General Information to Dahlia Growers

This catalogue is issued with the intention of giving brief description of the latest dahlias in cultivation in this country at the present time.

It is alphabetically arranged so that the busy man or woman can find what is wanted quickly.

We are giving the originator's description where possible and are listing nothing in this catalogue but what we have seen grow and bloom.

Our terms are cash with the order. All retail orders will be shipped parcel post, prepaid. Dahlia tubers will be shipped unless otherwise specified soon after May 1st, unless earlier planting is wanted in the South, then shipment will be made at the option of the buyer.

Green plants will be shipped any time after danger of frost is over unless otherwise specified by the purchaser. Green plants can be planted with perfect safety up to June 15th. The earlier the planting of green plants, the larger the crop of tubers will be.

We will make no substitution of any order unless directed to do so by the purchaser.

You will notice that we issue no cultural directions in this catalogue. Dahlias will grow in almost any soil or climate if they are grown from strong, healthy tubers. We find dahlias at times subject to disease. We find this disease easily controlled by the use of strong nicotine powders blown on the plants with a duster, from planting time well on into the season.

All stock sent out by us is guaranteed true to name. We have carefully gone over our fields and rouged out all dahlias from our stock that did not show to be true.

Our reference is the City National Bank and Trust Company, Salem, New Jersey.

DAHLIA SEED

Grown in California for us from good dahlias and under our own test here. Produced many good flowers during the last season. \$1.00 per package.

SPECIAL DAHLIA SEED

We sent last year to a grower in California our latest varieties. From these tubers he produced a limited quantity of seed which we offer while it lasts at \$2.50 per package.

Raising dahlias from seed is very interesting and a pleasant pastime. Every seed produces a new type and color of a dahlia. From 1500 seeds last year we grew 1265 hills and over 100 hills were of new and useful flowers. Eight hills out of the 1265 produced eight seedlings which in their first year are better than any dahlia now on the market.

PEONIES

We have over two hundred varieties of the world's choicest peonies collected from all over this country and Europe. These plants are now seven years old and in the height of their blooming ability. We have thousands of one, two and three year old plants which we will put on the market next October. Readers of this catalogue who are interested in peonies if they will write us, we will send them a catalogue or list of prices about July 1, 1927. Our peonies are raised in heavy soil, the roots are of good size, many having from three to seven eyes, if planted next October they will give a reasonable amount of bloom in June 1928. We do not send out any plants with one or two eye divisions. Our prices may be a little higher than dealers who send out small divisions, but they will bring the purchaser good returns on his investment.
