GARDEN

Bicknell Library

1857

* after same = one from 8.09 Oak Bluffs to Edgartown

one found in grass in dunes pond
on upper end of island

underlined in red = 1st found
on Antietam

Plants crossed with a pencilled line
are translocated plants not found in translocation.

~~*Ophioglossum vulgatum*~~

Botrychium dissectum 1911 one plant well fruited.
Oct 25 Jackson Co. Rd.
1918, Foster farm, translocated leaf.

3
4 *Botrychium obliquum* 1911 one plant well fruited.
1918, Foster farm, translocated leaf.
1910. Chappagundidit I - a scattered
colony of vigorous strongly fruited plants on the dry lichen
clothed rocks. 1911 Chap. 2 Jackson Co. 1911 near C. on
Chappagundidit I. 4 near Lake Jackson. 1912 Very C. Winkler
Oct 6, fully fruited first on Chap. 2. then quite C. 1915 Sep. 15 + Chap. 2.

5 *Onoclea spectabilis* x C. ... Pond
Generally C. Chapp. I. vigorous at a number of places -
very C. near Poiche Pond

28 (21)
do. *cineraria* x frequent - C. ...
Chapp. I. C.

6 (24)
do. *Claytonia* 1910 A good deal of it on a
shale & wooded bank fitting in to a bog hole in
Chappagundidit I. 1913 on another ...

7 (21)
Pteridium aquilinum C. very C. ...

3 (21)
44 *Heidum laticaulum*, C. Chap. I.C.

5 (24)
2 *Coriaria acolata* C. in wet thickets on
1910 to Sep. 11. one station W. of town. a number of thickets on
Chap. I. 1913 July 1 broad flowing towards Lambert Cove. Chilmark
Hills above Monemiska Pond.

6 (22)
2 *Anchistea virginica* bog holes. Chappaquiddick I. in soil.
1910, C. at one swamp W. of town. 1912 C. on Chap. I. filling
many bog holes. - Chilmark
Asplenium abnorme Sep 22/15 near Tashmo Pond, 3 plants
on old wall, 1917 Chap. I. one colony.

3 (22)
1 *Asplenium filix foemina* major line of leaf, Kent
not in form narrow, rounded form / Chappaquiddick I. 1910 W. side
Tashmo Pond, 2 spp. thickets. 1911 Tashmo. frequent on
Chappaquiddick I. 1912 under a lattice porch in the town
1912, the red stalked form in soil. thickets S.E. Chap. I. Chilmark

3 (24)
5 *Dryopteris novaeboracensis* Indian Hill
elsewhere 1910 Chappaquiddick I. one thicket
1911 Tashmo. frequent in woods along Indian Hill road
1912 soil. Chap. I. thickets, near C. 1913 Very C. Chilmark

26/11 (21)
22 *Do. thelypteris* x *C. virens* Chap. I.C.

11 *Do. manualis* one tuft in low wet W.
of the town. Collected April/14
not seen 1911 Sep 22/15 along old wall Tashmo Pond. at
a bank north side of old road.

Polystichum acrostioides, July 1/13 Lambert's
Cove road. Last tufts under a wall.

(27)

29 Dryopteris simulata Linn. C. on low thickets
1910. Abundant in Swamp W. of the town - 1910 Chap. J.
1912 soil. thickets Chap. J. June '13, tree thickets on Chap. J.
South of Sampson's Hill - as large as I have ever seen.
Chilmark C.

4
1 do. cristata, Major's Cove, Longport Rd, Luperia -
Frequent. 1910 W. side Longport Rd.
much in one thicket.

5 25

2 do. Spinulosa, Chappaquiddick Thicket - N. side
1910. Swamp W. of town. 1912 fine examples in a number of
Chap. J. thickets - Chilmark. N. Tisbury

(27)

1 do. intermedia, Major's Cove, Longport Rd. and
one plant - At vert. place June 27/13 one tuft in tree thicket
South of Sampson's Hill & Spinulosa & the next, towards
Lambert's Cove. N. Tisbury

(27)

2 do. Boothii, A number of vigorous tufts in low thickets on
Chappaquiddick I. with Spinulosa,
N. side Longport Rd. Three thickets S. of Sampson's Hill
a number of tufts.

5 3 25
5 Desmarestia punctilobus, At soil. places
1910 see house at Sweet Pond 1911 Chap. J. in pile of old fence
rails; Tashirov Rd. 1912 another station on Chap. J. N.W.
Chilmark C. towards Lambert's Cove. & N. Tisbury.

28

(22)

Onclea sensibilis % C at Trapps Pond, July C.
Chap I. C

17.11

(22)

25 *Equisetum arvense* C 1912 found on Chap. I.
only at one station bank by the shore 26- 1913 some at
a number of places Chap I. C generally.

— *do. fluviatile* —

(22)

Lycopodium adpressum. Near the shore, near Trapps Pond.
Wentworth & Chiltons - Jobs Neck Cove N. of town.
Chap I. Pond. 1912 near Lonsdale Cove - Chilmark.
1913 Chap I. vegetation Damp sandy level east of town
do. inundatum 1911, Oct. 2 fruit mature
1913, Sep. 17, Chap I. one station

— *do. alopecuroides* —

(5)

7

do. obscurum Towards Jobs Neck Cove 1912
C. Wentworth bog. Chap I. C. Sampsons Hill W. fruiting
Chilmark R. July 5/13, spikes green

19.30 (25)

24 *Lycopodium complanatum* W. side of harbor
 Road to 60's Neck Cove for 1910. Root 3 ft long. Chappaquiddick I.
 1911 arm of Gr Pond near Poichea Pt 1912 Chap I. much near lower Pt.
 1915 abundant in high oak woods towards Lamberts Cove, fruiting freely.
 1918 " N. Salisbury.

(7)

30 *do. trichachyum* mill, 60, 100 ft high. alt 2 miles N. of town. fruiting.

1912 Chap I. Sampsons Hill. W. abundant fruiting 1913. Towards
 N. interlock. open ground, N.W. Chap I. 1918.

~~*Locusts Brauerii*~~

28 (21)

22 *Pinus rigida* x C alt Edgerton. Chap I. C.

do. pinaster Chap I one tree June 30/13. A single
 tree 14-15 high estimated, 23' around 1 ft above base, bearing a number
 of cones.

5 *Pinus strobus* 1910 last trees among the pitch pines
 a fine small one. August 1914. 5 ft high at base, process of
 scales evident on terminal half of cone. 1912 Sep 30. a group of 6
 trees among pitch pines on Licking road a mile west of the town
 no planted grounds near. Largest trees 36' & 37' around near the
 base very nearly 1 ft above. Found on Chap I. 1911 a few small trees among
 pitch pines on Grubbs property June 25/13 a tree alt 12 ft high in
 open field close to road on Chap I. island.

(25)

5 *Pinus strobus* one tree alt 30 ft high among Pitch
 Pines N. of town June 25/13 one
 tree on Sampsons Hill. Chap I. alt 8 ft high; 15 1/4' around
 above the basal branches. Sep 22/15 one beautifully symmetrical
 tree alt 2 miles N. of Edgerton in remote sandy oak
 woodlands; tree alt 22 ft high, 25 1/2' one foot above
 base. S. inquis N. Salisbury.

3 ~~*Juniperus communis*~~ One closely prostrate plant
Chappaquiddick I. - Oct. 1915. Same plant, 10 fruits.

7 25 9 (21)
22 *Juniperus virginiana* x *Chappaquiddick* -
occasional tree. No cedar cones, except on Lantanae SE
side Chappaquiddick I. well fruited 1910 W. of the
town - solitary trees. Locally c. on E. side of island.

4 26
2 *Lepha latifolia* full bog on Chappaquiddick I.
rest of harbor + strongly typical. 1913 July 7,

1 28 11 (21)
22 *do. angustifolia* x *C. chip. I. - C*
1913 July 14

~~*Sparagnum angustifolium*~~

5 *do. androcladum* Mr. Liebig, Jr. Oak Hill
land 1 1/2 miles from town
Sep 22/15 soil ponds towards Lantanae side in dense woods. Well fruited
= *Lucidium* Sep. 13/17 Chp. I. bog side S.E. 1917 Chp. I. S.E.

28 21
25 *do. americanum*, near Trappes Pond, Chappaquiddick I.
Thajia Cove, Longport-Pd. & elsewhere. 1911 Ann of Great Pond
1912 just c. on Chp. I. Oct. 6. well fruited. 1913 July 1, Kearsage
clay Co. - branched -

13/8 (22)

25 *Potamogeton Oakesianus* Pool near Drapp's Rd.
1910 Same place. Also in pond N. of the town Sep 22/15
a small sized species doubtless this in salt pools towards Lambert Cove.

do natalis Sep. 23/13 one small pond towards
Lambert Cove.

do pulcher 1918, Pool Porter farms, covering
the wet mud.

17/8 (1)
30 do Nuttallii Wintucket - near Elgartown on Oak
Bluffs Road - 1910 Cove N. of or near N.
Fishery Pond - 1913 near Lambert's Cove 1918 frequent N. Fishery

14/30 (26)
27 do perfoliatus Ed. G. Pond. 1910 Farm Pond;
Herring Run, Fashmo.

do. mystecus

7 do. pusillus near Lambert's Cove.

8
②
Volanoxylon diversifolius 1910 ditch by ice house
- t. of town fr. some narrow floating leaves 1911 Sep 28 floating
abundance at same place, n. of the town abundance of
floating leaves - 1918. Foster farm N. J. Harvey.

①
do. poctinatus. 1913 July 1. Tashmas Pd. x.
July 4 x abundant in Deep Pond. 1917 Chap. 2. inlet to
Pouche Pond, fr. Sep.

3?
Ruppia maritima 1910. Farm Pond fr. rt. abundant.
Apparently this on Tashmas Pd.
1912 Chap. 2. E. two places.

Lanichella palustris

Acis flexilis

do. Guadalupeensis
Acis gracilina Pond is with one seed.

26 21
22 *Zostera marina* x C. much east of an lower than
all beaches. Chap. 3.

28 22
23 *Triglochin maritimum*. Chappaquiddick. 1899.
at several places. 1910. by Eel Pond. Locally very c on
Chappaquiddick I. Sep 26/11. Elyatton, freshly pretty spitters
since 22/13. + Chap. 3. South

7

Alisma subcordatum. 1913 July 7 x bushy pond
hole near the lower st. side of harbor - a good colony
at one place

7

17 1 Pond on U.N.
Sagittaria Euphrasiana and all 1 mile
from town - 60 - 1910. Bog near the above. C. fr. 1913, with
the above, young plants with very varicose leaves, which may be
some other species 1917 Sep. 16. 48 ft. N. of town

7

do. *latifolia* 1913 July 7 with *Alisma*, plant
young but leaves very broad.

14 30

27 *Vallisneria spiralis*. Ed Great Pd C. 1910, also
In apper pond 1912 Second n. of the town.

22 ²⁶⁺ (21) *Schizachyrium scoparium* x C. + very C.
chap. I.

30 *do. vellosissimum*, Chappaquiddick I. ~~on~~ ^{on} Locality middle & L.B.

6 *do. littorale*, Field & v. v. v. Ed. East Pond.

27 ^{11/16} (29) *Indropogon abbreviatus* - frequent +
in a large field along Rte 10, 1910 N. of town. frequent
1911. Relics only north of the town & along N. side of Long Pk.
1918 Zoster beam N. Salisbury.

11001

1913 June 30 Sandy road way N. of Tashmoo Hill
& also considerably further S. on Chap. I

(30)

Stipa ovata

(1) Muhlenbergia Schreb.

1912 Sep. 23, low duff in a neglected
cottage yard in the town of
a good deal along a street side.

1913 July 7. common in 2nd, 1913.

629 14 (21)

22 Muhlenbergia medicana x In seed yards in the town
1910. Sep 10. panicles just about - frequent about town.

628 14 (21)

22 Phleum pratense C. dried spikes, some late green spikes
Chap. I. frequent or C. Immature spikes just appeared.

~~Alopecurus pratensis~~

~~do. geniculatus~~

53

Sporobolus vaginiflorus 1910 Sep 15 x depression
in field N. of town
Tashmoo Pd. Chap. I. at one place apparently rather
frequent. Sep. 12/13 Chap. I. low backing beach.

22 ^{9 26 19} (21) *Agrostis alba* c. dried panicles Chap. 2. 1912 no fresh families c June 21/13. Panicles mostly immature, 28. first in flower the small vulgaris form

~~do. aristata~~

22 ²⁰ (21) *do. maritima* c. No fresh panicles - Chap. 2. 1912 No fresh panicles c June 21/13 No panicles yet July 4. Sep 22/15 distant towards Lamberts Cove.

(21) 23 *do. arctocedrus* x Some fresh panicles, 1913. c on chopping ground. June 21/13 - panicles oldish.

7 ^{9 26 19} (21) *do. hymenalis* frequent. - some fresh panicles Chap. 2. 1913 July 1 Vineyard Haven - no panicles yet 1913 Sep 17 Chap. 2 by Pouchet Bridge.

20 ³ *do. intermedia* Chap. 2. dry. 1912 Chap. 2. frequent. Sep 22/15 + c. west of Vineyard Haven & Lamberts Cove. Gardenoo.

27 *do. elata* + c 1910 Sep 9. panicles just appearing. Chap. 2. 1912 Vineyard Haven & Chap. 2. Some large

30 15 (22) *Calamagrostis canadensis* C. panicle dried
June 22/13. panicle just appearing - July 1. +

do. *cineroides* 1910 a single plant with eath
a small black panicle in bog
near Ice House on Ice St. Pond.

30 20 (21) *Ammophila arenaria* x Abundant, + Chap Island
abundant. even above the bluffs.

30 25 (21) *Holcus lanatus* x C. panicle dried Chap I. C.
June 21/13 + both abundant. fields full of it.
(L) Beauv. Sandy slope near water tower
159 (2) *Corynephorus canescens* much of it in considerable patches
panicle dried. July 7/13. +

23 *Poa caryophylla*
~~*Poa caryophylla*~~ *avenaceum* Chap I.
June 25/13 two tall culms in field near Porcupine P. d. C. in back
west of the town

30 24 (21) *Lechampsia flexuosa* x C. panicle dried
1911 Sep 30. panicle dried Chap. I. C. June 1/13 +

~~Ficetum palestine~~

030 (21)
23 *Danthonia spicata* x C, panicle dried
1911. Sep 30. some from ~~sp. 1/2~~ Chap. S. C. June 1/12 +

~~do~~ *compressa*

28 + (22)
22 *Spartina cynosuroides* x C + Chap. S. C.
July 1/13, 1911, sp. 1/12

10 + (29)
22 *do. juncea* C + sp. 1/2 from 1910 Chap. S. C.
Oct. 6/12 +

5 (21)
22 *do. patens* C panicle not dried Chap. S. C.

22 ²⁸⁺ ⁽²¹⁾ *Spartina 'pilosa* C + Chap. I. C.

13 *do. 'alterniflora* 1910. In pure sand shore of Poucha Pond.

~~*Phalaris canariensis*~~

14 ⁶ ⁽²⁸⁾ *Phragmites phragmites* One locality on Chappigueddit St. 1910 frequent in those bays on E side Chapp. I. N. Salisbury or Salisbury.

12 ⁶ ⁽¹¹⁾ *Tridens flava* Grassy opening nearly circled by woods richets in S.W. corner of Longport Pdo +

 Major's Cove -

30 (22)
 11 *Epigaea repens* x C. very C. Chap. I. Unigari
 Kaper - very much 1912 Chap. I. C.
 April 25/15 Along beach in full flower received at contact
 from *Epigaea repens* at Edgartown.

30 (22)
 11 *Saururus procumbens* x C. Chap. I. C.
 1910 Oct 17. A good deal of fruit ripe 1911 abundant - fr. very
 C. Unigari Kaper & D. Kaper.

30 (23)
 1 *Arctostaphylos uva-ursi*, *Arctostaphylos* 1 sp.
 13 miles from town on U.S. road - C. along the W. Salisbury road
 W. of Wintuick - not isolated to the east. Very C. along
 the W. Salisbury road on the higher ground about 1 mile
 to the town were fruit in some places
 1910 Next Chap. A good patch in lower W. rd. town. 1911 abundant
 in a corner of W. Pond - 1911 Oct 3. Chap. I. much more S. ridge Rd.

Sep 20/13 + same area abt 27 x 27 paces. A good sized patch abt. 50 paces
 shown growth in direction opposite to 35 paces distant patch. *Sparganium* quite
 with it, also about. *Monotropa uniflora*, *Pyrola rotundifolia*, one place,
 (29) *Orientalis*, *Kalmianum canadensis*,

24 ³⁰ *Calluna vulgaris* + some beds in adjacent oak
 scrub. Capturing the blue ground for woods to the exclusion
 of all other plants, the fruit reaches conspicuous stage in
 being some distance away. The main area covered was abt
 24 paces in one general direction & 32 paces in greater
 length. Another patch about 6 ft across in both directions
 was about 25 paces from the main body, a smaller
 patch 17 paces to the side of this one. The fruit flower
~~area~~ ~~abundant~~ abt 10 but fewer. Low very short
 color & much paler than above
 & fruit van from Sep. 24.

1910 Sep 16 + The patch seems about the patch seen from
 10 to nearly 30 ft high. 1911 Sep 30. Flowers mostly unopened, but some
 broken tips. 1915 Sep 30.

1923 Sept 5 not found at original site since its being
 described & found from here to me in debris at large patch
~~area~~ measuring 20 x 10 paces it is covered

Smaller patches about

- Crataegus pruinosa*. Chappaquiddick.
On beach near town

Od. *Clamatus virginiana* Border of lot in the town, double an entry from cultivation.
P. r. corticopulchellum open boggy spot at end
P. r. multiflorum - Superb lot of 1000 +

2 *Carex gynandra* one station edge of low thicket on Chippogueddit. - perfectly typical.

3 *Juncus marylandica* Root leaves of one plant in dry thicket on Chippogueddit S. 1910. Not very numerous on Chippogueddit.

3 *Leptanthes virginiana* C. under bushes in several thickets on Chippogueddit S. + (1) fr.

4 *Castanea dentata* Two trees at border of low thicket at the pine woods south of Cape Roger's Point. One tree was nearly a sapling, the other was perhaps 10 ft high & about 27 inches around a foot above the base.

4 *Rubus* One clump present at the Cedars on east side Chippogueddit S.

5 *Rhus coriulata* W. J. Leary.

33 *Salix virginica* (form of *apricifolia*) - small tree with or less tall; leaves oblong-ovate, serrate, apiculate but scarcely not, I think) 1911 typical *virginica* at Rogers garden.

34 *Rhamnus cathartica* Woods south of W. J. Leary, - a clustered forest some of the shrubs well-fruited.

Chelone glabra Several thickets along a ditch in the field in front of house.

Asplenium platyneuron Woods. - the typical woods plant.

oct

Common over a lot
Paniceum scoparium Lam. ! open beach south
of the Herby Run near Ed. Smith Pond.

Carex filiformis ? Leaves only, numerous
this year - 2000 rock oys.

Polygala Nuttallii - a few plants with last
of 2000 rock 1910 frequent generally.

Cicris (lectum ?) a single small specimen
plant on a hill near
the hotel - leaves of ochre perceptibly yellow

9:30
17 Eleocharis olivacea - along a wet sandy
rim N. side Scupper's Pocket Pond - a

number of small plants with many light
spikes. 1910 Another station N. side Scupper's Pond; Little Pond;
1911 Cove of Ed. Smith Pond - abundant S. side Chapp's near Beach & Pond.
(Kornia maritima + at two places on grassy bank)
near houses

40 Not found at either beach.

570 total berries throughout 1909

10 additional berries 8,09 -

680 total.

See over for 1910

910. Sep. 8 = 27 inches

Sep. 8 Time (species found on Chautauque enclosed in brackets)

Prof. Perry met us at Bad Bluffs & took us to Grafton in their automobile where we arrived before 11 am. To backing beach at 11:30 in afternoon in automobile to East chop & West chop & alighted there for a short time.

(Pastinaca sativa) Vineyard Haven. note found.

(Conium maculatum) One clump in bush.

in waste ground Vineyard Haven.

(Chrysanthemum Balsamita)

Prof. Perry - 8 overcast.

Sep 9. To Stone N. of the town in Am., S.E. of the town towards Lower Hill in P.M.

5.8 Lycopodium complanatum, Dry sandy border of low field near the stone N. of the town, about one place only.

3. Scirpus rubrostenus Border of low field S.E. of town, leaves only.

(Erigeron maculata) Some large plants with the above.

(Paspalum setaceum) At several places in dry fields S.E. of town.

(Polygala verticillata) Near Old Pond +

Helianthus scaberrimus + white ground as a
chicken yard. Soil scattered plants

(Verbesum phloxoides). Not collected but at
edge of plains S.E. of town in one locality

(Hypericum drummetatum) 1. of the town - 2 plants
at different places

(Bromus scaberrimus) A scattering of plants, old sandy
roadway S. of the town.

(Carex scoparia) one dried plant - 1 of the town.

(Aster latiflorus) Sparingly near the shore
- 1. of the town

Sep. 10. Fine, cool, windy - partly sunny - looking a little

In P.M. across plains nearly to West Pond -
(Juncoides campestris) Dry oak grove - W. of Harbor.
Frequent in Chippewagon Rd S.

Lespedeza capitata Sparingly on steep bank
to the shore W. side of harbor
30 (Fragaria vesca) many fine on hillside at

Sep. 11. Fine cool breezy day. West of the town in P.M.
Aspidium marginale One left in long days
woods W. of the town.

Sep. 11/10

(*Cuscuta bronovii*) Much of it at one place
in Swamp W. of the town.

(*Funaria hygrometrica*) Noted place W. of the town

Agalea glauca; a few bushes in Swamp W. of the town

Sep. 12. Miss Brown took her first lesson from the
bathing master, Mr. Brown. He was in only about 10 minutes
but succeeded in floating perfectly several times.

She took her afternoon lesson on Chippewa Island.

(*Eupatorium altissimum*) A cluster of
plants just in flower on the open downs
on Chippewa Island.

(*Pedicularis canadensis*) A scattering of
well developed plants in an oak grove on
Chippewa Island.

(*Bromus commutatus*) Sandy cultivated
ground Chippewa Island. A few plants.

Sep. 13. Fine, hazy day in Am. In afternoon in motor
boat to Wilson's landing, across to Poucha
Point & the woods at the western end of
Chippewa Island.

(Amaranthus blitoides) A few plants near a
stable in town. +

(Spartina alterniflora) More at Poucha
Pond.

Elymus australis. Sparingly at one
station on west side Chappaquiddick
among low shrubbery along top of bluff.

Sep. 14. Trapp's Pond and vicinity in afternoon. The day
all day cool & windy; clearing in afternoon, raining in
evening.

(Potamogeton diversifolius.) Patch at ice pond N.
of the town, in fruit.

(Eriophorum terreste) Trapp's Pond Swamp; a
few plants with some fruiting heads remaining.

(Carex homothodes) A single plant with dried
spikes. Trapp's Pond -

(Anemone quinquefolia) Low meads W. Lake
Tupper Pond.

(Leptocarpus laccra)
One plant near Tupper Pond - fruiting spike.

(Amaranthus Blitoides) a single plant
near a barn in town.

(Rorippa arvensis) Waste lot in town.

(Melilotus officinalis) A few flowering plants
in waste lot in town - in full flower.

(Menyanthes trifoliata) Swamp at first ice
pond.

(Mentha spicata) Waste lot in town.

(Limnolobos tenuifolia) Sandy shore of Tupper's
Pond. + 2 fr.

(Solidago asperula) Meadows near the shore
Tupper's Pond. A scattered colony in
full flower - with S. alterniflora; S. sempervirens near.

(Chrysanthemum parthenium) Waste ground in town.
Some flowers still.

Sep. 15. P.m. In afternoon west of water tower and on
across the plains to Great Pond.

Pinus strobus - a single tree of three
trunks united into one near the base, about
30 ft high among the pitch pines perhaps a
half mile W. of the water tower. No indications
of the ground ever having been disturbed
any where near by collections. The locality
was an extensive tract hundreds of acres in
extent of pines & scrub oak & arbutus oaks.

Not far away, however, were several
scattered trees 6-20 ft tall, of
(Pinus sylvestris) the largest bearing a few
small cones.

Panicum ashei, Dry cartway through
oak scrub. W. of the town.

(Sporobolus vaginiflorus, Dry clayey
depression, which had earlier been wet, in field
W. of the town.

Eriocaulon septangulare Boony, Ed-
- Pond Pond.

(*Calamagrostis cinnoides*.) A single plant just
in flower in bog on east side of St Pond.

(*Chenopodium ~~flavescens~~* ^{lagarum}) N. of town - *Trigonotis* c.

(*Sparganium angustifolium*.) Single plant at
border of scrub oak thickets. N. of town.

Corynephorus canescens L. ^{Reans.} Sandy slope near
water tower.

Sept 16, Mostly overcast with high N.E. wind; cool
to *Calluna* ponds in afternoon & beyond to
a wet meadow into St Pond.

(*Panicum inattenuatum* ~~Kotze~~) Border
of low thickets St Pond wet N.; Sept 18, low
thicket N. side Long Point Pond.

(*Ceratophyllum demersum*.) Ed St Pond

3 *Acalypha gracilens*, old cultivated
field in low grounds on west of St Pond

Sept 17, Mostly overcast with high S.E. wind, cool.

Up west side Long Point Pond in am
to *Calluna* ponds near E. in afternoon

(Micranthus lobata) Roadside at edge of town. fr.

(Erigeron annuus.) field on Oak Bluffs road about 1 mile out of town

(Lilium superbum) one tall plant in bog N. of Oak Bluffs road over a mile out

(Carad. lanuginosa?) Leaves only of some Carad. not before seen suggesting this:

Sep. 18. Bathing beach in am., in afternoon to Tancook Hill with Edith. Fine day.

19. Cloudy & threatening, light E. wind. Across the plains to foot of Edgartern Great Pond. In afternoon to Allen Keniston's, Hunt-Warden, to arrange abt. expedition tomorrow to look for Heath Hen.

(Desmodium graminoides) one left found in Panicum scoparium meadow

Sep. 20 Wet, threatening morning, postponed trip for Heath Hen. Cleared later, fine afternoon. Chopped duck in am. West side; in afternoon landed from boat on

East side on Cape Paper Bay.

(*Triostema perfoliatum*.) A colony consisting of a number of separate clusters of upright plants occupying a few square yards on open place in oak woods or chippewick. The plants were mixed with *Sanicula marylandica*, (the second good colony of this and with) & nearly *Gerardia pedicularia*, (common)

(*Scrophularia leporilla*.) Much of it at one place in a thickly wooded area in there, plants mostly dried - but found fresh.

Sep 21. Rainy from 8 in early am. clearing later & fine rather hot day. Left Newton 9:40 am to 6 pm. drove through North Hen country & beat the scrub looking for North Hen one was seen by Mr. H. but we found fresh tracks in the sand about stacked corn in a field.

(*Nabalus serpyllifolius*) Lf. First seen roadside out on N. Salisbury road; c. thence ^{locally} towards N. Salisbury Pond.

(*Populus grandidentata*) A group of small trees, in layers 20 to 30 ft high. See. miles out on N. Salisbury road.

(*Silene noctiflora*) a single plant in flower in old field near game warden Lawrence's place.

(Lepidium densiflorum) A single plant
near the Silene acaulis - nearly dried up.

(Linum catharticum) a single plant
just in flower near the above.

(Centaurea cyanus.) + scattered strongly on
old cultivated field at Warden Sawyer's
place.

(Trifolium incarnatum) + in same field
with the above.

Solidago virgata + Along bank on road
to Tesbury Pool Pond, Perhaps a half dozen
plants scattered among an abundance of
S. bicolor - flowers golden yellow - otherwise
nothing more than S. bicolor.

(Hedysarum pulegioides) A good growth of
strong plants, mostly dried up, in a little
depression by the roadside on road to W.
Tesbury Pond.

(Gnaphalium purpureum) + Scattered among small
plants of G. polycephalum in sheep pasture by shore
of W. Tesbury Pond.

Panicum Addisonii? Handy once
cultivated field where the Heath Hen are
fed in winter
(Chaetochloa Stalica) one left of two

Sep. 22. Batching back in Am. to Oak Bluffs by motor cat
boat in P.M. 1 1/2 hours on shore.

(Ruppia maritima) + 8 fr. Steam Pond

Yucca vulgaris + 8 fr. Scattered
plants in waste ground Oak Bluffs.

(Catalpa Catalpa) a few seedlings near the shore

Sep. 23. Batching back in Am. Chappaquiddit

in afternoon across to S.E. side of

Cape Poge Bay.

(Salix discolor) one shrub in dense

low thicket. leaves unusually narrow & tapering
with petiole, but to be referred to no

other species unless S. procumbens.

(Salix alba) but small trees in boggy depression on
Chappaquiddit I.

(Cyperus Grayii) sands near batching beach

Carex digitalis Two places in dense
hillside thickets, some colonies remaining -
Chappaquiddit I.

(Commada cloydoniana) hillsides
Chappaquiddit I.

Actaea alba, hillsides shaded with
beech trees & adjoining thicket many
plants, a few with the well-purplish
racemes remaining. Leaves mostly gone.

Paricium latifolium? a single
plant, spikelets all fallen, on hillside
thicket

Sep. 24 Bluefishing, fine day, very calm.

" 25, fine day Chappaquiddick I. across to
Poucha Pond - drove back - sailing in afternoon

" 26 Trapps Pond & southern end of Longkonlock
in Am. On Chappaquiddick I. for an hour
in afternoon.

Centaurea vochymensis + vfr. Scattered through
a sterile field of sweet corn 1/2 mi. N. of
Trapps Pond, with it much Medicago sativa
Silene vulgaris ^{br. Lychnis viscaria}, one Picris hieracioides,
some Malva moschata - & a tuft (or more) of

? Centaurea maculosa + vfr

Picris hieracioides 1 plant +

(Polanogeton pectinatus) Much wgt. in
shallow water pond near the shore S. end
of Longkonlock.

1910
Sep 24 Drove in afternoon with Mrs Keniston
from 2:20 P.M. to 6:45 P.M. across country to state
road a mile from Hambro's Cove, to Tashmo Pond
& Vineyard Haven -

(*Sanicula canadensis*) a single plant by
roadside in woodland NW of Heath Hen country

(*Samolus minor*) Tashmo Pond.

(*Rhus hirta*) Tashmo Pond, a scattered
colony of pod-rigid shrubs on the slope to the
shore the tallest perhaps 10 ft high

³
Aster cordifolius + a good deal of it in
the vicinity of the pond -

³
(*Urtica gracilis*) Tashmo Pond.

Aug 91 new for 1910 Vineyard 1910 including
19 not found on Vineyard.

1909-

Oct. 6. Walked to Katama. Bus along the
Herring Run to Great Pond back across to
the Water Tower. Fine day.
