FOREWORD

GLADIOLUS are among the most popular of all garden flowers. A garden of gladiolus is never monotonous. Day by day new beauties unfold, new shades and tints appear, until you begin to think that the whole range of colors has been covered. Each year the size, color and beauty of these wonderful flowers are being improved upon by specialists who some thirty years ago started to intensify the flowers by hybridizing.

The varieties listed in this catalog have been selected as the most beautiful ever produced. Every bulb is guaranteed to bloom. Gladiolus will do well in almost any ordinary garden soil. If planted in the richest place of your garden and given plenty of moisture they will repay you with extra large blooms and wonderful colors.

Bulbs, may be planted any time after May first, and should be set at least four inches deep and from four to six inches apart. It is not advisable to set bulbs in the shade of trees or close to buildings.

Dig your bulbs in October, you will find one or more new bulbs have grown on the old one which dries up and should be removed before planting time again. Cut the stock off one-fourth inch from the bulb. Spread the bulbs in the sun to dry for a few days then store in a cool, dry place in shallow boxes.

For the prices quoted I will deliver bulbs in any part of the United States.

All orders should be accompanied with remittance. In consideration of which additional bulbs to the value of 5% will be included.

To those who are just beginning to grow Glads I advise ordering at least one hundred of either of my mixtures, then select half a dozen each of a few choice varieties; add a few dozen each year, mark them so you will know them by name, and you will soon learn to love and admire the king of all flowers.

Stephen B. Jacobs, Prop.

NEWTON HIGHLANDS, MASS.

THIS beautiful lavender gladiolus was introduced by me at the Boston Show in 1926 where it was one of two out of several hundred seedlings exhibited to receive the award of merit. It created a sensation among the others growers present.

Dr. Moody, President of the A. G. S., was the first to ask for bulbs of this wonderful seedling and his offer of \$10.00 for a bulb established the price. He afterwards consented to allow it to be named for him.

Owing to the cold, wet and late season I had only one spike in bloom to exhibit at the Hartford show this year. This I entered in class 105 for the best spike of lavender; it easily won first prize, defeating glads introduced as high as \$100. a bulb. At three later shows it easily won first each time, in fact it has never been beaten. The color is a beautiful shade of pink lavender, 22 or more, five inch blooms on a tall straight spike with 8 or 10 open at a time. The substance and keeping qualities are almost unsurpassed, even the first bloom standing up for days.

The cut shown here is a bloom from a No. 3 bulb photographed from a painting by the well known artist and hybridizer, Eugene Fischer of Sharon, Mass. Here is what some of the other growers say about it—Robert Lapthorn of Bridgewater when he saw the spike at Hartford, “Any one of the half dozen I had would beat that a mile.” In a letter from G. W. Thacker, President of the Michigan Gladiolus Society was this, “It is a wonderful glad and easily worth \$25.00.” Elmer Gove of Burlington adds in a recent letter, “It sure is a wonderful propagator.”

A limited number of large bulbs can be spared this coming season at \$10.00 each.
