Ashes of Roses

W. E. MARSHALL & CO., INC.
150 WEST TWENTY-THIRD STREET
• NEW YORK •

Our Twenty-fifth Anniversary

TWENTY-FIVE YEARS AGO, the founder, W. E. Marshall, started business alone in a small way, using deskroom in an architect's office at 41 West 24th St. and at the same time conducting his packing and shipping from a cellar in Dey St. Two years later a co-partnership was formed with Alfred E. Wheeler under the name of W. E. Marshall & Co., when a store was opened at 146 West 23rd St. A few years later we moved to more commodious quarters at 166 West 23rd St. in order to fully take care of the rapidly expanding business. There we remained for fifteen years, during which period we incorporated in the year 1916, but were, during these later years, obliged to rent space in nearby buildings to carry on efficiently.

Again we were forced to obtain a larger store and in February, 1925, we moved into our present quarters. On entering this place we dispensed with all our old fixtures, and installed every new necessary device to aid us in facilitating the execution of our ever-increasing business, and make it what we believe is one of the best organized institutions of its kind in the country.

Each department has a separate staff, enabling them to concentrate in their particular branch and to exercise the care and promptitude which has proven a most valuable asset to our business.

We invite our patrons to visit our store, where they may be assured courteous treatment and advice from our fellow workers who have so materially aided us in the growth of our business.

The Lily

One of our specialties is the Lily, which we have selected on account of its grandeur, stature and gracefulness in the American garden. We believe the *Lilium* family offers to the amateur, as well as the professional gardener, a most interesting study because of its individual habits and many other remarkable traits.

We have done all in our power to popularize this hardy garden favorite in importing different varieties from different parts of the world, experimenting with so-called sub-tropical varieties and finally obtaining a number of these that we find to be hardy here although not so in England.

We are going still further in the matter of Lilies in presenting to the public the most comprehensive catalogue of Lilies ever published, and wherein all details of planting and culture will be found, including colored plates of most of the varieties in commerce with full description and treatise of same. See page 4.

WHO'S WHO

Through the following method we have endeavored to give you a biography of each of the directors and employees holding important positions in our establishment, many of whom are stockholders in the corporation as an award for long and faithful services. Our object is to place our patrons in personal touch with our employees.

WILLIAM EMERSON MARSHALL, our president, was born in Edinburgh, Scotland, where he received his education at George Watson's College for Boys. Although it was expected that he should follow the path of his elder brothers, one of whom was Dr. John Marshall, rector of the Royal High School, Edinburgh, and the other, Dr. Tom Marshall of London, he decided to stick closer to the soil, and became apprenticed to the seed and nursery establishment of John Downie in Edinburgh. Four years' training equipped him for the position as manager of the agricultural seed business of John MacLure of the same city. In 1891, Mr. Marshall emigrated to this country, where for the first year he received an intensive training in the greenhouses of the W. B. Dinsmore estate at Staatsburg, N. Y., under the tutelage of his uncle, that well-known gardener, Thos. Emerson. For the following nine years he was employed in the seed establishments of Peter Henderson & Co., J. M. Thorburn & Co., and Weeber & Don, during which period he did considerable traveling among the large estates until he started the present business twenty-five years ago.

Mr. Marshall's sole hobby is gardening, and he spends his spare time in his garden at Bayville, Long Island.

ALFRED E. WHEELER was born near Worcester, England, his father being a successful agriculturist in Worcestershire. He received his education in the Cheltenham and Handley Grammar Schools. At the age of 16, he was apprenticed to Jos. H. White, seedsman, florist and nurseryman, for five years. At the expiration of the term he took a position in a seed store in Chesterfield, remaining for four years. In 1896 he emigrated to the United States, and soon after arrival found employment with P. Henderson & Co. for the season, leaving them to take up gardening on private estates for a year to learn more of American floriculture, returning to the seed trade for two years with J. M. Thorburn & Co., and four years with Weeber & Don of New York. He joined W. E. Marshall in partnership in 1903 and was made vice-president and treasurer upon their incorporation.

For the past 13 years he has resided in Floral Park, L. I., where he maintains an extensive garden for pleasure and personal knowledge of horticulture.

HARRY J. RUTE. Born in New York City. Came to us twenty years ago when the firm was in its infancy. He knew little of gardening, but was confident he would be interested. He afterward proved that by his never failing efforts to learn, and through his close connections with some of the large private estates in the vicinity of New York, he has gained a knowledge of gardening and farming which is really surprising because of the fact that he has never been actively engaged in their pursuits. Mr. Rute has served in all departments of the business and has gradually worked his way up to his present position as one of the directors.

WILLIAM ALEXANDER. Born in Glasgow, Scotland, and educated in the public schools in Rothesay. He commenced his apprenticeship in the seed business of Dobbie & Co., Rothesay, in 1900. After serving in every department, including the nursery, he became manager of the stock room. In 1910, Dobbie & Co. moved their establishment to Edinburgh, where he made his home. In the Fall of 1911 he accepted a position as general manager of the firm of A. S. Ritchie & Co., seedsman and florists, Belfast, Ireland, and remained there till 1913, when he returned to Edinburgh as manager of Dickson & Co., seedsman. In March, 1914, he arrived in New York and immediately secured a position with Peter Henderson & Co., and in a short time after, he accepted a call from this firm as manager of the flower seed department, and after three years in that capacity he became traveling salesman, in which position his thorough knowledge of the various branches has become a valuable asset to our business.

PHILIP WILLIAM POPP. Widely known in horticultural circles as a first-class gardener and a successful exhibitor. Born in Wappingers Falls, N. Y., and at the age of 14, he entered, as apprentice, the gardens of "Netherwood," the country estate of Mr. Irving Grinnell at New Hamburg. A wide variety of stock was grown there, and the experience gained after ten years' service laid the foundation for a successful career. During the following ten years he held many important gardening positions in various parts of the country, and finally entered the employ of Mrs. Harry Darlington as superintendent of her handsome estate at Mamaroneck, N. Y., where he remained for thirteen years. He afterwards attached himself to the commercial field, representing various firms, until his employment by our firm, over five years ago, in the capacity of traveling salesman.

DONALD EMERSON MARSHALL, son of the president, is a graduate of Cornell University, having taking the agricultural course, where he specialized in rural engineering, which specially fitted him for golf course construction. He spent three years in this work, assisting in the construction of two courses, and having entire charge of construction of three others. After two years' sojourn in the Island of Crete, Greece, as partner in the Anglo-American Hellenic Co., Importers of Agricultural Machinery, he returned to take active part in the agricultural and golf departments of our business. He also acts in the capacity of traveling salesman.

EDWARD BENSON was born on a farm near Ossining, N. Y. and was employed by us fourteen years ago in the packing and shipping department, where he spent three years. He was then transferred to the implement department, where he was in charge for five years. He was received in the vegetable seed department six years ago, and is now in full charge. His early training on the farm has greatly aided him in attaining his present position.

SYDNEY WHITEMAN was born in Northampton, England, educated at University School, Hastings, apprenticed for four years to Thos. W. Edmunds, Ltd., Westerham, Kent, who had 300 acres of nurseries and greenhouses. Then for several years each with Barr & Sons, bulb and plant growers; R. Wallace & Co. Hardy Lily and plant growers, both of England; from there to Dobbie & Co., seedsman and plantsmen, Edinburgh. Fifteen years ago, he came to the United States and was engaged in landscape gardening for the Sage Foundation Homes Co., at Forest Hills, L. I. for five years. In all he spent four years in the flower seed department of Peter Henderson & Co., and came to firm seven years ago to take charge of the flower seed department. Although he is actively engaged in attending to the nursery part of the business, he still keeps a watchful eye on the flower seed department.

PAUL LONGART was born in Stuttgart, Germany. He was employed by us eleven years ago to take charge of the packing and shipping departments. Five years ago he was placed in charge of the implement department and afterward the Lily business was added. This latter department has developed to such an extent that he is obliged to relinquish the implement department and devote all his energies to Lilies, which is now a very important part of our business.

ERNEST LUMLEY was born in Brooklyn and started with us seven years ago as assistant in the packing department. His fitness for better work was soon manifest in the flower seed department and through valuable knowledge gained under the tutelage of Mr. Whiteman who still has a watchful eye on this department, he has now been placed in actual charge.

GEORGE ROBERT FISHER. Native of Boston, England. Educated at a private boarding school, Dibbens Academy, Sleaford, Lincolnshire, graduating from Boston Grammar School, one of Britain's notable educational establishments. Early commercial experience gained in the counting-houses of old established City of London firms, including that of Hitchcock Williams & Co., of St. Paul's Churchyard, Mr. Williams (later Sir George Williams) being the founder of The Young Men's Christian Association. For the past 25 years he has been engaged in the bookkeeping departments of several New York business houses of high standing, including Hickson Inc., Lucile, Ltd., and Vaughan's Seed Store.

RALPH PAGE BRAMMAN was born in Chicago, educated in the Massachusetts grammar schools, the New Jersey high schools, and the Richmond Academy. Since that time he has been engaged in clerical work and later as corporation assistant in the Electric Bond and Share Co., New York. Five years ago he was engaged by us as assistant bookkeeper, during which time he instituted modern methods in office efficiency, and has just organized a system which will insure still more promptitude in the execution of orders.

LOUIS GRENIS, another product of Brooklyn, came to us five years ago to take charge of the packing and shipping departments which position he has held until recently when he was brought upstairs to take charge of the implement department. He is known in the trade as the star pitcher of Marshall's baseball team.

General Directions to Customers

ORDER EARLY

We request our customers to order as early as possible on receipt of catalogue. We endeavor to ship all orders immediately on receipt, but during the busy season it is almost impossible; hence, the importance of ordering early.

PARCELS POST

We deliver free by Parcels Post all seeds, except Beans, Corn, Peas, Farm Seeds or Clovers. If these are wanted by mail, please add the cost of postage at zone rates.

Fertilizers, insecticides, sundries, trees and plants are at all times excluded from free delivery.

No charge for delivery to railroad station, steamer or express office.

Owing to the scarcity of all bags, we are compelled to charge them at cost and credit will be given when returned, charges prepaid, if in good condition.

EXHIBITIONS

At different periods, we expect to make displays of our Rock Garden Plants, Lilacs, Iris, Peonies, Gladiolus, Hardy Lilies, Hardy Herbaceous Flowers, Vegetable, Garden and Farm Produce. We invite our patrons to visit our store, where courteous treatment will be accorded by our fellow workers who have aided us in the expansion of our business, and who share with us its prosperity.

GARDENERS AND FARMERS

Parties requiring the services of reliable men, married or single, should consult with us, as we have the names of a number on our register, thoroughly experienced in every branch of the business. We have a large acquaintance among gardeners in this vicinity, and it is seldom that anyone who applies to us fails of getting the right party. No fee.

SPECIAL NOTICE: PRICES

The prices published in this Catalogue are subject to market changes without notice. Owing to the fluctuating market in prices of all materials, we cannot bind ourselves on prices of any articles.

WE ISSUE THE FOLLOWING CATALOGUES AND SPECIAL LISTS

AGRICULTURAL IMPLEMENTS, MACHINERY, ETC. A complete list of farm tools.

BULB CATALOGUE. Ready about July 1st, containing a complete list of all bulbs for Fall planting and greenhouse forcing.

LILACS. A list of 100 of the best varieties.

LILIES. A complete list of 80 varieties described and illustrated. (See below):

ROCK GARDEN. Illustrated list containing over 300 varieties of plants and evergreen shrubs.

HARDY GARDEN LILIES

One of our specialties is "The Lily," and on that most interesting subject we have compiled the most comprehensive catalogue ever published and wherein all details of planting and culture will be found, including colored plates of nearly all the varieties in commerce. Owing to the great expense incurred in producing this valuable Lily book we are obliged to charge one dollar for same, which will be credited to the purchase of the first order for Lilies to the amount of three dollars or over. This means that credit slip for one dollar received with book should be sent with your first order for three dollars or over.

Novelties and Specialties in Flower Seeds

MY GARDEN

A garden is a lovesome thing, God wot!
Rose plot,
Fringed pool,
Ferned grot—
The veriest school
Of peace: and yet the fool
Contented that God is not—
Not God? in gardens! when the eve is cool?
Nay, but I have a sign:
'Tis very sure God walks in mine.
—Thomas Edward Brown.

ALYSSUM *saxatile*, "Silver Queen." An early Spring blooming perennial with masses of palest lemon flowers. Height 6 in. Pkt. 25c.

ALONSOA *warscewiczii compacta*. A charming plant for pot culture or outside planting, growing about 15 in. high. Foliage dark green with racemes of bright scarlet flowers. Pkt. 25c.

ANTIRRHINUM *Dwarf Silver Queen*. A distinct color of pure silvery lilac. A beautiful color under artificial light. Adapted for bedding or pot culture. Pkt. 25c.

AQUILEGIA *Marshall's Rose Queen*. A beautiful selection of long-spurred rose shades of this popular hardy perennial. Pkt. 25c.

ASPERULA *azurea setosa*. A very effective annual, growing about 1 ft. high with numerous sweet-scented pale blue flowers. Remains in bloom for a long period. Pkt. 25c.

ASTER *Everlasting Flesh*. This curious Aster resembles a large *Helichrysum* or Strawberry; when cut and dried it retains its color and shape as an everlasting flower. Pkt. 25c.

Farreri. A very interesting perennial commencing to bloom in May. The flowers are single with violet mauve petals and a large golden orange disc, often over 2½ in. in diameter produced on long, stiff naked stems. Pkt. 50c.

BEGONIA *semperflorens*, *Marshall's Crimson*. The habit is similar to the Begonia Gloire de Lorraine, with light green leaves and blooms continuously on flower stalks crowned with crimson fiery-red blossoms about 1½ in. in diameter. A valuable acquisition as a pot plant or for Summer bedding. Pkt. 50c.

BROWALLIA *viscosa*. A very useful, free flowering plant for the greenhouse or indoor culture. The salver-shaped flowers are of a bright violet-blue. Pkt. 50c.

CALLIOPSIS *Dwarf Dazzler*. A beautiful plant of easy culture growing about 12 in. high with large flowers with a rich maroon red center and broad golden yellow border. Valuable for bedding or cutting. Pkt. 35c.

CHEIRANTHUS *linifolius*. This charming lilac Wallflower is seldom out of flower and grows about 12 in. in height. Valuable for hardy borders and rock gardens. Pkt. 35c.

CYCLAMEN *giganteum*. The following English novelties we offer as the best selection from the largest grower of Cyclamen in England.

Bush Hill Pink. Color a bright rosy-pink, foliage beautifully marbled. Pkt. \$1.00.

Fragrance. Color rose and beautifully fragrant. Pkt. \$1.00.

Fragrant Gem. Flowers white with rose eye. Pkt. \$1.00.

Delphinium, Wrexham Hybrids

DELPHINIUM *Wrexham or Hollyhock Hybrids*. This wonderful strain is conspicuous for its broad-based tall spikes, carrying large individual flowers that run largely in deep shades, much prized by experienced growers. Even the young plants blooming for the first time are a revelation to Delphinium growers, and their massive character in fuller maturity is cause for fresh amazement. Pkt. \$2.00.

DIASCIA *barberae*. Pretty pink, coral-like flowers produced on slender stems during the whole of Summer. Excellent for borders and a fine pot plant for greenhouse decoration. Height 9 in. Half-hardy annual. Pkt. 25c.

DIANTHUS *Pink Beauty (Heddewigi)*. A beautiful double pale pink annual variety. An ideal plant for borders or bedding. Pkt. 35c.

DIGITALIS *Giant Shirley Hybrids*. These hybrids are very large in size and vigor, growing from 5 to 6 ft. in height. Flower heads are 3 ft. long, crowded with bell-shaped flowers. Colors range from white, shell pink and deep rose, many dotted with crimson. Pkt. 25c., ⅛ oz. \$1.00.

DIGITALIS *Isabellina*. A distinct break; the color is a beautiful sulphur-yellow and the habit of the plant as robust as *Digitalis purpurea*. Pkt. 35c.

ESCHSCHOLTZIA *californica, Double Toreador*. In color and form this new variety has to be seen to be fully appreciated. The petals of golden bronze are artistically arranged and the reverse flower is a rich orange crimson. Pkt. 50c.

GEUM *Orange Queen*. We are pleased to be able to offer a *Geum* of a shade intermediate between *Mrs. Bradshaw* and *Lady Stratheden*. The plants are of similar habit to both and quite as large and free blooming, in a beautiful orange color. Pkt. 50c.

LARKSPUR *Emperor, Pink Delight*. A fine new *Larkspur*, suitable for bedding or pots, of compact growth. A charming soft pink color. Pkt. 50c.

LUPINES *Marshall's Matchless*. An entirely new strain, comprising a wonderful range of previously unknown colors among perennial *Lupines*.

Matchless. Apricot shades. Pkt. 50c.

Matchless. Bronze and copper shades. Pkt. 50c.

Matchless. Creamy pink shades. Pkt. 50c.

LILY OF THE VALLEY PIPS FROM COLD STORAGE

We have in storage a large quantity of Dresden Pips for forcing at any season of the year.

Lily of the Valley can be forced in about four weeks from cold storage pips. We cannot supply less than 250 pips.

Marshall's Matchless Pips. 250 for \$16.00, 500 for \$30.00, 1000 for \$60.00.

Note.—To obtain best results with Cold Storage Lily of the Valley, the pips should be plunged into cold water on arrival for at least 12 hours before placing them in heat.

MARSHALL'S VEGETABLE SEEDS

WITH GENERAL DIRECTIONS FOR CULTIVATION

We give no warranty, express or implied, as to description, purity, productiveness, or any other matter of any seeds, plants or bulbs we sell, and we will not be in any way responsible for them. If the purchaser does not accept the goods on these terms, they are at once to be returned. W. E. MARSHALL & CO., Inc.

ARTICHOKE

One ounce will sow 100 feet of row, and produce about 500 plants.

A rich, sandy loam is best adapted for this plant. The seed should be sown in drills $1\frac{1}{2}$ inches deep and 1 foot apart. Transplant to rows 3 feet apart. They reach maturity the second year. Protect in Winter by a covering of leaves or coarse manure.

Large French Globe. Heads large, fleshy and of rich flavor. Pkt. 25c., $\frac{1}{2}$ oz. 60c., oz. \$1.00.

ARTICHOKE PLANTS

Large French Globe. Plants ready for shipment after April 1st. Doz. \$2.50, 100 \$20.00.

Jerusalem. Grown for the tubers, which resemble Potatoes, and are cultivated in a similar manner, but the rows should be at least 4 feet apart. Qt. 30c., pk. \$1.75.

ASPARAGUS *One ounce will produce about 200 plants.*

ASPARAGUS ROOTS

It requires 100 plants for a single row of 150 feet.

Culture.—The permanent bed should be trenched or ploughed very deeply, and well manured with rich, thoroughly decayed manure. Set the plants 18 inches apart in rows, carefully spreading out and separating the roots, and deep enough to admit of the top of the plants being covered 6 inches. In November the plants should have their annual top-dressing of manure after the stalks have been cleared away.

BEANS

Beans like a well drained, rich and light loam. Plant about the middle of April when warm and favorable, and at intervals throughout the season for a succession, until the latter part of August. Bush varieties should be planted in drills 2 feet apart, and from two to six plants to the foot in a row. Keep them well cultivated and draw the earth up to the stem. For String Beans gather the pods clean as soon as fit for use. The plants will remain all the longer in bearing.

DWARF SHELL BEANS

Sow in drills 2 feet apart as soon as warm weather has set in; soil should be light and rich; covering about 2 inches.

POLE, OR RUNNING BEANS

Sow from the 1st of May (for all except Limas) to the latter part of May, in hills 4 feet each way. Limas should not be planted until warm weather has fairly set in. One quart of Limas will plant about 100 hills, allowing four or five beans to a hill, and of the smaller sorts about 200 hills. Poles 8 to 10 feet long should be firmly set in the hills before planting seed. Set poles 4 feet apart each way, and plant 4 to 6 beans about 1 inch deep around each pole. Thin out to three plants to a pole if the soil is rich; pinch off the ends of plants when they overrun the top of the poles, to effect more perfect growth below.

CELERY

One ounce will sow about 300 feet of row and produce about 5000 plants.

Sow in the open border early in April, in rich ground. When the plants are 3 inches high transplant 4 inches apart into temporary beds of soft, rich soil until they acquire sufficient strength for planting out. Plant in rows 3 feet apart and set 8 inches apart in the rows. About the middle of August earthing up is necessary for blanching and whitening of that which is wanted for early use.

One ounce to 60 hills, 2 to 3 pounds to one acre.

For very early use seed may be started in heat and the plants set out in May. Pieces of inverted sod are an excellent medium for starting and growing early Cucumber plants, as they can readily be lifted from the hotbed to the garden without disturbing the young plants growing upon them. For main crop plant in hills 4 feet apart at the end of May. Keep the young plants safe from the striped bug by dusting with dry plaster or powdered Hellebore. Leave four strong plants to each hill.

MUSHROOM SPAWN

Ten pounds will spawn about 10 feet square.

Mushroom beds may be made in a warm, dry cellar, or in any building where the frost does not penetrate, and in the open air during the Summer and Fall months. Having procured the spawn, the next thing to be attended to is to make preparation for the beds.

About two or three weeks before the beds are to be made collect a quantity of fresh horse manure without the straw; place it in a heap under cover, and as it heats keep turning it over once or twice a week, until the fiery heat has become exhausted, which will require from ten to fourteen days' time. When the manure is in a condition to be made up lay out your bed, according to your requirements, say 3 feet wide, 10 feet long and from 2 to 3 feet deep; beat it down well with the back of the spade as the process of building goes on. When the bed has been made some time, say a week or thereabouts, and the heat sufficiently declined to a temperature of 65 or 75 degrees, the spawn may be put into it. Break the spawn in pieces 2 inches square, and put them 6 inches apart, all over the bed; then cover the bed with 2 inches of rich soil. If everything goes on well, you may expect Mushrooms in about five or six weeks. When the soil looks dry give a gentle watering with tepid water, using a rose on the watering pot. Good crops of Mushrooms can be obtained by spawning the hotbeds in Spring.

Pure Culture Mushrooms

When the soil looks dry give a gentle watering with tepid water, using a rose on the watering pot. Good crops of Mushrooms can be obtained by spawning the hotbeds in Spring.

POTATOES GROWN EXPRESSLY FOR
SEED IN MAINE

Peck will plant 100 foot row. Ten bushels cut tubers will plant 1 acre.

The Potato, like the robust-growing vegetable, can be grown with varying success on soils of all kinds and in all conditions of fertility, but the soil best suited to it is a sandy loam. Manure is applied either in rows or hills or broadcast over the hills and ploughed in—the latter in most cases being preferable. In highly enriched soils the plants are more liable to disease than when grown in soil that is naturally good. Plant as early in Spring as the ground can be had in fair working order, in hills or ridges, about 3 feet apart, cover lightly with soil about 4 inches deep.

Green Mountain Potatoes

Beauty of Hebron. Slightly flesh colored skin, with pure white flesh; very productive and of the finest quality.

Bovee. Extra early; fine quality; flesh white.

Dibble's Russet. This is the best main crop Potato in cultivation. The tubers are round to oblong in shape, good size, white flesh and covered with a russet skin. The quality when cooked cannot be excelled. It also has great disease-resistant and blightproof properties.

Early Rose ("Spaulding's"). Very early; fine quality; very productive, skin shaded rose color.

Gold Coin. Very productive, fine table quality; flesh pure white and cooks very dry.

Green Mountain. Oval shape; white skin and flesh; heavy yielder; good for Winter use.

Irish Cobbler. One of the best extra early varieties.

At the time of going to press with this catalogue the Potato market is so unsettled that prices are subject to change.

We request those desiring Seed Potatoes to write for prices on the quantities wanted and we will give quotations by mail.

Unpriced orders will be filled at the prevailing market prices at time of shipment. Potatoes are forwarded by express or freight as directed, purchaser paying charges.

Du Pont Semesan. Potatoes treated with *Semesan* will be freer from disease and yield much larger crops. See page 98.

PUMPKIN

One ounce will plant 50 hills.

The common practice is to drop two or three seeds in every second or third hill in the Cornfield, but if cultivated on a large scale the seed may be sown in hills 8 feet apart each way, four plants to each hill, and otherwise treated in the same manner as Melons or Cucumbers.

RADISH

One ounce of seed will sow 150 feet of drill.

Radishes require a light, loamy soil, moderately fertile, which should be deeply dug and well pulverized. The situation should be warm and sheltered. For an early supply sow in January or February in hotbeds, keeping well ventilated. In May they may be sown out-of-doors. Successive sowings should be made every two weeks. Radishes to be crisp and tender should make a rapid growth.

Winter varieties should be sown in July and August.

MARSHALL'S LAWN GRASS SEEDS

MARSHALL'S "SPECIAL" LAWN GRASS MIXTURE

Marshall's Special Lawn Grass Seed produces a perfect and enduring lawn of luxuriant richness with closely interwoven, firm and elastic turf, and it is usually ready for cutting in six weeks from time of sowing. This Lawn Grass is composed of a combination of various fine-leaved, deep-rooting grasses of interweaving habit, that flourish under our varied conditions, soils and climates, growing during different seasons of the year, so that a deep green, smooth and velvety sward, free from clumps, is maintained without burning brown in Summer.

This mixture contains highest grade recleaned seeds of Red Top, Kentucky Blue, Chewing's Fescue, and Perennial Rye Grasses, blended in suitable quantities.

Price: Lb. 70c., 5 lbs. \$3.25, 20 lbs. \$12.00, 100 lbs. \$60.00.

MARSHALL'S "CENTRAL PARK" LAWN GRASS

Marshall's Central Park Lawn Grass will produce an even, dense growth of permanent sward as early in the season as it is possible to do. This mixture contains no annual grasses for making quick show to the detriment of a good lawn, but only those of lasting value and hardness, which, when once established, need no reseeding for years. Our seed, which we know to be as pure as can be found anywhere, is of the best varieties, best suited for even and permanent growth; it is carefully cleaned and free as it is possible to make it from foreign matter.

1 lb. will sow 25x25 feet (625 square feet); 5 lbs., 50x50 feet (2500 square feet); 20 lbs. 100x100 feet (10,000 square feet); 100 lbs., one acre.

Price: Lb. 50c., 5 lbs. \$2.10, 20 lbs. \$8.00, 100 lbs. \$40.00.

MARSHALL'S "SHADY PLACE" LAWN GRASS

Usually it is quite difficult to obtain a satisfactory growth of grass under trees and in shady places; for sowing in such places we recommend the use of this special mixture. It will quickly produce an abundant and even growth of beautiful green grass. The grasses used in making this special mixture are only those adapted for growing in shade. It has been successfully used on some large operations where a green sward was desired on land partially shaded by old trees.

Price: Lb. 70c., 5 lbs. \$3.25, bu. 20 lbs., \$12.00, 100 lbs. \$60.00.

SPECIAL LAWN GRASS MIXTURE FOR SEASIDE LAWNS

A mixture of fine grasses peculiarly suited to seaside lawns and very sandy soils.

Price: Lb. 60c., 5 lbs. \$2.75, 20 lbs. \$10.00.

MARSHALL'S TERRACE MIXTURE LAWN GRASS

A special mixture of grasses for sowing on terraces and side hills—grasses that produce strong, spreading roots, thus preventing heavy rain from washing them out; that will withstand drought and exposure, thrive on shallow soils and produce a rich, green turf throughout the season.

Price: Lb. 70c., 5 lbs. \$3.25, bu. 20 lbs. \$12.00.

PERMANENT GRASS MIXTURES FOR GOLF LINKS

MARSHALL'S PUTTING GREEN, or TENNIS COURT MIXTURE

A very carefully prepared mixture for use on putting greens, croquet lawns, tennis courts, bowling greens and lawns. This mixture produces a very thick, soft growth, when sown on a well-prepared ground, and mowed short will allow a ball to roll in almost a direct line. We especially recommend this mixture to those who are particular to obtain the very best. Our mixture contains only the very fine-bladed species of grasses without Rye Grass. 25 lbs. will seed a putting green 75 feet square.

Price: 5 lbs. \$4.00, 25 lbs. \$17.50, 100 lbs. \$70.00.

MARSHALL'S FAIR GREEN MIXTURE

Marshall's Fair Green Mixture is composed mainly of perennial native grasses and two very important European grasses which have proven of great value for Fair Green use. They are all of dwarf spreading growth, forming a close velvety surface which improves from year to year if given proper care.

This mixture contains no Clover but will be added if desired in quantity of one-half pound per bushel of grass seed. Sow 100 lbs. per acre.

Price: 20 lbs. \$10.00, 100 lbs. \$48.00.

GRASS FOR HAY CROPS AND PASTURES

MIXTURES FOR HAY AND PERMANENT PASTURES

The results obtained from our special Grass Seed mixtures are well known by the constantly increasing demand for them. Fall seeding is preferable, but Spring sowing will be successful if done early, while the land is cool and moist. In addition to the Grasses, we advise sowing 10 lbs. of Mixed Clover Seed per acre.

We recommend sowing 50 lbs. to the acre.

PERMANENT PASTURE MIXTURE NO. 1. For cool and light soils. Bus. (15 lbs.)

PERMANENT PASTURE MIXTURE NO. 2. For medium soils. Bus. (15 lbs.)

PERMANENT PASTURE MIXTURE NO. 3. For heavy soils. Bus. (15 lbs.)

Prices of any of the above Mixtures, 10 lbs. \$5.25, 50 lbs. \$25.50, 100 lbs. \$50.00.

GRASS SEEDS

For Pasture, Mowing and Lawn

Prices subject to market changes.

	Weight per bush.	Lb.	Bushel	100 lbs.
Bermuda Grass. Used in the southern states for Lawns.....	35 lbs.	\$0.85	\$24.50	\$70.00
Canadian Blue Grass (<i>Poa compressa</i>). A more rapid grower than Kentucky Blue Grass and equally good for pasture, but not as suitable for lawns. This is an excellent pasture grass for poor, dry land and should be more largely used for this purpose.....	14 lbs.	.45	5.00	35.00
Creeping Bent Grass Mixed (<i>Agrostis</i> species). Desirable for mixing with other lawn or pasture grasses.....	15 lbs.	1.30	18.00	120.00
Crested Dogstail (<i>Cynosurus cristatus</i>). Roots fibrous and tufted; perennial. This is a most valuable permanent pasture grass. For parks this grass is well suited because of its fine, close growth and pleasant green color.....	20 lbs.	1.10	20.00	100.00
English Rye Grass (<i>Lolium perenne</i>). Produces a strong growth in four or five weeks after sowing. It cures into a hay that is rather hard, but having a sweet flavor and much relished by cattle and horses. Sow 60 lbs. to acre.	24 lbs.	.30	5.25	21.00
English Rye Grass (Pacey's). A carefully selected, short-seeded, dwarf-growing strain, suitable for lawns.....	24 lbs.	.35	6.00	25.00
Fine Leaved Fescue (<i>Festuca ovina tenuifolia</i>). Suitable for lawns and putting greens.....	16 lbs.	.80	11.50	70.00
Hard Fescue (<i>Festuca duriuscula</i>). A slender, densely tufted perennial grass, 1 to 2 ft. high. Thrives on dry, sandy soils.....	14 lbs.	.50	6.00	42.00
Italian Rye Grass (<i>Lolium italicum</i>). It is a very rapid grower, forms a dense turf, and is regarded as an excellent hay grass.....	22 lbs.	.25	4.25	18.00
Kentucky Blue Grass (<i>Poa pratensis</i>). A very widely distributed species, and without a rival as a pasture grass. Being of perennial habit, it will, when established, last indefinitely. One of the finest varieties of grasses for use in lawns, owing to the thick growth of sod.....	14 lbs.	.50	6.00	40.00
Meadow Fescue, or English Blue Grass (<i>Festuca pratensis</i>). Root creeping; perennial; flowers in July; one of the most valuable of the Fescue grasses. This grass is well adapted for permanent pastures. It grows rapidly in rich and rather moist soils and makes an excellent pasture grass, its long, tender leaves being much relished by cattle. It should be always mixed with other grasses.....	15 lbs.	.55	7.00	45 00
Meadow Foxtail (<i>Alopecurus pratensis</i>). One of the best grasses for permanent pasture, and should always form a fair proportion of the mixtures for that purpose. Thrives best on a rich, strong soil.....	10 lbs.	.60	5.50	50.00
New Zealand, or Chewing's Fescue (<i>Festuca rubra</i>). Resists extreme drought; thrives on inferior soils, gravelly banks and exposed hills. 25 lbs. to acre.	14 lbs.	.60	7.00	50.00
Orchard Grass. A good grass for hay crop, yielding nearly the same amount as Timothy and almost equal in feeding value. Orchard Grass will grow on almost every soil. It prefers a moderately dry soil with considerable sandy material. One of the best grasses for sowing in shady places and among fruit trees in orchards. 35 to 40 lbs. required for one acre	14 lbs.	.35	4.00	28.00
Red, or Creeping Fescue (<i>Festuca rubra</i>). Resists extreme drought, thrives on gravelly banks and exposed hills. Excellent for Lawns and Putting Greens, 25 lbs. per acre.....	14 lbs.	.60	7.00	50.00
Red Top, Fancy Cleaned (<i>Agrostis vulgaris</i>). A highly recommended grass for permanent pasture and as meadow grass for hay. Red Top is especially valuable for sour and acid soils, and meadow lands. Red Top makes one of the best grasses for lawn use, either sown alone or in connection with White Clover, or in a mixture with other grasses. Use 14 to 16 lbs. to acre.....	30 lbs.	.60	15.00	50.00
Rough Stalked Meadow Grass (<i>Poa trivialis</i>). A spreading, stoloniferous rooted grass. Adapted for shady lawns and pasture mixtures.....	14 lbs.	.75	9.25	65.00
Sheep Fescue (<i>Festuca ovina</i>). A small tufted, hardy grass, of value in mixture for lawns or dry soil.....	14 lbs.	.50	6.00	42.00
Tall Meadow Oat Grass (<i>Avena elatior</i>). A fibrous-rooted perennial; flowers in July; of luxuriant growth, and valuable in permanent pasture on account of its early and late growth.....	10 lbs.	.25	2.25	20.00
Timothy, or Herb Grass (<i>Phleum pratense</i>). The standard hay of commerce. The excellent quality of the hay and the ease of culture make it valuable. It is adapted to most soils, but succeeds best on moist loam and clay. Timothy sown alone requires about 20 lbs. per acre; when sown with Red Clover use 15 lbs. Timothy and 5 lbs. Red Clover.....	45 lbs.	.20	6.00	13.00
Wood Meadow Grass (<i>Poa nemoralis</i>). Excellent for shaded positions in lawns and woodland parks. Very hardy, resisting extremes of heat and cold.	14 lbs.	1.00	12.00	85.00

OATS

Sow 2 to 3 bushels to the acre, 32 lbs. to the bushel.

Storm King. The heads measure from 8 to 10 in. and the kernels are of immense size, thick, plump and heavy. It is very early, has great length of straw, producing 70 bushels per acre. We can safely say it is the greatest producer of any variety of Oats grown in this country. Bus. \$2.75, 10 bus. or over \$2.50 per bus.
Canada Cluster. A very early variety with long straw and thick, plump heavy grains. A true side Oat and heavy cropper. Bus. \$2.50, 10 bus. or over, \$2.25 per bus.
Swedish Select. A strong grower, grain rather short, plump and heavy. Yields well on any soils and under varied conditions. They have a stiff straw and are a branching variety with a great root development. Bus. \$2.75, 10 bus. or over, \$2.50 per bus.

Prices on all Farm Seeds are subject to market fluctuations.

PEAS

Canada Field. Valuable for cattle feeding. Also used for ensilage. Sown broadcast in the Spring at the rate of two bushels to the acre. Pk. \$1.50, bus. \$5.50.

Cow Peas, Clay. This variety is of extra strong growth and specially adapted for sowing in Northern States. Sow 2 bushels per acre, 60 lbs. per bushel. Bus. \$6.00.

Cow Peas, Whippoorwill. A very early maturing variety of upright or bush growth. Bus. \$6.50.

RAPE

Dwarf Essex. Fine for sheep pasture; valuable as a soil enricher. Plant in June or July in drills at the rate of 3 lbs. per acre, broadcast 5 lbs. per acre. Can be planted alone or with other forage crops. Lb. 25c., 100 lbs. \$15.00.

RYE

For grain, 1 bushel to the acre; for forage or soiling, 1½ bushels, 56 lbs. to the bushel.

Spring. This is excellent for a catch-crop, as it may be sown somewhat later than other grains and produces an abundance of green feed in the Summer season. Pk. \$1.25, Bus. \$4.50.

Giant Winter. This variety is fast gaining in popularity as a cover crop. If allowed to mature will produce a heavy crop of grain, and a fine quality of straw if cut about July 1. Pk. \$1.00, bus. \$3.50.

New Rosen. A four-row Winter variety introduced in Michigan. Pk. \$1.25, bus. \$4.00.

SORGHUM

Early Amber Sugar Cane. The earliest and most productive variety. Height, 10 to 12 ft. For ensilage or fodder it possesses good qualities; stock of all kinds relish it. Sow 7 lbs. in drills, or 15 lbs. broadcast, to acre. Lb. 15c., 100 lbs. \$12.00.

SUDAN GRASS

A new forage crop of immense value. Sudan Grass is strictly an annual and dies each year like Millet and must be seeded again each Spring. Sudan Grass reaches a height of from 7 to 9 feet, yet the stems are small and tender. The plant stools wonderfully and produces under favorable conditions as many as 100 stalks from a single root. The seed should not be planted until the soil has become warm in the Spring, and preferably on warm, light soil. Sow in drills 2 to 3 lbs. per acre; broadcasted, 16 to 24 lbs. per acre. Cut just after bloom, so ample time may be had for second growth. Lb. 25c., 100 lbs. \$20.00.

SUNFLOWER

Mammoth Russian. Very productive, large heads with large seeds. Valuable for poultry; 5 lbs. will plant 1 acre. Lb. 25c., 25 lbs. \$4.50, 100 lbs. \$16.00.

Prices on all Farm Seeds are subject to market fluctuations.

DU PONT SEMESAN

Accelerates Seed Germination. Stimulates Plant Growth. Controls Diseases. Increases Crop Yields.

Semesan, a complex organic mercurial, while primarily a disinfectant for the control of seed borne diseases, possesses at the same time the remarkable properties of accelerating and increasing germination, producing more vigorous seedling growth and increasing crop yields from 5 to 40 per cent. It is suitable for the treatment of field, truck, forage and cereal crops, as well as flowers, grasses and ornamental plants. Applications of Semesan by either the dusting or liquid methods will in no way harm the seed germ.

Price 60c. per 2 oz. bottle; 4 oz. bottle, \$1.00; \$1.60 per 8 oz. can; 1 lb. can, \$2.75; \$13.00 per 5 lb. can; 25 lb. can, \$62.50.

Semesan Booklets on Request

Winter Vetch

VETCHES, OR TARES

Spring Vetches (*Vicia sativa*). Highly valuable for soiling or for green manuring. Sometimes grown with Oats for mowing and feeding to stock. Use 40 to 60 lbs. to the acre. Sow in Spring while ground is cool and moist, or in early Autumn. Lb. 15c., 100 lbs. \$10.00.

Winter Vetches (*Vicia villosa*). Also called Sand Vetch, or Hairy Vetch. Recommended for Fall sowing with Rye. A valuable food for stock in early Spring. Use 30 to 50 lbs. per acre. Lb. 30c., 100 lbs. \$25.00.

WHEAT

The seed Wheat we offer is grown in Pennsylvania by a very reliable grower, especially for seed purposes. Sow 1½ bushels to the acre.

Marquis Spring. A very early beardless Wheat that succeeds well in the East, producing larger yields than any other kind. Sow as early as possible about 2½ bushels per acre. Bus. \$4.50.

Leap's Prolific. A very hardy, beardless, white chaff and dark amber grain. Straw long and stiff and ripens early. Market price.

Pennsylvania 44. A bearded, large red variety originated at the Pennsylvania State College Experiment Station some years ago. Market price.

Trumbull. A medium size, red hard grain, beardless, great yielder, and stands up well. Market price.

Marshall's Matchless Flower Seeds

ALL FLOWER SEEDS ARE MAILED FREE AT PACKET, OUNCE AND POUND RATE TO ANY POST OFFICE IN THE UNITED STATES

The following list contains a most complete assortment of the choicest and most popular flowers for either conservatory, greenhouse or garden culture.

Annuals grow from seed, flower, mature their seed, and die in one year, or, in other words, the same season.

Hardy Annuals are those which can be sown in the open ground.

Half-Hardy Annuals are those which should be started early in the house, conservatory or hotbed, and transplanted to the garden in settled warm weather.

Biennials grow from seed, sown from June to August, flower, ripen their seed and die the next year, though some varieties bloom the same season if sown early in gentle heat.

Hardy Biennials will winter in the open ground without protection.

Perennials grow from seed, and continue flowering annually for many years after the first season. Some varieties flower the first season if planted early in gentle heat.

Half-Hardy Biennials require the protection of a coldframe or cool house during Winter.

Hardy Perennials can remain in the open ground during Winter without protection.

Half-Hardy Perennials require the protection of a coldframe or cool house during the Winter.

Tender or Greenhouse Perennials require window or greenhouse culture, free from frost during Winter and thrive in the garden during the warm months.

ASTERS

Plants from seeds sown in the open ground in May bloom finely in September and October, when the flowers are seen at their best. For July and August flowers sow in March or April, in coldframe, spent hotbed, or pots and boxes in the house. Cover the seeds about half an inch deep with rich, light soil, and when the plants have three or four leaves, transplant about 18 inches apart each way into well-prepared beds.

SWEET PEAS

There are no Annual Climbers that are more popular or more admired by everybody than Sweet Peas. They are of the easiest culture, unrivaled for cutting, delightfully fragrant and of the brightest and daintiest colors imaginable. As soon as the ground can be worked in the Spring, sow the seed in trenches at least 6 inches in depth, then as the plants grow fill in the soil about one inch at a time until the trenches are full, taking care not to cover the young plants. Liquid manure applied occasionally will be found very beneficial. Pick the flowers frequently, for if allowed to form seed the plants will soon stop blooming.

MARSHALL'S SPENCER TYPE SWEET PEAS

The Spencer Types of Sweet Peas are a great improvement over the large flowering varieties. For cutting and exhibition purposes they are indispensable. The following varieties are a selection of the many kinds of this class best adapted for general use.

Afterglow. Reddish-mauve, violet wings.
Annie Ireland. Pure white, edged terra cotta pink.
Apple Blossom Spencer. Rose standards, blush rose wings beautifully waved.
Asta Ohn. Lavender, tinted with mauve.

See pages 56, E, F, G, and H, for color plates, description and prices.

LYCORIS purpurea

An introduction from Japan, but now very scarce. The foliage is produced in Spring and ripens up in August, after which the flower stalks appear, producing flowers in clusters of 6 and 8 flowers of 6 petals each. The bud is wine color, changing to royal purple when expanded, giving a startling and beautiful effect. Perfectly hardy. 2 feet high.

Strong Flowering Bulbs. Each \$1.00, doz. \$10.00.

LYCORIS squamigera

A perfectly hardy bulb of the Amaryllis family. They produce attractive green foliage in the early Spring, which later dies away, and about a month later the flower stalks appear, growing about 2 feet high and developing an umbel of large Lily-shaped delicate pink flowers shaded with clear blue.

Extra Large Flowering Bulbs. Each \$1.00, doz. \$10.00.

Ismene calathina grandiflora

ISMENE (Calathina Grandiflora)

One of the best of our Summer flowering bulbs. Clusters of large, fragrant, pearly white flowers, resembling the Amaryllis family.

Large Bulbs. Each 25c., doz. \$2.50, 100 \$16.00.

MADEIRA or MIGNONETTE VINE

A rapid growing, beautiful and popular vine, covering a large space in a short time. Heart-shaped leaves of a light green, with numerous racemes of feathery flowers of delightful fragrance.

HARDY GARDEN LILIES For Spring Planting

One of our specialties is "The Lily," and on that most interesting subject we have compiled the most comprehensive catalogue ever published and wherein all details of planting and culture will be found, including colored plates of nearly all the varieties in commerce. Owing to the great expense incurred in producing this valuable Lily book we are obliged to charge one dollar for same, which will be credited to the purchase of the first order for Lilies to the amount of three dollars or over. This means that credit slip for one dollar received with book should be sent with your first order for three dollars or over.

TRITOMA RUFA

The New Everblooming

~ *Tritoma* ~

THERE is nothing more dainty than a vase of this beautiful new Tritoma. The stems are so long that they can be placed in a deep and narrow vase where, with the natural bend to the stalk, they will attain a neat and graceful attitude without any arrangement.

The color is so sweet and pleasing that it adapts itself to any surroundings.

A remarkable feature of this Tritoma, unlike all others, is that it will commence blooming late in June and will continue to throw up its flower spikes until cut down by frost, although it is not affected by light frosts. From individual plants as many as 25 flower stalks have appeared in one season.

We would recommend planting in a well drained situation, and a mulching of manure should be applied as a protection in Winter. Otherwise they should be lifted and placed in a cool cellar with a covering of soil or planted in a coldframe.

ROSES—Hybrid Tea, or Everblooming

This selection will produce a mass of Roses to cut from the entire season. The plants are American, two-year-old, and the varieties are the very best for outdoor culture; invaluable either for display or cutting and are hardy with protection.

Being almost as hardy as the June Roses, they can be treated in a similar way with regard to pruning. All strong, American two-year-old field grown plants, \$1.00 each, \$9.00 for 10.

SUGGESTIONS FOR SPRING PLANTING OF ROSES

The soil should be thoroughly cultivated and a liberal supply of rotted manure added. In planting, dig a hole sufficiently large to accommodate the roots when spread out on the bottom of the hole. In filling in the soil, shake the plant lightly in order that the soil may mix between the roots. Fill in the soil and firm it in order that the plant may be solid. Be sure to see that the lower parts of the lower branches are below the surface of the soil. Do not plant in a mound, the surface should be level. Cut back the branches to within 4 to 6 inches of the surface of the ground. With this treatment the best results may be obtained.

FRUIT TREES

Planting.—Make the holes large enough to admit the roots without cramping or bending, and deep enough to set the trees to their natural depth. Fine surface soil should be used for covering the roots, and this should be carefully mixed among them. If the ground is dry, it is well to pour in some water when the hole is partially filled. See that the ground is firmly and solidly packed over all parts of the roots. Fill the holes full enough to be even with the surrounding surface after the fresh earth settles. Never use manure in contact with the roots.

BAMBOO LAWN RAKE

A Superior Make

This rake cannot be compared with the cheaper quality that is often offered. The head is wired top and bottom and has a four-foot wood handle clamped onto the rake.

Made with split bamboo. Very light and flexible; for raking leaves, grass or paths. An excellent rake for removing crab or August grass in lawns.

Each \$1.00.

HOOVER LAWN RAKE

The teeth of this rake are made with flexible steel spring wire and will fit into any irregularities on the surface of the ground, taking all leaves, dead grass or refuse without any injury to the living grass. Each \$1.00.

"KONGO" COIR BASS BROOM

This broom is made with Coir Fibre with a metal case fastening. It sweeps fine, is tough, impervious to hot or cold water and does not dry up and break off. Makes a fine broom for stable, garage, greenhouse work, also for cleaning gutters on roads. Each \$2.00.

ADJUSTABLE GARDEN CULTIVATOR

The most useful hand garden tool on the market.

It will pull out the weeds, pulverize the ground thoroughly, leaving it level. It will work between the rows, or the center shovel can be removed and straddle the row if desired. It is adjustable in width by sliding the top plate. It is the lightest, weighing but 3 lbs. complete with long handle. The blades are forged out of a solid steel rod. 3 prong, \$1.00; 5 prong, \$1.25.

No. 4 Planet Jr. Combined Hill and Drill Seeder Wheel Hoe, Cultivator and Plow

No. 4 complete\$18.00

No. 4 D, as a Seeder only..... 14.25

Does the work of almost all garden tools combined. It sows accurately all garden seeds in drills or in hills 4, 6, 8, 12 or 24 inches apart, cultivates, furrows and plows.

No. 25 Combined Hill and Drill Seeder and Double Wheel Hoe

As a seeder it will sow in drills any thickness or drop in hills 4, 6, 8, 12 or 24 inches apart. It is thoroughly substantial and is accurate in planting all kinds of garden seeds in either hills or drills.

As a wheel hoe it is practically the same as the admirable Planet Jr. No. 12 Double Wheel Hoe, Cultivator and Plow. No. 25, complete, \$21.50.

No. 26 Planet Jr. Drill Seeder

A new seeder that will sow large or small seeds. Hopper holds 4 qts. Has automatic shut off. \$20.00.

No. 11 Planet Jr. Double Wheel Hoe, Cultivator

Price, with attachments, as in cut, \$13.75.

No. 12 Double Wheel Hoe, Price \$10.75

This is identical with No. 11 Wheel Hoe, except that it has one pair plows, one pair hoes, two pair cultivator teeth and a pair of leaf lifters only.

No. 16 Planet Jr. Single Wheel Hoe

Price, with attachments, as in cut, \$9.00.

No. 17 Single Wheel Hoe, Price \$7.75

The No. 17 has a pair of 6-inch hoes, a plow and a set of cultivator teeth, an outfit sufficient for most garden work.

No. 18 Single Wheel Hoe, Price \$5.75

Has one pair of 6-inch hoes only—the tools that are most constantly useful. Other tools can be added as needed.

No. 35 Seeder Attachment

The above can be attached to any Planet Jr. Single or Double Wheel Hoe. The Hopper holds a pint of seed, is indexed for all the principal seeds and will sow the last seed, so that a small packet can be sown without waste. Price, \$6.50.

PLANET JR. TOOLS.—Continued

TOWNSEND TRIPLEX LAWN MOWER

Made with three units of 30 inches each, cutting a swath of 86 inches, \$380.00.

COLDWELL'S COMBINATION ROLLER AND MOTOR LAWN MOWER

Simplicity more than anything else has been sought in these models. Mechanical experience is not necessary to operate them and they can be cared for by anyone.

In using these machines you simply have to guide the mower, negotiating any grade that a horse-mower can be used on, and running a keen 30-inch or 35-inch cutter over 6 or 8 acres per day. Model "H" weight 850 lbs. Model "G" (same type), 35-inch cut, weight 1000 lbs.

The operating handles are also used for raising and lowering the cutter unit over obstacles.

Model G, 35 in., \$475.00. F. O. B., Newburgh, N. Y.

Model H, 30 in., \$425.00. F. O. B. Newburgh, N. Y.

60 inch cut, \$345.00, f.o.b. Newburgh, N. Y.

Grass Catcher for Model R, \$20.00.

COLDWELL ELECTRIC LAWN MOWER

A simple, inexpensive power lawn mower for use on lawns which are not extensive enough to warrant the purchase of a gasoline mower. The electric mower is simple, clean and quiet. The plug will attach to any light socket and current is controlled by push button on the handle. The supply cable is carried on a reel which pays out and takes up automatically.

It has a five-blade revolving cutter and all gear drives enclosed in dustproof housings and run in oil. 150 feet of supply cable on reel. Weight 157 lbs. Width of cut 21 inches.

Price, \$240.00, f.o.b. Newburgh, N. Y.

Grass Catchers, \$6.00.

THE IDEAL POWER LAWN MOWER

The most popular and the most adaptable of the "Ideal" line. Cuts a 30-inch swath. Rolls as it cuts. Will cut six to seven acres per day. Loosely suspended cutting unit tilts to ride over any irregularity of ground. A general purpose mower that cuts close to trees, shrubbery and flower beds. Mechanically simple—fool-proof—easy to operate.

Either the Model 30 or the Junior rolls as it cuts, thereby insuring a smooth, velvety lawn. All unsightly bumps are leveled, and there is no marring the lawn with hoof-prints or mutilation of shrubbery, as is the case with horse-drawn mowers and rollers. Weight 630 lbs.

DU PONT SEMESAN

Semesan is the most effective all-purpose seed and plant disinfectant on the market. The use of this remarkable mercuric compound, either in dust or liquid form, not only provides disease control, but accelerates seed germination, invigorates seedling growth, insures sturdier stands and produces larger, more beautiful flowers, foliage and vegetable crops.

Semesan will control such disease organisms as "damping-off" of seedlings, stem rot of Carnations and root rot of Violets, which are borne in the greenhouse, coldframe and seed bed soils. When choice tubers or bulbs have been cut accidentally or in separation, Semesan will protect them from storage molds or rots. It is being increasingly used for the disinfection of cuttings, graftings, tools and general equipment used in agricultural operations.

Model No. 8 is similar to No. 6, only that it has fifteen outlets, and with a water pressure of 35 lbs. will cover an area of 24x50 feet and is 22 inches long. Each \$18.00.

RAINMAKER LAWN SPRINKLER

This sprinkler is made on the turbine principle, the water coming from the nozzle strikes the turbine paddle on the wheel causing it to revolve. As the turbine wheel revolves it travels around the circular base carrying the jet around about eight times per minute. With a pressure of 40 lbs. it will cover a space of 300 sq. yds. Each \$25.00.

RED DEVIL LAWN SPRINKLER

The "Red Devil" Sprinkler is the only correct method of watering your lawn or garden evenly without waste of water. It sprays perfectly, throwing seven streams from each head that break into a mist-like cloud. This assures perfect watering and causes the water to penetrate instead of laying in puddles.

It can be made to revolve at any speed, or made stationary by the mere tightening of the set screw collar below the arms. Setting the water heads at different angles will cause the atomizer to irrigate over a large or small area. When set correctly it will cover an area of 70 feet. **Red Devil, No. 151.** Each \$12.00.

GIANT RAIN KING LAWN SPRINKLER

This Sprinkler is adjustable to height as well as distance, direction and volume of water. It plays like a gorgeous spiral fountain in any circle up to 90 feet. Easily locked so it won't revolve, or will throw water in 1, 2, 3 or 4 directions. Each nozzle works independently, throwing solid stream or any desired spray. It stands 4 feet high and has 20-inch arms. Price \$14.00.

Inoculate Your
Alfalfa, Clovers, Cow Peas, Soy Beans, Vetches
and
Other Legume Crops
WITH
Mulford Cultures
FOR LEGUMES

Small Cost Large Returns Easy to Use No Labor Expense

Mulford Cultures contain pure, tested strains of active, vigorous nitrogen-fixing bacteria for inoculating seeds of legumes or soil.

Mulford Cultures are "different" and should not be confused with other brands.

Legumes offer the best known means of maintaining soil fertility and rejuvenating overcropped and wornout fields. They add both humus and nitrogen to your soil and thus increase your yield of wheat, cotton, corn and other non-legume crops.

The U. S. Dept. of Agriculture and many State Agricultural Experiment Stations recommend inoculation of legumes with nitrogen-fixing bacteria to induce a prompt "catch" and increase your yield.

Mulford Cultures are prepared for:

Alfalfa Lucerne	Red Clover	Cow Peas	Vetch	Garden Peas
Crimson Clover	Alsike Clover	Soy Beans	Velvet Beans	Garden Beans
Sweet Clover	Bur Clover	Peanuts	Sweet Peas	Lima Beans

Always specify on your order what crop you want to inoculate, as there is a different strain of bacteria for each legume.

Garden Size for Peas, Beans, Lima Beans and Sweet Peas, 35c.

For Large Seeds, Soy Beans, Cow Peas, etc. 1 bus. size 60c., 2 bus. size \$1.00, 5 bus. size \$2.25, 20 bus. size, \$8.00.

For small seeds, Alfalfa, Clovers, etc., $\frac{1}{2}$ bus. size 60c., 1 bus. size \$1.00, $2\frac{1}{2}$ bus. size, \$2.25, 10 bus. size \$8.00.

NEW RED-LEAVED
JAPANESE BARBERRY

W. E. MARSHALL & CO., Inc., 150 West 23d St., New York City

NEW RED-LEAVED JAPANESE BARBERRY

IT IS only once in a lifetime that a really worth-while, outstanding novelty in hardy shrubs is introduced, and in this new Barberry we have such a plant.

It is similar in all respects to the green-leaved Japanese Barberry which is so popular for mixing in the shrubbery border, as single specimens, or for planting in clumps on the lawn, as well as for foundation plantings and for hedges, but the foliage of this new variety is of a rich, lustrous, bronzy red, similar to the richest red-leaved Japanese Maples. However, unlike these and other colored shrubs in which the coloring fades or disappears entirely as the season advances, this new Barberry becomes more brilliant and gorgeous throughout the summer, and in the fall its foliage changes to vivid orange, scarlet, and red shades, more brilliant and more effective than in the ordinary Japanese Barberry. In this coloring it is unequaled by any other shrub and is followed by the same brilliant scarlet berries common to the type, which remain on the plant the entire winter.

All that is required to develop its brilliant coloring at all seasons is that it be planted in full exposure to the sun.

1-year plants 75 cts. each, 10 for \$7. 2-year plants \$1.25 each, 10 for \$11.
3-year-old specimen plants \$2.50 each, 10 for \$20
