NEW ORIGINATIONS IN GLADIOLI

CECIL E. HOUDYSHIEL, LA VERNE, CALIF.

FIFTY CENT BULB FREE TO ALL!

Here's how. Just write a post card (or letter) to each of ten flower loving friends. Use the following words exactly—do not add or take away, nor give any other explanation.

Dear _____

Knowing how much you love flowers, I thought you might be interested in a Gladiolus Price List that I have just received from Cecil E. Houdyshiel, La Verne, Calif. He is the originator of the famous Gladiolus Los Angeles and others, and the list contains over 100 of the best varieties, reasonably priced. I am sending him my own order and I know he will be glad to send you his list.

Sign your name.

Then send me your order for at least \$1.00 and state that you have complied exactly with this requirement and I will include a bulb of the La Verne or Mary Jane Coole, value 50c.

Houdyshel Gladiolus List

INTRODUCTION

I am sending out brief price lists this year instead of a catalog as in former years. On account of a mild but prolonged indisposition I have not been able to write a catalog and especially not able to write an account of my trip east to the Hartford and Boston Gladiolus Shows in a continuation of "The Odyssey of a Gladiolus Grower."

This also co-ordinates with a general plan of economy which will enable me to knock off from a cent to several cents on the price of each bulb.

So many have praised the "Odyssey" (not Homer's—no one praises that any more) that I here make promise of its continuation at some time in the future.

This price list goes to about 20,000 old customers or applicants. IF YOU WANT NEXT YEAR'S CATALOG you must either buy bulbs from this or write me a post card asking to be kept on my mailing list. All other names will be dropped.

Later this spring I will put out a price list of Iris and other bulbs. It will be sent only to those who ask for it. It will price about 200 wonderful new IRISES. The wonderful new colors and great beauty of modern Iris will surprise you if you have not seen them. My prices are reduced to a real "bargain basement" level.

SIZE OF BULBS

As far as possible I try to sell only bulbs grown from very small bulbs or bulblets and one inch or more in diameter. Many dealers sell larger bulbs than I do, but all experts know that old flat-bulbs are not to be compared to smaller, high crowned, young bulbs.

GUARANTEE

I guarantee my bulbs to be true to name and to be in a healthy growing condition. I will replace two for one any that do not prove to be so.

PREMIUMS

We include good count and extras at least to the amount of 10 per cent, in orders over \$1.00. We aim to treat you a little better than anyone else but not to talk too much about it.

KICKS

We get a few. We want to know about our mistakes, and to correct them. About once a year we get a discourteous letter. We always feel sorry for the writer. Call Mr. Houdyshel's personal attention to errors, please.

SUBSTITUTION

Experience seems to indicate that it is better to substitute a similar and if possible a better variety when out

of an item ordered. We also add an extra or in some way give a little more value. Please advise if you object to this policy.

POSTAGE PREPAID

on orders of \$1.00 or over. On smaller orders send 7c extra for one bulb and one cent for each additional bulb.

FLOWER SOCIETIES

Join the American Gladiolus Society and get the best gladiolus magazine ever published. Dues \$2.00 per year.

The California Gladiolus Society gives so much, space prohibits description. Dues \$2.00.

The American Iris Society with many free bulletins, \$3.00 per year.

Send me the amount with your order (or even without an order). The secretary of the society will send you a membership card. We send no acknowledgment.

CULTURE OF GLADIOLUS

It is easy to grow fine gladioli. They prefer plenty of sun but do fairly well if slightly shaded part of day. Plant three to five inches deep and twice the diameter of the bulb apart. Rows may be 18 inches apart. Most gladioli may be planted rather close, but the Los Angeles should be given twice as much room and be given more water than other sorts, as it is a heavy feeder, and a good bulb will do at least twice as much in flower production, etc., as ordinary kinds.

Be sure to water liberally and cultivate after each rain or irrigation.

Fertilizing, if done at all, is likely to be overdone. Use sparingly. Ground bone and sheep manure are often used with good results. Plenty of water is more important.

Houdyshel Originations

- CREPE. (Prim. Grand.) Begonia rose with irregular lines of ivory running through, which give it the appearance of crepe.....75c ea.
Bulblets10c ea.
- GOLDSTONE. Rose pink with a peculiar glistening quality like the gem goldstone. I have measured flowers of this over seven inches across....\$10.00 ea.
Bulblets\$1.00 ea.
- LA VERNE. (Prim. Grand.) Cream yellow flushed pink. Carmine throat. Five and one-half feet high50c
Bulblets5c ea.

LE CYGNE. (Prim. Grand.) As pure in its whiteness as a Madonna lily. A vigorous and hardy grower, which its parent Europa is not.....\$10.00
 Bulblets\$1.00 ea.

LOS ANGELES. (Prim. Grand.) Grenadine or orange tinted pink with a darker throat. In any list of the world's finest glads the Los Angeles is usually named among the best twenty-five.

As a florist's gladiolus it has become the most popular pink variety in the few markets where it has been offered in quantity.

It is also far in advance as a landscape glad owing to its ability to produce such a large number of flowers. A bulb will produce from two to six spikes (rarely, even twice that). If planted far apart each stem will give three or four side spikes and when the whole stem is cut, a fair portion of them sends up a second growth spike with rather darker flowers. For this reason the Los Angeles was named by me the "Cut and Come Again" Gladiolus. A bed of them remains in bloom often for two or three months. It is the nearest everblooming.

If you are interested in making money in the glad business, send for wholesale bulletins about the Los Angeles.

Most of all, plant it abundantly in your garden for quantities of flowers, either for cutting or for landscape effect. In order that you may do that, we have put the price very low this year.

Price: Large Size—1 to 1 1-2 in., 25c ea.; \$2.50 per doz.; \$20.00 per 100.

Medium Size—1-2 to 1 inch, 15c ea.; \$1.50 per doz.; \$12.00 per 100.

Small Size—Every one will bloom with good culture if planted early. 10c ea.; \$1.00 per doz.; \$7.50 per 100.

Bulblets—10c per doz.; 75c per 100; \$5.00 per 1,000.

MARY JANE COOL. (Prim. Grand.) Coral pink with pomegranate purple throat. A beautiful and very vigorous variety.....50c ea.
 Bulblets5c ea.

ROSE O' CALIFORNIA. A fine clear rose, self-colored.
 Each\$2.50
 Bulblets25c ea.

SEÑOR ESPIRIDION. Geranium pink shading into rose doree, amaranth purple feather. Very tall. \$5.00 ea.
 Bulblets50c ea.

SEÑORITA LUISA. (Prim. Grand.) Color near to rose doree.\$5.00 ea.
 Bulblets50c ea.

SUNNY SONNY. (Prim.) Autumn tints of yellow and orange.\$1.00 ea.
 Bulblets25c ea.

Standard Varieties of Gladiolus

The name of the originator is given thus: (D) Diener; (K) Kunderd, etc. Primulinus hybrids are indicated (Prim.), and Primulinus Grandiflora (Prim. Grand.).

Please note prices per single bulb are given. For the dozen rate multiply the price per bulb by ten; for the hundred rate, multiply by eighty.

ADELINE KENT. (D)	Ruffled. Delicate rose pink, ranging from flesh to deep rose on the edges of petals. Throat is straw color with ruby dashes.....	15c
