VOLCK, Effective, Safe and Easy to Use

Controlling plant pests successfully demands a spray that will not only effectively control pests such as Red Spider, Mealy Bug, Scale, White Fly, and Aphis, but at the same time be safe to use on tender plants. Safety is particularly necessary on tender greenhouse and garden plants. Volck answers these requirements and fewer applications will get results.

Volck is also a pleasant spray to handle and mixes easily with water.

Roses of Recent Introduction

JOHN RUSSELL (H. T.)—A very fine dark crimson rose with blooms of a good shape and stiff, strong petals. Mr. Easlea, who saw it growing in the raiser's nursery, tells us it is quite one of the best roses of recent years.

JOSEPHINE VESTAL (H. T.)—A Rose of attractive coloring. Color is so difficult to describe that any description can only be a partial one, and gives but a faint idea of the superb beauty and richness of the shades. It might be described as salmon-flesh, tinted rose, with a touch of yellow at the base. Its fragrance fills the room. Ranks one of the best of the garden Roses. Hardy in almost all localities.

JUNE BOYD (H. T.)—Long-pointed bud, flower large, double high centered very lasting. Salmon carmine yellow at base, opens to bright peach-blossom pink, continuous bloomer.

JUSTINA (H. T.)—Has a very large long-pointed bud, petals recurving on the opening flowers, color a beautiful salmon-pink, tinted apricot and gold, delightfully fragrant. A very strong, vigorous grower. It might well be described as a glorified Madame Butterfly but more highly colored.

LADY DIXON HARTLAND (H. T.)—Bud long-pointed; flower opens well, high center, fragrant, deepest salmon at center shading to pale pink on outer petals. Abundant, continuous bloomer.

LA CHAMPAGNE (H. T.)—A meritorious and distinct variety of strong, robust habit, with large, long buds of beautiful shape, which develop into good full bloom; color bright chamois, shading to yellow with apricot at center and peach-blossom reflex and yellow base.

LORD CHARLEMONT (H. T.)—Bud very long-pointed; flower large, full, high centered, perfectly shaped; clear crimson, deepening to carmine-crimson; strong fragrance.

LOS ANGELES (H. T.)—Lovely buds and exquisite flowers of salmon pink with yellow shading, very sweetly perfumed. In favored locations it does well.

LUCIE NICHOLAS MEYER (H. T.)—Bud large, flower large, double, globular, very lasting; dark pink, lighter at the edges; borne, singly and severally, on strong stem; moderate fragrance. Foliage glossy green. Disease resistant. Blooms continuously.

LUCY FERDINAND DAVID (H. T.)—Long-pointed bud, flower large, full cuped, very fragrant. Pure white with slightly cream center, borne on strong stems.

MADAME ALEXANDRE DREUX (Per.)—Color, deep, orange, very brilliant, and with bunches of bright gold and a light suffusion of pink at times. Bud, long, slender and pointed, opening into a flower of beautiful form, held upright on a long stiff stem, good foliage beautifully arranged, bloom medium size.

MABEL TURNER (H. T.)—A fairly vigorous rose, with well-shaped faintly scented blooms, carried on long, stiff stems. The color is a bright pink, shaded white, reminding one of the old rose "La France." Foliage olive-green and fairly free of mildew. It should be useful as a bedding variety.

MISS LOLITA ARMOUR (H. T.)—Burnished buds and creamy copper flowers, with reddish tinge.

MME. MERCIER MOLIN (H. T.)—Bud long-pointed; flowers large, full; fiery red tinted with crimson, edges of petals slightly tinted with rosy-pink; borne on long, strong stem, sweet fragrance. Vigorous very free bloomer.

MARCIA STANHOPE (H. T.)—Bud large, globular, streaked slightly with carmine; bloom large, double, globular very lasting; pure white, strong fragrance. Foliage disease-resistant. Profuse bloomer. Hardy.

MATCHLESS (H. T.)—Bud very large, long-pointed, deep cerise-pink; flower immense, full, very double, intensely strong fragrance, lasting well, uniform cerise-pink, borne singly on long strong stem. Growth very vigorous.

MRS. WILLIAM C. EGAN (Per.)—Strong healthy grower, with long, pointed buds which develop into flowers of good shape. In color, it is a two-tone pink, the reverse of the petals a soft light pink, the interior deep flesh color with a golden line at the base of the petals; the flowers are carried on long stiff stems, and last in good condition for an unusually long time, either cut or on the plant; an exceptionally free and continuous bloomer.

NERISSA (H. T.)—Pink buds, opening into creamy double flowers, deepening to peach color in center. Mild fragrance.

NEW COLUMBIA (H. T.)—Sport of Columbia. Flower true pink, deepening to glowing pink—a little lighter than Columbia, with outer petals reflexed, allowing the bud to open better. All other characteristics like Columbia.

DR. HUEY (H. W.)—Bud medium size; semi-double; borne in clusters of 3 or 4 on good stems; lasting. Color, dark crimson-maroon, of great brilliancy; stamens and anthers light yellow. Blooms continuously for three weeks.

DR. W. VAN FLEET (H. W.)—Flowers when open run four inches and over in diameter. The center is built high, petals beautifully undulated and cupped. The color is a remarkable delicate shade of flesh-pink on the outer surface, deepening to rosy-flesh in the center.

EMILY GRAY (H. W.)—A new yellow climbing Rose with glossy, undulated holly-like foliage. The buds are long and flowers of golden yellow are large and semi-double. A valuable acquisition. Needs winter protection north of Washington, D. C.

EUGENE JACQUET—The earliest and most profuse flowering of all the climbers and of the easiest cultivation. Almost every eye produces a handsome truss of fragrant, cherry-red flowers Eugene Jacquet can be bloomed in February without difficulty. It flowers a week earlier than Tausendschoen or Rosarie under the same conditions and carries handsome, dark green, mildew resisting foliage. It holds the flower unusually long—the color improves with age. Eugene Jacquet should be forced so as to show color ten days before Easter to be at its best for Easter sales

GARDENIA (H. W.)—Bright yellow, cream color when open; very fragrant and free; early flowering. This is the hardy Marechal Niel; double yellow flowering.

HEART OF GOLD (H. W.)—Bud medium size; flower medium size, single, open, lasting, crimson shading to white center with yellow stamens, borne in clusters on medium long stems. Very hardy.

HIAWATHA (H. W.)—Its flowers are about one and one-half inches across, and produced in long, pendulous sprays, with frequently from forty to fifty flowers on a spray. In color, it is brilliant ruby-carmine, with a clear white eye and a mass of golden stamens.

JACOTTE (H. W.)—Bud large, orange and yellow; flower large, semi-double, open, cupped, very lasting; deep coppery yellow tinted coppery red; borne, several together, on long, strong stem; fragrant. Blooms profusely in May and June.

JEAN GIRIN (The ever-blooming Dorothy Perkins.)—The flowers are similar in form and color to the pink Dorothy Perkins. The chief merit of this rose is that after giving a mass of bloom in June, unlike the other climbers, it blooms again.... Cut off all of the old June blooms to help the plant produce more flowers during the summer and fall.

LADY GAY (W.)—Flowers of a deep cherry-pink, shading on the edge of the petals to a very delicate soft tone of pink.

MARY LOVETT (H. W.)—In this Dr. Van Fleet has brought out another Wichuraiana Hybrid a "White Dr. Van Fleet." This rose has done well and is strongly recommended. Loses foliage early.

MARY WALLACE, (H. W.)—This is Dr. Van Fleet's masterpiece. Blooms two or three times during the summer months. A pillar rose supporting itself in a bushy growth 6 to 8 feet high. Bright clear rose-pink with salmon at base of petals. The largest Hybrid Wichuraiana in existence. Seen this year in all its giant loveliness.

PAUL'S SCARLET CLIMBER (H. W.)—Vivid scarlet, shaded crimson, makes a brilliant display for a long period of time in the garden. A wonderful climbing Rose. We consider it the most wonderful hardy Climbing Rose.

RED DOROTHY PERKINS, or EXCELSA (W.)—Ornamental climber which is nearly evergreen; this will assure this lovely pillar Rose a place in every American garden, for it is quite hardy in addition to all its other fine points. The flowers are very double, produced in large trusses of thirty to forty, and almost every eye on a shoot produces clusters of flowers. The color is deep rosy-red, the tips of the petals tinged with scarlet.

ROSERIE (Pink Tausendschoen)—This is a bright pink form of Tausendschoen. A grand Rose from any standpoint.

SHOWER OF GOLD (H. W.)—The color is a deep golden-yellow, with orange shadings in the center. This fills the "long felt want" for a "Yellow Rambler."

SILVER MOON (H. W.)—Flowers very large, four and one-half inches and over in diameter. Pure white in color; petals of great substance, beautifully cupped, forming a clematis-like flower. The large bunch of yellow stamens in the center adds to its attractiveness.

TAUSENDSCHOEN, or THOUSAND BEAUTIES (H. M.)—The flowers upon first opening are the most delicate shade of pink ever seen in a Rose, might be described as a white, delicate flushed pink, changing to rosy-carmine. It gets its name from its many flowers and the variation in coloring.

THE BEACON (H. Cl.)—Fiery red with distinct white eye.

VEILCHENBLAU, THE BLUE ROSE (H. M.)—This is a much better Rose than some give it credit for. It opens a reddish-violet, quickly changing to violet-blue.

WHITE DOROTHY PERKINS (W.)—White Dorothy Perkins, in every way is the equal, if not superior, to Crimson Rambler, as a red, and Dorothy Perkins as a Pink. This Rose has no rival as a white climber.

It is really one of the most beautiful of summer blooming Begonias and never fails to grow well and bloom freely when bedded out in a partially shaded, moist situation; produces clusters of flowers and buds of a beautiful pink color by the hundred on a single plant during an ordinary growing season. Think of it, a Hardy Begonia, one that stood twenty degrees below zero last winter, and came up and bloomed all summer. So many persons write us asking for plants suitable for shady places. Well, Begonia Evansiana will fill the bill. 85 cents per dozen; \$6.00 per hundred.

Fern Whitmanii Compacta

Ferns

Although we increase each year our production of Nephrolepis Ferns, the demand constantly exceeds the supply. Successful fern growing invariably hinges on the cleanliness of the plants. Ours are free from "White Scale."

TEDDY JUNIOR (The Fern for Every Household.)—The fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant, permitting it to finish with a fine full center and perfect symmetrical spread. The pinnae are distinctly undulated, giving the fronds an attractive wavy appearance, which adds materially to their charming decorative effect. "Teddy Junior" will produce about four times more fronds than any other Fern ever introduced, finishing with fifty to sixty fronds in a four-inch pot.

JOHN WANAMAKER ("The Wanamaker Boston Fern")—A "sport" from Nephrolepis Scholzei, with longer, narrower, gracefully drooping fronds. It is not so compact in growth as Scholzei, and, therefore, does not decay in the center, and is a durable house Fern. It is a rapid grower; making an abundance of fronds, and is quite distinct from any other Nephrolepis.

ROOSEVELT—The pinnae are beautifully undulated, giving the Roosevelt a pronounced wavy effect seen in no other Fern; as the plant ages this effect becomes quite distinct. Our sales of Roosevelt have exceeded two hundred and fifty thousand plants.

WHITMANII (The Ostrich Plume Fern.)—The well-known fluffy leaved fern; a popular florists' variety.

WHITMANII COMPACTA ("The Parlor Fern")—This is a condensed form of the "Ostrich Plume" Fern, with valuable characteristics added which are not evident in the parent—the pinnae subdividing, making miniature fronds which are superimposed on the main fronds, looking as if two or more were condensed in one. Graceful beyond description.

SCHOLZEI ("The Crested Fern")—The fronds, like Scottii, stand erect, and with a graceful arch form a plant of ideal shape, and they never break down, giving the plant a ragged appearance, as is so often the case with other plumed forms; furthermore, the loose, elegant arrangement of the fronds, allowing a free circulation of air through the foliage, prevents the center of even the largest specimens from becoming defective or yellow.

BOSTONIENSIS ("The Boston Fern")—A variety that needs no description. Still the most popular of all varieties.

GOODII ("The Baby's Breath Fern.")—(Good & Reese.)—This Fern is splendid to use for fern dish planting. The finest foliage of all the ferns. Fronds very fluffy. A well-grown specimen is in great demand. It is of easy culture.

SCOTTII ("The Newport Fern.")—It is a rapid grower and to see it in all stages of growth from a runner in the bench to a fourteen-inch pot specimen will convince you that it will be in great demand as a house Fern. This has always been a favorite variety.
