SPECIALTIES

AQUILEGIA (Columbine)

The loveliest of spring flowers. In form and color and foliage the Columbines come as near to perfection as is possible. The clear colors, the fine texture and exquisite shape of the flowers would put them in the front rank even without the added attraction of the beautiful foliage. One of the pleasures of the perennial border is to watch for the little grey green rosettes in early April. When they appear you know that spring has come. The Columbines bloom from May well on through the summer. They are absolutely hardy and flourish in rather heavy loam and part shade.

All the plants listed below will give good bloom next spring.

MRS. SCOTT ELLIOTT'S LONG-SPURRED HYBRIDS. For some years this has been considered the finest strain of Aquilegia in commerce. It is the product of many years of work by an amateur grower, who, it is said, has given all her profits from it to charity. It comes only in mixed colors.

\$3.50 a dozen. \$25 for 100.

SUTTON'S LONG-SPURRED PINK SHADES. These are from the well known seedsmen, Sutton and Sons of Reading, England, and like everything else put out by this celebrated firm, are unsurpassed in quality.

\$4.00 a dozen. \$30 for 100.

SUTTON'S LONG-SPURRED BLUE SHADES. Companion to the above.

\$4.00 a dozen. \$30 for 100.

SUTTON'S LONG-SPURRED PURE WHITE
Companion to the above.

\$4.00 a dozen. \$30 for 100.

ALPINA. The true species from the Alps of Switzerland. Ideal for the rock garden, growing about a foot high. The flowers are very large; the color is a beautiful soft dark blue, in a few cases white.

\$4.00 a dozen. \$30 for 100.

MRS. NICHOLLS. An improved form of Aquilegia coerulea, the beautiful blue and white Rocky Mountain Columbine. It is a stronger grower than the parent and the color is brighter.

\$5.00 a dozen. \$35 for 100.

DOBBIE'S IMPERIAL HYBRIDS. A new strain of long-spurred Columbine sent out by Dobbie and Son of Edinburgh, Scotland.

\$5.00 a dozen. \$35 for 100.

DIGITALIS (Foxglove)

In all the multitude of June blooming flowers, nothing is finer than the Foxgloves with their tall spires covered with beautiful bells. In their season they dominate the garden. Sun or shade will suit them and no degree of cold in winter will harm them, but they do object to being smothered. Their winter covering should be straw or some other material that will not mat down and rot the crowns.

Below are two exceptionally fine varieties. The plants are very large and will give splendid bloom next year.

LUTZ HYBRID. Varies from pale pink to deep rose. The magenta color has been eliminated, and occasionally a real salmon pink, a color very rare in Foxglove, appears.

\$3.50 a dozen. \$25 for 100.

SUTTON'S GIANT PRIMROSE. A very lovely Foxglove. The flower buds are yellow and open into deep cream color, becoming almost white with age.

\$3.50 a dozen. \$25 for 100.
