Shipment of Gladioli and Dahlias will be made during the months of April and May. When cash accompanies order or payment is made prior to shipment, goods will be shipped by parcel post, prepaid. All C. O. D. shipments will be made with charges collect.

The only failure in growing Gladioli is from shallow planting and dryness of soil. Gladioli should be planted about five inches deep, first covering with about three inches of soil and keep well watered; when first shoots appear, work the balance of loam into the trench. This allows the bulbs to get a good root growth.
