"World's Foremost Bulb Growers"

Darwin Tulip "WILLIAM PITT"

(2/3 NATURAL SIZE)

Reproduced in water color by our artist from early forced flowers.

This variety is recognized by America's leading commercial growers, as the finest of all early, forcing red Darwins.

There is no finer red for forcing or outside planting, and we are pleased that our large stock enables us to feature it at the very special price of

\$24.00
per 1,000

Remember that we grow and handle more Darwin Tulips than any other firm in America.

TERMS OF SALE
(see inside cover)

O business can have the consistent yearly growth that we are experiencing unless it is retaining its old trade—and old customers are not retained unless they are being pleased.

And so a real satisfaction comes to us in observing the relation maintained with so many of our old buyers—for this is the most striking proof that we are pleasing them.

And we welcome the long list of new customers being added every year. If good bulbs and good intentions will preserve their trade we are sure of keeping it indefinitely.

Bulb Demand Constantly Increasing

In the bulletin issued annually by the Department of Agriculture a list of bulb importations for the preceding season is shown, and in comparing these reports for the past few years, we get an idea of how many more bulbs are being used each year in this country. This is not surprising for we are sure that bulb stocks produce a surer flower crop than any other means of production. We are also sure that enormous possibilities still exist for the expansion of sales and each of our customers can help in making bulb stocks better known with the assurance that they are recommending something that will in turn please their buyers.

Bulb Prices Are Again Lower

In spite of this increasing demand the supplies of practically all items are becoming greater and as a result, prices are more reasonable. Generally speaking, this condition applies to all of the stocks we list with the exception of Hyacinths and we can expect no relief on this item for a year or two.

Deliveries

By far the larger part of our business is made up of orders booked in advance of the shipping season by our travelling men, but we will have in stock at our New York warehouse liberal supplies of all the stocks shown in this catalogue for prompt shipment as the various items are ready. We advise early orders as we are not in a position to replenish our supplies throughout the season.

Cultural Suggestions

While we have always been ready to aid our customers by offering growing instructions on items they are not familiar with, it has occurred to us that a general expression from some of the larger and well known bulb forcers around New York would be welcome to our trade and we now include this as a new feature. Please bear in mind, however, that these conditions apply especially to the New York market and will vary with other sections.

Introduction of Novelties

We have assumed a prominent part in the introduction of meritorious novelties and valuable varieties to the trade. In doing this we have not attempted to foster those kinds of which we happen to have large stocks. Instead we have made thorough tests and have reserved our decision until we were convinced that the newer kind had an advantage either in size, color, form or flowering period over one already in commerce.

LIBERAL TERMS TO RESPONSIBLE PARTIES

(We have revised the text of our terms and ask all customers, both old and new, to read it):—

Our regular terms of sale are as follows: 5% off for cash with order, 2% off for cash within 10 days: final payment to be made within 60 days. These terms still apply in all sales to customers who in turn resell the bulbs.

To the grower and florist, however, we have inaugurated the "GROWERS' TERMS" of sale. They are as follows: invoices for bulbs are payable from responsible florists and growers 10 days after the normal flowering period of the particular bulbs sold, with final payment on late bulbs due 10 days after Easter. We, in this way, endeavor to assist the florist and grower during the period that the stocks are in growth.

WHAT WE GUARANTEE. We guarantee that all bulbs leave our farms and warehouses in good condition, packed in boxes or packages substantially secure and sufficiently strong to insure delivery in good condition with reasonable handling. The risk of transportation is one which the customer must absorb.

WHAT WE DO NOT GUARANTEE. We give no warranty, expressed or implied, as to description, quality, productiveness or any other matter of any seeds, bulbs or plants we send out, nor will we be in any way responsible for the crop. If the customer does not accept the bulbs, roots or seeds under these conditions, they must at once be returned to us and any money paid will be promptly refunded.

Positively no claims allowed unless made within five days after the receipt of merchandise.

"WORLD'S
FOREMOST
BULB GROWERS"

Read these opinions from leading Growers!

A house of Narcis. "Spring Glory" grown by S. Kahn, Bull's Head, S. I., N. Y. (Rynveld's Bulbs).

TULIP KEIZERSKROON

formed, then copiously and often.

MR. LOUIS DUPUY of Whitestone, L. I., is regarded by New York's leading Florists as one of the few great, if not the greatest, growers of "**PERFECTION QUALITY**" both in cut flowers and potted plants for the New York Trade.

"Coming from DUPUY" means to them a standard of excellence that other growers strive to attain—unquestionable quality always.

To produce these high class flowers and pot plants, Mr. Dupuy must buy the very highest quality stocks—and we are proud to have been for many years, one of his chief providers in **FORCING BULBS** and **ROOTS**. The fact of his yearly repeating his orders with us is proof, beyond question, of the quality of the stocks we grow—there is a world of truth in our slogan "**NONE BETTER GROWN**."

In giving us a few brief words about our stocks, Mr. Dupuy says:

"Your American grown Spiraeas have given me very gratifying results, and, as you know, I grow quite a few of them. 'Gladstone,' 'Queen Alexandra' and 'America' are splendid forcing varieties and the new pink 'Princess Mary' is one of the best I have ever forced. To grow good spiraeas one must buy the best and I am told: 'I grow good spiraeas.'—Rynveld's spiraeas. The pots should be just large enough to allow 1 inch or 1½ inch of soil around the clump. I use 4/5ths good 'top sod loam' and 1/5th 'sand.' I water sparingly until new roots have formed, then copiously and often. Spiraeas like plenty of water if good drainage is assured. Temperature 48 to 52 degrees.

"My favorite earliest Darwin tulip is 'Le Notre.' It always comes good and it is easily one of the best early pink Darwins. Others that make excellent pans are 'Copeland' (mauve) 'Bartigon' (a splendid red), 'William Pitt' (glowing scarlet) and 'Princess Elizabeth' (a charming rosy pink). I usually look for my first Darwin blooms about January 20th. I like to get them rooted early in a soil consisting of a good top soil loam and sand to which I add one quarter of well rotted manure. Early rooting and gentle forcing at about 50° to 52° generally assures a uniform crop. A little liquid sheep manure is helpful after flower buds are up.

"By the way, I like 'Centenaire' for a late bloomer. You might mention that.

"Early Tulips get about the same treatment and soil as Darwins. I grow both the singles and doubles in liberal quantities. They will stand a little more forcing than the Darwins, without 'toppling' over. 'Rose La Reine,' 'Fred Moore,' 'Ibis' and 'Queen Flora' are good reliable singles, while in the doubles I like 'Couronne D'Or,' 'Salvator Rose' and 'Murillo.'

"I have been far better pleased with the American large trumpet Narcissus than I had anticipated. Of course, I look for great improvements in the production of good forcing bulbs, but those I have forced have been very good—particularly 'King Alfred.'"

Paper White Grandiflora

AT our Florida farms where we are producing these bulbs we have been favored with exceptional weather throughout the whole growing season and we are sure that the crop of bulbs we have harvested has never been excelled in appearance or quality.

We have added extensively to our storage, grading and packing equipment and are thus able to send out cleaner and more uniformly graded stock than heretofore.

We have also added extensively to our acreage with the hope that we would be able to take care of the full demand, but early booked orders have already consumed a large part of the supply.

We have already completed deliveries on advance orders and if you would like to see the quality of our stock we can no doubt refer you to some customer in your immediate section.

We have retained the old French Method of grading and packing and while the supply lasts we can offer as under:

NOTE: These prices are f.o.b. Jacksonville, Fla., but we expect to have a supply available at our warehouse in New York and to shipments made from here the extra freight will be added. Please state your choice of shipping points.

In addition to the Paper White Narcissus shown here, we offer on the next page Chinese Sacred Lilies and Soleil d'Or. These three, in the order listed, are the leading varieties for house culture and are all easily flowered in bowls with water and pebbles or fibre.

On the inside back cover we list a line of bulb bowls and accessories and these items will aid your sales and help your customers.

Miscellaneous Florida Grown Narcissus

This little girl is shown with the prize bowl of Paper-whites she grew in one of the schools of New York the past winter. The School Gardens Association sold and distributed over a quarter of a million of these bulbs to the school children of greater New York and awarded prizes to the best exhibits. Rynveld's Florida grown bulbs were used exclusively.

CHINESE SACRED LILIES

The Bulbs we are producing in Florida are much finer than ever came from China. They do not have that crab-like appearance of the imported stock but they are more solid and flower more readily and profusely.

We have advocated their use by Florists for we are sure that the flowers will find a ready market.

These bulbs are the second best variety for house culture.

Double Roman Constantinople

The double form of Chinese Sacred Lilies. Very fragrant.

Per 100, \$7.50; per 1000, \$60.00

SOLEIL D'OR (YELLOW PAPER WHITES)

We have possibly the largest single block of these ever assembled at one time and when in flower it is a beautiful sight.

Our customers tell us that these Florida grown bulbs flower splendidly—even finer than those formerly imported—and our advance sales bear this out for the available supply is practically booked up for this season.

We offer limited quantities only.

Long Island Grown DAFFODILS (NARCISSUS)

AS we write this catalogue the digging of the Daffodils on our Long Island Farm is still in progress. We will have a nice lot of bulbs, but we also have a lot of advance orders which must be taken care of first. Not until the bulbs are graded and counted can we determine the available quantities still to be offered. We do know, however, that on some of the popular forcing kinds our remaining stocks are very low, for forcers did very well with the bulbs we shipped to them last season and have ordered larger quantities as a consequence. We therefore suggest that you name a second choice when ordering, for we may be sold out on the particular variety you want. All of these Hardy Narcissus are quoted F.O.B. Central Park, Long Island with the usual extra charge for containers.

A brief explanation of the leading types is shown below!

AJAX, large trumpets.

BARRI, short cup, usually not over 1/3 the length of the perianth (petals).

INCOMPARABILIS, medium length cups, sometimes 3/4 of the length of the perianth.

LEEDSII, medium length cups of white or cream with white perianth.

POETAZ, flowers in clusters—see photo on next page.

POETICUS, pure white perianth, short cups with rim of orange or scarlet.

JONQUILS, small flowers in clusters. Very sweet scented.

NOTE—Large trumpet Daffodils are erroneously called Jonquils in some sections of the country.

DUTCH HYACINTHS

In the text that accompanies the colored photograph of our Holland Hyacinth field shown on the back cover we have attempted to show the advantage to be gained in allowing us to serve you with your Hyacinth requirements.

Hyacinths vary in price according to the size of the bulbs and of course the larger bulbs produce bigger and finer spikes, with more individual florets. There is no difference in the flowering time of the sizes.

The blue varieties are in short supply this season and in order to spread the available quantity among all buyers as far as possible, we must limit the percentage of blue kinds to 25% of the total order. This applies to all sizes.

There is every indication that Hyacinths are in short supply this season.

WHITE AND BLUSH

- Albertine, early pure white.
- Arentine Arendsen, snow white, early forcer, large bells.
- *Grandeur a Merveille, rosy white.

OUR PRICES ON HYACINTHS OF ALL SIZES

EXHIBITION SIZE—MEASURING 19 CTM AND OVER

This is the top size and the pick of the crop. Where extra large spikes are desired this is the size to use. We can supply this size in any of the varieties shown on the opposite page.

Per doz., \$2.00; per 100, \$15.00; per 1000, \$140.00

FIRST SIZE BULBS—MEASURING 18-19 CTM.

We can also offer this size in any of the varieties. They produce large trusses and are used extensively in single pots or pans where large flowers are desired.

Per doz., \$1.80; per 100, \$14.00; per 1000, \$125.00

SECOND SIZE BULBS—MEASURING 17-18 CTM.

This size produces slightly smaller spikes than the two larger sizes. They still make a very fine showing and are one of the most popular for Florist use and for bedding. This size can be supplied in any of the varieties we name.

Per doz., \$1.70; per 100, \$12.50; per 1000, \$110.00

FORCING SIZE—MEASURING 16-17 CTM.

This size is used extensively when a good showing is desired with bulbs of a smaller cost. The bulbs are available in any of the popular kinds only.

Per doz., \$1.50; per 100, \$10.50; per 1000, \$90.00

BEDDING SIZE—MEASURING 15-16 CTM.

This is the most popular size for outdoor planting. It rarely makes a spike of sufficient size for single pots but can well be used in pans. We have liberal quantities in all the most popular kinds in each color.

Per doz., \$1.25; per 100, \$8.00; per 1000, \$70.00

MINIATURE SIZE—MEASURING 12-15 CTM.

These bulbs are used exclusively for forcing and are not recommended for outside planting. We have selected the following named kinds which make the best showing in this size. La Grandesse, L'Innocence, Gertrude, Gigantea, Roi des Belges, Lady Derby, La Victoire, Grand Maitre, Queen of the Blues, King of the Blues, Yellow Hammer.

Per doz., \$.75; per 100, \$5.75; per 1000, \$48.00

A fine bowl of Hyacinths grown in our Bulb Fibre, from 2nd size 17-18 ctm. bulbs.

HYACINTHS
(after three days under glass)

RYNVELD'S PREPARED HYACINTHS (FOR EARLY FORCING)

These bulbs differ from the regular stock in that they are dug earlier and subjected to a period of artificial heat which advances the embryo and makes possible an advance of the flowering period by two or three weeks. Many of our customers get them into bloom by Christmas. It is, of course, necessary to plant the bulbs early in order to get full advantage of the treatment.

FIRST SIZE BULBS

LADY DERBY, light pink.

GERTRUDE, rose pink

Bismarck, Blue

L'Innocence, white

Per doz., \$2.00; per 100, \$16.00; per 1000, \$150.00

LARGE MINIATURES—13 TO 15 CTM.

Lady Derby, Gertrude, Bismarck, L'Innocence

Per doz., \$1.10; per 100, \$8.50; per 1000, \$75.00

When forcing Hyacinths, or most other bulbous stocks, it is of great importance to see that the bulbs are well rooted and show evidence of top growth before bringing into heat. The photograph at left shows a well established pot and we suggest growth at this stage before forcing.

SINGLE EARLY TULIPS

THESE bulbs have their greatest value when forced early, for it is obvious that they cannot compete favorably when the larger later types come into flower. Some of the varieties are readily bloomed for Xmas and others maintain an unbroken succession through the early Spring months.

Their popularity for outdoor formal bedding is well known, and they continue to be used extensively for this purpose in parks and gardens all over the country. Particular care should be taken in selecting the varieties best adapted to the purpose intended, for many have a beauty or value only when grown under certain conditions.

DOUBLE EARLY TULIPS

DOUBLE TULIPS are mainly used for pots and pans, and some of the kinds, notably Couronne d'Or and Murillo, are grown in large quantities for cut flowers. While used outdoors to some extent they are not as popular for this purpose as the singles. Good stocks of several fine sports of "Murillo" have been developed the past few years and they promise to become more popular than the parent.

	Doz.	100	1000
*Boule de Neige, creamy-white, peony-like flower. Very large and ideal for pots and pans. Fine for outside	\$.55	\$3.70	\$31.00
*COURONNE d'OR, golden-yellow, flushed yellow. One of the most popular forcing double tulips. Equally suitable for cutting or pots	.55	4.00	33.00
*El Toreador, reddish-orange with dark yellow border. Good for pots and pans	.90	6.25	52.00
*IMPERATOR RUBRORUM, glowing-scarlet. The most popular double red. Can be forced slowly	.65	4.55	38.00
La Candeur, fine white for outside	.50	3.60	30.00
*MURILLO, light pink. The most popular double variety	.40	2.75	23.00
*MR. VAN DER HOFF, golden-yellow sport of "Murillo," with all of the latter's fine qualities	.75	5.15	43.00
*PEACH BLOSSOM, a deep-pink sport of "Murillo." Exceptionally fine and highly recommended	.75	5.40	45.00
*RUBRA MAXIMA, deep red. Fine early forcer and good bedder	.55	3.70	31.00
*Salvator Rose, deep rose, should be forced very early and for this purpose it is the best	.55	3.70	31.00
*SCHOONOORD, snow-white sport of "Murillo." Very good	.60	4.20	35.00
*TEAROSE (Saffrano), saffron-yellow sport of "Murillo." Extensively used for pots and pans	.50	3.50	29.00

DARWIN TULIPS

DARWIN TULIPS are our leading specialty and we have for years consistently pushed their development and advocated their use. Several years ago we said that they represented the biggest dollar's worth in the whole bulb list and if it was true then it is doubly true now, for the bulbs are cheaper than they have ever been.

This season marks the fading in popularity of some of the old time varieties for they are giving place to a group of newer kinds—each with an improvement either in color, size or forcing quality over the variety it displaces. And these newer kinds are cheap enough to justify their extensive use.

We have large stocks of the leading varieties available at our New York warehouse for prompt shipment throughout the season.

The New Mendel Tulips

A fine early flowering class, developed from Darwins crossed with the Early Duc Van Thol tulips. They might be termed "Darwin Dwarfs" averaging about 20 inches high, with the appearance of Darwins and the early flowering qualities of the Van Thol. They bloom three weeks before Darwins and should make excellent pans. We offer a few of the better low priced ones now available.

Triumph Tulips

A new race produced by crossing the Darwins with certain early single varieties. The petals are somewhat pointed and slightly reflexed, adding a very graceful appearance to flowers of brilliant and delicate hues covering a wide range of colors. Their early flowering parentage should give them a distinct advantage in forcing qualities over the Darwins. It would be well to try some for forcing this year.

THE FINEST IN FREESIAS

Without Any "Bunk"

We have no "super" brands of Freesias to offer. Our understanding is that all of the bulbs are produced by numerous small growers in California and that no one grower stands out as a consistent supplier of better stocks.

We hear that the supply is much shorter than last season, but we have contracted for liberal quantities with reliable growers and offer good Freesia "Purity"—without the bunk—as follows:

Colchicum and Autumn-Flowering Crocus

COLCHICUM AUTUMNALE MAJOR. We know that the trade will welcome our offer of these bulbs, the first since the embargo. We have only a limited supply this year, but the quantity will be larger very shortly. These unique bulbs bloom in early Fall and the foliage follows in the Spring. They flower readily in the home without planting. The color is rosy lavender.

Per doz., \$4.00; per 100, \$25.00.

CROCUS ZONATUS. This is an early-flowering, forcing species of delicate refinement and surpassing beauty. Its earliness and easy growth have much to do with its popularity. Thrives and blooms profusely in a few weeks after starting in pans, bowls or saucers of fiber. An ornament of rare beauty and really a novelty for quick sales when displayed on counter or window. Flowers are pale rosy lilac with orange center.

Price per 100, \$2.50; per 1,000, \$20.00.

CROCUS SPECIOSUS. This species is similar in character to the C. Zonatus, the flowers being an attractive shade of rich deep blue, with orange anthers.

Price per 100, \$3.00; per 1,000, \$25.00.

FRENCH ROMAN HYACINTHS

The supply of these bulbs is apparently increasing annually and they are again being bought by many growers who formerly used them in quantity.

Possibly no bulbous item available for Christmas use is as graceful as the French Roman Hyacinths.

We Offer Mammoth Bulbs of Muscari "Heavenly Blue" That Are Fine for Forcing

MISCELLANEOUS BULBS

Many profitable uses can be made of the small miscellaneous bulbs offered on this page. They are among the earliest of our Spring bulbs and make excellent material for rockeries and perennial border edges. They can all be forced gently and make attractive and unusual cut flowers and pans.

CHIONODOXA

WATSONIA ARDERNEI ALBA

This is the large, snow-white South African "Bugle Flower," and a most lovely plant for pots and pans in the cool greenhouse. Seedsmen should list and recommend this for conservatory and sun parlor. The graceful branches grow from 2 to 3 feet high, covered with elegant, glistening, snow-white blossoms. Remove the top flowers when fading, and lower spikes rapidly develop, thus maintaining a long flowering season. Force like gladiolus.

Price per 100, \$4.80; per 1,000, \$40.00

SPANISH IRIS

SPANISH IRIS

These take a prominent place among the cheaper stocks of forcing bulbs. They require to be "potted" or "flatted" very early, preferably September, as they root very quickly and are not improved by a long "out-of-ground season."

We have been growing both these and Filifolia for the past three years on our Long Island Farms, where soil seems eminently suited to them, and we have one of the largest crops of any in the country, just harvested in the pink of condition.

IRIS FILIFOLIA "IMPERATOR"

For two years this great forcing Iris has been creating much favorable comment at leading Spring Flower Shows, and growers are unanimous in their opinion of its great value as a forcing cut flower. It is somewhat similar in character to the old Spanish type, but larger and earlier. The color is clear brilliant blue.

IRIS TINGITANA

While this Iris is an uncertain producer with some growers, we have many others who tell us that they are getting splendid results, and we believe that it is all a matter of handling. It is a good money maker for those who can grow it. We offer the finest California bulbs.

Per 100, \$7.50; per 1,000, \$65.00

TRITONIA CROCATA

TRITONIA CROCATA

This is an old and perhaps somewhat neglected bulb that has recently received much attention as one of the most strikingly brilliant and interesting of Winter and Spring forcing bulbs. It has the character of the Freesia but the flower spike is more like a Montbretia, the stems being thin, long, wiry and upright. The flowers are bright orange scarlet and make a most attractive pot or pan plant, though the stiff stem and flower spike make it a valuable cut flower also. Requires the same treatment under glass as Freesias.

We have been growing quite a quantity of these for the past few years, and have a fine stock to offer of large, plump, forcing bulbs.

Price per 100, \$4.50; per 1000, \$40.00

ANEMONES

Anemones are becoming a leading market flower—not in quantity because there are never enough to meet the demand, but they are decidedly popular, and those who have been successful in forcing them have been amply repaid. They are invariably sold quickly at a good price. They provide color effects that are unsurpassable in intensity, and a prolonged marketable season for the flowers can be maintained by planting successive batches.

Culture. Anemones like cool moisture and leafy loam, and above all, good drainage to prevent stagnation which rots the bulbs. The best potting or benching mixture is made with equal parts of rich well-manured loam, leaf mold, and clean fresh sand. Deep pans are better than pots, but whether grown this way or in benches avoid all chance of sour accumulation of moisture by providing good drainage. The first bulbs should be put in in October for February bloom, and later batches for late Spring bloom. Give a cool shady position at first until roots are formed, then place near the glass with never more than 55 degrees to 60 degrees temperature.

Our Anemones have been giving splendid results for the past 3 years or more, and we have a splendid crop to offer this year.

RANUNCULUS

We have started many greenhouse men in the growing of Ranunculus and they are making money on them. The Domestic bulbs are larger than those formerly imported and seem to force better. If your trade can use "something different" we suggest that you try them.

This year we have added a group of named varieties to our list.

The giant French Ranunculus resemble in form a miniature pompon Dahlia but are as brilliant and varied in coloring as the Poppies and Anemones. In forcing them, give the same treatment as Aemones, but they do not mature quite as early.

GIANT FRENCH MIXED. The Californian grown bulbs are giving splendid results, and we have several letters from customers telling us of the fine flowers produced. Beautiful rosette flowers in a wide range of colors. Force well and are money makers.

OXALIS

These are becoming very much in demand for winter forcing. Successive crops may be had from November till late spring by planting at intervals from August onwards. They are most effective planted in pans, 1½ to 2 in. intervals between bulbs, and make delightful subjects for rooms, sun parlors, etc., simply covering themselves with bloom. Florists will find these good sellers, either dormant or as blooming plants.

SPIRAEAS

(ASTILBE)

WE are maintaining our position as the foremost growers and suppliers of spiraeas and are yearly shipping to most of the prominent Easter pot plant growers of the country. Spiraeas, especially the pink varieties, are gaining in popularity each year and the Easter season sees them well represented in flower stores all over the country. We suggest that you try some of the newer kinds we are offering.

We show behind each description the number of weeks required to flower the different varieties.

FLORISTS' FORCING EASTER LILIES

LILIUM HARRISII

For the small grower who cannot devote an entire house to Easter Lilies, Harrisii is without question the best variety to use. With sturdy stem and sufficient foliage it makes the finest pot plant and its earliness is now making an appeal with the large growers who bloom it in the early Spring months ahead of the Japanese types and when the highest prices are realized.

We are handling the "Fairy Isle" plant from the oldest and best known grower. Cheaper bulbs may be available but better ones are not.

LILIUM FORMOSUM AND ERABU

There is a difference of opinion among growers as to the merits of these two types. Some favor the Formosum and others like the Erabu. We offer them both and you can have your pick. We guarantee our Erabu to be the genuine stock.

DIELYTRA SPECTABILIS (BLEEDING HEART)

We have been advocating the more extensive use of this beautiful decorative plant for several years and those of our customers who have availed themselves of our suggestion have profited. It is used extensively as an early spring pot plant and is a fine specialty for St. Valentine's day. The cut sprays are also useful. It is perfectly hardy and makes a splendid showing in the perennial border or when planted with early bulb stocks.

We offer large clumps suitable for forcing or outside planting.

HARDY LILIES

In possibly no class of bulbs is as much interest being shown as in the beautiful hardy lilies, and real efforts are being made in the various producing centers to develop stocks that have been available heretofore only in limited quantities. We are offering some of the most popular kinds and our large volume of trade enables us to make very reasonable prices.

LILIUM CANDIDUM

Madonna or Annunciation Lily

Lilium Candidum are again becoming more plentiful with prices more reasonable. It is possibly the most popular of our early Summer Lilies and we know that the trade will appreciate the opportunity of again buying good supplies at lower prices.

The bulbs should be planted early for best results. We are the largest importers of this popular Hardy Lily.

LILIUM REGALE

LILIUM REGALE (Myriophyllum)

The beauty of this fine Lily is well known and it stands unequalled among those which will thrive in this country. The trade has long awaited a supply of these bulbs at reasonable prices, and we are now glad to have a stock sufficiently large to enable us to make a general offer.

In this latitude the Regale Lilies bloom in early June and about the same time as Lilium Candidum. They have white trumpet flowers with slight pink and other colored stripes on the lower petals and are very fragrant. The bulbs we offer are good flowering size and we suggest that they be left undisturbed for several years as they will then enlarge annually and throw much larger flower spikes.

LILY OF THE VALLEY

Best Hamburg and Berlin Pips for Forcing

Experienced "Lily of the Valley" forcers are far more interested in the quality of the stock they purchase than in the prices they pay. They have established to their satisfaction that a few dollars more in the purchase price comes back to them several times in their sales return when they get the proper quality.

To retain and yearly add to our large Valley importations is conclusive evidence that we are supplying the kind of stock that makes money for our customers.

Our Valley is inspected during the growing season and packed under the supervision of our own men.

Gladiolus From Our Long Island Farm

As this catalog goes to press it is too early to estimate the gladiolus crop or to predict possible market fluctuations. These prices therefore are to be considered as tentative and subject to change without notice.

Last year many leading kinds were sold out quite early in the season and this same condition will likely prevail again.

Our own crop is doing well and we look forward to harvesting a very nice lot of bulbs.

All prices are f.o.b. growing station, Central Park, L. I., N. Y.

A Few Leaders For Forcing

	100	1000
	All first size bulbs 1½" & up	
FLAMING SWORD. The outstanding new European red. Flowers in single row formation with six and more open together. Color is soft red. This variety has great commercial promise on account of its extreme earliness.....	\$6.00	\$50.00
LENA GRAETZ. This variety is now considered as the leading commercial white. It has all of qualities demanded of a first class Gladiolus, being a free bloomer, sturdy and healthy grower and producing well formed spikes of pure white with very slight throat markings. We have the largest stock in the country.....	4.80	40.00
MAIDEN'S BLUSH. In featuring this wonderful variety, we feel that we are offering to the trade the best forcing Gladiolus in existence. With its beautiful enchantress pink color, extreme earliness and high percentage of flowers, it combines all that can be desired in any Gladiolus.....	3.00	25.00
ROSE PRECOSE. Solid shell pink and a very pleasing color. A tall, sturdy grower like Schwaben. Good formation. This promises to be a leader among pink commercial kinds.....	6.00	50.00
ROSE LUISANTE. Shell pink with cream throat. Tall grower and large, full open flower. We predict that this variety will become very popular when known.....	4.80	40.00
SOUVENIR. Again this season this remarkable Gladiolus has demonstrated its value, for it was in demand at good prices when other varieties were unsalable. Souvenir is a real golden yellow and extremely early, making it a combination that is unbeatable. We possibly have the largest stock in the country.....	4.20	35.00

BULB BOWLS

An important demand has developed within recent years for bulb bowls and all storekeepers should avail themselves of the opportunity to engage in this profitable side line. Our own buyer has been abroad and made advantageous purchases, which, together with a good domestic line, we are able to offer at prices that should make them ready sellers. We are the largest suppliers of bulb bowls to the Florist trade.

RYNVELD'S HYACINTHS

The production of sound and healthy Hyacinth bulbs demands more expert knowledge and painstaking care than is necessary with any other bulb crop. Each year it is becoming more difficult to keep the stocks free of all the old troubles to which Hyacinths are subject, and from new ones which are constantly appearing. This condition is general throughout Holland. We are very fortunate to have in our employ, a group of the most competent hyacinth specialists available, who have devised means of maintaining our stocks in a much more healthy condition than is general throughout the district.

We do not claim to have the only disease-free bulbs in Holland, but we believe that no finer stocks are produced than those we grow. As a result we can more consistently deliver a clean and healthy product than those who procure, in the open market, bulbs of doubtful origin and variable quality.

You cannot possibly expect good Hyacinth flowers unless you start **right**—and the way to **start right** is with:
