“SAGMORE GARDENS”

Greetings 1927

I AM PRESENTING my second Catalogue. I take great pleasure in thanking my many customers for their patronage the past year. I sold out my entire stock very early. I then went to work to secure the best general collection for the coming year; and I think I have as good an assortment of up-to-the-minute Dahlias as any grower, and I Shall continue to add to my collection what I consider the best for all purposes.

I keep quite a few of the cheap varieties, as I take great pleasure in serving the people who love Dahlias but cannot afford to buy the higher priced kinds. I try to please them all.

I am always glad to receive letters in regard to my stock, and thank those who wrote me during the past year. I had some fine letters from Canada in the north to Florida and Texas in the south, and also from the western coast.

I increased my stock to five times what I grew in 1926, I grow 300 different varieties, and if you wish a certain variety write me, as I may have it. I also wish to thank the many visitors who put themselves out to visit at my gardens at Sagamore Highlands, Mass., the past Season.

I hope my 1927 list will be interesting, and that I may serve you. My stock is healthy, and again I must say I have no corn borers.

I wish you all a very successful season for 1927.

Most sincerely,

Dr. SHIRLEY S. SHATTUCK.

Growing the Dahlia

Location: Open, sunny, or partial shade.

Cultivate the soil thoroughly. Plant from May 1st to June 20th. Dig a hole one foot deep. Put in a shovel of manure or other plant food cover with an inch of soil. Would advise using stake which should be set firmly in the ground. Plant bulb four inches deep, horizontally, and cover. Cultivate at least once a week. Do not water until plants are well above ground. When the buds appear water the plants thoroughly once or twice a week. Apply any good fertilizer, stirring the soil lightly after. To obtain extra large flowers, disbud freely, leaving only a few buds and branches on each plant. If the plant grows too bushy, cut off some of the leaves and side branches and the plant will flower more freely. Green plants should be planted *twice as deep* as they were grown in pots, or four or five inches deep. They should be watered and *shaded* a few days after planting.

Cut Flowers

When using the Dahlia for a cut flower, cut in the cool of the day, either late in the evening or early in the morning. Place stems in deep vessels filled with cold water. Set in cool cellar or ice box for six hours or more. They are then ready for use.

Dahlias Which Are Not Catalogued

If you are looking for varieties that are not catalogued, it will pay you to write to me before ordering elsewhere, as I carry a large list of uncatalogued varieties, my stock being insufficient to warrant me to catalogue these varieties. If you have any variety in mind that you do not see listed, I will be pleased to have you write me. I have 500 clumps of expensive Dahlias one or two of each kind that are not catalogued.

MR. THOS. J. MURPHY'S NEW SEED-LINGS. Winners of the \$100 President's Cup at Boston Show 1926.

SHIRLEY EILEEN SHATTUCK. Dec. The best lavender to date on long stiff stems. Free bloomer on well constructed plant. Can easily be grown eight inches in diameter without disbudding. Don't miss this one as it is reasonable in price for so good a seedling. Tubers.....\$15.00; Plants.....\$7.50

TOP NOTCH. Dec. Another silver cup seedling that has stood the test. The flower opens a light primrose and as it matures bleaches; graduates to cream and white. Extra large blooms on good stems. Never comes with open centre. It has been well recommended by commercial growers. Tubers\$19.00; Plants.....\$5.00

FLAMELICK. Dec. And another silver cup seedling. Most growers say we have enough reds, but when you see a new red with different construction, a little different shade, we all want it, even if we do have quite a few. This is a very beautiful, brilliant flame red flower on the end of the best of stems, looking you full in the face, free bloomer of large size. The petals seem to have a transparent tissue shoen that you don't see in other reds, it is something new. Great exhibition and cut flower. Tubers \$10.00; Plants \$5.00

REFLECTION. Dec. Still another silver cup seedling. A grand exhibition and cut flower variety. Face of petals are white, reverse somewhat suffused violet with a light shell pink base, flowers large and deep held high above foliage on the best of stems. Free bloomer. Tubers \$10.00; Plants \$5.00

Mr. Murphy has now released it, so send in your orders at once as stock is limited. A very large 10 inch well constructed flower. The color is a combination of white and two tone magenta clouded and suffused in a way hard to describe. You will have to grow this flower to appreciate the new coloring. CARE AND CULTURE

BULBS should not be planted until ground is warm, about the time corn is planted. Always plant in good sunny place to get best results. If soil is light, plant six inches deep. Plant bulbs four inches apart and when they are six or eight inches tall, weed and soften up the ground between stalks of the bulbs. Never allow ground to crust over, as it retards growth. When they are about a foot in height, work fertilizer in around plants. This may be repeated once or twice more before they blossom. When flower spikes appear, abundant watering is very beneficial.

Bulbs should be dug as soon as leaves begin to turn yellow. Cut stems off about an inch above bulb. Let the bulbs dry in the sun for two or three days, then place them in a dry place. Do not have the bulbs more than three inches deep, as they may heat and mold. Trim when they are thoroughly cured, and store in cool dry cellar. It will help the bulbs if they are stirred up and given the air during the winter.

GLADDIE BOY. (Bill's Origination).

This variety was one of the outstanding new productions at the New England Gladiolus Society Exhibition at Boston 1924. The Massachusetts Horticultural Society voted it a Special Award of Merit. At the American Gladiolus Society Exhibit in New York City, GLADDIE BOY was again in evidence winning the class for "Most Beautiful Basket of Glads" as well as the class for "Most Artistic Table Decoration". It is of the semi-primulinus type retaining the delicate characteristic coloring but in form more massive. Flowers are well expanded with only slight hooding effect. Those shown in the photographic reproduction on page 19 were produced from small planting size bulbs, the mature bulbs throwing spikes with 18 to 20 buds and opening 6 to 8 perfect flowers at a time. The color is distinctive, the general effect being a Grenadine pink gradually blending with straw yellow deep in the center. To further enhance its beauty, the petals are most gracefully frilled.

Ea. \$7.00, 3 for \$16.00

GRETCHEN ZANG. Rose-pink shading into salmon. Tall spikes.

15c ea., \$1.50 doz.
