Announcement!

SEATTLE'S NEW AIRPORT will displace our old Duwamish Avenue Nursery alongside the Tacoma Interurban tracks. Because of this adjustment our Ellis Avenue Nursery, adjoining the airport on the north, will be the scene of exceptional nursery stock values, to which we commend the attention of our many customers.

¶ The increasing business with which we have been favored during the past thirty-five years bespeaks the confidence of a discriminating patronage appreciating the true economy of dependable nursery stock, seeds and bulbs. We cordially invite inquiries and will be pleased to receive suggestions that may assist us in further improving service to our customers.

How To Order:

Local Customers: You may order by telephone. Shopping from your home is facilitated by our telephone order department. It provides you with a quick and efficient method of placing your order which will receive the same careful and prompt attention by our experienced nurserymen and seedsmen as if you were present.

Mail Orders: Fill out order sheet carefully, sending in same as soon as convenient after receiving this catalog. Nursery Stock, Seeds and Bulbs should have the desired quantity written distinctly in the column provided for that purpose, with price after each item.

Packing and Shipment—We are especially equipped for packing Nursery Stock and Seeds for long distance shipping. We have had thirty years experience in handling goods of this class and pack to insure arrival at destination in good condition regardless of distance.

Freight—On Nursery Stock orders of \$10.00 or more we prepay freight charges to any point within 50 miles of Seattle. On orders for less than \$10.00 add enough to cover transportation.

Parcel Post.—Parcels weighing 8 oz. or less containing seeds, cuttings, bulbs, roots, scions and plants, 1 cent for each 2 oz. or fraction thereof, regardless of distance.

Other parcels of fourth class matter are chargeable according to distance zone as follows:

The limit of size of a package that will be accepted by parcel post is 84 inches in length and girth combined. Larger packages must be forwarded by express or freight.

TERMS—Cash with order. Send remittances by Money Order, Draft or Registered Letter.

We exercise the greatest care to furnish seeds, bulbs, plants, shrubs and trees that are pure and reliable, but owing to the various conditions of climate, soil and cultivation attending success, we do not warrant in any way, express or implied, the description, purity, productiveness or any other matter of any seeds, bulbs, plants, shrubs or trees sold by us, and we will not be in any way responsible for the crop. If the purchaser does not accept these goods on above terms, no sale is made thereof and the goods must be returned to us at once and the money will be refunded.

Flowering Bulbs For Fall Planting

There are no flowers which will give more pleasure and satisfaction than the Winter and Spring Flowering Bulbs. Their culture is so simple and easily understood that anyone can have splendid success with them by exercising a little care and forethought. On the Pacific Coast most bulbs may be planted from October to February. Bulbs planted in October or November will give better results than if planted later. By planting early flowering bulbs, it is possible in our mild climate to have a continuation of flowers the year round.

Tulips

The climate on the Pacific Coast is ideal for the growing of Tulips. They may be left in the ground from year to year, otherwise the directions for culture are the same as for hyacinths, except that tulips cannot be grown in water.

EARLY SINGLE TULIPS

The following list is made up entirely of the best varieties, all of which are suitable for either forcing or bedding. We import only the highest grade first size bulbs which always give the best results. **Malmö pays the postage.**

Breeder Tulips

The Breeder Tulips have been favorites in Holland for centuries, but it is only within recent years that they have become known in America. Their majestic size and remarkable colors place them distinctively in a class by themselves. Many of the flowers are sweet scented, and all are splendid for cutting. They are also very effective in combination with the Darwins, flowering late in May.

BREEDER TULIP—Louis XIV

BRONZE QUEEN. Soft bronze outside petals, with inside petals a golden hue; an exceptional color combination greatly admired at recent flower shows. **Doz. 85c; 100 \$6.50.**

CARDINAL MANNING (New). Dull wine-red flushed with rosy bronze, changing to rosy violet. A very large flower. **Doz. 85c; 100 \$6.50.**

CORIDION. Clear yellow, overlaid with a broad stripe of lilac through center of petals. A tulip of rare form and beauty. **Doz. \$1.25; 100 \$9.50.**

DON PEDRO. Coffee-brown and maroon, shaded with old gold; robust in habit and a fine cut flower. **Doz. \$1.00; 100 \$7.50.**

FEU ARDENT. Flashing fiery red blending into deep red at base; excellent forcer. **Doz. \$1.25; 100 \$9.50.**

HAMLET (New). Dull coffee-brown with a faint flush of rosy purple through center of petals; inside dark brown with yellow base. A flower of good size and distinct color. Splendid for contrast with paler tulips. **Doz. 85c; 100 \$6.50.**

INDIAN CHIEF. Reddish mahogany flushed purple with yellow base; a huge flower of wonderful substance and most artistic shape carried on a very tall strong stem. Always a triumphant entry at spring flower shows. **Ea. 75c; Doz. \$7.50.**

LA SINGULIERE. White changing to wine-red. **Doz. \$1.00; 100 \$7.50.**

LOUIS XIV. Gorgeous rosal purple flushed golden bronze, with broad margin of golden-brown; very large, globular flowers with green black base starred yellow. Creates a sensation wherever shown. **Ea. 15c; Doz. \$1.50; 100 \$11.50.**

MARKGRAAF. Inside orange, outside scarlet and yellow. **Doz. 65c; 100 \$5.00.**

PERFECTA. Yellow, scarlet feathered. **Doz. 65c; 100 \$5.00.**

MALMO'S PARROT TULIP MIXTURE. All colors. **Doz. 60c; 100 \$4.50.**

Rembrandt, Bybloem, Bizarre Tulips

These flower at the same time and are somewhat similar to the Breeder and Darwin Tulips, but do not grow so tall and are quaintly and very attractively striped and feathered in contrasting colors. They appear especially to advantage in clumps among shrubs or in a border.

REMBRANDT TULIPS. All colors mixed. **Doz. 75c; 100 \$5.50.**

BIZARRE. Choice mixture of varieties. **Doz. 75c; 100 \$5.50.**

BYBLOEM. All colors mixed. **Doz. 75c; 100 \$5.50.**

PARROT TULIP—Lutea Major

Crocus

CROCUS

This is the earliest bulb to blossom in spring. Although most showy when massed in large beds, or when planted in lines of distinct colors, a very desirable effect is produced by setting Crocus here and there over the lawn.

Crocus will care for themselves, blooming very

early amid the grass and dying down to the bulb in ample time to be entirely out of the way of the lawn mower. The Crocus should be planted in the autumn, in any good garden soil, about three inches deep and about two inches apart, if in beds or borders.

ALBION. Fine purple variety. Good for planting generously in lawns. Doz. 35c; 100 \$2.00; 1000 \$15.00.

BARON BRUNOW. Blue-mauve, large spring blooming variety. Doz. 35c; 100 \$2.00; 1000 \$15.00.

CAESAR. Huge purple flower; appears well as a garden border. Doz. 35c; 100 \$2.00; 1000 \$15.00.

KING OF THE WHITES. Pure white; very large handsome. Doz. 35c; 100 \$2.00; 1000 \$15.00.

LOTHAIR. Lilac striped with purple, very dainty. Doz. 35c; 100 \$2.00; 1000 \$15.00.

MAMMOTH YELLOW. Rich deep yellow. Very fine for planting in sunshine, or blending with white varieties.

Select size XX; Doz. 45c; 100 \$3.00; 1000 \$25.00.

First size; Doz. 35c; 100 \$2.00; 1000 \$15.00.

MIKADO. Lilac deeply flushed with mauve stripes on inside. Very fine for planting with other colors. Doz. 35c; 100 \$2.00; 1000 \$15.00.

PALLAS. Blue with white stripes; large flowers, which produce lovely effects in rock gardens. Doz. 35c; 100 \$2.00; 1000 \$15.00.

PURPUREA GRANDIFLORA. Deep purple, large flowers of very rich color. One of the earliest. Doz. 35c; 100 \$2.00; 1000 \$15.00.

SECTION OF FIELD OF TULIPS IN TRIAL GROUNDS AT OUR GEORGETOWN NURSERIES

Mammoth Single Hyacinths

Single Hyacinths are more desirable than the double. They are better for forcing, more vigorous in growth and are more beautiful than those of the double sorts. Customers at a distance will find it convenient to order bulbs by mail. MALMO PAYS THE POSTAGE.

OUTDOOR CULTURE. The bulbs may be planted any time from October to February. They succeed in any good, well drained garden soil. Dig deep and mix in a little fertilizer. Set the bulbs so that the tops will be between two and three inches below the surface and six to ten inches apart, with a little sand under and above them if it is convenient, being careful that none of the fertilizer comes in direct contact with the bulbs. Early planting brings the best results.

POT CULTURE IN THE HOUSE. Plant from September to December in rich, sandy loam, inserting the bulb (base downward) so that the top is just above the surface. Do not pack the soil in the pots, as the bulbs will be much less liable to push out when the root growth commences if the soil is not packed. Water thoroughly and set the pots away in a cool, dark place for three weeks. This will allow the roots to grow and become firmly fixed in the soil. The plants can then be brought into the light and will at once commence the top growth. Keep near the light, and at a temperature of 50 to 70 degrees. Water frequently.

WATER CULTURE. Fill the glass with water until the base of the bulb rests on the water. Set away in the dark for three weeks. Fill up the glass with water as fast as it evaporates. If the water becomes impure it should be changed and the roots well cleaned before putting in again. A small piece of charcoal put in the glass will keep the water pure much longer. Give as much fresh air as possible without a direct draught, plenty of light and keep the glasses full of water. If moved out of the direct rays of the sun, flowers will last longer.

Malmo's Water Lilies

CULTURE—The water garden, whether a formal concrete pool or just a tub in the corner of the garden, is a source of continual interest and beauty, and requires, perhaps, less effort for the result than anything else in the garden. The essentials are as near as possible one foot of rich garden loam and one foot of water.

*—Adapted to small pools.

†—Adapted to medium sized pools.

CONQUEROR. Immense floating dark red blooms streaked with white on the outer petals. Nine inches across; heavy leaves 12 to 14 inches. One plant will carry as many as 15 buds and blooms at one time. A strong grower requiring an eight-foot space. Each \$5.00.

ESCARBOUCLE. Large, brilliant, red floating blossoms; strong grower requiring an 8 ft. space. This lily attracted more attention than any other last summer on account of its brilliant coloring. Each \$7.50.

EUGENIE DE LAND† (See photo No. 3) Pink floating flowers 5 to 6 inches across. A strong grower. Each \$2.00.

HELEN FOWLER† (See photo No. 2.) A light pink bloom borne about 3 inches above the surface of the water; not as desirable as other varieties. Each \$1.00.

JAMES BRYDON* Floating cup shaped flowers, dark rich, reddish rose. A splendid bloomer of beautiful color. Foliage of this variety a bronze red. Each \$3.00.

LAYDEKERI LILACEA* Deep, pink flowers, 3 to 5 inches across. Suitable for tub culture. Each \$1.50.

MARLIAC ROSEA† (See photo No. 1.) Very large light pink, floating flowers. A free bloomer and one of most popular varieties. Each \$2.00.

MARLIAC WHITE (ALBIDA) † (See photo No. 4.) Floating large pure white flowers. A good bloomer. Each \$1.50.

MARLIAC YELLOW (CHROMATELLA)† (See photo No. 5.) Floating large bright canary yellow flowers. Foliage deep green mottled brown. Each \$2.00.

ROSE AREY* One of the most beautiful bright pink lilies. Very fragrant floating blooms from 6 to 8 inches across, borne in succession all summer. One of the most admired pinks and one which we strongly recommend. Ea. \$3.00.

SIoux* Floating flowers of deep apricot, rose in center. Outer petals slightly flushed with rose. Very attractive and especially good used with Marliac Yellow. Each \$2.50.

Poeticus and Poetaz Narcissus

POETAZ NARCISSUS—Alsace

The Poeticus Narcissus are probably the best known of the short trumpet or cup class. They have only one flower on a stem, but are very hardy and multiply rapidly in the ground. They also force well. The blossoms of the Poetaz class are somewhat similar to the Poeticus and borne in clusters of three to eight flowers on the stem.

Customers at a distance will find it convenient to order by mail. **Malmo pays the postage.**

Lily of the Valley

One of the most charming spring flowering plants, producing in profusion its delicate bell-shaped, delightfully fragrant white flowers. They thrive best in a rich sandy soil and a shady situation — are perfectly hardy and can be left undisturbed in the open ground, where they will increase from year to year, and are very attractive in beds or borders. For outdoor planting and winter forcing pips are ready December to March.

SELECTED PIPS, for forcing indoors or planting outside. Doz. 75c; 100 \$5.50.

SELECTED CLUMPS, for outdoor growing. Ea. 50c.

POETICUS NARCISSUS—Recurvus
(Pheasant's Eye). See page 13.

Japanese Lilies

Lilies planted outdoors during the fall or early spring flower each year from June to October. After bulbs are set out they should remain undisturbed for five or six years. They will increase in size, beauty and number of flowers; our Coast climate being perfectly suited to their requirements. They may be planted in open ground or beds and are very effective when planted in a border either alone or among perennials or shrubbery. **Malmo pays the postage.**

Malmo's Selected Nursery Stock

WHEN AND HOW TO PLANT

Special attention is called to the superior quality of Nursery stock which we supply. Our experience in growing and transplanting Nursery stock in the Puget Sound climate covers over thirty years. This climate is particularly well adapted to a wide range of varieties of Nursery stock that heretofore have been successfully grown only in certain parts of Europe. The varieties range from the hardest to semi-tropical plants. Evergreens thrive especially well in our climate, obtaining better growth and color than in any other part of the world.

Evergreens may be successfully transplanted the year round providing sufficient water is used, but the best time to transplant is early in the fall or late in the spring. Ornamental deciduous trees and shrubs and all kinds of fruit trees and berry bushes may be set out any time after the rainy season commences (generally some time in November) until the first of April. The early planting, however, is much preferable as it gives the trees and plants a chance to establish a new root system before the dry season commences. Plants or trees of any size may be transplanted successfully providing they have been properly cared for in the Nursery. Our stock is transplanted every two or three years, thereby producing a root system on the Evergreens that will hold firmly to a ball of soil, and a mass of fibre roots on the deciduous trees, insuring full success in transplanting.

We make a specialty of large size fruit trees in varieties best adapted to this climate. These are transplanted every year in our nursery to insure a perfect root system and can be set out by the planter as safely as smaller trees. Many of these trees are highly ornamental, producing fruit as well as beautifying the home. Our stock is large and complete. We invite requests for estimates on planting of orchards.

ORCHARD AND GARDEN

The State of Washington ranks among the first in fruit production. With proper care given

to varieties suitable for Western Washington, fruit may be as profitably grown in the Puget Sound section as in the celebrated fruit districts of Eastern Washington.

The Puget Sound climate is adapted to the growing of both sweet and sour cherries, pears and many varieties of apples, including Yellow Transparent and Gravenstein. Western Washington is unexcelled in its production of prunes and plums.

Where one has not sufficient space for an orchard, a few fruit trees in the garden or back yard may be made to yield a high return for the space occupied. Such planting need not exclude the vegetable garden, which may be planted between the trees, and the soil made, with the addition of proper fertilizers, to accomplish double duty production.

The first requisite for the successful growing of trees is proper preparation of the soil. The ground should be plowed or spaded very deeply and thoroughly as the roots will soon gather food from the whole orchard area.

PLANTING

Trees should be heeled in only in a cool shady place. If the trees have, for any reason, before planting, become dried out, they should be buried, tops and all, in a trench which should be filled with water every day for three or four days, or at least soaked in water for a few hours, until the bark is restored to a healthy, plump condition.

The holes should be staked out and dug before exposing the trees. The roots must be protected carefully from the sun and drying winds, as either will very soon wither up the fibrous roots which are necessary for quick and vigorous growth. The holes should be dug from six to twelve inches larger around than the roots of the trees, to allow for filling in a few inches of loose soil, on top of which the tree should be planted to a depth it formerly stood in the nursery row.

Malmo's Bearing Size Fruit Trees

WE SPECIALIZE in the production of large, bearing-size fruit trees, to meet the ever increasing demand from the home orchardist who wishes to have fruit from one to three years earlier than by planting small trees.

This stock has been properly transplanted to insure a good root system and properly trained each year through pruning.

All of these trees are strong and vigorous, and can be strongly recommended. Prices are in accordance with size and development, which are the factors influencing early bearing, rather than age only.

A Ready-to-Bear Fruit Tree

PRUNING

The first object is to establish a balance between the top and the roots, cutting off all bruised and broken branches. The second is to shape the top so as to make a good foundation for a well-shaped tree. Of course, this cannot all be done at one time. It is necessary each year to look after the shape of the tops, selecting such branches as are most desirable for the building of the tree; then cutting off the surplus. This applies especially to fruit trees. For apple trees, it is the general rule to cut back each year one-half of the previous season's growth. Shade trees and other ornamental stock, including shrubs and evergreens, are pruned only for desired shape.

The best time for pruning fruit trees, in the Puget Sound country, is the month of January, and not later than the end of February. On the east side of the Cascades, it may be done one month later. All winter pruning and spraying should be done at the time the trees are dormant.

SPRAYING

The spraying of fruit trees has proven to be an absolute necessity. Lime and sulphur is effective as a dormant spray to eliminate all pests. Generally the first summer spraying of fruit trees is applied by the time the blossoms are dropping, being followed by a second and third spraying, according to the pest to be eliminated. See **spraying table, in general catalog.**

PERENNIALS**Plants that bloom from year to year**

Complete list of popular perennials in general catalog.

While all plants that bloom every year are perennial (per annum) the common meaning refers to hardy garden flowers which die down to the ground at frost, coming up again in the spring and blooming again each year. The growing popularity of this class is not surprising when it is considered they give such an ever changing array of color in the garden without the yearly replacement that annuals require. Most varieties, moreover, remain green all winter in our mild climate.

Perennials of suitable habit may be used to brighten the shrub group or used by themselves in a border in an unlimited number of color combinations according to individual taste.

In nearly all cases better results will be secured if deep rich soil is supplied that is well drained and that is kept continually moist, especially until the plants have become well established. A longer period of blooming is possible if flowers are removed before the seed pods form.

Large Evergreens Being Dug and Packed for Delivery at Our Nurseries

“Evergreens from the Evergreen State”

THE steadily increasing trade with which we have been favored is largely due to our policy of propagating and furnishing only high grade, dependable nursery stock. We aim to deliver only stock that will, with proper care, give entire satisfaction—from the smallest parcel post shipment to the carloads of evergreens we are now shipping to points outside the state.

Propagation is made from the best strains of the finest varieties. Plants are given scientific care to promote healthy luxuriant growth, and are transplanted often to produce compact balls of fibrous roots close to the plants, which is essential to successful planting after delivery. All plants are carefully dug and

packed to insure safety in moving. The photograph above illustrates the balling of large evergreens, each of which weighs several hundred pounds.

We have made a specialty of furnishing large plants for immediate effect, particularly desirable in landscape work. Such material inevitably gives the best results because, through transplanting and trimming, shape and compactness have been built in to these plants at our nurseries.

Over Half a Million Young Evergreens in the Propagating Houses at Our Nurseries in Georgetown

A Section of a Field of Cypress Erecta Viridis at Our Nurseries, a Variety Fast Growing in Public Favor

Our quantity production of high grade nursery stock has effected economies that are reflected in the greater values received by our customers.

The production of nursery stock, unlike most other produce, requires planning several years in advance to supply future demand. It involves continuous propagation through seeds, cuttings, grafts, layers, etc., in season, and requires the carrying of a large stock of hundreds of varieties in various ages and sizes to insure a continuity of supply of mature stock as fast as the same is sold each year. Toward this end we have been adding land, stock, and equipment in developing one of the most complete nursery establishments in the country to render the largest measure of service though the furnishing of reliable products abreast the latest improvements in horticulture.

Malmo's Peonies

Between the magnificent Rhododendron and the lovely June Rose, comes the Peony. It is used in the same way and in conjunction with its two stately rivals, to continue a bold color display from May to July. While in close harmony with the other, the Peony is more lavish in its bloom and makes the most pretentious show; besides which it is harder than either and more easily cultivated. Modern culture has

developed many superb varieties, with the most delicate tints as well as the most intense colors. Their cut blooms are very lasting, and in most cases are exquisitely scented.

Culture. Peonies are of easy culture being extremely hardy and abundantly repaying proper care. They should be planted early in the fall or winter in deep, rich, well-prepared soil, covering the buds but an inch or two. Do not expect too much of them the first year, as they are a little slow in establishing themselves. **Ask for prices on quantity.**

In our superb climate roses attain a perfection seldom equaled anywhere, but we cannot expect them to thrive unless properly planted and cared for. Therefore, to promote more successful rose growing, the following suggestions are offered:

Roses thrive best in a rich, sandy clay-loam but will do well in any good garden soil if properly fertilized, either with well decomposed cow manure or good commercial fertilizer. Roses are great feeders and should be fertilized every season.

On the Pacific Coast roses can be planted any time after they drop their leaves in the fall until late in the spring. Early planting, however, will bring the best results. Upon receiving roses for planting, especially if they appear dry, they should be uncovered at once and heeled-in in a shady place, covering them with soil

half way up the stems. Use plenty of water to wash the soil among the plants.

In preparing for planting, dig or trench in good soil mixed with fertilizer to the depth of two feet. Set the plants deep enough to allow the soil to cover above the graft. Firm the soil down solid and water well to wash the soil in among the roots. Trim the bushes, thinning out the branches to three or four of the strongest, which should be cut back at least one-half of the last year's growth. The trimming should be repeated each year in order to produce better flowers and longer stems.

To prevent mildew roses should be watered only in the morning and not in the evening. This is especially important if the nights are

ROSE MARIE. H. T. Buds long and pointed, bloom large and well formed. One of the most attractive roses of a delightful shade of pure rose pink. Each \$1.00; Doz. \$10.00.

SENSATION. This beautiful new rose is a pleasing bright, yet deep, velvety red that does not fade; long pointed buds, of most perfect shape when open; borne on long stems with heavy, glossy foliage. Each \$1.50; Doz. \$15.00.

SHOT SILK. (Alex Dickson and Sons 1924). One of the most charming new roses awarded the Gold Medal of the N. R. of England. Color orange-rose overlaid with yellow and flushed with soft rose. Buds beautiful and long with reflexing outer petals; fine foliage. Each \$2.00; Doz. \$20.00.

SOUV. DE CLAUDIUS PERNET. Pern. (New). Winner of the International Gold Medal at Paris in 1920. The best yellow rose ever introduced for garden culture. Clear shining yellow with no tinge of orange and without the faded or white edges so common to many yellow varieties. Beautifully formed, elongated buds, open flowers very double — a vigorous grower with clean shining foliage. Each \$1.25; Doz. \$12.50.

SOUV. DE GEORGE BECKWITH. Per. New. Shrimp-pink shaded to chrome and deeper yellow; of vigorous habit and free blooming. A great improvement on the Lyon. Each \$1.25; Doz. \$12.50.

SOUV. DE GEORGES PERNET. Per. Oriental red tipped cochineal-carmine. Entire flower faintly shaded yellow. Very large and full on long, strong stems. Each \$1.25; Doz. \$12.50.

SOUV. DE H. A. VERSCHUREN. Color two-tone cadmium yellow deepening orange at center. Perfect form. Fragrant and productive. Each \$1.25; Doz. \$12.50.

SUNBURST. H. T. Color a rich chrome yellow overlaid and shaded orange-copper with a metallic sheen. Each \$1.00; Doz. \$10.00.

SUNBURST

SUNSTAR. H. T. Deep orange and yellow, edged, veined and splashed crimson and vermillion. Vigorous grower; free bloomer. Each \$1.50; Doz. \$15.00.

SWEET BRIAR. Pink. Each 75c; Doz. \$7.50.

T. F. CROZIER. H. T. Large, well-formed canary-yellow flowers, produced freely and continuously. Each \$1.00; Doz. \$10.00.

THE QUEEN ALEXANDRA ROSE. H. T. One of the most unique and striking color effects in roses, the petals being deep vermillion with conspicuous orange base—reverse side richly shaded old gold. Free bloomer and fragrant. Each \$1.00; Doz. \$10.00.

TIPPERARY. New Irish rose, bright yellow long, slender, shapely pointed buds. Each \$1.00; Doz. \$10.00.

ULRICH BRUNNER. H. P. Cherry red. Each 75c; Doz. \$7.50.

WILHELM KORDES. Pern. Golden yellow tinted copper and flushed red. Very fragrant. Petals so stiff that flowers are remarkably lasting. Each \$4.50.

WILLIAM F. DREER. Per. This rose of the same parentage as the Los Angeles is similar in shape and, like that variety, beautiful in all stages of development. The flowers are a silvery shell-pink suffused golden yellow. Each \$1.00; Doz. \$10.00.

WILLOWMERE. H. T. Color rich shrimp pink shaded yellow at center edges of petals bright rosy carmine about the same as Lyon, except it is a strong, robust grower. Each \$1.00; Doz. \$10.00.

ROSA RUGOSA and OTHER BEDDING ROSES

Rosa Rugosa and their hybrids are very hardy, they will stand the coldest climate and do well under most trying conditions, the seashore, mountains or Alaska; are excellent for covering steep banks and for planting among native shrubbery. They make well-branched, dense, compact bushes from 4 to 8 feet high, with a shiny, dark green, thick, leathery foliage which is oddly wrinkled. Some bloom all summer, others but once; however, the flowers are followed by a profusion of orange, red and crimson fruit. They are remarkably free from insect pests and disease.

AUSTRIAN COPPER. Austrian Briar. Strong erect grower of stately appearance—excellent for planting in borders, alone or with other shrubs. Flowers single bright coppery red, reverse of petals golden yellow. Each 75c; Doz. \$7.50.

BELLE POITEVINE. H. Rug. Large double flowers of clear magenta-pink. Vigorous and free flowering. Each 75c; Doz. \$7.50.

CONRAD F. MEYER. Rugosa Tea, very large, double, hardy, color clear, silvery pink. Each 75c; Doz. \$7.50.

ROSA HUGONIS. This spectacular rose blooms very early. The gracefully arching branches of the previous year's growth become lined to the very tip with closely set wide open, single flowers like dainty yellow hollyhocks, bending over with the weight of the blooms. For planting among shrubbery this unique rose has few equals, the growth is

DIRECTIONS

For handling Rose Bushes

Upon receiving from the nursery:

1. Keep moist until planted.
2. Prune back to about eight inches.
3. Firm well rich soil about roots.
4. Soak thoroughly upon planting.

For best blooms continue to water well, keeping the soil constantly moist throughout the growing season.

POTTED ROSE BUSHES

For the convenience of our customers we also offer potted rose bushes in leading varieties which allows late planting with safety, even when in leaf and full bloom. We have been meeting an increasing demand for these roses for shipment to Alaska after June 1st.

For roses in pots add 25c each to the prices listed.
 Packing free, f. o. b. Seattle.

A PRIZE WINNING EXHIBIT OF MALMO ORNAMENTALS—SEATTLE ROSE SHOW

HOW TO MAKE A HANDSOME VELVETY LAWN

The best time to make a lawn, we consider, is either in late summer or spring.

Spade the soil deep and cultivate well. If the soil is sour use hydrated lime, about 100 pounds to 1000 sq. ft., applying it preferably two to four weeks before seeding. Commercial fertilizer should be scattered on evenly and well raked in just before the seed is sown. In sowing the seed be careful to spread it evenly. The best method is to take half of the seed and sow it walking across the lawn, then take the other half and sow it walking lengthways. After the seed is on do not rake, but roll it in. If a roller is not available, tamp the seed into the ground with the back of the shovel. Sprinkle lightly, being careful not to float the seed.

While the seed is germinating and the grass is young extra care should be used, especially during dry weather, that the ground be kept moist. It should never be allowed to dry out but cannot be soaked, so it is necessary to watch it very closely and sprinkle whenever necessary, sometimes as often as three times a day.

Commence cutting as soon as the grass is long enough, and cut often. This will both thicken the grass and make it finer. If cut often the clippings may be left on the ground for fertilizer. They will not be noticeable unless the grass is allowed to grow too long between cuttings.

After the lawn is established it should be thoroughly soaked about once a week during the dry weather. When watering, saturate the ground thoroughly and it will not be necessary to do it so often.

WASHELLI LAWN GRASS

This is the grass that is used exclusively at Washelli Cemetery and has produced all of their beautiful lawns. It is the best mixture of grasses for the purpose of quickly producing a fine, lasting lawn. Each variety of grass is there for a special purpose and nothing but the very highest grade of clean seed is used. It makes a rich, velvety, dark green turf that, when properly cared for, improves with age and stands almost any amount of wear. It starts quickly and makes a good lawn the first season. Sow 1 lb. to every 150 square feet.

MALMO'S WASHELLI LAWN GRASS (Subject to market change. Postage extra).....1 lb. 65c;
10 lbs. \$6.40; 100 lbs. \$63.00.

MALMO'S EVERGREEN LAWN GRASS

A special blend of deep rooted, fast growing, turf forming grasses, somewhat coarser than Washelli. It starts quickly and grows well, even on poor soil and for those who want a quick permanent lawn at a minimum price this is the best. Sow 1 lb. to every 150 square feet.

MALMO'S EVERGREEN LAWN GRASS (Subject to market change. Postage extra).....1 lb. 35c;
10 lbs. \$3.45; 100 lbs. \$34.00.

MALMO'S SHADY LAWN GRASS

It is usually quite hard to obtain a good lawn under trees or in other shady places. This grass, however, will grow well and make a thick green turf in places where ordinary grass will not thrive for want of light. Sow 1 lb. to every 150 square feet. Ground that is densely shaded is very apt to be "sour" and as a rule the best results are obtained when an application of Hydrated Lime of about 100 lbs. to 1000 square feet is made before seeding.

MALMO'S SHADY LAWN GRASS (Subject to market change. Postage extra).....1 lb. \$1.00;
10 lbs. \$9.50; 100 lbs. \$94.00.

MALMO'S GOLF LINKS MIXTURE

This mixture is composed of Creeping Bent and other high grade, fine-bladed grasses best adapted to withstand the frequent close cutting and hard usage required for the Fairways. White Clover not being suitable for this purpose is not included in the mixture. It is of the greatest importance that only such grasses as will fulfill all requirements are used and by a careful study of this subject we are able to offer a superior mixture for golf grounds.

MALMO'S GOLF LINKS MIXTURE (Subject to market change. Postage extra)1 lb. 65c;
10 lbs. \$6.40; 100 lbs. \$63.00.

MALMO'S SPECIAL PUTTING GREEN MIXTURE

By close observation we have found the Bent Grasses to be particularly well adapted for use in establishing the Putting Green, owing to the smooth, thick, turf they form which withstands the constant close cutting and trampling. This mixture of Seaside Bent and various other Bent Grasses, is made up of seeds of the highest grade only. Subject to market change.

MALMO'S SPECIAL PUTTING GREEN MIXTURE (Ask for price on large quantity.; postage extra.) 1 lb. \$1.75; 10 lbs. \$16.50.

**MALMO'S BENT GRASS MIXTURE
FOR VELVETY LAWNS**

This mixture is a blend of the best imported Creeping Bent and other fine, acid loving grasses, which produce lawns of a beautiful velvety green color, unsurpassed for fine homes, and especially adapted to climate and conditions prevailing around Puget Sound.

It is a mixture, which if used with Malmo's Acid Fertilizer will build a lasting turf free from weeds.
MALMO'S BENT GRASS MIXTURE 1 lb. \$1.50; 10 lbs. \$14.00

MALMO'S GARDEN FERTIL-GRO

(Reg. U. S. Patent Office)

Analysis: 2% to 3% Nitrogen, 10 to 15 Phosphoric Acid, 3% to 4% Potash.

The most complete fertilizer for roses, fruits and berries, in fact all vegetables and flowers. This effective garden fertilizer is scientifically prepared to promote the rapid growth and maximum crop. It yields its plant food only as the plants require it and is therefore effective and lasting.

It is applied broadcast and cultivated in or sowed in rows and thoroughly mixed with the soil before the seed is planted, or used as a top dressing alongside the rows and around the hills. It may be used for lawns, but for that purpose we recommend our LAWN FERTIL-GRO, which is especially adapted for that purpose.

5 lbs. 25c; 10 lbs. 45c; 20 lbs. 85c; 50 lbs. \$2.00; 100 lbs. \$3.50.

MALMO'S LAWN FERTIL-GRO

(Reg. U. S. Patent Office)

Analysis: 8% to 10% Nitrogen as Ammonia, 10 to 15 Phosphoric Acid, 1% to 2% Potash.

This fertilizer is scientifically prepared, purely organic, it is a great foliage builder and designed to release its quickly available high nitrogen content only as fast as it can be assimilated by plant life without danger of over-stimulation or burning. It is unexcelled for lawn use, when used on new lawns should be applied broadcast and raked thoroughly in before sowing the seed at the rate of 100 lbs. per 1500 square feet. For old lawns it is better to give them an even top dressing, seeing that all lumps are pulverized and wet down thoroughly as soon as applied. For this purpose use 100 lbs. to 2500 square feet.

5 lbs. 35c; 10 lbs. 60c; 20 lbs. \$1.10; 50 lbs. \$2.50; 100 lbs. \$4.50.

HIGH GRADE FISH FERTILIZER

Analysis: 8% to 10% Nitrogen as Ammonia, 10 to 15 Phosphoric Acid.

A high quality ground and dried fish fertilizer for quick results in the growing of roses, or the making of lawns or other uses where production of luxuriant foliage is desired. For use on Flowers and Vegetables: Spread evenly over the ground as far out as the roots extend. Cultivate well; keep from stems of tender plants. For LAWNS, apply broadcast and rake in well, 100 lbs. for 1500 square feet; on old lawns use 100 lbs. to 3000 square feet. Pulverize all lumps, wet down with coarse spray.

5 lbs. 35c; 10 lbs. 60c; 20 lbs. \$1.10; 50 lbs. \$2.75; 100 lbs. \$4.75.

SEA-PRO-CO

Grass Food Fish Fertilizer.

Analysis: 7% to 10% Nitrogen as Ammonia, 2 to 3 Phosphoric Acid.

Its wonderful rapid action is due to the availability of its high nitrogen content, which is yielded to plant life as fast as it can be assimilated without the danger of over-stimulation or burning attending the use of nitrate of soda. FOR ROSES: One small handful for one treatment well mixed in soil.

FOR NEW LAWNS: 100 lbs. to 1500 square feet. Apply broadcast and rake in well before sowing seed.

FOR OLD LAWNS: 100 lbs. to 3000 square feet. Spread evenly through a screen, if possible. Pulverize all lumps. Wet down with a coarse spray.

5 lbs. 35c; 10 lbs. 60c; 20 lbs. \$1.00; 50 lbs. \$2.50; 100 lbs. \$4.50.

Ask for quantity price.

SHEEP MANURE

Analysis: 1% to 2% Nitrogen as Ammonia, 1% Phosphoric Acid, 2% to 2½% Potash.

The sheep manure we offer and recommend is kiln dried and finely ground, practically free from germinable seeds and moisture.

20 lbs. 50c; 50 lbs. \$1.25; 100 lbs. \$2.00; 500 lbs. \$9.00; 1000 lbs. \$16.00; per ton \$30.00.

MURIATE OF POTASH

Analysis: Potash 52%

This is a very strong, quick acting fertilizer and is the best form of Potash available for ground that is lacking in this element. It is packed 200 lbs. in a bag and is generally used at the rate of about 1 bag to the acre.

5 lbs. 35c; 10 lbs. 60c; 20 lbs. \$1.00; 50 lbs. \$2.00; 100 lbs. \$3.50; 1 sack (200 lbs.) \$7.25.

SULPHATE OF AMMONIA

Strong in nitrogen, about 25%. Is very good to stimulate quick growth, but is not a complete fertilizer. Is valuable for its high percentage of nitrogen, but must be used very carefully or will burn vegetation.

1 lb. 15c; 4 lbs. 50c; 25 lbs. \$2.25; 50 lbs. \$4.25; 100 lbs. \$7.75.

MALMO'S ACID FERTILIZER

This is a well balanced mixture of acid fertilizers, especially prepared for the use of Creeping Bent and other acid tolerant grasses and should never be used on Washelli, Evergreen, or Blue grasses, which will not tolerate acid, but delight in a lime soil. This fertilizer is made up of ingredients, which tend to sour the soil and eradicate weeds in the lawn. If applied every spring and fall to Creeping Bent lawns, there will be no trouble with weeds, such as dandelions, plantain, etc. Should be applied at the rate of 20 lbs. per 1000 sq. ft., and watered-in thoroughly.

1 lb. 15c; 10 lbs. \$1.25; 50 lbs. \$6.00; 100 lbs. \$11.50.

MALMO'S WORM ERADICATING FERTILIZER

This is an efficient preparation for destroying earthworms in lawns, putting greens, etc., and an excellent fertilizer for fine grasses. Should be used at the rate of ¼ lb. to every square yard and thoroughly watered-in. Must never be applied when there is frost in the ground or during long dry spells, unless kept continually moist for at least two or three days.

1 lb. 10c; 3 lbs. 25c; 10 lbs. 75c; 50 lbs. \$2.00; 100 lbs. \$3.00.

NITRATE OF SODA

Analysis: 13% Nitrogen.

Nitrate of Soda is entirely soluble, like salt and should be used frequently in light dressing for best results; 150 to 200 lbs. per acre.

4 lbs. 25c; 10 lbs. 50c; 20 lbs. \$1.00; 50 lbs. \$2.15; 100 lbs. \$4.00; 200 lbs. or more, \$3.75 per 100 lbs. \$4.00; 200 lbs. or more, \$3.75 per 100 lbs.

SUPER-PHOSPHATE

Analysis: 17% to 22% Phosphoric Acid.

Super-Phosphate furnishes a quickly available supply of phosphoric acid and is especially desirable as a top dressing for grain and fruit. 300 to 500 lbs. per acre.

10 lbs. 30c; 20 lbs. 50c; 50 lbs. \$1.10; 100 lbs. \$1.75.

GYPSUM OR LAND PLASTER

For sweetening soil, freeing plant food and supplying sulphur.

50 lbs. \$1.00; 100 lbs. \$1.75.

HYDRATED LIME

Pure Hydrated Lime, best adapted for general use, including lawns, neutralizes the acid of the soil making it possible for fertilizer to accomplish maximum results. This form is quick and efficient. An application will attain the same results as twice the quantity of Ground Lime Rock.

20 lbs. 50c; 50 lbs. \$1.00; 100 lbs. \$1.75.

GROUND LIME ROCK

Used for sweetening the soil, but on account of slower action must be used in larger quantities than Hydrated Lime. One ton or more per acre required, according to extent of acidity of the soil. Indispensable to success in growing Alfalfa on the west side of the Cascade Mountains.

100 lb. sack \$1.25.

"TORO" AGRICULTURAL SULPHUR

No plant can grow to maturity without the element of sulphur. "Toro" Brand is especially prepared to make these elements available for the plants and to act upon other chemicals naturally in the soil, transforming them into plant food. Applications of from 100 to 500 lbs. of "Toro" Sulphur per acre have, in many cases, doubled the yield.

3 lbs. 25c; 5 lbs. 40c; 10 lbs. 75c; 20 lbs. \$1.25; 50 lbs. \$2.75; 100 lbs. \$5.00.

STIM-U-PLANT

A concentrated fertilizer in tablet form, especially convenient for potted plants, window boxes, etc. May be used either in tablet form or dissolved in water.

30 tablets in pkg. 25c; 100 tablets in pkg. 75c.

Giant Spencer

Sweet Pea Collection

**15 TEN CENT
PACKAGES \$1.⁰⁰**

We will mail postpaid our selection of fifteen 10-cent packets of GIANT SPENCER SWEET PEAS, including such varieties as King Edward, King White, Primrose, Asta Ohn, Othello, Mrs. Routzahn, at above price, a saving of one-third.

This group includes the largest and most beautifully formed Sweet Peas. The Spencers have very large waved flowers which are produced abundantly on long stems, making the blossoms most desirable for cutting. They attain their great perfection on the Pacific Coast, where they are grown extensively for seed, furnishing the greater part of the supply for the entire country.

SUNKIST

This is a magnificent large Picotee Edged variety. The ground is a clear rich cream, and the Picotee Edging is clearly defined. The flowers are large, well waved and beautifully placed on long strong stems. **Per Packet of 25 seeds, 25c**

Cultural Directions For Sweet Peas

Sweet Peas require good soil and plenty of water. On Puget Sound they may be planted from October till Christmas, for early Spring flowering. Most seasons they come through without any protection, but a few inches of straw placed on the row will insure sufficient protection against frosts usually experienced here. Plant in the Spring as early as the ground can be worked.

The best method of planting is to dig a trench 12 to 18 inches deep. If the soil is not good, remove the poor soil and supply a good quality, using plenty of fertilizer, which should be well mixed with the soil, filling up the trench to within three or four inches of the top. On top of this mixture of soil and fertilizer, place about one inch of good mellow soil without any manure or fertilizer in it, on which to sow the seed. Cover the seed one-half to one inch with soil, a half inch being preferable. The trench should always be kept open an inch or two from the top in order that water used will lead to the plants. Sweet Peas require more moisture than most other plants, and whenever it is necessary to water them, soak them thoroughly. When the seeds are well up, thin them out and when grown to one or two inches, fill in some more soil around them.

When the Peas are in bloom they should, unless grown for seed, be cut every day. If this is done they will produce better blooms on longer stems and blossom profusely all through the season. One ounce will plant a 15 to 20 foot row.

Malmo's Mixed Spencer Sweet Peas

This is made up from standard varieties named Spencers, properly blended, and is an ideal combination for those who want a variety of color.
