Price List

FALL 1928

SPRING 1929

Hamburg Nurseries

Hamburg, Iowa

GENERAL INFORMATION

OUR OBLIGATION:

Every customer is entitled to receive in good condition, sound, healthy trees or plants of the size, age and variety for which he pays. The successful growth of trees and plants, after delivery to customers depends almost entirely on conditions of soil, weather, and after-care, all of which are beyond our control. If any stock fails to grow, we will help share the loss with our customers, by replacing at one-half of the original purchase price.

NON-WARRANTY:

If Nursery stock proves untrue to the name under which it was sold by us, a replacement of the stock, as originally ordered, without charge, or a refund of the purchase price, shall be a complete satisfaction of our liability. Except for such liability we give no undertaking or warranty, express or implied, as to description, quality, growth, productiveness, or any other matter of any nursery stock we sell.—Hamburg Nurseries, Hamburg, Iowa.

WE PREPAY TRANSPORTATION CHARGES:

The prices quoted here are f. o. b. your railroad point. Our customers have no expense except the original purchase price. Some Nurseries make an extra charge of 10% or more to cover transportation. This is worth considering in placing your order.

SIZE OF ORDERS:

We will take care of your order no matter how small.

TERMS OF PAYMENT:

All orders are taken with the understanding that cash will be paid in full at the time of delivery.

CERTIFICATE OF INSPECTION:

Issued by our Iowa State Inspector who has gone over our Nurseries, showing them to be free from San Jose Scale, and other injurious insects and diseases, will be attached to every shipment.

REFERENCES:

Commercial Agencies, Any Bank or Business House in Hamburg.

PRICES:

We have made our prices very reasonable indeed. Note our stock is listed plainly as to age and size. Please do not compare our prices with firms quoting on mailing size trees and plants only.

30 of a kind like 30 apple or 30 cherry, etc. at 100 rates; 300 of a kind at thousand rates.

VARIETIES OF STOCK:

The best of the old and the choicest of the new varieties, which have been thoroughly tested and are worthy for your planting are listed. All orders are booked subject to stock being unsold, and without liability to us should injury befall the stock from frost, hail, fire or other causes.

Fruit Department

APPLES AND CRABS

The apple is the KING of fruits. An orchard or even a single tree is a good investment and will INCREASE the value of your property as time goes on.

	Price Each	Per 10	Per 100

Huntsman Fav.	Crab Apples		
Hibernal	Florence		
Ingram	Hyslop		
Janet	Red Siberian		
Jonathan	Transcendent		
King David	Whitney		
	Yellow Siberian		

We recommend the Specimen 5 to 7 ft. select trees, in preference to the smaller grade at a cheaper price. Quality counts and is remembered long after the price is forgotten. You save by buying the best. For the planter of a small family orchard, our Specimen 5 to 7 ft. trees, well branched, with a well developed fibrous root system, is better than any other grade to plant. It will give you the best satisfaction and we believe that it is the tree to buy. All fruit trees in this price list are branched except as stated otherwise.

ONE YEAR APPLE

Mostly Whips.	Per 5	Per 10	Per 100
Apple, 1 yr, 3to 4 ft, top 2 yr. root.	\$2.00	\$3.50	\$27.50
Apple, 1 yr. 2 to 3 ft. top 2 yr. root.	1.75	2.50	22.50
Same varieties as on page 1, not less than 5 apple sold at above prices.			

TOP WORKED.

**JONATHAN, DELICIOUS, GRIMES
GOLDEN APPLES.**

Will Triple the life of Your Trees.

	Each	10
First Class trees, 4 to 6 ft.....	\$1.10	\$10.00
Medium grade, 3 to 5 ft	.90	8.00

We are propagating the above popular varieties by a new and thoroughly tried out method, whereby we make five vital improvements.

1. Trees are more hardy.
2. Trees are more productive
3. Trees are longer lived.
4. Trees are more vigorous.
5. Trees are more disease resistant.

These popular varieties are top worked on hardy Virginia Crab and Hibernial stocks each variety requiring a particular variety of stock.

Our Iowa State Experiment Station at the Ames Agricultural College have been working on this for years, trying the different varieties on different apple stocks to determine which stock is the best to use for each variety. Also orchardists throughout the middle west have given these top worked trees a thorough trial showing the above 5 improvements.

No one will ever regret buying these top worked trees. This is the most important apple improvement ever made.

XX SPECIMEN APPLE

Many of our customers prefer a still larger tree than the regular commercial No. 1 grade To this trade we offer an extra heavy XX Specimen Apple Tree.

These XX Specimen Apple Trees will be specially selected as to their size and shape, having well balanced and branched tops. They were given more room in the nursery row, resulting in heavier trees.

These are not "overgrown" or unusually large or tall trees, but are clean, shapely, well balanced XX Specimen Apple Trees.

XX Specimen Apple Trees each.....	\$1.25
3 trees (any varieties)	3.50

DARK RED DELICIOUS AND IMPROVED GRIMES Two Year Tops 3 Year Roots

EARLY RICHMOND
MONTMORENCY
DYEHOUSE
ENGLISH MORELLO
LATE DUKE
OSTHEIM
WRAGG

We are one of the largest growers of fruit trees in the Middle West. The prices quoted are for strictly first class trees, well branched and well rooted, the best that can be had at any price. We recommend the Specimen trees 5 to 6 feet high.

These Cherry trees are not to be compared with the small one year or the mail order sizes of trees. The two best varieties for the Mississippi and Missouri Valleys are the Early Richmond and the Montmorency, which ripen about ten days later than the Early Richmond. Cherries you know are practically a sure dependable crop.

SPECIAL		
Hamburg Hardy Sweet Gold Cherry		
Hamburg Hardy Sweet Red Cherry		
Vigorous trees 4 to 6 ft., 1 yr	Each	
mostly whips		\$1.50
Medium Grade, 2½ to 4 ft., 1 year,		
mostly whips		\$1.00

Hundreds of times we have been asked "Have you a hardy Sweet Cherry?" We have them. The above Golden Yellow and Red Sweet Cherries bear well here in the Middle West and the trees are thrifty and do not winter kill. We have them bearing here in Hamburg. Do not fail to include some of both the above varieties in your home and family orchard. They will bear where other sweet varieties fail. They will stand our below zero winters here in the West.

XX SPECIMEN CHERRY

XX Specimen Cherries are smooth and shapely. Extra well-balanced tops and roots—real specimens. Heavier than the regular No. 1 Grade but not overgrown and "staggy" Two varieties only:

EARLY RICHMOND AND MONTMORENCY

extra select, 2 yr. top, 3 yr rtr	\$1.50	\$12.50
Medium Grade, 4 to 5 ft. 2 year		
top, 3 yr rt.	1.00	8.00

Just a word about these plums: Both of them originated in Minnesota; the Underwood by the University of Minnesota and the Loring introduced by Hon. C. M. Loring. Enormous large, bright red, juicy yet meaty, and of excellent quality fruit. We have a limited number of these to offer this year. One word describes these two new varieties. "Wonderful." Buy some of the Hansens and buy some of these and you will have the best plums introduced and originated in America.

SPECIAL PLUM CLUSTER BARGAIN

The Big 7 Plum Collection.

This is a real bargain for you. These plums are choice varieties specially selected so you will have fruit from July 15th to Sept. 15th, over a period of 2 months. They are all perfectly hardy anywhere; they are extremely heavy bearers and bear young often the next year after being planted. They are meaty and have an excellent rich flavor. They will fertilize each other insuring a heavy crop. In every way these 7 plum trees are superior and we positively guarantee that they will please you. Plant them in a cluster.

All 2 year selected 5 to 7 feet trees.

PACKING

Every customers order is individually packed. We enclose the roots of all trees and plants in heavy paper or burlap with damp packing material about the roots to keep stock in good condition.

PEARS

Dwarf Varieties

	Price Each	Per 10	Per 100
Specimen trees 4 to 5 ft., ex. select 2 yr. top 3 yr. rt.	\$1.50	\$12.50	\$100.00

BARTLETT DWARF The difference between Dwarf
DUCHESS DWARF and Standard Pears is that
KIEFFER DWARF Dwarf Pear trees are budded on
 imported quince roots which
 stunt or dwarf the growth. Standard Pears are budded on
 Pear Roots. The fruit is the same as the Standard varie-
 ties. The Duchess is the best dwarf to buy.

Light grade, 2½ to 4			
ft., 3 yr. root, 2 yr. top.	1.00	8.00	65.00

For years nurserymen have searched for a blight proof pear. Here we have it—at last a pear that is blight resistant. The parent tree over 20 years old has never blighted nor has any of the trees budded from this tree shown the least signs of blight. Again this is the only pear that we know of that bears the next year after being planted. Think of 't, bears right off the bat. It is a good keeper, ripening a week or two ahead of other winter pears.

This pear will pay for itself several times before other varieties of Pears even start to bear.

SPRING BEARING

EARLY OZARK

GIBSON

SENATOR DUNLAP

WARFIELD (Imp.)

Fruitgrowers agree that the Senator Dunlap is the best strawberry for the middle west. It produces immense crops of dark red, firm, even sized berries. It is hardy and thrives on most any kind of soil. It retains its rich flavor after being canned. It does well planted alone or with other varieties.

Our strawberry plants are all NURSERY GROWN. They come from beds that have not been allowed to bear fruit. If you do not get plants that are NURSERY GROWN you are apt and usually will get plants that are seedlings, which have come up from the seeds of the decayed fruit. That is the reason that plants "RUN OUT" in a few years—the good plants have been crowded out by the seedlings. If you get plants from your neighbor you will be very apt to get some of these seedling plants. You will get the best results from "NURSERY GROWN ONE YEAR" plants. The HAMBURG NURSERIES STRAIN of CHAMPION EVERBEARING STRAWBERRIES we believe far superior to the old Progressive.

THE GENUINE MASTODON

Our Strawberry Special
King of Strawberries.

The only practical everbearing commercial strawberry—they yield heavy profitable crops.

SPECIAL LOW PRICES.

50 Plants \$1.50..... 100 Plants \$2.50

The most wonderful everbearing strawberry introduced. It produces at least 3 or 4 times as many berries as Champion or the Progressive and in size is easily double. It is not only an extra fine fall bearer, but also a good spring bearer as well. It is a large red choice flavored solid superior quality berry. A good keeper and shipper. It comes into bearing within 100 days after plants are set.

Buy this sure winner, heavy bearing, money making Mastodon.

ORNAMENTAL SHRUBS.

All Shrubs are Field Grown From 3 to 5 yr. old.

The 2 to 3 ft. shrubs are 4 and 5 years old grown especially for landscape work.

Privet Ibota Spreading	20.00	25.00	30.00	

Barberry Thunbergi (Japanese Barberry, rustless)

The aristocratic hedge. A beautiful plant with thorny drooping branches, dark green leaves, small nearly round leaves. In the early fall leaves turn a rich crimson and branches are loaded with red berries all winter. Does best when not trimmed, although good results are obtained when pruned. Hardy. Plant 12 to 18 inches apart, in a trench.

Amoor River North Privet

The hedge for everybody. The most popular of all hedges. Hardy everywhere. Trim back severely four inches above ground as soon as planted. And then cover top and all for 2 or 3 weeks and then uncover gradually. Keep well trimmed raising height by degrees to where you wish it. Retains light green leaves till late in fall. Plant 12 inches apart, in a trench.

Spirea Van Houttei

The old favorite Bridal Wreath. A good hedge where no pruning is wanted, as it is a heavy grower. Good for screening purposes. Snow white bloom in May. Plant 12 to 18 inches apart, in a trench.

ROSES

Out Door Strong 2 yr. No. 1 Field Grown

Two year Number 1 Field Grown

*Starred kinds are the Hybrid Teas or Everblooming. They should be protected in winter by raking leaves around plant and then covering well with gunnysacks. These roses will bloom for you the first season. Each spring cut wood back of Everblooming roses 3 to 4 inches above the bud.

HOW TO PLANT ROSES SUCCESSFULLY.

Roses can be transplanted successfully if the following directions are observed First, Cut back the tops severely, cutting back each cane to three or four buds. Shorten the roots a little. Do not expose roots to sun or wind. Second. Dig a roomy hole at least 6 inches wider than spread of roots and deep set plant well down in hole. Fill hole two thirds full of rich soil, tamping the soil firmly around the roots as being filled up. Third. Water the plant thoroughly and generously, allowing water to soak in ground before filling the hole. Fourth. Cover the newly set plant with a mound of soil at least 6 inches high, completely covering the plant. This prevents the plant from drying out. After a four or five inch growth has pushed thru the soil, then rake away the mound of dirt from the plant gently. Follow these directions and success will be yours and don't forget to protect your roses during the winter months.

TRANSPLANTED EVERGREENS FOR WINDBREAK

Living behind a windbreak is just like moving 500 miles further south. It saves fuel and protects your stock in the winter time. Plant your windbreak this spring—don't put it off. 30 at 100 rates. Do not expose the roots of your evergreens.

Two or more times transplanted.

(The Black Hills Spruce, originating in the wind-swept hills of South Dakota make a wonderful compact windbreak. Easiest of all evergreens to transplant. There is no substitute for an evergreen windbreak.)

Yucca, white. June 5'.....	.35	3.50

If you want flowers continuously from April to October plant Iris, Peonies and Gladiolas-- adding Phlox for good measure.

LANDSCAPE YOUR HOME

It is truly remarkable how a few shrubs and flowers planted around a house will transform otherwise bare and sometimes unsightly places into spots of cheerfulness and homes of wonderful beauty, increasing the value of the property many, many times the cost of these plants.

By a careful selection of varieties, blooms matching every tint of the rainbow is yours from early spring till late autumn. You can transform an ordinary house into a home of gorgeous beauty. Here is where our landscape department is at your service. Our landscape man knows when plants bloom, the color of their flowers, the shades and tints of their leaves and twigs. He knows their height and their spread at maturity. He knows what shrubs and plants thrive best on the north side of buildings; and what do best on the sunny south side. At a comparatively small cost we can make the lawn of your home blend and harmonize in all the elegant beauty that living plants only can give to your own home.

The outside of your home will be as cozy and comfortable and beautiful as your parlor. Our landscape architect will help you lay out your place right.

We urge our customers and salesman to take advantage of our LANDSCAPE DEPARTMENT.

A home surrounded properly by trees, shrubs and flowers is a place of beauty and of joy to the whole family.

We are Nurserymen—nothing else. The growing of fruit trees, shrubs and ornamentals is our life's work.

We love to start the small graft or shrub, tend, nourish and watch it grow.

We love our work and business because we are producing something that fruitful, useful and necessary to mankind.

You, too, be a producer—grow your own fruit.

What in nature is more beautiful than TREES and PLANTS?

"It's not a home 'till it's planted."

Sincerely yours,

THE HAMBURG NURSERIES.

Sjulin Bros., Props.

(Pronounced Shoe-lin.)

PLANT MORE SMALL FRUITS

Raspberries, Asparagus, Gooseberries and Currants are neglected by the average land owner. They just don't think about planting them. Fine for jellies—for preserves—for canning. For the small space they take up small fruits pay bigger dividends than anything you can plant. They are sure croppers, Plant them along a fence line.

SELL SHRUBS BY SKETCH

More and more people are improving their homes by planting shrubs. Make a sketch of the place outlining where each shrub should be planted. Then SELL ALL AS ONE UNIT instead of trying to sell one shrub or one variety at a time. Remember we have the very finest list of ornamentals from which a selection can be made.

TRUE TO NAME

We grow fruit trees by the hundred thousand. Our plant of apple grafts alone this year is 340,000 in our 170 acre nursery. We grow a general complete line of nursery stock and you will find in this list one of the most complete assortments of nursery stock of any firm in the middle west.

Being extensive growers of nursery stock, we have an experienced organization of men in our nursery. Every effort is made by us to see that every order is filled with true to name stock. Every row of trees set out is carefully staked and a record made in our office of every row of trees. The size of our nursery, and the extensive scale upon which we grow our nursery stock, is itself a guarantee to our customers that they will receive what they order.

SUITABLE DISTANCES FOR PLANTING

Commercial Apple Orchard.....	30 to 40 feet each way
Home Apple Orchard.....	30 to 33 feet each way
Cherries and Standard Pears.....	20 feet each way
Plums, Peaches and Apricots.....	16 to 18 feet each way
Dwarf Pears and Quinces.....	10 to 12 feet each way
Grapes.....	for family use, 6x8 ft.; commercially 8x10 ft.
Currants and Gooseberries.....	rows 6 to 8 feet apart; plants 3 to 4 feet each way
Raspberries and Blackberries.....	rows 3½ feet apart; plants 1½ feet apart
Strawberries, commercial purposes.....	rows 2 feet apart; plants 1 foot apart
Strawberries, garden culture.....	should plant 2 or more rows 16 by 16 hit and miss
Evergreen Windbreaks	

NUMBER OF PLANTS OR TREES REQUIRED TO AN ACRE

40 feet apart each way.....	28	10 feet apart each way.....	435
30 feet apart each way.....	48	8 feet apart each way.....	860
20 feet apart each way.....	110	6 feet apart each way.....	1,210
18 feet apart each way.....	135	5 feet apart each way.....	1,745
15 feet apart each way.....	205	4 feet apart each way.....	2,725
12 feet apart each way.....	300	3 feet apart each way.....	4,840
		2 feet apart each way.....	10,890

RULE—Multiply the distance in feet between the rows, by the distance, in feet, the plants are apart in the rows. The product will be the number of square feet required for each plant which, divided into the number of square feet in an acre (43,560), will give the number of trees or plants required for an acre.

ON COUNTERMANDING ORDERS

Our order contract provides that a customer can not countermand his order but order can be carried forward to a following planting season upon remittance of 30 per cent of the amount of the order with the request.

We cannot make any changes in the order after Feb. 1st. If there are any other arrangements made with customer same must be plainly stated on the face of the order.

REPLACEMENT

Our terms for replacing stock which fails to grow with care the first season, are at ONE-HALF PRICE, for shipment the following spring. There are no exceptions to this rule.

BOOK ORDERS EARLY.

No nurseryman can carry a complete stock of everything **ALL THROUGH THE ENTIRE SEASON**. It is easier to sell a customer four months ahead of delivery date than to sell just before shipment. It costs the customer **NOTHING** to order early while the assortment is complete and avoid disappointment later. We believe we have the choicest and best varieties for this middle western territory therefore our customers should order early before we sell out of the best grades of trees.

BOYS

**The Bee that gets the Honey
doesn't hang around the Hive.**

HELP INCREASE OUR SALES ORGANIZATION—EARN \$25.00

We are always on the lookout for hustling salesmen. If you know of an honest reliable and trustworthy man, whom you believe would make a good salesman for us speak to him about our nursery.

Send his name in and for each salesman hired through you we will mail you our check for \$10.00 when we have received from said agent \$200.00 in good orders. When the sales of the new agent amount to \$500.00 in good business we will mail you another check for \$15.00.

Remember we want only perfectly reliable "on the square" men or women who are hustlers.
