HAVE A HOBBY—GROW SOME GLADS

THE GLADIOLUS

IN the history of the flora world there have been very few varieties which have become so popular as the gladiolus. You perhaps can recall quite a few years ago, the gladiolus grown by our grandmothers, a small red or yellow bloom. That would be an insignificant thing compared with our modern "glad," with blooms from four to six inches across, and as many as twelve blooms open at a time.

Its great variety of colors, ease of culture, immunity from disease and long keeping qualities as a cut flower, place the Gladiolus at the head of the list for garden culture, and for the many other purposes flowers are used.

This catalog contains the names and descriptions of more than 125 varieties, and while all of them are not new, they are the worth-while varieties selected from over 200 we have had on trial. We cannot grow all of the varieties, (of which there are over two thousand), but our aim is to grow the best of them.

WE GUARANTEE SATISFACTION

This means that the bulbs will be of satisfactory size ($1\frac{1}{4}$ inches in diameter, or over), finest quality and well packed. They must be true to name and healthy. If, for any reason, bulbs do not please you, tell us before you tell your neighbor. Then you won't have to tell him. No grower is immune from making an occasional error, but any mistakes we may make will be adjusted to your satisfaction.

A HOBBY THAT GREW

To our many friends who visited our gardens, and to the hundreds of customers from all parts of the United States, we owe our success in developing a hobby that has grown to considerable proportions, and we expect to plant this season nearly a million bulbs and about 200 varieties.

We wish to thank all of our kind friends who so ably assisted us in increasing our sales, and we want you to know that we fully appreciate your kindness. You are cordially invited to visit us any time, tho from late July until about September 10th you will find nearly all of our varieties in bloom.

CULTURAL DIRECTIONS

THE following is prepared for the benefit of the novice:

We believe gladiolus will do well in any soil that will produce a good crop of corn or potatoes. A fertile soil will undoubtedly give better results in size of bloom, and also produce a larger bulb. A little extra care in cultivation and fertilization will amply repay you. *DO NOT USE* fresh manure before planting bulbs. Manure should be applied in the Fall. Very scabby bulbs will be the result of fresh manure.

DEPTH TO PLANT

We would suggest planting bulbs from four to five inches deep. Don't guess, but measure the depth. A bulb will grow as well planted much shallower, but bulbs planted deep are protected from falling over, which often occurs with tall growing varieties.

SUBSTITUTIONS

Many varieties are in great demand and we advise placing orders early to avoid disappointments. We do not substitute unless requested to do so, but we reserve the privilege of giving you two one-inch bulbs instead of one larger size, in case we are unable to furnish the large size.

DISCOUNTS

A discount of 5% in bulbs will be allowed on all cash orders of \$5.00 or over, and 10% in bulbs on orders of \$10.00 or more. The extra bulbs given as discounts can be the customer's choice if so desired. Orders for less than \$1.00 not accepted.

KINDLY NOTE

AN account of receiving numerous inquiries from many of our friends, as to whether we could supply them with tulip, hyacinth or hardy lily bulbs, we have finally made arrangements with a large wholesale bulb company to enable us to furnish you tulips of the standard varieties in quantities of 25 or more, hyacinths, 12 or more and hardy lilies six or more. These quantities must be of one variety, however.

We do not issue a list of varieties of the bulbs mentioned above, or make prices, but you may make your selection from any flower catalog, write us the quantity you wish, and we will quote you the wholesale prices delivered.

Orders should be received not later than October 10th, as these bulbs should be planted not later than November 1st, and can be planted as early as September 20th.

DELPHINIUM

We expect to plant several thousand of the famous Wrexham and Hollyhock strains of Delphinium, the finest strains ever produced. The original stock was imported from England, and is considered the best in the world. This is a hardy perennial and one of the most popular of the hardy flowers.

THE GIFT BOX

SPECIAL PRICE OF \$1.00

We are making up a special gift box which contains the greatest value we have ever offered in a collection of "glad" varieties. This box contains 15 distinct varieties of our most popular blooms (not named), and to the novice in growing gladiolus this collection will be a revelation.

As an Easter remembrance, or as a gift to mother on Mother's Day, there is no other gift which could possibly give greater pleasure, and would also be a kind reminder of the donor when the "glads" are in bloom.

This collection will be packed in a very attractive box, and the wrapper will display the blooms in colors identical with the colors on our catalog.

A number of church societies and woman's clubs have taken advantage of our offer to dispose of gladiolus, and have realized some very nice profits from the sale of our bulbs. If you will write us for particulars we will be very glad to give you full details.
