Gladiolus---

Le Marechal Foch

Some Opinions by Those Who Know:—

"Le Marechal Foch is now in full bloom, and is the most beautiful Gladiolus I ever saw. It is admired by all who see it."

"This is the finest cut flower that ever came out of Holland. Blooms are enormous. Of light shell pink, and it stands the hot weather and torrid winds of summer better than any other variety. A great future."

"My own experience with this variety, covering a period of three seasons, leads me to believe that its popularity has been only started."

"When the florist observes how readily Le Marechal Foch forces under glass, and how beautiful the mammoth clear pink flowers are when bloomed in the greenhouse, then will this variety be in such demand that it will take millions of bulbs."

TERMS OF BUSINESS.

First—Cash must accompany order. No orders filled for less than \$1.00.

Second—Remittance may be sent in any manner most convenient to the purchaser.

Third—Prices quoted include postage or express charges, except where noted.

Fourth—We guarantee the safe arrival of goods by mail or express, and will use careful methods in filing orders with stock of known vitality, and superior merit. If any stock doesn't prove true to name we will replace same free of charge or refund your money. But we will not be responsible for shortages or other causes beyond our control. Errors should be reported at once.

Fifth—Size of bulbs. Orders will be filled with first size bulbs, when out of first size, second or third sizes will be sent and more of them, unless mentioned when sending the order. If out of varieties ordered we will substitute with as good or better of similar color unless mentioned.

Sixth—Filling orders. We try to send orders just as soon as possible, filling them in rotation as we receive them. Many times your order goes out the same day we receive it.

Seventh—Complaints. In case any order fails to meet your approval, as error or oversight may happen when in a hurry, we will thank you if you will report to us and give us the first chance to correct same.

 100, \$5.00. 25 at the 100 rate, 25 and the 100
 rate F. O. B. Parcel Post or Express.

CULTURE

Plant in any good soil about six inches deep,
 lay the roots on the side with the eye up. After
 plant has four leaves pinch out the center, and side
 shoots will form, leaving four strong shoots, one
 bud to each branch, and you will have some fine
 blooms. If you want some choice blooms leave four
 buds to each plant, pinch off all others. When buds
 begin to show, water freely with liquid manure,
 also using a little bone dust and hard wood ashes.
 Scatter around the plant, not too close, and work it
 into the soil. As soon as the frost has killed the
 foliage dig the roots carefully, cut off the tops, place
 the roots up-side down in a box or barrel and store
 in a good cellar where they won't freeze. The fol-
 lowing spring you may divide the roots and plant
 them.

Gladioli or Gladiolus

PLANTING—Plant in any good soil in full sun-
 light away from trees or shrubs, two or three inches
 deep in clay soil, four to five inches in sandy soils.
 Don't use any fresh manures when planting. You
 may use bone dust and pulverized sheep manures
 right after planting bulbs and rake it in the ground
 and another dressing when spikes begin to show.
 Or use any liquid manures about the color of strong
 tea. In dry season water freely. Make the rows
 to suit and set the bulbs four, six or eight inches
 apart in the row.

BLOOMING—For best results cut the spikes
 when the first two flowers open and let them bloom

in the house, leave as many leaves as possible on the plant to mature the bulb; remove wilted blossoms; with a sharp knife cut about an inch of the stem off each morning, making a slanting cut; give them fresh water daily.

DIGGING AND STORING—In the fall before hard frost, dig the bulbs, cut off the tops close to the bulbs, dry well in the air and sunshine before storing in the cellar. Any good dry storage of about 40 degrees is right. Any good shallow box will do. Don't put bulbs over four inches deep in boxes. You may cross pile your boxes which will give them plenty of air. Watch your bulbs closely, they will freeze as quick as potatoes. In about thirty days you may clean off the old bulb from the bottom, and if you care to save the bulblets about the size of pepper kernels, place them in dry sand in little boxes not air tight, planting them about two to three inches deep the next spring. With good care they will bloom the second year.

All bulbs offered per 100 are sold F. O. B. Express or Parcel Post collect.

VARIETIES.

- ALBANIA**—Very fine white large flower, each15c; 3 for 35c; 6 for 55c; doz. 95

- MIXED IRIS 15 for \$1.15; 18 for \$1.25; prepaid. per 100 \$3.00 F. O. B.

CULTURE.

Any good rich soil will do, if not work in some bone dust around each plant, about a hand full. Use no fresh manures of any kind. A light application of lime or wood ashes is beneficial, if not applied too near the plant.

PLANTING.

We have had good results in transplanting iris any time in the growing season, except from about the middle of May to July first which is their blooming season with us. Set the plants so the rhizomes are about level with the ground.

PEONIES

By all means plant a few peonies. They are one of the hardiest and finest flowers grown. By planting the early, mid-season and late varieties, you may have blooms for a month.

PLANTING.

Plant in any good rich soil that is well drained; fertilize the same as for Iris. In setting the plant have the eyes or buds come about level with the ground, as deep planting does not produce many blooms. September until the ground freezes is the best time to plant.

RATING.

The figures before the names give the rating, 10 being perfect.

- 8.5—ADOLPH ROUSSEAU—(Dessert, 1890) Early, purple garnet, semi-double, plant tall strong and healthy, free bloomer, each.....\$1.50
