Mastodon Everbearing Strawberries

This is the gigantic Strawberry you have doubtless read about the past two years, and wanted to buy, but the price was almost prohibitive. We had a wonderful crop and will share our good luck with you on a limited number. 25 plants, \$1.70; 100 plants, \$5.20; 200 plants, \$9.00, Parcel Post, Postage paid.

YEAR
BOOK

FARINA NURSERY
COMPANY

1927
1928

A Word to Our Friends:

It is with great pleasure that I present to you a copy of our Annual Catalog. First of all we want to extend greetings and best wishes for a prosperous year, and to thank each and every one of our costumers for their patronage during the past years and hope that we may have the pleasure of receiving your valued orders for this year.

Those who may receive a copy of this catalog and who have never purchased nursery stock from us, we ask that you give us a trial order. It has always been our policy to pass on to our customers every saving which the nature and growth of our business has made possible. Personally I have supervised the growing and supplying of nursery stock for over 21 years and many of the trees that make up some of the finest, largest and most profitable orchards in the United States came from under my care and attention.

Did you ever stop to think that:

No matter how valuable your land—no matter how much it cost per acre—

No matter how much you weed, dig, hoe, or cultivate—

No matter how deep you plow, or how much you disc or harrow—

No matter how much the sun shines, or how much it rains, how much you irrigate or water—

No matter how ideal the weather conditions, how much you fertilize or manure—and every one of these things represents real cash money—it is all lost and wasted and the effort is for nothing, if in the first place you don't have the right kind of trees. Good trees cost the least and are the smallest investment you put into any field or garden. It's the smallest initial expense and counts for the most.

Join our campaign for good trees today. All we ask of you is one tree order to let us prove what our trees are, and we will make you a life customer.

If in doubt about varieties to plant, order the number of trees you would like and we will select the varieties adapted to your soil and locality. Just tell us the kind of soil that you have and our service department, which is made up from men who have spent many years testing fruits on most every kind of soil and in almost every climate, will select varieties that will grow and produce for you. Write our service department regarding any question pertaining to the fruit growing business—this service is free—and you may trust us to answer any question to the best of our ability.

We are at your service—working for your interests—we solicit your patronage on a basis of continual endeavor—to enjoy with you the results, knowing that we can and will provide you with the finest stock it is possible to grow.

Yours for growing success,

LINCOLN GRAVES, Proprietor
Farina Nursery Company

Terms, Conditions and General Remarks

We Guarantee Safe Delivery of Every Order or Money Refunded

OUR POSITIVE GUARANTEE—Our trees and plants are first-class in every way; that they are carefully dug and carefully packed in damp material and securely wrapped to insure safe delivery. Our prices compare with other reliable Nurserymen; quality unsurpassed; grown by expert Nurserymen of wide amount of experience; packed by careful and experienced hands; propagated from the best and most productive bearing trees and plants.

TRUE TO NAME—No human caution could be more exacting than ours. If any of Graves' trees prove untrue to name, we will gladly replace the items or refund the purchase price. Obviously, we cannot assume further responsibility than that.

YOU TAKE NO RISK WHEN YOU ORDER NURSERY STOCK FROM US.

ORDER TREES EARLY—Wherever you live it pays to order early. Send in your order just as soon as you know what you want. **OUR METHOD OF SHIPPING** C. O. D., requiring one-fourth cash with order, makes it convenient for you to do this, and we want you to get your trees, plants, etc., and plant them as soon as the weather conditions and the preparation of your land will permit, either fall or spring.

OUR SHIPPING SEASON—Our spring packing usually opens up in February and continues into the month of May. Our fall packing begins about the first of October and lasts all winter, especially to all the Southern States. The planting season is not regulated by any particular month or day, nor by the state of vegetation where the planting is to be done, but by the condition of the trees to be planted. Hence trees can be sent with safety from here to localities several degrees south, even if they do not arrive until the ordinary transplanting season in that locality is passed.

BUSINESS TERMS AND SUGGESTIONS

We sell direct to the planters, cutting out the middleman's profits. Buy direct from the growers, save rehandling, delays, inferior stock, poor grade and unsatisfaction in many other ways.

CORRESPONDENCE SOLICITED—We give every inquiry prompt attention. We ask that each inquiry be made as brief and clear as possible.

ORDER EARLY—Please write orders on **order sheet accompanying this catalog**. Be sure to sign your name. As far as possible orders are handled here as they are received, specially selected and reserved in customer's name for shipment at the proper time.

IMPORTANT—Please advise when ordering if you wish goods shipped by Express or by Parcel Post, giving your express office in every instance. While we exercise the greatest care to have everything true to name and descriptions, and hold ourselves prepared to replace on proper proof all that proves untrue, we do not give any warranty, expressed or implied.

LOCATION—We are located on the Great Illinois Central R. R., running north and south, connecting with all the great trunk lines running east and west, thus giving quick service.

REMITTANCE—Remittance should accompany the order; but we will book the order if one-fourth of the amount is sent and the balance may be sent before time to make shipment, unless ordered balance C. O. D.

REMITTANCE may be made in any way most convenient to our customers, by Check, Money Order, Express Order, Draft or Currency.

OUR PRICES

We have seen the rise and fall of many Nurseries, both locally and nationally, in our long experience. Cheap Johns have sold trees cheap and they have wound up cheap in the bankruptcy courts. While it is true that sometimes planters have obtained exceptionally fine trees from these low-priced concerns, the vast majority of their patrons suffered severe disappointment and loss of money in the long run because the trees were inferior or not true to name. Business prudence and your best interest insist that you deal with a Nursery firm that is permanently established, that is not here today and gone tomorrow, and to do this you must be willing to pay a fair price for the stock.

When you consider the fact that we prepay the Express on all orders of **\$25.00** or more and guarantee safe delivery, you will agree with us that the prices quoted in this catalog are rock-bottom for high quality stock. We challenge any competitor to furnish trees like ours for less money. Remember, also, that we include enough stock free to more than pay the express on each and every order amounting to **\$5.00** or more.

APPLES

FOR THE TEMPERATE ZONE there is no fruit so important as the apple. There are so many varieties that every taste can be satisfied, and the different kinds vary in time of ripening almost the entire year.

EVERY LANDOWNER should plant at least some apple trees; the blossoms alone would more than repay for the trouble, even the shade it might afford. The landscape effect they give to a homestead is invaluable, no real homestead could be complete in appointment without its orchard; it's the one dear spot in the memory of everyone reared on a farm that has its orchard. Still some people neglect such an important feature in laying out their home grounds. And with all these benefits you may have apples fresh from the tree at your pleasure with a flavor that cannot be had in ones from a distant market. Could there be greater inducements for planting an orchard?

SOME ARE AT A LOSS to know what kinds to plant. Some kinds do better on certain soils and locations and one must study orchards in the neighborhood in which he lives to find what kinds succeed best. But after all, one's taste is the main consideration in making selections from our list, as every variety is well and favorably known in the corn belt and will do fairly well in any part of it.

IN MAKING SELECTION for an orchard one must not choose too many summer and fall varieties, as they do not last long in a fresh condition and are soon gone, although the trees are usually good bearers. One should select mostly late fall and winter varieties. The reason for selecting a number of kinds is that some varieties are at their best in early winter and some mid-season, while others are not good eating until March or April. A selection should be made so as to have kinds that will give ripe fruit in succession during the entire year, beginning with the early-maturing kinds and ending with the very late keepers.

The fear that there will be long years of waiting before one can gather apples is an old bogey that is easily overcome by planting around your home a few of our beautiful, early-to-bear, large, strong, bearing-age Apple Trees.

Jonathan

Special Wholesale Prices from the Growers to Planters

Prices of all varieties, 2-year-old trees:

First Class	Each	10	25	100
3 to 4 feet.....	\$0.35	\$3.25	\$7.00	\$26.00
4 to 5 feet.....	.50	4.50	11.00	40.00
5 to 7 feet.....	.75	6.75	15.75	53.00

Price of all varieties, one-year-old trees:

First Class	Each	10	25	100
1 to 2 feet, Whips.....	\$0.20	\$1.80	\$3.40	\$12.00
2 to 3 feet.....	.24	2.10	4.25	16.00
3 to 4 feet.....	.30	2.50	6.00	20.00

Our 5 to 6-foot trees are heavy select specimens well branched and extra well rooted trees.

Add 3 cents for each one-year-old apple and 5 cents for each 2-year-old apple, if wanted by mail.

Baby Apple Grafts—Whole-Root

No orders accepted for Baby Apple Grafts after April 15th. Special prices on Graves' Whole-Root Grafts, all varieties: **Per 25, \$2.50; per 100, \$9.00; per 1,000, \$60.00.** Orders for 100 or more sent parcel post, prepaid. If set early and properly cared for you can grow those Baby Apple Grafts into 4 to 6 foot trees by fall.

SPECIMEN TREES—If you have room for only a few trees, don't wait years for results. Plant a bearing apple tree that has already produced fruit in the nursery. Jonathan, Delicious, Mammoth Black Twig, Banana, Winesap and York. **5 to 8 feet, time-saving, bearing apple trees, 3 and 4 years old, \$3.00 each; 10, \$25.00.**

SUMMER VARIETIES

LIVELAND RASPBERRY—Extra early; skin of a blush or pinkish-red; flesh white as snow, tender, fine-grained, juicy, mild and just the right degree of hardness. Thrifty and abundant bearer, beginning to bear the third year.

YELLOW TRANSPARENT—An upright, vigorous grower; very productive and hardy. Fruit medium sized; skin pale yellow; flesh tender and juicy. Good cooker; brings top prices.

EARLY HARVEST—Large pale yellow; tender; with a fine flavor. A good grower and a heavy bearer. Ripens early.

EARLY FALL VARIETIES

MAIDEN BLUSH—Large, flat, pale yellow, beautiful blush. Mild.

RAMBO—Medium sized, greenish yellow, striped with carmine.

WEALTHY—Vigorous and productive. Fruit large size, red streaked with white. Quality good.

LATE FALL AND WINTER VARIETIES

BALDWIN—Large, roundish, dark, bright red, juicy, sub-acid. Good flavor and a good cooker. Tree vigorous and upright. An old standard, but a good variety.

WINTER BANANA—Fruit large sized, perfect golden-yellow. Flesh lemon-yellow. Fine-grained, sub-acid, rich aromatic flavor.

DELICIOUS—Large, with surface almost covered with a most brilliant dark red, blending to a golden-yellow. Extremely hardy, rapid grower, coming into bearing soon.

GRIMES GOLDEN—Rich golden color; flesh yellow, very firm. Crisp, but tender, rich, aromatic and juicy.

JONATHAN—One of our earliest and best bearers. Brings fanciest prices. Many times this variety bears in the nursery row. Extra long-life tree. Fruit a brilliant glossy red, with spicy rich acid, which has made it a great favorite with all lovers of deliciously-flavored apples. Succeeds everywhere. A firm apple, crisp, tender and juicy. Jonathan is a great commercial apple and a splendid family sort, and for many years Jonathan has been the standard of quality by which other sorts have been gauged. We can not recommend Jonathan too highly. Your orchard is not complete without Jonathan.

THE NEW CORTLAND APPLE

The fruit of the Cortland is as large or larger than that of McIntosh; round to somewhat conical in shape. In color it is a bright red blushed with a darker red splashed and striped with carmine and more or less overlaid with a purplish bloom. The flesh is white, often with a pinkish tinge, fine, crisp, tender, juicy, sub-acid and aromatic. The trees are large, vigorous, upright-spreading, very hardy, productive and healthy. Flowers bloom in mid-season. Fruits about three weeks later than McIntosh. An early bearer. In our nurseries this year, two-year-old Cortland trees produced 2 and 3 good specimens per tree!

PRICES OF CORTLAND APPLE TREES

Age	Height	Each	10	100
Two years old.....	5 to 7 feet.....	\$1.25	\$10.00	\$80.00
Two years old.....	4 to 5 feet.....	.95	7.00	60.00
Two years old.....	3 to 4 feet.....	.85	6.00	50.00
One year old.....	3 to 4 feet.....	.95	7.00	60.00

PARCEL POST SIZE. First class 3-foot trees can be sent parcel post, 25 trees \$14.98, postage paid.

APPLES, LATE FALL AND WINTER VARIETIES—Continued

ROME BEAUTY—Large, roundish, oblong, handsomely colored, being striped with red. Ripens in November, and keeps until April and May.

STAYMAN'S WINESAP—Fruit large in size. Yellowish striped and splashed with dull red, and with a firm, crisp, yellow flesh. Mild, sub-acid in flavor. Good quality coming into bearing about the fourth year and is a reliable, annual cropper, in season from December until May.

YORK IMPERIAL or Johnson's Late Keeper—Medium, whitish shaded with crimson. Firm, rich, juicy, pleasant, mild. Sub-acid, vigorous and productive.

WINESAP—Well-known variety and one of the leading export apples. Fruit medium large; skin thick and very tough, almost entirely covered with dark red. Flesh yellow, fine-grained, firm, rich, crisp, sprightly, sub-acid. Quality excellent.

MAMMOTH BLACK TWIG—Supposed to be a seedling of the Winesap. Tree a better grower and fruit much larger, or in other words, an improved Winesap. Tree an upright, spreading grower. Long keeper.

GANO—This apple was introduced to the public in 1886. Tree very hardy. It bears very young. Fruit bright red on yellowish ground; no stripes. Large, oblong, tapering to the eye. Surface smooth, taking a very high polish, making it valuable as a stand fruit. Flesh white. An annual early prolific bearer.

WILLOW TWIG—Latest winter. A large apple, pale green, mottled striped and blushed with lively red. Will KEEP TILL APPLES COME AGAIN. In sections of Missouri and Illinois and a few other favored localities it is profitable, but for general planting we do not recommend it, as it is a poor grower.

Mammoth Black Twig

CRAB APPLES

Prices same as for Standard Apples

HYSLOP—Large, roundish-ovate; dark red with blue bloom; flesh yellowish.

KINDLY WRITE TO US REGARDING VARIETIES NOT LISTED, AS SPACE WILL NOT PERMIT FURTHER DESCRIPTION.

\$3.00

CASH PLAN SAVES YOU 20 PER CENT MORE

Selling for cash only, enables us to pass certain savings on to our customers—to you. We lose no money from unpaid accounts. Nurseries who extend credit are fortunate if they collect 80 per cent of the money due them for trees sold. They must overcome this loss by adding 20 per cent to their price. Our cash prices permit you to keep this 20 per cent in your own pocket. This, together with the agents' commission, means a saving to you of 50 cents on every dollar.

We have grown to our present magnitude, not because of what we have said about ourselves, but because of what we have done for our customers. The complete satisfaction of our thousands of customers justifies you in placing complete confidence in Graves Nursery Company.

We grow only the best nursery stock in ways that lifetime experience has taught. We select from our own grown stock only the strongest, hardiest, and best-rooted. Extreme carefulness guides us in grading and tagging varieties. We try to make no mistakes, and we rarely do.

The treatment you receive from us will be what we would expect from you under the same conditions. That is the test of everything we do—and your protection.

We prepay the Express to any railroad point in the United States on orders amounting to \$25.00 (net), or more, when cash to the full amount is sent with the order.

DIAMOND KING PEACHES AGAIN TOP THE MARKET!

O. E. BALDWIN & CO.

ESTABLISHED 1900

PHONES: CANEL 4955-4956

WHOLESALE RECEIVERS, JOBBERS AND SHIPPERS

FRUITS, VEGETABLES AND PRODUCE

91 SOUTH WATER MARKET
CHICAGO

TO WHOM IT MAY CONCERN:

After thinking over the Peach Crop of last year, have come to the conclusion that the best peach we handled was the DIAMOND KING.

It was the best in color, best in size and the best carrier.

We recommend you to plant all DIAMOND KINGS. We can handle 10 cars per day at a good, big price.

Yours respectfully,
O. E. BALDWIN & CO.,
By J. E. B.

Diamond King Peach is, in our opinion, finest Peach in the world

Gentlemen—The 400 Diamond Kings I purchased three years ago bore a good many peaches last year (second year after planted). This season I sold over \$2,000 worth of fruit from the four acres. They are much larger than the Elberta or Hale, better flavored, sell for more money, bear younger than any other peach I know of. We have Diamond King peaches when the other varieties fail. \$1,000 per acre would not buy my Diamond King Orchard.—WILLARD SULLENS, Alma, Ill.

PEACHES

This wonderfully delicious fruit can be grown almost as far north as the apple and will succeed farther south. If properly selected varieties as to time of ripening are planted from year to year, every home can have the great luxury of home-grown peaches for a season of three months. They are easily grown and bear in two or three years. Plant more of the midseason varieties.

WHOLESALE PRICE OF FIRST CLASS PEACH TREES

	Each	10	25	100
1 to 2 feet.....	\$0.18	\$1.70	\$4.00	\$13.50
2 to 3 feet.....	.25	2.00	4.50	16.00
3 to 4 feet.....	.30	2.50	5.50	20.00
4 to 7 feet.....	.45	4.00	7.75	25.00

PRICE OF DIAMOND KING

	Each	10	25	100
2 to 3 feet.....	\$0.50	\$4.00	\$8.75	\$30.00
3 to 4 feet.....	.75	6.50	13.75	40.00
4 to 5 feet.....	1.00	8.50	18.75	60.00
5 to 7 feet.....	1.25	11.00	23.75	80.00

If the two smaller sized Peach trees are wanted by mail add 3c each for postage.

SPECIMEN TREES—Special select, bearing size Diamond King, for immediate results. Well branched and well rooted. Fruit highly flavored, well colored, good shipper, bears when others fail, longer lived. 6 to 8-foot trees, \$2.50; 10, \$22.50; 100, \$200.00.

LISTED IN ORDER OF RIPENING

RED BIRD IMPROVED—Earliest white cling. Gloriously red all over. A sensation of all early markets. Large as Elbertas, strikingly handsome, and the first big blood-red peach ready for market. Nearly twice the size of other peaches of same season. Fruit bright glowing red on the background of creamy-white. Flesh unlike other extremely early sorts, is firm, like Heath Cling—making it an ideal shipper; rots very little. Tree extremely hardy, strong grower. Regular bearer, often bears big crops when other hardy sorts fail; bears heavy crop at an early maturity. Have sold on the market as high as \$6.75 per bushel, and making a wonderful record, selling for \$4.00 to \$6.00 by carload. Ripe 45 days before Elberta.

EARLY ELBERTA—Freestone, mid-season, of the Elberta type. Large golden-yellow flesh, far better in quality than the Elberta, sweeter and finer grained. Tree strong grower, has tendency to thin itself like Elberta, carrying moderate loads of fruit.

ROCHESTER PEACH—Beautiful golden-yellow and red peach of immense size, solid and heavy; very highly flavored, juicy and delicious, far sweeter than Crawford. Exceptionally hardy, more productive than Elberta and usually bears the second year after planting.

CRAWFORD'S EARLY—This is a magnificent large yellow freestone peach. Good quality, and a beauty which makes it one of the most popular orchard varieties. August.

BELLE OF GEORGIA—A very large, white fleshed peach with a red cheek; firm, juicy and of excellent flavor. Productive. A fine shipper and does well in the North as well as in the South. Rapid grower. August.

ELBERTA—See front cover for full color illustration. One of the greatest peaches grown. Freestone. A beautiful extra large golden-yellow peach with a brilliant red cheek, firm, juicy, highly flavored, rich and sweet. It is the standard of market sorts.

DIAMOND KING—Ripens last of August to September 1st, with a beautiful red cheek that resembles the Elberta but much larger in size, better flavored and a better shipper; freestone. Bears young, making it an excellent market peach when the prices are at the top.

J. H. HALE—Color deep golden-yellow, overlaid with bright carmine. Skin is thick, smooth, and little fuzz. Flesh is deep yellow, fine grained, firm, tender and of a very delicious flavor. Flesh is firm and heavy and will ship and keep well. August-September.

CRAWFORD'S LATE—This peach is similar to the Crawford's Early, but ripens two or three weeks later.

HEATH'S CLING—The most satisfactory large, clingstone peach known. Very large, creamy white with rich blush. Good keeper and shipper.

KRUMMEL OCTOBER—Latest yellow freestone. Gloriously red and gold—handsomest, best of all late peaches. Of great size, almost covered with carmine cheeks. Ripens 40 days after Elberta.

"ALL SEASON" PEACH COLLECTION

SPECIMEN TREES. 6 to 8 feet, time-saving, bearing-age Pear trees.
\$3.50 each; 10, \$30.00.

BOSC PEAR—The king of pears. After fruiting it many years we find it to be one of the most perfect pears grown. Extra large size, beautiful shape and color; sweet and very delicious; keeps and ships well; heavy yielder.

LINCOLN PEAR—One of the greatest pears ever introduced; blight-proof, large size, fine quality, heavy cropper; tree hardy, healthy and enormously productive. Best for eating fresh.

ANJOU—This is one of the best general purpose pears, combining a high quality with hardness and dependability. Fruit is large, yellow with a chunky neck.

BARTLETT—Large, yellow, waxy skin, rich, juicy, highly perfumed, refreshing.

CLAPP'S FAVORITE—High quality, an early ripener; large size; tree productive.

DUCHESS—Buttery, rich, juicy, excellent; greenish-yellow splashed with russet; succeeds well as a standard, but grown as a dwarf it does better.

SECKEL—Small, rich, yellowish-brown with bright red cheek, juicy, buttery and melting.

Bartlett Pear

CHOICE PLUMS

	Each	10	25	100
First Class, 2 to 3 feet.....	\$0.35	\$3.15	\$7.50	\$26.25
First Class, 3 to 4 feet.....	.45	4.05	8.90	36.75
First Class, 4 to 5 feet.....	.60	5.40	12.90	45.00
First Class, 5 to 7 feet.....	.85	7.65	18.15	63.75

SPECIMEN TREES. 5 to 8 feet, time-saving, bearing-age Plum trees. \$3.00 each; 10, \$25.00.

Plums have a distinctive flavor from any other fruit and are especially fine for eating fresh, for jellies, preserves and unexcelled for canning for desserts. Plum trees require no more care than the pear or peach and thrive well under ordinary conditions; however, they do best in a cool, not too dry a place and in good rich soil.

EUROPEAN VARIETIES

LOMBARD—Medium, violet-red, juicy, good, hardy and productive. The leading market variety. August.

MONARCH—Tree robust, dense foliage and abundant bearer. Fruit very large, roundish oval, dark purplish bloom. Perfect freestone. Follows Grand Duke in ripening. October.

SHIPPER'S PRIDE—Large, dark purple, very showy. Often measuring two inches in diameter. Fine, juicy and sweet. September.

SHROPSHIRE DAMSON—Medium, dark purple. Very productive. Best for preserving. October.

JAPANESE VARIETIES

ABUNDANCE—One of the oldest and best Japanese varieties. Hardy, productive. Fruit large, lemon-yellow with heavy bloom, good quality. August.

BURBANK—Most profitable among the growers for market. Ripens from 10 to 14 days after Abundance. Tree hardy, spreading, vigorous grower. Unequaled in productiveness. Bears young. Fruit large, excellent quality, cherry-red with lilac bloom. August.

RED JUNE—One of the vigorous, upright growers, productive, good size, vermilion-red. Pleasant quality. Ripens a week before Abundance. August.

Burbank Plum

SPECIAL NOTICE

If you are in the market for a quantity lot of Nursery Stock, send us a list of your wants so we can make you a real money-saving price.

Remember, we will meet all competitive prices of any reliable nursery for stock of the same high quality as our own.

SELECT CHERRIES

There are few more desirable fruit trees than the Cherry. It is notably hardy and quite adaptable to different soils and climates. It grows under neglect better than any other fruit tree and can be planted along the street, on the lawn, along fences, avenues, in corners and in many places where other fruits would not be profitable.

	Each	to	25	100
2 to 3 feet.....	\$0.51	\$4.55	\$11.00	\$36.00
3 to 4 feet.....	.59	5.55	11.90	46.00
4 to 5 feet.....	.74	6.75	14.75	57.00
5 to 7 feet.....	1.00	9.00	21.00	80.00

You remember, of course, the big, rich, juicy cherries for which you climbed the tree when a boy. Why deprive the children and yourself of the same pleasure today? You can have all the rich, juicy cherries you want, and have them quick, if you will plant some of our magnificent bearing age cherry trees which we offer in the following varieties:

SPECIMEN TREES—We have a limited number of fine, healthy bearing age, magnificent Early Richmond and Montmorency Cherry trees, well branched and rooted. 6 to 8 feet, each, \$3.50; 10, \$30.00. Remember, the cherry made the pie famous.

BING—One of the best known and most popular dark sweet cherries; ripening in June.

BLACK TARTARIAN—Purplish-black fruit of mild, sweet, jelly-like consistency. July.

EARLY RICHMOND or MAY—An exceedingly productive and reliable old variety with dark red fruit, of medium size and acid flavor. Unsurpassed for canning or cooking. Tree very hardy and freer from disease than most other varieties. Sour.

GOVERNOR WOOD—Rich and delicious variety, fine large yellow fruit, with red on sunny side. Sweet. June.

LARGE MONTMORENCY—Larger and finer than the Early Richmond and one of the finest flavored cherries in this class. Ripens late in June.

MAY DUKE—Large, dark red, sub-acid; rich. A superior and productive old sort. Middle of June.

May Duke Cherries

APRICOTS

	Each	3 trees
1-year-old.....	\$0.90	\$2.25
2-year-old.....	1.25	3.25
3-year-old.....	1.50	4.00

MOORPARK—This is one of the largest of Apricots. Orange yellow, with numerous specks and dots. The flesh is yellow, sweet, juicy and rich. Tree is somewhat tender and the fruit is inclined to ripen unevenly, thus lengthening its season. August.

SUPERB—Medium, roundish oval, light salmon with numerous red or russet dots. Flesh yellow, firm, sub-acid and good. Tree hardy. Middle of July.

PERSIMMONS

Same price as Apricot.

AMERICAN—Ornamental with a round topped head, handsome foliage. The puckery fruit is an inch or more in diameter, orange yellow, with a bright cheek when touched by frost, which is necessary to ripen it.

JAPAN—Fruit large, often measuring 2½ inches in diameter; skin light buffish yellow; flesh dark brown, crisp, sweet and meaty. Good while still hard.

PAWPAWS

or Northern Banana. Same price as Apricot.

PAWPAWS—The poor man's fruit, and is well worth a place on every ground, as the pawpaw thrives well in thin or poor land. Has large early flowers, distinctly novel in appearance and effective on the lawn. Fruit large, oblong, pulpy, aromatic and much relished by some people.

MULBERRIES

Same price as Apricot.

Valuable for shade and ornamental purposes as well as for the fruit; also for hedge and posts, being rapid in growth.

DOWNING'S EVERBEARING—A fine rapid growing tree; attractive for lawns and bears large and delicious fruit for three months.

NEW AMERICAN—Fruit large, jet black, of the finest quality. Tree vigorous; a good bearer and highly ornamental for the lawn.

QUINCES

Same price as Apricot.

CHAMPION—Flesh cooks tender like an apple without hard spots. Flavor delicate; bears abundantly.

MEECHES PROLIFIC—Very large, bright, yellow. Quality good. Of great beauty and delightfully fragrant. Bears early.

ORANGE—An old standard variety. Large, roundish, somewhat irregular with short neck at base. Fine golden yellow flesh, excellent flavor. October.

SPECIAL OFFER

2 Apricots—2 Quince—2 Pawpaws—2 Persimmons
—2 Mulberries

10 Trees in all! Large, Strong, Sturdy Trees, 3 years old.

10 Large Trees—A \$15.00 Value, all for **\$10.98**

NUT TREES

The growing demand for nuts and the immense quantities imported annually is giving an impetus to the planting of nut-bearing trees in America. Many farms contain land that would be far better planted to nut trees than in anything else, and would pay better than farm crops, besides annually growing more valuable as timber. In planting ordinary nut trees we would advise planting the smaller size stock—say one or two-year seedlings—for best results.

FILBERT (Hazelnut)—Easiest of culture, growing 6 to 8 feet, hardy; profitable and satisfactory nuts to grow, succeeding in all kinds of soil, bearing early and abundantly. Nuts nearly round, rich and of excellent flavor. 2 to 3 feet, 75c each.

HICKORY (Shellbark)—White and shell thinner than any other. Also valuable for its timber. 2 to 3 feet, \$1.50 each; 3 to 4 feet, \$2.50 each; 4 to 5 feet, \$3.50 each.

CHESTNUT (Japan or Giant)—A dwarf grower. Very distinct from other kinds, the leaf being long and narrow, of a dark green color. A fine ornamental tree in any situation. Commences bearing very young; two-year trees in nursery row frequently produce nuts. Nuts are of good size. The productiveness, early bearing and enormous size render these of great value. 2 to 3 feet, each, \$1.00; 3 to 4 feet, each, \$1.50; 10, \$12.00.

CHESTNUT (American Sweet)—A valuable native tree, both useful and ornamental; timber very durable and possesses a fine grain for oil finish. Nuts sweet and of delicate flavor, and a valuable article of commerce. No farm should be without a grove of these where the soil is adapted to their growth. 2 to 3 feet, each, \$1.00; 4 to 5 feet, each, \$1.50; 10, \$12.00. 5 to 6 feet, each, \$2.50; per 10, \$20.00.

WALNUT (American Black)—The large, oily nuts are borne in heavy crops. They are much relished and always bring a fair price in market. The tree grows quite fast; its wood is exceedingly valuable.

Hubbard (Delicious)	.40	3.25	28.00	.50	4.50	30.00	.75	6.25	41.70

There is scarcely a yard so small in the country or city that from one to a dozen grape vines cannot be grown. The fruit can be put to many uses. Grapes thrive and produce well on poor land as well as the rich.

MOORE'S EARLY—Black. Bunch large and berry very large; equal to Concord in productiveness and quality but sweeter. 10 days earlier than Concord.

DELAWARE—Red. A very delicious little red table grape. Very highly prized because of its fine flavor. Hardy and productive. The standard of excellence.

CONCORD—Black. The most extensively planted and generally successful grape in America. Bunch and berry large, fair quality, medium early. Rank grower, healthy, hardy and productive.

NIAGARA—White. The most popular white grape in existence. Fruit large and very productive. A good grower, ripening same season as Concord; equally good.

CAMPBELL'S EARLY—Handsome. Black berries, with purple bloom; bunch large, double shouldered and compact. Flesh is sweet to the center. Skin tough and a good shipper. Early.

WORDEN—Black. This excellent grape is as hardy, healthy and vigorous as Concord, better quality, sweeter, and larger in bunch and berry. Several days earlier. A very glossy grape.

HUBBARD—The famous table grape. The finest early black yet produced. Sweet, rich and delicate. Ripens 10 days before Concord, and is so rich in sugar can be eaten ten days before it is fully ripe. We consider Hubbard the best grape for table, jellies, canning, preserving and grape juice. In great demand by all grape growers everywhere.

CACO (Red)—This new red grape has the most delicious flavor and is of the highest quality of any grape that we have ever tested. It is one of the earliest grapes in ripening. It has a peculiar characteristic not common to other grapes in that, on account of its being so rich in sugar and excellent in flavor, it can be eaten with enjoyment fully two weeks in advance of its being fully ripe. In appearance, it is the most beautiful of hardy grapes, wine-red in color with abundant bloom. The berries are unusually large, bunches of good size, compact and of good form. The vines are very strong, vigorous growers, hardy, healthy and prolific. This variety is a cross of the two well-known grapes, Catawba and Concord, and is said by expert grape-growers to have all the good qualities of both these varieties without the defects of either. Ripens here early in September. See illustration.

Prices of Extra Size Two-Year-Old Caco Grape Vines—75c each; 10 for \$6.50. Medium size by parcel post, 75c each; 10 for \$7.00; postpaid. One-Year-Old Vines 38c each; 10 for \$3.00; 100 for \$27.00.

UNITED STATES DEPARTMENT OF AGRICULTURE ADVISES YOU TO BUY DIRECT FROM NURSERY

This is what they say: "If the farmer makes his purchases direct from the nurseryman, he will save the expense of the agent and is less liable to mistakes and injury that may occur through repeated handling."—United States Department of Agriculture, Farmers' Bulletin Number 113.

BEARING-AGE FRUIT TREES

If you want fresh, juicy fruit and want it now, and in sufficient quantities to include it on the family bill-of-fare, plant some of our magnificent bearing-age fruit trees which we are offering to our patrons this spring and fall. These trees are really an horticultural achievement.

Each tree has been grown, cultivated and pruned for a specimen. All of the trees run from six to eight feet in height, are symmetrically branched, heavily rooted—trees that will save you seasons of waiting for fruit of delicious flavor.

THE DIAMOND KING PEACH

The original tree lived to the ripe old age of thirty years. Its fruit was of the finest quality and best flavored; in our opinion, the finest peach in the world. It is equally good fresh or canned. In appearance, a large yellow and red peach containing a very small stone. Some specimens measured over 12 inches in circumference, and weighed over 12 ounces. The tree is a splendid, strong, upright grower, and has stood sixteen below zero and produced fruit, while many other varieties were killed, bud and branch.

BABY CHICKS FREE

Special Bargain Collections on orders sent in within ten days

Collection No. 1 FREE—25 BABY CHICKS

Free, on all orders for 50 Apple or 50 Peach, or 100 of either. Double order and receive 60 Baby Chicks, free. Limited to 5 to 7-foot trees, only.

Collection No. 2 FREE—40 BABY CHICKS

Free on all orders for 100 Cherry, Pear or Plum trees, or combined order of these varieties, totaling 100 trees. Double this order and receive 100 Baby Chicks, free. Offer limited to 5 to 7-foot trees, only.

Collection No. 3 FREE—100 BABY CHICKS

Free, with all orders for 25 specimen, Bearing-age Apple, Cherry, Pear or Plum trees, or combined order of these varieties, totaling 25 trees.

Customer to pay freight or express on these 3 Special Bargain Collections and mail us the names of ten neighbors who are likely to be interested in buying Nursery Stock and who are property owners.

Latham Raspberries

RASPBERRIES

	One-Year-Old Plants			Larger, Bearing Grade

Cumberland, Black	1.00	1.80	3.60	1.50	2.70	5.40

RED VARIETIES

CUTHBERT—Strong, hardy variety. Flavor is rich, sweet and luscious; berries large. Plant only in rich soil.

COLUMBIAN—Berry is firm, adheres to the bush and retains its shape. Strong grower.

KING—Early; has large, red, attractive fruit of good flavor; ripen with the earliest and is firm enough to ship nicely.

LATHAM—Conceded to be the best Red Raspberry now grown. Latham is extremely hardy, withstanding the winters in Canada without covering. Vigorous in growth, producing strong canes, able to carry heavy crops. Growers are just beginning to realize that nothing will make them so much money so surely and quickly as the Latham Raspberry. One nine-acre field of Latham four miles west of Minneapolis produced an average of \$1,000.00 per acre for each year for 5 years.

EVERBEARING

ST. REGIS—Does well upon all soils, whether light, sandy or heavy clay. In growth it is strong and stocky with a healthy dark-green foliage. Plants set in early spring will give a small crop of fruit the fall following. About the middle of August it commences to set fruit on the young canes and bears continuously until frost, during a favorable growing season. The berries are large, beautiful and attractive, bright crimson, rich, sugary, with the wild raspberry flavor so much desired.

BLACKCAP VARIETIES

CUMBERLAND—Mammoth midseason blackcap that loads it stout, stocky canes. Must have extra good care.

KANSAS—Strong grower; fruit jet black; splendid yielder.

CHOICE BLACKBERRIES

One-Year-Old 2-Year-Old Transplants

	Doz.	100	Doz.	100
Eldorado, 1st class	\$0.70	\$2.90	\$1.40	\$5.80
Blowers, 1st class	.70	2.90	1.40	5.80
Early Harvest, 1st class	.95	4.40	1.90	8.80
Mersereau, 1st class	.70	3.90	1.40	7.80
Snyder, 1st class	.95	4.50	1.90	9.00

ELDORADO—Large berry of finest flavor and jet black color.

BLOWERS—One of the leading and most profitable varieties. Extremely hardy and a very strong grower. Good canner.

MERSEREAU—Early producer and by far the most profitable variety. Hardy enough to stand our winters without protection.

SNYDER—Medium size, sweet, melting, juicy, with no hard core.

EARLY HARVEST—One of the best early varieties. Hardy.

DEWBERRIES

OR CLIMBING BLACKBERRY

Plant the same as Blackberry but should be trellised or staked for the best results.

LUCRETIA—The very best of the climbing blackberry family. Far larger and better than any black. Ripens early. 75c dozen; 100, \$3.00.

TREES OR PLANTS TO THE ACRE

Varieties marked (Per.) are perfect blooming and those marked (Imp.) are imperfect blooming varieties.

AROMA—Large berries, roundish, conical; rarely misshaped. Excellent quality. Late.

BIG JOE (Joe Johnson)—One of the most popular shipping berries. Large, bright red. The quality is good and berries firm.

GANDY—Old standby, very popular. Good shipper. Perfect in shape and form.

COOPER—The largest and best ever introduced. Plants very large and produce six to eight fruit stems to a plant.

SENATOR DUNLAP—Midseason. Greatest all-around berry ever introduced. Heavy cropper.

MASTODON—Berries average very large. See illustration on front cover. Plants robust and thrifty, begin bearing in July. We have seen Mastodon Berries so large they would not go through the top of a quart milk bottle.

Aroma Strawberries

GOOSEBERRIES

	Each	Doz.
First Class, 1-year.....	\$0.25	\$2.25
First Class, 2-year.....	.35	3.25

DOWNING—Large, pale green, of splendid quality for both cooking and table use. Skin smooth.

HOUGHTON—Small to medium, roundish, oval, pale red, sweet, tender, very good. Plant is spreading and productive.

Downing Gooseberries

SELECT CURRANTS

	Each	Doz.
1-year.....	\$0.20	\$2.00
2-year.....	.30	3.00
3-year.....	.40	4.00

CHAMPION—The best black currant; a variety from England, now well tested in this country and pronounced good everywhere.

FAY'S PROLIFIC—Leading red market variety; extra large.

LONDON MARKET—Extremely hardy, vigorous and retains its foliage throughout the season. Red color fruit, large in size.

RHUBARB

A deep rich soil is indispensable to insure large, heavy stalks. Plant in rows 4 feet apart and 3 feet apart in the row. Set so that the crowns are about 1 inch below the surface. Top dress in the fall with stable manure and work well into soil in early spring.

1-year, 15c each; \$1.50 per dozen; \$3.00 per 100. 2-year, 25c each; \$2.50 per dozen.

LINNAEUS—Large, early, tender, fine old reliable pie kind. Stalks are a decided pink color and delicious for canning, cooking or pies. A strong grower.

ASPARAGUS

For those who enjoy the delicious, creamy taste of asparagus, which can be so easily grown and requires such a small amount of care compared with the enormous production of tender sprouts, we are listing the three most desirable varieties.

1-year, per doz., 35c; per 100, \$1.40; 2-year, per doz., 45c; per 100, \$2.00.

CONOVER'S COLOSSAL—This variety is much superior in size and quality to any of the old common sorts, being remarkably tender and fine flavored.

GIANT ARGENTEUIL—New French variety that makes crowns strong for cutting before any other sort.

PALMETTO—Until recently we believed that the Conover's Colossal was the best known, but we are forced to concede that the Palmetto is earlier and a better yielder. Its tender sprouts are out of the ground at the first sign of spring.

Plant some Asparagus this year, without fail.

FROM SOME OF OUR CUSTOMERS

Dear Mr. Graves—The orchard I visited last Sunday of Diamond King beat anything I ever saw; many small two and three-year trees with limbs broken from heavy loads of fruit. I have planted over fifty thousand fruit trees the last few years, and wish they had all been the Diamond King. Yours respectfully, WALTER WHITE, Centralia, Ill.

Mr. White is one of the largest fruit growers in Illinois, if not the United States, owning and managing hundreds of acres near Centralia, Ill., also Tunnel Hill, Illinois.

ORNAMENTAL DEPARTMENT

SHADE TREES

There is nothing about a homestead in the country or residence in city or village that reflects the culture and refinement of the owner as do well-kept and judiciously planted grounds. The planting also adds selling value as well as beauty and comfort.

IN THE DEVELOPMENT of the Central West the first and most important thing to the home builder was to get the home, and little attention was paid to the beautifying of the home grounds. Now the land is practically all developed into farms with convenient and substantial buildings, and the owners are beginning to think about beautifying their homes by the planting of ornamental trees, flowering shrubs and plants.

THE DEMAND FOR ORNAMENTAL trees, shrubs and plants has greatly increased the past few years and to meet this demand we have greatly enlarged our plantings in this department and enlarged our facilities for propagating this class of stock, which consists of such kinds as are hardy and desirable and represent a great variety of colors both in blossom and foliage, as well as in habit and growth, and we are able to supply these in large quantities.

WHERE LARGE OR SMALL ESTATES are to be beautified or grounds laid out, such as parks, playgrounds, institutional and club grounds, cemeteries, etc., we send a landscape architect to survey same and furnish complete plans and specifications for the proper planting, location of walks, drives, etc.

WHOLESALE PRICE OF FIRST CLASS SHADE TREES

All varieties except Norway Maple and Catalpa Bungei.

	Each
3 to 4 feet.....	\$0.55
4 to 5 feet.....	.60
5 to 6 feet.....	.75
6 to 8 feet.....	.95

NORWAY MAPLE

3 to 4 feet, \$1.00; 4 to 5 feet, \$1.10; 5 to 6 feet, \$1.20; 6 to 8 feet, \$2.25, each.

CATALPA BUNGEI

4 feet, one-year-old heads, \$1.75; 2-year-old heads, \$2.25; 5 feet, one-year-old heads, \$2.25; 2-year-old heads, \$3.00.

AILANTHUS (Tree of Heaven)—A rapid-growing, lofty tree, long, elegant foliage. A distinct ornamental tree with pinnate foliage, exempt from diseases and insects. Useful in producing tropical effects.

MAPLE (Silver-Leaved)—A hardy rapid-growing native tree of large size, valuable for producing a quick shade. Excellent for street planting.

CATALPA SPECIOSA (Western)—T. One of the most rapid growers. Large heart-shaped, downy leaves, and compound panicles of white flowers, tinged with violet and dotted with purple and yellow.

MOUNTAIN ASH—Hardy tree. Head dense and regular; beautiful, fern-like, green foliage; covered from July till winter with clusters of bright red berries.

LOMBARDY POPLAR—This grows to an immense height, and is remarkable for its columnar growth. In landscape work breaks the monotony of the lower, round-topped trees. One of the characteristic trees of Lombardy and other parts of Italy.

CAROLINA POPLAR—A vigorous, healthy native tree of rapid growth, pyramid in form, with large glossy leaves; valuable for park or street planting.

TULIP TREE—One of the grandest of our native trees. Of tall, pyramidal habit, with broad, glossy, fiddle-shaped leaves. The flowers have been the cause of the name which the trees bear. They look like greenish-yellow tulip. Cone-like fruit clusters arise from the flowers. Grow rapidly and make excellent shade trees.

MAPLE, HARD (Norway)—A native of Europe. Its large, compact habit, broad, deep green shining foliage, render it one of the most desirable species for streets, parks and lawns.

CATALPA BUNGEI (Umbrella Tree)—A small species that grows 8 to 10 feet high, as broad, forming a broad head clothed with a dense mass, heart-shaped leaves. Among our hardy trees, there are but few, if any, that are more effective for park or lawn. Grafted on stems of the common Catalpa 5 to 6 feet from the ground, forming an umbrella-shaped top.

CHOICE EVERGREENS

Evergreens are invaluable for beautifying grounds. They are used for specimens on the lawn, also for borders, screens, hedges, etc. We have listed herewith a condensed list of a few most popular types of Evergreens. Should you desire other types or larger sizes, kindly write us for prices.

THE PRICES NOTED INCLUDE BALLING AND BURLAPPING.

ARBORVITAE

AMERICAN—Tall, rapid grower. Sometimes called White Cedar. Can be sheared in any form. 1½ to 2 feet, \$1.50; 2 to 3 feet, \$2.50.

PYRAMIDAL—Close, upright habit. 1½ to 2 feet, \$4.00; 2½ to 3 feet, \$6.00.

GLOBE—Dense, round shape, dwarf. Suitable for bedding and foundation plantings. 12 to 18 inches, \$2.50; 18 to 24 inches, \$5.00.

HOVEY'S GOLDEN—Its unusual bright golden color adds contrast and a novel touch when planted with other evergreens. 12 to 18 inches, \$2.50; 18 to 24 inches, \$5.00.

SPRUCE

COLORADO BLUE—Glistening silver-blue in color. Perfectly shaped, with heavy, steel-blue foliage. 1 to 1½ feet, \$4.00; 1½ to 2 feet, \$6.00.

COLORADO GREEN—Same as above except that foliage is a bright green. 1½ to 2 feet, \$3.00; 2 to 3 feet, \$5.00.

NORWAY SPRUCE—The time-honored Christmas tree. Very graceful, rapid in growth, fine for windbreaks. 12 to 18 inches, \$1.50; 18 to 24 inches, \$2.50; 2 to 3 feet, \$3.50.

PINES

MUGHO (True Dwarf Form)—Growth dense and low, color a deep green, summer and winter. 10 to 12-inch spread, \$2.00; 12 to 15-inch spread, \$4.00; 15 to 18-inch spread, \$5.00.

SCOTCH—Rapid of growth; great hardness; can be grown anywhere; a fine light green in color. 1 to 1½ feet, \$1.50; 1½ to 2 feet, \$2.50; 2 to 3 feet, \$3.50.

JUNIPERS

IRISH—Dwarf-growing, of very columnar habit, bluish-green foliage. Suitable in formal or architectural gardens; fine for cemetery plantings. 12 to 18 inches, \$1.50; 1½ to 2 feet, \$3.00; 2 to 3 feet, \$4.00.

SAVIN—A low, much-branched shrub, spreading, with dense short, straight tufted branchlets, good green in color. Carries dark violet or deep purple berries. 12 to 18-inch spread, \$3.50; 18 to 24-inch spread, \$6.00.

RED CEDAR (Juniperus Virginiana)—Extra narrow, pyramidal habit, with dark green to bluish foliage. In season the tree bears bright blue and silvery berries. Can be trimmed to any size and shape.

	Each	10	100
6 to 12 inches.....	\$0.40	\$3.00	\$15.00
12 to 18 inches.....	.60	5.00	25.00
18 to 24 inches.....	1.00	8.00	40.00

(The wood of Red Cedar is a valuable commercial product; you all know its many uses.)

Colorado Blue Spruce

ORNAMENTAL SHRUBS

X—Designates one-year-old plants.
 XX—Designates two-year-old plants.
 XXX—Designates three-year-old plants.
 B. G.—Designates BLOOMING GRADE, or BLOOMING SIZE.

ALMOND—Double white and double pink. Early spring flowering shrub. Dwarf, bushy, compact. X, 45c; XX, 75c; XXXBG, \$1.00 each.

ALTHEA—Double rose, white, pink, red and purple. Grow 10 to 12 feet. Make serviceable and showy hedges. Large bright-colored flowers. Bush form. X, 45c; XX, 60c; XXXBG, 75c. Tree form, 2 to 3 feet, \$1.00; 3 to 4 feet, BG, \$1.25 each.

BARBERRY THUNBERGII (Japanese Barberry)—Immune from rust. Fine foliage effect. X, 20c; XX, 40c; XXX, 60c each.

BUDDLEIA (Butterfly Bush, Summer Lilac)—Quick, bushy growth. Bloom spikes appear in July. Fragrant. X, 35c; XX, 60c; XXXBG, 80c each.

CALYCANTHUS (Sweet Scented Shrub)—Flowers are purple, very double and deliciously fragrant. Foliage rich, dark green. Blooms in June. X, 45c; XX, 75c; XXXBG, \$1.00 each.

CORNUS FLORIDA (Large Flowered Dogwood)—Tall, upright tree or small shrub with large, white flowers in early spring. X, \$1.25; XX, \$1.50; XXXBG, \$2.00 each.

CORNUS FLORIDA RUBRA (Red Flowering Dogwood)—Recently introduced. A variety producing flowers suffused with bright red. Blooms when quite young. One of the finest flowering trees. X, \$2.50; XX, \$3.00.

DEUTZIA (Pride of Rochester)—Large double white flowers, vigorous grower; early to bloom. X, 25c; XX, 50c; XXXBG, 75c.

DEUTZIA CRENATA—Tall, light, double pink. X, 25c; XX, 50c; XXXBG, 75c.

ELDERBERRY (Cultivated, Improved)—A new fruit perfected from the common elderberry. The small white flowers come in large handsome clusters; very fragrant, handsome, opening in early summer when other flowers are scarce. Fruit black, very profuse, ripening in August. Grows 6 to 8 feet high. Berries are highly esteemed for pies, sauce, and highly flavored beverages which are very refreshing. Everybody likes these improved elderberries; they are easy to grow and do well everywhere. Price, 45c each; 3 for \$1.00; 6 for \$1.75; per 100, \$18.00.

FORSYTHIA FORTUNIA (Golden Bell)—Upright, hardy, vigorous; large, bright yellow flowers. X, 25c; XX, 50c; XXXBG, 75c.

FORSYTHIA VIRISSIMA—Erect green branches; dark green leaves; greenish-yellow flowers. X, 25c; XX, 50c; XXXBG, 75c.

FLOWERING CRAB (Bechtel's Double)—Low bush tree. Stems covered with dainty little pink rose-like blossoms. Blooms quite young. Very fragrant. XX, \$1.25; XXXBG, \$1.50.

FLOWERING PLUM (Prunus Pissardi or Purple-Leaved Plum)—Handsome little tree, white single flowers in the spring, pinkish purple leaves. XX, \$1.25; XXXBG, \$1.50.

HYDRANGEA ARBORESCENS GRANDIFLORA—Very hardy, blooms July till September. X (12 to 18 inches), 35c; XX (18 to 24 inches), 60c; XXX (2 to 3 feet), 75c.

HYDRANGEA P. G.—Very hardy with white cone-shaped flowers; August and September; changing to pink, then bronze-green. X (12 to 18 inches), 60c; XX (18 to 24 inches), 75c; XXX (2 to 3 feet), \$1.00.

HYDRANGEA, TREE—The above Hydrangea in tree form. 3 to 4 feet, \$1.25; 4 to 5 feet, BG, \$1.75.

PHILADELPHUS CORONARIUS (Mock Orange)—Popular shrub; fine form; white flowers, early. X, 35c; XX, 60c; XXXBG, 75c.

PHILADELPHUS AUREA (Golden Mock Orange)—Similar to above, except that the foliage is a beautiful golden color. X, 45c; XX, 70c; XXXBG, 85c.

RED BUD (Judas Tree)—Small-growing tree, heart-shaped leaves, delicate pink, blossoms in spring. Pinkish-purple leaves. X, 45c; XX, 75c; XXXBG, \$1.00.

Forsythia Virissima

RHUS-SUMAC

Very attractive shrubs and small trees make up this family—a family that is highly prized in landscape work on account of the brilliant autumnal colors of its foliage. The showy clusters of berries likewise add to its value in the shrubbery planting. Any soil that is well drained is suitable for the Sumacs.

SHOULD BE INCLUDED WITH EVERY ORDER
 See Listing Below

RHUS COPALLINA (Shining Sumac)—Shining green foliage, changing to rich crimson in autumn; greenish-yellow flowers in August. 1 to 2 feet, 20c; 2 to 3 feet, 35c; 3 to 4 feet, 45c each.

RHUS GLABRA (Smooth Sumac)—Flowers are borne in large panicles at ends of the branches, and are followed by crimson clusters of fruits which last all winter. Very excellent for mass plantings. 1 to 2 feet, 45c; 2 to 3 feet, 60c; 3 to 4 feet, 70c each.

RHUS TYPHINA (Staghorn Sumac)—Tall, showy shrub, that grows in the driest soils and is gorgeous in its autumnal garb of richly-colored brilliant foliage and crimson-scarlet fruit in large clusters. 1 to 2 feet, 35c; 2 to 3 feet, 50c; 3 to 4 feet, 60c each.

SNOWBALL (Japan)—Of better habit than the old familiar form with plicate leaves and more delicately formed white flowers; fruits red. X, 65c; XX, 90c; XXXBG, \$1.25 each.

ORNAMENTAL SHRUBS—Continued

SYMPHORICARPOS (Red Snowberry)

VULGARIS (Coral Berry or Indian Currant)—A grand shrub producing a wealth of red or purplish berries which remain on the branches all winter. Leaves ovate, bright green. They can not be equaled for effect; the fruit laden stems drooping with the weight of the richly colored berries, are nothing less than beautiful. 1 to 2 feet, 20c; 2 to 3 feet, 35c; 3 to 4 feet, 50c each.

SHOULD BE INCLUDED WITH EVERY ORDER.

SMOKE TREE (Purple Fringe)—Unique, spreading tree, large leaves. Mist-like flowers having the appearance of smoke. X, 95c; XX, \$1.50; XXXBG, \$2.00 each.

SPIREA ANTHONY WATERER—Bushy, spreading, dwarf; is covered with crimson flowers. Blooms, July-August. X, 45c; XX, 75c; XXXBG, \$1.00 each.

SPIREA BILLARDI—Narrow, dense shrub, rich pink flowers, borne in long spikes. July-August and again in the fall. X, 35c; XX, 50c; XXXBG, 60c each.

SPIREA VAN HOUTTEI (Bridal Wreath)—The finest of all the Spireas, and one of the finest of ornamental shrubs. Covered with a perfect mass of pure white flowers in the spring, causing the branches to bend to the ground. Much used for hedges. X, 20c; XX, 40c; XXXBG, 60c each.

SAMBUCUS (Golden Elder)—Handsome variety with golden-yellow foliage. Flowers white. Grows naturally high, even to 10 to 12 feet, but can be pruned to a small bush. X, 45c; XX, 60c; XXXBG, 75c each.

SYRINGA (Lilac)—Of delicate beauty, very fragrant in spring. Perfectly hardy. Colors red, white and purple. X, 30c; XX, 40c; XXXBG, 50c each.

TAMARIX AFRICANA—Tall shrub, 8 to 10 feet; fine feathery foliage like Juniper. Small, unusually bright pink flowers in April and May. Splendid for damp places. X, 35c; XX, 50c; XXXBG, 75c each.

WEIGELIA CANDIDA—Extra choice vigorous sort, yielding one profuse crop of white flowers in June, lighter ones at intervals throughout the summer. X, 40c; XX, 50c; XXXBG, 90c each.

WEIGELIA ROSEA—Tall-growing, vigorous sort with deep pink flowers. X, 40c; XX, 50c; XXXBG, 90c each.

WEIGELIA EVA RATHKE—Six to eight feet. Charming variety. Bright crimson flowers, blooming all summer. X, 40c; XX, 50c; XXXBG, 90c each.

Purple Syringa

HEDGE PLANTS

PRIVET, CALIFORNIA—The finest all-purpose hedge. The most popular and most useful hedge grown. A pretty shrub, with smooth, shining leaves, of unusual beauty. For the ornamental hedge there are many plants that may be used with happy results, but the great demand for California Privet proves it to be the most satisfactory. Plants, 6 to 12 inches, \$3.50 per 100; 12 to 18 inches, \$5.00 per 100; 18 to 24 inches, \$6.00 per 100; 2 to 3 feet, \$8.00 per 100.

PRIVET, AMOOR RIVER NORTH—Hardy for northern climates. It is of similar form and habit to the well known California type; the foliage not so glossy. Plants, 6 to 12 inches, \$6.00 per 100; 12 to 18 inches, \$7.00 per 100; 18 to 24 inches, \$10.00 per 100; 2 to 3 feet, \$15.00 per 100.
