Bulbs and Plants for FALL PLANTING

1928

HOLM & OLSON INC.
NURSERYMEN — FLORISTS — LANDSCAPE ARCHITECTS
SAINT PAUL

OUR FALL CATALOG OF 1928

You will find, we hope, much to interest you in this issue of our annual Fall Bulb and Plant Book. This season most of the illustrations are in color and so will more vividly recall to you the beauty and charm of these early spring flowers and plants. These color plates were made from actual photographs of our own plants and are as accurate and true-to-nature as the engravers could make them.

PRICES ARE LOWER. This year we are happy to announce that you can get our first quality, selected bulbs at reduced prices because of a seemingly over-production abroad. So you can take advantage of lower costs and for once have all the spring flowers that you really want for cutting and garden display.

FLOWERS DURING THE WINTER of your own growing can be had at very little expense and almost no trouble by potting the bulbs for house culture. These growing plants also make beautiful gifts for their cheerfulness is especially appreciated during the winter season.

THE REASON WHY YOU ARE ALWAYS SO PLEASED WITH OUR BULBS is because of the selected quality of the stock. Each winter we grow in our green houses for cutting, thousands of these spring flowers and for this purpose must have bulbs of the best grade, properly matured and ripened. We import this stock direct from the foremost Holland growers and we insist upon and get the best obtainable. You get these same selected bulbs in your orders and of course they give wonderful results when you provide favorable growing conditions.

A COMPLETE HORTICULTURAL SERVICE, available to our friends and customers, is made possible through the combination in our business of Greenhouses, Florist Shop, Nurseries and Landscape Construction Department. You can call upon our experience of many years in these fields and be assured of practical help and prompt attention.

Special Offer of Bulb Collections for Indoor Culture

We offer these collections at a reduced price with the object of inducing those who have not tried and experienced the pleasure of growing bulbs indoors to try them.

As great a variety as possible of the kinds best suited to house culture will be found in these collections. No substitutions can be made.

INDOOR COLLECTION NO. 1

Price \$3.00. By Parcel Post Prepaid, \$3.25. (Value over \$3.75 if purchased separately).

Contains 24 Early Tulips, in four colors, 6 First size Hyacinths, all different, 6 Daffodils, 2 Paper White Narcissi and 2 Chinese Lilies—forty bulbs in all.

INDOOR COLLECTION NO. 2

Price \$5.00. By Parcel Post Prepaid, \$5.35. (Value over \$6.00 if purchased separately).

Contains 12 First Size Hyacinths, 12 Early Flowering Double Tulips, 24 Early Flowering Single Tulips, 12 Daffodils and Narcissi and 3 Chinese Lilies—sixty-three bulbs in all.

INDOOR COLLECTION NO. 3

Price \$7.50. Express or Parcel Post Prepaid, \$8.00. (Value over \$10.00 if bought separately).

Contains 12 Exhibition Size Hyacinths, 12 varieties, 36 Single Early Flowering Tulips in 6 varieties, 18 Double Early Flowering Tulips in 3 varieties, 18 Daffodils and Narcissi in 3 varieties, 12 Rainbow Freesias and 4 Chinese Lilies. Total, 100 bulbs.

Bulb Bowls

Muskota

These bowls are especially adapted for growing such bulbs as Chinese Lilies, Paper-White Narcissi and Hyacinths. Most bulb bowls offered are too shallow. These are deep enough for the largest bulbs and insure against the plant falling over when grown up. They are suited for planting bulbs in water with pebbles or the bulb fibre.

MUSKOTA BOWL. Colors, green, blue and old rose, in high luster glazed finish. This is of the best grade of pottery, and they are fine for holding cut flowers when not in use for bulbs.

5-inch opening, 90c each; \$1.00 each, postpaid.
6-inch opening, \$1.35 each; \$1.50 each, postpaid.
7-inch opening, \$1.75 each; \$1.95 each, postpaid.

MOTHER OF PEARL CHIPS. For use in bowls or aquariums. These chips are about the size of small seashore pebbles, which they resemble. They have a bright iridescent lustre, which makes them very attractive, particularly for bulb bowls.

1-pound package, 20c each; 25c each, postpaid. 5 pounds, 75c. Parcel Post extra.

"RAINBOW" PEARL CHIPS. These are pearl chips that have been stained in many colors. They are very pretty particularly in glass bowls when their iridescence is displayed at its best.

1 pound package, 25c, 30c each postpaid. 5 pounds, \$1.00. Parcel Post extra.

BULB FIBRE. The growing of bulbs indoors is a source of great pleasure during the Winter months. Bulb Fibre will be found a great aid and a simple way to grow bulbs. It is scientifically prepared, containing several ingredients in the proper proportions best suited to bulb culture. It is clean and odorless and yet contains plant food such as bulbs need. Should be kept moist and treated like soil. Quart 20c; half peck, 70c; peck, \$1.25. Mail or express extra.

Mastique

MASTIQUE BOWL. The design and soft color effect of pale yellow and blue on grey body is very pleasing, and suggestive of old Egyptian pottery.

5-inch opening, 70c each; 80c each, postpaid.
6-inch opening, 90c each; \$1.00 each, postpaid.
7-inch opening, \$1.20 each; \$1.35 each, postpaid.
8-inch opening, \$1.50 each; \$1.65 each, postpaid.

Our bulbs are of the best that Holland produces

SINGLE EARLY TULIPS

These are the earliest tulips to bloom in the garden and the easiest to bring into bloom indoors. While they are not as large and stately as the late kinds, they are very desirable for the reason that they make a brilliant display soon after the snow is gone.

We list only the best varieties in their respective colors.

OUTDOOR PLANTING. Any good garden soil prepared by spading to a depth of 10 to 12 inches is suitable. Plant the bulbs five inches apart for mass effect and about four inches deep. The bulbs should all be planted at an equal depth if they are desired to bloom at the same time. Raise the bed several inches above the lawn or walk to encourage drainage. Firm the soil well about the bulbs and mulch the beds with leaves or straw before severe cold sets in.

HOUSE CULTURE. Plant six or more bulbs in a pot. Set in a cool dark place for a period of six to ten weeks, to allow roots to develop. They can then be brought into the light for flowering. (Follow same instructions as for Hyacinths.)

NOTE. The approximate height in inches is indicated by a figure, following the variety name.

LATE OR MAY FLOWERING TULIPS

May-flowering tulips include many species among which the Darwins, Breeders and Cottage are the most prominent. Many of these wonderful flowers have been developed through hybridization, and many have come as sports of older varieties. Generations of this most intense and careful selection has resulted in a truly magnificent range of gorgeous colors as well as size and robustness.

When planted in the garden or border they may be left undisturbed for years and will continue to bloom each succeeding season.

Plant the bulbs as closely as desired, about five inches deep, before the heavy frosts harden the ground, and before snow comes to stay, cover well with leaves or straw. Remove this covering in spring as soon as it is free from snow and ice.

DARWIN TULIPS

The Darwins are the best known of the late flowering group and are the "Aristocrats" of Tulpdom. Darwins do not vary in type and shape so much as the other species, but make up for this in the great range of shades and colors that they display, from the most intense violet, crimson and maroon to the very delicate shades of pearl and pure white.

We offer below a most complete list of the very best varieties. All bulbs are the finest obtainable and have been especially selected for us by the leading growers in Holland.

Cottage Tulips

These beautiful tulips are quite similar to the Darwin. In size of flower and height they are alike, but vary considerably in the shape of the flower, some of which are globular, others long and pointed and some with reflexing petals. Many are sweet scented and the range of color and shades comprises every conceivable combination of colors. We offer here a very complete list of the choicest and most desirable varieties.

Breeder Tulips

These comprise mainly the old original mother tulips from which many of the newer species and types have been bred and developed. They are very robust in habit of growth with the large flowers oval shaped on tall stiff stems.

The predominating colors are rich purples and the warm brownish tones, which is overlaid with a silvery sheen or bloom just as it is seen on grapes.

Planting Breeder Tulips against a background of Evergreens gives a wonderful effect. Those we offer are all of the choicest varieties.

Rare and Unusual Tulips

There are many odd varieties and species of tulips that are rarely seen except in Holland where, while not as popular as some newer types, they are grown for their oddity and quaintness and to maintain the completeness of the tulip family. We offer here the more prominent and desirable kinds.

REMBRANDT TULIPS—These are like Darwins in size and form. They are the so-called broken colors that appear as spots from the Darwins. Flowers that revert back partly to the parent flowers, striped and blotched in a great variety of colorations. They were christened Rembrandts for the reason that they resemble the tulip flowers seen in old Dutch paintings.

	Doz.	100
Well mixed in many unique colors.	\$1.00	\$8.00

BIZARDS AND BI-BLOOMS—These are tulips that originate in the hybridization of Breeder Tulips, which results in feathered or flamed markings. They present many beautifully marked flowers in unusual coloring. The flowers are of medium size on stiff stems averaging 18 to 22 inches tall.

Bizards—Feathered and flamed brown shades on yellow ground\$ 0.75 \$6.00

Bi-Blooms—Feathered and flamed rose and violet shades on white ground 1.00 8.00

CLUSTER FLOWERED TULIP—This is a new type in tulips. Instead of one flower on a stem these develop a cluster of four, five and six good sized flowers which are all in bloom at same time.

Monsieur Mottet, 20. Ivory white flowers.	\$1.25	\$10.00
Madame Mottet, 22. Purplish rose flowers.	2.50	20.00

WILD NATIVE TULIPS—Particularly suited for the rock garden.

Clusiana—Height 8 in. Small flowers creamy white inside, cherry red on outside of petals.\$ 0.75 \$6.00

Kaufmaniana—Height 6 in. Deep rosy red and creamy white on inside. 3.00 22.50

PARROT TULIPS

These curious flowers are both brilliant and showy. The very large flowers are fringed and lacinated in a most fantastic way. They should be planted in the border rather than in beds because of their twisting and curling habit of growth.

Cramoise Brilliant. Deep crimson and scarlet	\$0.65	\$4.50
Lutea Major. Lemon yellow with deeper stripes	.65	4.50
Perfecta. Red and yellow with striped shadings	.65	4.50
Parrot Tulip Mixture. Many fine kinds.	.60	4.00

It is not difficult to grow bulbs indoors—Ask us.

HOLM AND OLSON HYACINTHS

Growing Hyacinths indoors is a very simple matter indeed, and the pleasure derived in watching the development of the bright cheery, sweetly perfumed flowers during the winter days is ample reward for the slight effort.

INDOOR CULTURE IN POTS—Use ordinary good soil with a little sand to make it more porous. Place a piece of broken crock over the hole in bottom of pot so as to insure free drainage. Fill in with enough of the soil so that the top of the bulb or bulbs is a little below the level of the top. Cover the top of bulbs with soil and firm so as to have at least a half inch below rim. Use 4 or 5-inch pots for the larger bulbs when planting them singly. A number of the smaller bulbs planted in larger shallow pots is very satisfactory. After being potted they should be watered thoroughly and then placed in a cool, dark place (preferably a vegetable cellar) for a period of six to ten weeks. This will induce root growth.

To ascertain the right time to bring them out of the dark, tip the pot upside down, tapping lightly so as to lift pot off soil. If several of the white roots show, it is then safe to bring them into the light.

Hyacinths may also be grown in glasses of water. The bulb should be placed so that the bottom just touches the water and enough water added occasionally to keep it at the proper level. Hyacinths grown in water should also be kept dark until roots 3 to 4 inches are developed. Better results are obtained by growing them as cool as possible.

OUTDOOR CULTURE. Plant the bulbs uniformly about 6 inches deep. Doing so carefully will insure them blooming evenly. When planting a larger bed, the best plan is to remove about 4 inches of soil, firm bulbs in place about 6 inches apart each way, and cover them firmly.

Dutch Hyacinths

Daffodils and Narcissi

We are enabled this year to offer all the choicest varieties of Narcissus. Three years ago the Federal Horticultural Board placed an embargo on all importation of Narcissi and Daffodils and as a result a few of the leading Holland growers brought to this country, by permit, all their better bulbs and we have contracted for our stocks with two of the largest of these growers.

Daffodils are among the first spring flowers that greet us and they are most welcome. The pleasure in first seeing these bright, beautiful flowers in blossom is easily worth the small outlay.

They will thrive in almost any location, doing well in sunny or shady places and it matters little if wet or dry. They continue to bloom year after year increasing in size and effectiveness.

They are valuable for planting in the perennial border or among the shrubbery where they may be left undisturbed from year to year.

For growing indoors treat the same as Tulips, planting them in pots, but should be given more time to developing roots before being brought into the house. The proper time for this, is when a number of the white roots show through the soil when tipped out of pot.

THE DIFFERENT TYPES IN NARCISSI

Barri. The crown is cup shaped and less than one-third the length of perianth petals.

Campanil. Flowers in clusters of three to six and not as large as the one stemmed flowers.

Incomparabilis. Cup not less than one-third, but less than the length of the perianth segments.

Leedsi. White perianth and cup but slightly colored.

Poetaz. Flowers in clusters of four to eight, perianth petals fleshy.

Poeticus. Short crown or cup, usually bright colored.

Trumpet. This type includes all the Narcissi having a crown or trumpet that is longer than its perianth petals.

Polyanthus Narcissi

These are best suited to indoor culture and are very satisfactorily grown in either pots or in the bulb bowl in water. If planted outdoors they should be heavily covered.

Our bulbs are American grown and we consider them superior in every way to those formerly imported from France.

Gloriosa—Very free and early flowering. Flowers in large clusters and similar to the Chinese Lily. Large bulbs 15c each; \$1.50 per dozen.

Grand Soleil d'Or—Large clusters of deep golden yellow flowers, strongly fragrant. Large bulbs 35c each; \$3.00 per dozen.

Paper-White (The French Narcissus)—Pure white. Very desirable for growing in bowls of water and pebbles. Large bulbs 10c each; \$1.00 per dozen.

Add 15c per doz. for all Narcissi if to be sent by parcel post.

Various Types of Narcissi

Will you have bright, golden daffodils in your garden next Spring?

Chinese Sacred Lilies

The bulbs of these popular flowers were formerly imported from China, but due to the Federal Horticultural Board's Embargo on all Narcissus, experiments have been made in growing them in various localities in this country.

Last year we offered and recommended bulbs grown in California, which proved highly satisfactory, even more so than those formerly imported. We offer bulbs from the same growers this year and can again recommend them for their satisfactory blooming qualities.

These bulbs may be planted in soil, but are preferably grown in bowls of water, with pebbles to firm and hold them upright. Each bulb sends up from four to eight stems, producing great clusters of large wax-like blossoms, with orange centers. Some blooms are single, others double, but all equally beautiful.

Largest size bulbs, 20c each; \$2.00 per dozen.

Add 3c each or 20c per dozen if to be sent by parcel post.

Lilies

These should be potted firmly in the rich soil and placed in a cellar or cool dark place until the roots show when the soil is tipped out of pot. They may then be placed in a warm light place when they will start and continue to grow and bloom.

Crocus

These bright, cheerful flowers are earliest of all to bloom. They are often in bloom before the snow is gone. A few dotted about in clusters in the lawn is a most pleasing view from indoors.

The colors come in bright golden yellows, deep blue to light blue, striped and pure white. Plant them anywhere. The simplest way is to take a sharp trowel and raise sod enough to drop bulb in place. Do not plant too deep, one inch, not to exceed two inches is best.

They may also be grown in pots indoors. Treat same as Tulips or Hyacinths.

GORGEOUS PEONIES

PEONIES WILL GROW ANYWHERE IN THE NORTH

A few choice plants of PEONIES will fill your garden with color and fragrance from late May through June. Even the rose cannot excel in beauty and charm the flowers of the modern Peony. Here, under our northern conditions, it is peer of all flowers in combining so well the qualities of absolute hardiness, great color variation, size, beauty and fragrance of bloom.

PLANTING. The roots should be set with the "eyes" 2 to 3 inches below the surface and the soil tightly packed about them. Allow a spacing of about 3 feet between the plants.

The soil should be of good substance and the location free of tree roots and dense shade. Bone meal is preferred as a fertilizer. A light covering of straw, after the ground has frozen is desirable.

We list only those sorts suitable to our northern conditions and that have proven their value as producers under ordinary garden culture.

QUALITY. The "roots" are substantial plants with 3 to 5 strong eyes. "Clumps" or older stock that will produce immediate flowering results can be supplied at double the catalog price of "roots."

Spring Brings Iris Time to the Garden. (See Page 13)

ENJOY BEAUTY IN YOUR HOME GROUNDS

The full value of your home property is realized only when the grounds are made attractive and inviting. Trees for shade and protection, shrubs for foundation and boundary plantings, flowers for color and fragrance and a soft carpet of green lawn will add untold pleasure to your daily use of the place.

LET US HELP YOU PLAN THESE ENJOYMENTS and show you how they can be accomplished most economically. A definite plan for the improvements can be developed and you can follow this gradually if you prefer. Our skilled gardening service assures your satisfaction. You will like the way we plan with you. Ask us for suggestions.

A HEDGE WILL BRING PRIVACY

A HEDGE along the property line will give privacy and seclusion. We will gladly suggest the kind best suited to your use and give full planting instructions.
