Caution!

Do not put off until tomorrow that order which should be placed today. Too often, customers are badly disappointed by waiting until certain varieties are sold out—thus receiving only a partially filled order.

To insure good service on Rooted Cuttings, it is very necessary to place your order in advance. This, again, often saves the disappointment of a half-filled order.

Chrysanthemum orders should be booked at once upon receipt of this price list. Do not wait until the rush of late spring comes on. Make your reservations now.

DEEMER FLORAL COMPANY

OUR SPECIALTY

Rooted Cuttings and 2 1-4 Inch Pot Plants

**We Grow These in Immense Quantities and Can
Make Prompt Shipments.**

NOTICE

We will make every effort to have a good supply of Rooted Cuttings of all varieties every day throughout the season and make every shipment as promptly as possible. It often happens during the busy season that orders come in very rapidly, and the supply of certain varieties is all sold before another lot is quite ready. For that reason orders for Rooted Cuttings should be sent in several days before cuttings are wanted.

OUR GUARANTEE

We guarantee all cuttings, plants, and bulbs we send out to be in a growing condition and properly packed as light as possible to secure safety, but we give no warranty, expressed or implied, as to description, quality, productiveness, of any seeds, bulbs or plants we send out and we will not be in any way responsible for the crop.

TERMS--CASH WITH ORDER

Our prices are as low as good, clean plants can be sold. The only way that we can maintain these low prices is to adhere strictly to the rule of CASH WITH ORDER. Goods desired C. O. D. must be accompanied by one-fourth value remittance with order to guarantee acceptance.

Chrysanthemums

The varieties listed below are arranged in sequence as to blooming time. We grow only standard or commercial varieties which appeal to both the large and small grower. Dates given are based on plantings made in May, June, and July. Naturally, the heat of summer in different localities will alter the time of date of bud. Approximations only can be given.

The Mistletoes can be held through into January by securing late cuttings. This is decidedly profitable when the shortage of flowers after Xmas is considered.
