BEARING AGE TREES

Seven to Eight Feet Tall for Quick Results

Reduce the high cost of living by making every available foot of space in your garden produce something. We have prepared our bearing age grade of trees especially for the suburban gardener and family with the small back yard where quick results after planting both as to shade and fruiting, as well as the good appearance of the back yard are desired.

ADVANTAGE OF BUYING OUR BEARING AGE GRADE OF TREES

These trees carefully grown in our nurseries have been developed larger than the regular two-year stock. They are almost ready to bear. Some of them have already fruited in the nursery row. The labor in setting out these larger trees is very little extra to what it would be in planting the regular one and two-year old grades, and when once planted the cost of caring for them is the same. They are ideal trees for the garden of the city or village family. Home made jellies, syrups, cider, delicious drinks of all kinds and fruit the year round for the entire family can be produced right in your garden in a short time by planting a few of our Bearing Age trees.

Note this astonishingly low price on all the varieties listed below of Bearing Age trees.
