SMALL FRUIT PLANTS
IDEAL FRUIT FARM

J. W. AUFFET, Owner
Stilwell, Oklahoma

Our Guarantee—We guarantee all plants sent out by us to be true to name, full count and to arrive in good live condition, or we will replace free of charge. However we do not guarantee plants to live after being set out and in common with all other nurserymen and seedmen, we give no warranty express or implied as to quality, productiveness or any other matter and we will not be responsible for the crop. Claims of any nature will be made within five days after arrival of plants or will not be entertained.

Reference---**FIRST STATE BANK, Stilwell, Oklahoma.**

To Whom it May Concern:

This is to certify that Mr. J. W. Auffet has been a customer of this bank for many years past and we have found him an honest, honorable man who has a high regard for his moral and financial obligation. We believe any statement or representation that he may make can be considered as absolutely true and correct.

Very truly yours,
Albert Carlson, President.

Strawberry Plants

We are located practically in the famous fruit belt of Northwest Arkansas being only 10 miles from the Ark. state line.

Strawberries grow and fruit here to perfection and we make a specialty of Strawberry plants. We grow all varieties of fruit we have to offer for market as well as nursery purposes. Our plants are taken from a new bed on new land and are extra well rooted. Plants are dug fresh every day, and dressed and tied in bunches of 25, packed to arrive in good live condition. Certificate of inspection accompanies each order. All varieties we grow are perfect bloom. They do not need to be pollenized with other varieties to make them fruit. We have the following varieties to offer:

Senator Dunlap—Midseason. A prolific bearer of medium to large berries. Adopted to a wide range of soils and climate. Grown practically all over the United States. More Dunlap grown for home use than all other varieties combined. Prices 200 plants \$1.00—500 \$2.00—1000 \$3.50 postpaid.

Aroma—Late. Very large and productive. Adopted to Kansas, Missouri and the north. Prices 200 plants \$1.00—500 \$2.00—1000 \$3.50 postpaid.

Klondike—Medium early. Large and productive. Adopted to Oklahoma and the south as it is a good drouth resister. Price—200 plants \$1.00—500 \$2.00 1000 \$3.50 postpaid

Excelsior—Early. As early as any we know of. The blossom beginning to appear as soon as weather will permit. Dark red color and a splendid shipper. Prices—200 plants \$1.00—500 \$2.00—1000 \$3.50 postpaid

Gandy—Late. An old standard variety. The latest and largest berry we know of. Will do well in low damp soil. Prices—200 plants \$1.00—500 \$2.00 1000 \$3.50 postpaid.

Kellogg's Premier—Early. About as large as Aroma. Immensely productive ripening early and bearing through a long season. Not a real good plant maker and should be set a little closer in the row. Prices—150 plants \$1.00—500 \$2.50 1000 \$4.50 postpaid.

Cooper—Medium early. Cooper makes a large vigorous plant. Also the largest berry of its season. Ripening only about a week after premier. Very pleasing flavor. Fine for home use and canning. Prices—150 plants \$1.00—500 \$2.50—1000 \$4.50 postpaid.

Progressive Everbearing—The Standard everbearer. Medium size sweet berry. A prolific bearer if season is favorable. Not adopted to Oklahoma and dry sections unless you practice irrigation as it will not stand dry weather. Prices—\$1.00 per 100—\$7.50 per 1000 postpaid.

New Mastoden—The largest and best everbearer ever introduced. As large as Aroma. Our plants set March 1st began bearing June 1st and bore continuously till late November. A shy plant maker. Hence the high price. We have the genuine Mastoden. Large and vigorous plants. Price \$2.50 per 100 postpaid.

Blackberries

Early Harvest—Early and a prolific bearer. Succeeds all through the south west. Prices—\$1.00 per doz—\$4.00 per 100 postpaid.

McDonald—Of Texas origin. It is said to be a cross between a dewberry and a blackberry. Fruit larger and about a week earlier than the Early Harvest. It is not a perfect bloomer and should be planted 3 rows of McDonald to 1 row Early Harvest. Adopted to Oklahoma, as it stands dry weather remarkably well. Prices—\$.75 per doz.—\$8.00 per 100 postpaid.

Dewberries

Austin—Of Texas origin. The most widely planted dewberry. A good shipper, very early and a good drouth resister. Prices—\$.75 per doz.—\$3.00 per 100 postpaid.

Lucetta—A rank grower and a prolific bearer. A fine large berry, ripening a week later than Austin. Prices—\$.75 per doz.—\$3.00 per 100 postpaid.

Grapes

Concord—1yr. No. 1 vines \$1.00 per doz.—\$6.00 per 100, postpaid.

Asparagus Roots

Conover's Colossal—The standard variety for the southwest. 2 yr. roots Price 40c per doz.—\$2.00 per 100, postpaid.

Rhubarb Roots

Victoria—A popular sort for home use. Prices \$1.00 per doz., postpaid.

Sweet Potato Plants

Varieties—Nancy Hall, Porto Rican, Early Triumph and Southern Queen Prices, 200 plants \$.75—500 \$1.50—1000 \$2.75 postpaid. Write for prices in large quantities. Plants ready about May 10th.

Cabbage Plants

Frost Proof—200 plants, 75c, 500 \$1.50, 1000 \$2.75 postpaid. Ready March 1st.

Spring Sown Plants

Varieties—Jersey Wakefield, Charleston Wakefield, Succession, Copenhagen and Late Flat Dutch. Prices, 200 75c, 500 \$1.50, 1000 \$2.75 postpaid. Ready April 1st.

Tomato Plants

Varieties—New Stone, Chalks Early Jewel, Earliana, Greater Baltimore and Ponderosa. Prices, 200 75c; 500 \$1.50; 1000 \$2.75 postpaid. Ready April 10.

Onion Plants

White Bermuda—200, 60c; 500, \$1.00; 1000, \$1.75 postpaid. Ready March 1st.

Celery

White Plume—100 plants \$1.00, 500 \$2.50, 1000 \$4.50 postpaid.

Cauliflower

Early Snowball—100 plants \$1.00, 500 \$2.50, 1000 \$4.50 postpaid.

Egg Plants

Varieties—Black Beauty and Improved Spineless. Prices 100 plants \$1.00; 500 \$2.50, 1000 \$4.50 postpaid.

Kohl Rabi

200 \$1.00, 500 \$2.00, 1000 \$3.50 postpaid.

Pepper

Varieties—Sweet and Hot. 75c. per 100 postpaid.

Flowers

Varieties—Pansies, Asters, Zinnias and Petunias. 3 in. plants 60c. per doz. postpaid.

Apple Trees

Varieties---Early Transparent, Red Astrachan, Maiden Blush, Stavman, Ben Davis, Jonathan, Delicious, Grimes Golden, Winesap and Black Ben. These are all standard varieties for the southwest, grown from whole root grafts. 1 yr. 4-5 ft. 30c each postpaid.

Peach Trees

Varieties---Elberta, Early Wheeler, Heath Cling, J. H. Hale and Bell of Georgia. 1 yr. 3-4 ft. 25c each postpaid.

Cherry Trees

Varieties---Montmorency and Early Richmond. 1 yr. 3-4 ft. 50c each postpaid.

Pear Trees

Varieties---Kieffer 1 yr. 4-5 ft. 50c each postpaid.

Plum Trees

Varieties---Burbank, Red June and Wild Goose. 1 yr. 3-4 ft. 25c each postpaid.

Order Early---Early orders will be carefully booked and receive our best personal attention. Late in the season we will possibly be out of some varieties. We will be swamped with correspondence and orders. Strawberries may be set as early as March 1st in Oklahoma, March 15th in Missouri and Kansas and April 1st further north. However they can be set as late as June with fairly good results. Fruit trees and grape vines should be planted in February or March and not later than April 1.

Terms---Cash. Remit anyway convenient to you.

Address all orders to **Ideal Fruit Farm**, Stilwell, Okla. We have no agents or anyone authorized to collect for us. All prices herein are prepaid and net to purchaser. We Guarantee all plants sent out to arrive in good live condition.

Claims---Should be brought to our attention immediately and signed by two responsible persons. We will not be liable if claim is not made in five days after arrival of plants.

CERTIFICATE OF NURSERY INSPECTION

State Board of Agriculture, Oklahoma City, Okla., Sept. 28, 1925

THIS IS TO CERTIFY, That in accordance with Senate Bill No. 342 of Session Laws 1914-15, the Nursery Stock, consisting of two acres, now growing for sale by IDEAL FRUIT FARM, Stilwell, Oklahoma, J. W. Aulset, owner, has been inspected by a duly authorized inspector and found to be apparently free from dangerously injurious insects and plant diseases. Invalid after October 1, 1928

H. B. CORDELL

President State Board of Agriculture

THOMAS B. GORDON

Countersigned

State Inspector

Directions---for growing strawberries.

Plow ground deep and prepare level. Set plants in rows $3\frac{1}{2}$ to 4 ft. apart by 18 in. to 2 ft. apart in the row, do not set in furrows as they might get covered up after heavy rains, cultivate as soon as weed growth starts and continue at intervals of 2 weeks during the whole growing season or till about Sept. 1st. Keep entirely free from weeds and grass by hoeing and hand weeding. Keep blossoms picked off to induce them to make runners and set new plants. The blossoms may be allowed to remain on ever bearers after the middle of July and they will fruit in the fall.
