“Bresler’s Own”

Lawn Grass Seed

Well Adapted for Shady Lawns

We have devoted much time and careful attention to the composition of this item, having been engaged in the Seed business for more than thirty years, and giving much attention to city lawns, park greens and golf courses.

We did not have the success we wished for by buying ready mixed seeds; so now for the last five years we have mixed our own—we put into this package new grown seeds—and of high purity and germination, and use only the kind that is best for a lawn accord-

ing to our experience and advice taken from those who know.

Highest Grade Kentucky Blue Grass is the foundation of our package, and the correct proportions of Chewing Fesque, White Clover, Herd's Grass and Argentine Rye Grass makes up the balance.

The Ky. Experiment Station under date of February 20, 1928, says:

"We only find $2\frac{1}{2}$ per cent weed seeds in your package."

That is $97\frac{1}{2}$ per cent desirable seeds and $2\frac{1}{2}$ per cent weed seeds, and we think that's mighty near perfection. Our honest effort is to sell you a

clean, green lawn seed that will merit your approval and make us both happy.

“Bresler’s Own” Lawn Grass Seed prepaid to you this year for only 50c per pound, and is put up in one, three and five pound packages.

Ask for prices on large amount for acreage seeding.
