mineral matter. A good mash feed without a mineral supplement contains about 6 to 7% minerals. It is therefore evident that a mineral should be added to maintain the body structure and to supply the minerals needed to make eggs. The correctly formulated laying mash with **OBERCO** contains more than 10% minerals. **OBERCO** mineral supplements are of organic origin, therefore more digestible than those of inorganic source. Chickens need minerals to strengthen and build bones and tissue and to form feathers and for eggs. All of Wood's mash feeds contain **OBERCO** or mineral supplements, hence their popularity. We strongly recommend all makers of home-made mashes to incorporate **OBERCO** mineral supplement at the rate of 5 pounds of **OBERCO** to a 100 pounds of mash mixtures.

GIANT WHITE NARCISSUS

The Most Satisfactory Winter Blooming House Plant

They will bloom in water from six to eight weeks from time of planting, and are superior to Chinese Lilies or any other Narcissus for growing in water. The flowers are larger, more attractive in color and very fragrant. A very unique and simple way to grow them is to place six or eight bulbs in a shallow bowl with water; support the bulbs with pebbles, and place the bowl in the dark until the roots have started, when they should be brought into the light. Change the water occasionally to keep it pure. Planted in September or October, can be easily brought into flower by Christmas. Each, 15c.; per dozen, \$1.35; per 100, \$10.00, postpaid. Not prepaid, \$1.25 per dozen; \$9.50 per 100.

PAPER WHITE GRANDIFLORA NARCISSUS

These are excellent for growing in water; larger flowers and clusters than the ordinary Paper White. Planted any time in September, they can easily be brought into flower by Christmas. 12c. each; \$1.10 per dozen; \$7.50 per 100, postpaid. Not prepaid, \$1.00 per dozen; \$7.25 per 100.

Giant White Narcissus Growing in Water

CROCUS

One of the earliest blooming spring flowers and very effective in lawns and borders. They show off very prettily when planted in the turf of a lawn. When planted in the lawn, make a small hole about two inches deep with a dibble or sharp-pointed stick, and then cover with a little extra soil. They can be planted in this way without disturbing the appearance of the lawn. After flowering, the cutting of the grass does not injure the bulbs, and they will appear year after year, proving an ever-recurring delight in the early spring. They are also very useful to plant in hyacinth or tulip beds between the rows, thereby giving a succession of early flowers. Set the bulbs two inches deep and two or three inches apart and plant as early in the fall as possible.

Pride of Haarlem—Deep salmon rose..	.07	.65	4.25
Mr. Farncombe Sanders—Brilliant scarlet, white center	.10	.80	5.25
The Sultan—Rich, glossy maroon.....	.07	.65	4.25
White Queen—White tinged pink.....	.08	.65	4.25

Collection, 1 each of above Giant Darwin Tulips 85c., postpaid.

WOOD'S SPECIAL MIXED DARWIN TULIPS—Composed mostly of named sorts; contains a great variety of colors and shapes. 60c. per dozen; \$3.50 per 100, postpaid. Not prepaid, 50c. per dozen; \$3.25 per 100.

DUTCH BREEDER TULIPS

Similar in habit to the Darwins and flower at the same time. They produce immense blooms on long, stiff stems. The colors include many rare among flowers and run principally in the purple, maroon and terra cotta shades. These tulips are very valuable for the garden, producing by their refined colors a most artistic effect. Plant and treat like the Darwins.

The following varieties postpaid, 10c. each; 70c. per dozen; \$5.25 per 100:

Bronze Queen—28 inches. Soft golden bronze, large flower.
Cardinal Manning—28 inches. Wine red, flushed rosy brown.
Janne d'Oeuf—24 inches. Ruddy apricot; inside soft yellow.

The following varieties by mail postpaid, 10c. each; 95c. per dozen; \$6.75 per 100:

General Ney—25 inches. Dull old gold with olive base.
Le Mogol—26 inches. Clear lilac flushed white.

Beautify Your Home

Sow Lawn Grass Now

Nothing will add more to the attractiveness of your home this winter and spring than a beautiful green lawn. With little work and expense this can be obtained by sowing grass seed now.

Pulverize the soil thoroughly, using Swift's Vigoro, a complete lawn fertilizer, at the rate of 25 lbs. per 600 square feet, or 1000 lbs. per acre. Sow Lawn Grass at the rate of one pound for every 300 square feet, or 75 lbs. per acre. You will find a mixture below adapted to your needs.

WOOD'S EVERGREEN LAWN GRASS

A mixture composed of the finest grasses. Well adapted for use in the central and western sections of North Carolina, all of Virginia and the Northern States. With a little care and attention Wood's Evergreen Lawn Grass in these localities will furnish a beautiful green all-year-round lawn. It does not contain any of the coarse grasses, only the best turf grasses being used.

Prices not prepaid: lb. 45c.; 10-lb. lots 49c. lb.; 50-lb. lots 38c. lb.; 100-lb. lots and over 37c. lb.

Prices postpaid: lb. 55c.; 5 lbs. \$2.35; 10 lbs. \$4.35; 25 lbs. \$10.25; 50 lbs. \$20.25.

WOOD'S WINTER LAWN GRASS

A mixture especially adapted for sowing in the Southeastern States. This mixture, under ordinary circumstances, will make a good green appearance in about two weeks—lasting throughout the winter and spring. A valuable grass mixture for Parks, Real Estate Developments, or for use where a quick green effect is desired during the fall, winter and spring months. Wood's Winter Lawn Grass is also adaptable for sowing on Bermuda sods.

Prices not prepaid: lb. 35c.; 10-lb. lots 26c. lb.; 50-lb. lots 24c. lb.; 100-lb. lots and over 23c. lb.

Prices postpaid: lb. 45c.; 5 lbs. \$1.75; 10 lbs. \$2.95; 25 lbs. \$6.85; 50 lbs. \$13.25.

SHADY PARK LAWN GRASS

A special mixture of grasses for growing under trees and in shady places. Sow in same localities as suggested for Evergreen Lawn.

Prices not prepaid: lb. 50c.; 10-lb. lots 45c. lb.; 50-lb. lots 41c. lb.; 100-lb. lots and over 40c. lb.

Prices postpaid: lb. 60c.; 5 lbs. \$2.50; 10 lbs. \$4.65; 25 lbs. \$11.00; 50 lbs. \$21.75.

PERENNIAL RYE GRASS

A fine quick growing lawn grass, much resembling Blue Grass in color. Well adapted for sowing in the Southern States and where a quick green effect is desired. A fine grass for sowing on Bermuda Grass sods.

Prices not prepaid: lb. 15c.; 10-lb. lots, 12c. lb.; 50-lb. lots, 11c. lb.; 100-lb. lots, 10c. lb.

Prices postpaid: 5 lbs. 95c.; 10 lbs. \$1.55; 25 lbs. \$3.60; 50 lbs. \$6.75.

ITALIAN RYE GRASS

Similar in growth to the Perennial Rye Grass. This grass is generally used in the South on lawns, golf courses and large estates. Makes a splendid green appearance during the fall, winter and spring.

Prices not prepaid: lb. 15c.; 10-lb. lots, 12c. lb.; 50-lb. lots, 11c. lb.; 100-lb. lots, 10c. lb.

Prices postpaid: 5 lbs. 95c.; 10 lbs. \$1.55; 25 lbs. \$3.60; 50 lbs. \$6.75.

SWIFT'S VIGORO

—An especially prepared plant food for Lawns, Gardens, Flowers and Shrubbery. Prices: 25-lb. bag, \$1.75; 50-lb. bag, \$3.00; 100-lb. bag, \$5.00.
