Baby Chick Season Is Here

WE have made arrangements with several of the leading hatcheries of the Northwest to handle their Baby Chicks. Use the attached order-blank and send us your order, stating which hatchery you want them from and whether to be shipped direct or if you will call for them at the store.

PRICE ON HENACRES BABY CHICKS

FEBRUARY 1 TO MAY 1

25 to 500 chicks, each	22c
500 to 1000, each	21c
1000 or more, each	20c

MAY 1 TO 15

Note These New Lower Prices

25 to 500 chicks, each	20c
500 to 1000, each	19c
1000 or more, each	18c

MAY 15 TO JUNE 1

25 to 500 chicks, each	18c
500 to 1000, each	17c
1000 or more, each	16c

JUNE CHICKS

25 to 500 chicks, each	16c
500 to 1000, each	15c
1000 or more, each	14c

PULLETS

For delivery when 8 weeks old, \$1.50 each; 500 for	\$ 700
16 weeks old, \$2.25 each; 500 for	1000

TERMS: For immediate delivery, cash with order. For future delivery, one-fourth deposit required.

ALL OUR BIRDS ARE B. W. D. TESTED

Please note that we test every bird on every one of our farms. We take no chances. Every bird is tested by the Washington State Department of Agriculture.

It took a crew of three men a month to draw the blood samples of our flocks. Seven cents a bird was paid for the Laboratory work, but the price of "HENACRES" chicks remains the same, except for the early May hatches and that is lower this year. This is only one of the "safety first" measures that we take to be sure of delivering to you only clean, healthy, husky chicks.

"HENACRES" LEGHORNS CAN BE SHIPPED INTO ANY STATE OF THE UNITED STATES AND TO ANY FOREIGN COUNTRY. We positively guarantee this, so you take no chances in ordering either hatching eggs, baby chicks, pullets, hens or male birds.

A LITTLE HISTORY

Mr. Wells, the owner of "HENACRES," was born in Ohio, raised in Kansas, graduated from a Kansas high school and college, became interested in poultry in 1906. His first hatch was a case of "store eggs." Then he bought some Kellerstrass and Philo White Orpington eggs at \$1.00 each and raised a flock of 100 fine pullets. He tried to make a living from poultry and "went broke" twice, but never gave up. In 1915, with an old automobile and \$200.00 as capital, he bought an eleven-acre apple orchard at Prosser for \$5,500. Traded the car in as \$500.00 for first payment, bought 100 hens from the Pasco farm for \$100.00 and had \$100.00 left for furniture, farming equipment and living expenses. He had no team or car, so carried his eggs a mile and a half to town and toted his groceries and feed home on his back. Bought a second-hand incubator for \$6.00 the first year and two more small machines the second year. Started supplying the neighbors with baby chicks, then shipping them to nearby towns.

At first, he specialized in commercial eggs, but his success in breeding and hatching turned his ideas in that direction. Every dollar he earned went back into chickens and his flocks and business grew.

Today he has one of the most modern, up-to-date plants in the northwest. You make no mistake when you buy Henacres' Chicks.

RUSSELL'S 1928 CHICKS ARE FROM B. W. D. TESTED STOCK

Our individual responsibility counts for more than the fact that our chicks are accredited. For many seasons we have used Leghorn Cockerels that came from trapnested hens whose records equal or exceed accredited standards. We have paid the closest attention to the breeding, size and quality of our birds, but this season we are taking even more care to provide stock that will not fail to give satisfaction. For this reason and to comply with regulations regarding interstate shipments of eggs, chicks and stock, all our birds are being tested for bacillary white diarrhea.

All reactors are removed under State supervision. Not only Leghorns, but all of Russell's chicks—Reds, Rocks, Giants, Orpingtons and Minorcas are tested, and only bacillary white diarrhea-free stock is used for breeding. This gives you every assurance that with proper breeding conditions you will be able to raise a greater percentage of chicks than you have ever raised.

PREPAID PRICES FOR TANCRED STRAIN LEGHORNS

Per 25 Per 50 Per 100 Per 500 Per 1000

Chicks, October 1927 —————

to April 30, 1928.....\$4.50 \$8.50 \$16.00 \$75.00 \$150.00

C. O. D. COLLECTION CHARGES: We are always glad to send chicks, eggs and pullets collect on delivery, where a deposit of 10 per cent has been paid. But the collection charges for the express or the parcel post C. O. D. are to be paid by the consignee, even though we prepay the delivery charges. We guarantee all our chicks, eggs, etc., to reach you 100 per cent safe, but our prices are net and the C. O. D. charges are to be paid by the customer.

BABY CHICK GUARANTY

We guarantee full count and 100 per cent safe arrival of baby chicks. In case of a loss we will either refund the purchase price or send a second lot of chicks at our option, provided they are examined in the presence of the postman or the express agent before leaving the post office or express office, and a statement signed by this official, showing the number of dead, weak or defective chicks, mailed to us immediately. No complaint concerning shipping or condition of chicks upon arrival, will be considered unless it reaches us within ten days after chicks are shipped.

TURKEYS

MAMMOTH BRONZE

A fine flock of 200 pure bred Bronze Turkeys will supply our eggs this coming season. We have selected these birds carefully from healthy range stock, the hens being the choicest of a flock of 400. The males all big, husky specimens, the females large framed, deep bodied and of approved weight.

PREPAID PRICES

Poults—April and May, \$1.00 each for 25 or more. Eggs—March and April, 75 cents each for 8 to 25; 60 cents each for 25 to 100; 50 cents each for 100 or more.

TWO, THREE AND FOUR WEEKS OLD CHICKS

Occasionally we sell chicks direct from our brooders. Of course, we do not always have certain breeds on hand, and if we have no day-old chicks, can at times supply the older chicks. To calculate the prices, add 5 cents per week to the cost of the day-old chick. For example, chicks four weeks old would be 20 cents more than the listed price. These chicks can not be shipped on an excessively long trip; neither can we at this age separate pullets from cockerels.

“SNOW WHITE” STRAIN OF WHITE LEGHORNS

EVERY BREEDER HAS A RECORD OF 200 EGGS OR
BETTER IN HER PULLET YEAR—AND ALL ARE
TESTED FOR BACILLARY WHITE DIARRHEA

(PEDIGREE CHICKS).

“SNOW WHITE” BABY CHICKS

“SNOW-WHITE” baby chicks are of superior quality, partly on account of our system of breeding, and the use of twenty-five ounce eggs only, thereby giving the chick the right start in life, and partly through our system of incubation, which does away with over-heating, and gives the chicks moisture at the right time.

It is not unusual for 90 per cent of our chicks to reach maturity.

We are very careful in culling baby chicks and assure you that you will receive nothing from our ranch, except 100 per cent perfect chicks.

SAFE DELIVERY GUARANTEE

All shipments are warranted to arrive in good condition. We will replace, or refund, for any loss in shipping, providing you do not have full number, with the exception to prepay stations, which are at buyer's risk.

PRICES

100 chicks, \$15.50. 500 chicks, \$75.00. 1000 chicks, \$145.00.
Send us your order quick.

TERMS:

If it is not convenient to send full amount with order, send us deposits as follows: \$2.00 deposit on orders of 25, 50 and 100. 10 per cent deposit on all orders over 100. Balance due may be paid before shipping date or chicks can be shipped C.O.D. for amount due. No shipments of less than 25 chicks.

We will greatly appreciate cash in full with orders.

No Order is too large for us to fill—nor too small to compel our most careful attention.

ALL FLOCKS TESTED AND ACCREDITED

Salem Chickeries flocks are all tested for Bacillary White Diarrhea, and the reactors removed. This work is done under state supervision. Last year 1700 of our birds underwent this test, and this year every flock of all our six varieties are tested.

Our Salem Chickeries utility matings of White Leghorns are bred from carefully selected males and culled flocks of females. All flocks farm-raised, with plenty of free range, and are vigorous type birds that are free from disease.

Our stock is O. A. C., Tancred, Hollywood and Hanson.

Mating, feeding, and housing is under the close supervision of our inspector, and the entire management is directed toward producing strong, vigorous OK chicks.

SEMESAN

The wonderful new seed disinfectant. Write for circular giving full information, or come in and ask us about it.

Our Feeds Are the Best

FEED MOLASSES

We have Albers Feed Molasses in 600 pound drums. Try this on your milk cows—the results are simply wonderful.

This is the famous

Buckeye Oil-Burning Brooder

Whether you hatch your own chicks or buy your chicks from a hatchery, by all means learn about these famous Buckeye Brooders. Learn about the new improvements and about the new low prices. If you have not received a copy of the new Buckeye Brooder Book, write us for it today.

We Carry the Wonderful—

Sol-Hot Oil Brooder

THE FAMOUS TWIN FLOAT SOL-HOT BROODER—THE
WORLD'S GREATEST VALUE

We have investigated all the brooders on the market and have selected the TWIN-FLOAT Sol-Hot for our customers because we have never seen a brooder that can compare with the TWIN-FLOAT Sol-Hot for safety, dependability and ease of operation. The success it gave to thousands of users last season has never been equalled or even approached.

EASY TO OPERATE

The TWIN-FLOAT Automatic Oil Level is the greatest invention ever developed for oil burning brooders. You can set the Sol-Hot anywhere—just light it and it will furnish all the heat your chicks require. No bother leveling the burner—no wicks to trim—no smoke—no gas—no danger—no trouble—no smothered chicks. Poultry raisers everywhere say it is the most wonderful brooder they ever saw. Sol-Hot will mean a lot in your success with the chicks this season.

We handle Brooders of the standard makes and from the 1200 chick coal brooder down to the little Putnam Brooder stove at \$4.75 each.

LLOYD A. LEE Hatchery and Poultry Breeding Farm

QUALITY BABY CHICKS

Officially B. W. D. Tested and Officially Approved Under State Supervision

We have handled chicks from this hatchery before with excellent success. These satisfied customers together with other recommendations that have come to us lead us to place a great deal of confidence in this hatchery and breeding farm. We are reliably informed that this is one of the leading poultry plants in Oregon and that their products can be relied upon.

WHITE LEGHORNS—SPECIAL QUALITY

Two qualities of White Leghorns are shipped. One known as the "Pedigreed Cockerel Mating" consists of two- and three-year-old hens carefully culled according to O. A. C. production standards and mated to pedigreed males whose dams' trapnest records are from 250 eggs or more. Price of these chicks, 25 for \$5.00; 50 for \$9.50; 100 for \$18.50; 500 for \$90.00; 1,000 for \$175.00

Regular Mating White Leghorns are of outstanding quality. They are maintained for breeding purposes and are not the ordinary commercial egg stock mated for a short spring season. Every male is from a dam whose trapnested record is more than 225 eggs in her pullet year. Most of the males' dams have records of from 250 to 290 eggs and have been bred from trapnested stock for many generations. Prices on page 8.

BARRED ROCKS—SPECIAL E MATING

This is one of several special matings which give higher quality chicks. These O. A. C. females are mated with O. A. C. cockerels whose dams have trapnest records of 200 eggs and better to their credit at the College farm at Corvallis. These birds have been carefully culled for type and vigor. Strong, sturdy chicks will result from such choice matings. Price of chicks, 25 for \$5.75; 50 for \$9.50; 100 for \$21.00; 500 for \$102.50; 1,000 for \$200.00.

Barred Rock regular mating chicks consist of flocks of O. A. C. strain and also other flocks of Park's stock which have been well culled for vigor and size. Many of the males heading these flocks are from trapnested dams with records of 200 eggs to well over 300 eggs in their pullet year. High production has been bred into these flocks for many generations. Price on page 8.

R. I. REDS—SPECIAL E MATING

Higher quality R. I. Reds culled for dark red color and properly mated to males from dams having trapnest records of better than 200 eggs in their pullet year. These flocks will produce some real Reds in color as well as production. Here is an opportunity to establish a flock of which you will be proud, at much less than the usual price for such fine quality. Price of these chicks, 25 for \$5.75; 50 for \$11.00; 100 for \$21.00; 500 for \$102.50; 1,000 for \$200.00.

R. I. Red regular matings are well above the average quality, due to careful culling for color and egg production. Many of the birds in these regular matings would not be out of place in special matings and are equal to those found in the better matings of many breeders. Prices on page 8.

Lee Quality Chicks Can Be Had in Fourteen Varieties

Parent stock of all Baby Chicks sold by this poultry plant is B. W. D. tested.

Ask Duthie Co. for complete 24 page catalogue describing Lee's Baby Chicks, if interested in the following varieties:

Brown Leghorns

Black Minorcas

Buff Orpingtons

Buff Leghorns

White Minorcas

White Orpingtons

Light Brahmas

Jersey Giants

White Wyandottes

Anconas

Special matings in all varieties for those who desire higher quality for foundation stock or new blood for high bred breeding males. See the 24 page catalogue for complete descriptions. Get it from Duthie Co. or write in direct.

GUARANTEE 100% LIVE DELIVERY PREPAID WITH LIBERAL TERMS

Small deposit of \$2.00 per 100 holds your order on date desired. If not convenient to pay before shipment, the chicks may be sent C. O. D.

SCREEN GLASS

Passes Violet Rays
Economical
Durable
Healthful

What Screen Glass Is

Screen Glass is made by processing or coating wire cloth with tough, flexible, transparent material that allows the ultra violet rays to pass. It has all of the characteristics of glass without the disadvantages. It is absolutely weather proof and unbreakable. It is unaffected by extreme cold or heat, and when used in a vertical position will render lasting service. Screen Glass comes in rolls and is easily cut to size and framed, requiring only a pair of shears, tacks and hammer.

BRINGS THE VIOLET RAYS INDOORS. USE IT WHEREVER YOU NEED GLASS FOR LIGHT OR PROTECTION.

All animal, plant and even human life is dependent upon pure sunshine for health, vigor and vitality. In addition to its many other advantages Screen Glass transmits the important health building, ultra violet rays of the sun, while ordinary glass filters them out. By simply replacing ordinary glass with Screen Glass in the windows and wherever possible, you permit these vitalizing ultra violet rays to pass. By actually using Screen Glass you will be convinced of its many advantages, as a weather proof, inexpensive, practical building material. Screen Glass is not sold as a roofing and for best results in point of service, should be framed in a vertical angle, or otherwise in loose frames that can be taken down during the extremely hot months.

INCREASES POULTRY PROFITS

MAKES HENS LAY—SAVES BABY CHICKS

Hens given violet ray advantages regularly are kept healthy, scratch more and develop egg laying vitality, which greatly increases your egg yield. In baby chicks you will prevent deaths, rickets (leg weakness), and diseases. Chicks will thrive and grow faster and it has been proven will even weigh more. You can easily place Screen Glass in your brooder or poultry house windows or fronts, thereby providing outdoor sunshine without exposing chicks to outdoor weather conditions. You will be agreeably surprised at your increased profits, increased egg yield and saving of baby chicks, for Screen Glass is now in universal use and demand by poultry raisers everywhere.

A FEW OF ITS MANY USES

Screen Glass is ideal for poultry or brooder house windows, fronts, doors and lights. Also for winter screening, sun parlors, playrooms, out-building windows, sleeping porches, summer cabins and greenhouse sides. When used for hot-bed sash or scratch shed covers Screen Glass should be mounted on removable frames and protected from the direct rays of the sun during the hot months. You will find many additional uses for Screen Glass around the home, office, factory or farm.

If in Doubt About Hens Paying a Profit

\$600.00 PROFIT

175

"HENACRES"

Leghorns

By Carl Discher, Route 10, Spokane, Washington

	Eggs	Sold	Feed	Profit
September	2693	\$ 77.55	\$27.45	\$ 50.10
October	3185	113.00	34.90	78.10
November	3818	128.25	32.40	95.85
December	4031	146.50	38.80	107.70
January	3288	93.78	36.30	57.48
February	2599	70.47	34.25	36.22
March	3472	75.00	39.15	35.85
April	3557	66.46	33.55	32.91
May	3489	72.64	32.75	39.89
June	3018	63.90	33.95	29.95
July	1753	36.72	24.15	12.57
August	1985	50.53	23.00	27.53
Totals	36,888	\$994.80	\$390.65	\$604.15

Average number eggs per hen	211
Amount received for eggs per hen	\$5.68
Feed cost per hen	2.23
Gross profit over feed cost per hen	3.45
Average feed cost per dozen eggs	.1268
Average price received per dozen eggs	.32

Mr. Discher started with 184 pullets and eight yearlings. He sold some and culled a few. His flock averaged 175 birds for the year.

He received his chicks from "HENACRES" March 14th, and fed them Sperry's feeds (a mighty good feed, by the way) all the way through. We have always said that the combination of good stock, good feed and good care means a good profit every year.
