NEW HAVEN NURSERIES

55th Annual Catalog
1928

Residence of J. L. Bagby

J. Bagby & Sons Company
New Haven, Mo.

Just About Ourselves

Fifty-six years have been spent in building up our nursery business at New Haven. It was established in 1872 by Julian Bagby, the father of the present management. Our employees have grown up in the business and are honored citizens of the community. We state this fact that our customers may know that their orders are handled by responsible men. All of the trees we offer are grown on our own land and under our own care. We are proud of our record of the orchards that are growing in every state from the trees we have produced. Some of our customers have been with us for more than forty years, and we expect to keep right on serving a larger circle of new customers every year with **Bagby** quality trees. This list contains only the standard, time-tried and tested varieties.

Our years of experience in the nursery business have taught us that our customers like our way of doing business, for they know that we do not exaggerate the merits of our varieties. We produce good stock, true-to-name, pack it well, ship it promptly and in good condition, and charge only reasonable prices. Let us fill your order.

The Way We Do Business With You

Terms Cash, unless otherwise agreed upon. All orders to be sent C. O. D. must be accompanied with one-fourth the amount in cash. Remit by Money Order, Registered Letter or Check.

Order Early It is important that you order early. For the benefit of customers who wish to order early, but do not care to spare all of the money when the order is sent, we will accept such early orders if 10 per cent of the amount is sent with order. We will reserve the stock for you. Balance to be sent when you order the stock shipped.

Directions for Ordering Write name and address plainly. Always state distinctly the sizes and grades of stock ordered as per the grades given in this list. When named varieties cannot be furnished, we reserve the right to substitute such varieties as will fill the season as near as possible, unless prohibited in the order. Persons unacquainted with the different varieties will generally get a much better selection by leaving the assortment to us. Keep a correct copy of the order, so that when stock arrives you will know exactly whether you get what you have ordered. If we make mistakes, they are accidental, and we wish to right them.

Prices The prices are for the quantities named, but five, fifty and five hundred will be supplied at ten, hundred and thousand rates respectively—i. e., five at half the price of ten; fifty at half the price of one hundred, and so on.

Packing All goods are packed free. Notwithstanding this fact, we use the utmost care and pack according to the distance and our customers' best interests. **Everything is correctly labeled.**

Our Guaranty The fact that nurserymen, planters and fruit growers of the country have ordered of us year after year, is as good a guaranty as can be given by any other nursery of fifty-six years' standing. If a mistake occurs we will cheerfully correct it. **We use the greatest care possible to have our stock true-to-name,** and should any prove not true, we stand ready to replace it free of charge, or to refund the purchase price, but it is mutually agreed between the purchaser and ourselves that we shall not at any time be held responsible for any sum greater than the amount originally paid for said stock. We guarantee stock to reach customers in good condition.

All shipments will be accompanied by **Certificate of Inspection of the State Entomologist.** Good stock, true-to-name, sold direct to the planter at reasonable prices is our aim.

Our Location NEW HAVEN is on the Missouri Pacific Railroad and also on the Missouri River, sixty-seven miles west of St. Louis. Our soil is the very best for producing well-ripened stock with splendid roots. Our facilities for prompt shipments are first class.

Our Shipments Our shipments go to practically every State in the Union. We do not claim you should plant "**Bagby**-grown or none at all," but **we do want to impress on you the fact that there are NONE BETTER.**

Free Freight On all orders amounting to \$10.00 or more at the single, ten and hundred rates, accompanied by full remittance, we will **prepay the freight** to your railroad station, if east of Colorado. If you wish the shipment made by express, we will refund you the freight allowance.

We solicit correspondence and personal inspection of our stock, confident that it will compare favorably with the best.

Apples

The first fruit, both in importance and general culture, is the Apple. Its period, unlike that of all other fruits, extends nearly or quite through the year. By planting judicious selections of summer, fall and winter sorts, a constant succession of this most desirable fruit will be obtained. Apple planting can never be overdone.

Our apples are all grown on Missouri river upland, on well-branched, whole roots, smooth, clean and well grown in every respect. **No better trees can be found anywhere.**

	Each	10	100	1000
2-year, 5 to 6 feet, well branched, select	\$.60	\$5.00	\$45.00	\$350.00
2-year, 4 to 5 feet, well branched, first class	.50	4.00	35.00	300.00
1-year, 3 to 4 feet, select, or 2-year, 3 to 4 feet	.40	3.50	30.00	220.00
1-year, 2 to 3 feet	.30	2.50	20.00	150.00
1-year, 1 to 2 feet	.20	1.50	10.00	75.00

Summer Apples

BENONI—One of the best summer sorts. Red striped. Flesh yellow, tender, pleasant. Core small. Tree vigorous and upright.

CAROLINA RED JUNE (Red June)—Medium size; red, flesh white; last of June. Tree is very vigorous, upright, an early and abundant bearer.

DUCHESS OF OLDENBURG (Russian)—Medium to large size; skin yellow, streaked with red, somewhat blushed. Productive. August.

EARLY HARVEST—Medium to large, bright straw color; flesh white. Tree moderately vigorous and productive. First of July.

LIVELAND RASPBERRY—Fruit good sized, clear, waxen, white striped and marbled crimson; flesh snow-white, often tinged pink next to the skin, a very popular early summer variety. Blooms late, is blight-resistant, bears early, makes a good filler.

RED ASTRACHAN—Fruit large, roundish, juicy. Very hardy.

YELLOW TRANSPARENT—This valuable apple is said to be of Russian origin. We find it to be a valuable addition to our list. Medium to large; nearly white.

Jonathan

[[Randolph County, Ill.
November 16, 1927.
Trees were sure fine. I
think the best I ever got of you
and I have bought several
thousand from you.
Austin Harris.

Fall Apples

GRIMES' GOLDEN—Medium to large; rich golden-yellow; flesh tender, mild, sub-acid. Should be gathered before turning yellow and put in a cool place, and often keeps until February. Tree hardy, vigorous; an early and abundant bearer. October to January.

GOLDEN SWEET—Large pale yellow. Very sweet.

MAIDEN'S BLUSH—Rather large, evenly shaded red cheek or blush on a clear pale yellow ground; bears large crops. August and September.

RAMBO—Greenish-yellow streaked with red. Tree good grower and long lived.

WEALTHY—An apple of fine appearance and quality; an early and profuse bearer; a good market apple of its season. Tree hardy. Ripens here in August. Winter apple North.

Mammoth Black Twig

Winter Apples

BALDWIN—Large, bright red, crisp and juicy. Tree vigorous, upright grower. Fine for eating and cooking. Good commercial sort.

BEN DAVIS—Fruit medium to large; red striped; flesh white; an excellent variety. Tree very hardy; a free-grower, coming into bearing early and very productive. December to March.

DELICIOUS—A remarkably popular variety, and rapidly taking first rank both for commercial and home orchards in all the apple-growing sections of the country. Fruit large, nearly covered with dull dark red; fine-grained, crisp, juicy; quality best; a splendid keeper and shipper; vigorous grower.

GANO (Black Ben Davis)—This apple was introduced to the public in 1886. Tree very hardy; it bears very young. Fruit bright red on yellow ground, no stripes; large; oblong, tapering to the eye; surface smooth, takes a very high polish, making it valuable as a stand fruit; flesh white. Annual, early, prolific bearer.

GENETON (Rawles' Janet)—Medium, roundish, greenish-yellow, striped with red; rich and juicy; one of the best and longest keepers in the South and Southwest; valuable for its high quality and its late blooming; moderate grower. January to March.

Delicious

Winter Apples—Continued

HUNTSMAN'S FAVORITE—Originated in Johnson county, Missouri. Very large; golden-yellow, with bright red cheek; nearly sweet, fine flavor, very aromatic. One of the best and highest selling market apples; tree very healthy and productive. November to January.

INGRAM—A seedling of the old Janet. Originated near Springfield, Mo. Its habits are similar to the Janet, but the tree is a more upright grower and the apple is not subject to crack. Size medium; striped bright red in the sun; flesh greenish-yellow, agreeable, sub-acid flavor; a good keeper. Tree hardy, late bloomer; very productive.

JONATHAN—One of our earliest and best bearers. Brings fancy prices. Extra long-life tree. Fruit a brilliant glossy red, with spicy rich acid flavor. Succeeds everywhere. A firm apple, crisp, tender and juicy. A great commercial apple and a splendid family sort.

KING DAVID—Handsome red apple. Somewhat deeper in color than Jonathan. Snappy flavor. Productive.

MAMMOTH BLACK TWIG—Supposed to be a seedling of the Winesap, but tree a better grower and fruit much larger; or, in other words, an improved Winesap. Tree a fine, upright spreading grower.

Grimes' Golden

MINKLER—Bright red cheek. One of the very best late keepers. Seedling of Little Red Romanite.

ROME BEAUTY—Large, yellow shaded with red; tender, juicy, sub-acid. October to February.

STAYMAN WINESAP—Not quite so well colored as Winesap, but larger; splendid quality; a good keeper. Valuable for market or home use. A vigorous grower and adapts itself readily to different soils and conditions.

Stayman Winesap

Burnett County, Texas.
December 9, 1927.

The peach trees I bought from you some five years ago have done fine and we have gathered two fine crops of peaches. We have today as fine a small orchard as one can find here. Many people that come here and see my orchard pass compliments on it and many ask "where did you buy those trees?" I gladly tell them that I bought them from you.

H. O. Klose.

New Haven
Nurseries

New Haven
Missouri

Winter Apples—Continued

WINESAP—Medium, dark red; a favorite market variety. November to April.

WINTER BANANA—Fancy market fruit; large, pale yellow, pink blush. Tree a strong grower.

YORK IMPERIAL—This apple has been gaining favor, and is being planted largely as a commercial sort. Large, smooth, yellow, shaded red, with indistinct red stripes.

Crab Apples

Prices for Crab Apples are the same as for other Apples.

TRANSCENDENT—Remarkably vigorous, growing to a good size, and immensely productive. Bears a little the second year from planting, and every year after, and produces good crops by the fourth year. The best of its class for cooking and eating; juicy and crisp. Skin yellow, striped with red. September to October.

WHITNEY—Large, averaging 1½ to 2 inches in diameter; skin smooth, glossy green, splashed with carmine; flesh firm, juicy and rich. Very hardy, vigorous, handsome.

Winesap

Denver County, Colo.

April 12, 1927.

My order arrived O. K. and I was more than pleased with the nursery stock.

Lucas Wilson.

What Our Customers Say

Trimble County, Ky.

March 14, 1927.

My trees arrived promptly and in good shape. I can always count on a square deal from you.

David H. Beetem.

Henry County, Mo.

March 24, 1927.

I received my trees O. K. and I want to tell you they are fine; the best I ever did get.

Mrs. Nannie Knight.

St. Louis County, Mo.

January 12, 1927.

I sent for 300 Early Harvest Blackberry plants last year and they grew wonderfully and made heavy stocks. My apple trees grew wonderfully. Did not lose one tree.

Ernest S. Nollau.

St. Louis, Mo.

November 30, 1927.

The six trees received. Two were for me and four for two neighbors. They were so well pleased they offered to pay for mine for the ordering. Now I want two more Sycamores for another neighbor. Your trees are easily the best in the block.

Dr. W. H. Heseman.

Peaches

Tree Digger at Work

We are "Headquarters" for **True-to-Name** Peach Trees in the West, and can supply the best **up-to-date market sorts**. Our Peaches are stocky, nicely headed, smooth, straight bodies, well rooted, on healthy peach stocks and free from any disease. Remember this when comparing prices with other establishments.

	Each	10	100	1000
Extra select, 5 to 6 feet.....	\$.50	\$4.50	\$40.00	\$270.00
First class, 3 1/2 to 5 feet, nicely headed.....	.45	4.00	35.00	250.00
Medium, 2 1/2 to 4 feet, nice, well branched.....	.30	2.50	22.00	200.00
2 to 3 feet, part branched.....	.20	2.00	15.00	140.00

Early Varieties

ALEXANDER (White free)—Large size, handsome and regular in form, with deep maroon shade; adheres to stone; should remain on the tree until fully ripe. Early in July.

CARMAN (White semi-cling)—Large with beautifully mottled red cheek. A valuable home or market sort. Season about fourteen days later than Alexander and about three weeks earlier than Elberta. Our stock came from the originator, and is true to name.

GREENSBORO (White free)—Large, oblong. Tree vigorous, prolific; grown largely in Georgia and the South for Northern markets. One of the best early sorts. Ripe June 25th.

MAMIE ROSS (White free)—Large, white, almost covered with carmine; juicy, and of good quality. One of the best for family use and probably the best early commercial variety.

MAYFLOWER (Red semi-cling)—A beautiful "red-all-over" peach; handsome and of splendid quality. Extremely early. Tree hardy and healthy.

Carman Peaches ready for the market

New Haven
Nurseries

New Haven
Missouri

Mid-Season Varieties

BELLE OF GEORGIA (White free)—Very large; skin white with red cheek; flesh white, firm and of excellent flavor. Tree a rapid grower, very prolific; fine shipper. Ripens with Early Crawford.

CAPTAIN EDE (Yellow free)—Originated on farm of Capt. Ede in Illinois. Splendid yellow freestone variety. In appearance is very much like Elberta, its equal in every way, except not quite so large; better quality.

CHAMPION (White free)—Originated at Nokomis, Illinois. Fruit large, beautiful in appearance; flavor delicious, sweet, rich and juicy; skin creamy-white, with red cheek. August 15.

CRAWFORD'S EARLY (Yellow free)—This beautiful yellow peach is highly esteemed for market purposes. Fruit medium, oblong; skin yellow, with fine red cheek; flesh yellow, juicy, sweet and excellent. Last of July.

CRAWFORD'S LATE (Yellow free)—Fruit of the largest size; skin yellow, or greenish-yellow, with dull red cheek; flesh yellow; productive; one of the best freestones. August and September.

Champion

CHINESE CLING (White cling)—A most popular peach; shape is oblong, has creamy skin with faint flashes of red. August.

Captain Ede

Holt County, Mo.
January 13, 1927.

The apple you sent us last Spring did extra well. It was a dry spring, but our loss on your trees was very light.

J. H. Murray.

Bernalillo Co., N. M.
March 25, 1927.

I received the trees you sent and am so well pleased with the good condition in which they came that I'm writing my appreciation for the careful packing.

John Vogh.

Macoupin County, Ill.
March 31, 1927.

The one hundred trees ordered from you were received in good shape and on time. I was more than pleased with them. They are well rooted and good shaped trees.

G. A. Rowton.

Peaches—Continued

Mid-Season Varieties

ELBERTA (Yellow free)—A Georgia cross between Crawford Early and Chinese Cling; very large; well colored; all things considered, the finest yellow freestone in cultivation; no one can go amiss by planting it; the fruit is perfectly free from rot, and is one of the most successful shipping varieties. August and September.

FOSTER (Yellow free)—Same season, as Crawford's Early; much more productive; yellow, with red cheeks; quality best; good size.

J. H. HALE (Yellow free)—Ripens about August 20th. Yellow, finely colored; large round, and of excellent quality.

HILEY (White free)—Ripens last of July. Yellowish-white skin with deep red cheek. Flesh is white and very juicy. Large size.

MILLER CLING (White cling)—An extra large clingstone. Hardy, productive, and of best quality. Earlier than Heath Cling, but larger and better color.

Elberta Peaches

OLD MIXON CLING (White cling)—Large, white flesh, with deep red cheek; rich and good; one of the best. August.

ROCHESTER (Yellow free)—Ripens ahead of Early Crawford, but is of the same type. Long season and an excellent home orchard variety. Flesh firm, juicy and rich.

*Jackson County, Missouri,
August 24, 1927.*

I received the trees in good condition. Also received the peaches. I put three plates on exhibition at county fair and now send you the "Blue Ribbon."

Emil Konow.

J. H. Hale Peaches

Late Varieties

HEATH CLING (White cling)—Large, oblong, creamy-white, slightly tinged with red in the sun; very tender, juicy, melting; very rich and luscious. September 15th.

HENRIETTA (Levy) (Yellow cling)—Magnificent yellow cling, large size, slightly covered with bright crimson; hardy, productive, always commands fancy prices. September 25th.

OCTOBER BEAUTY (Yellow cling)—A late yellow cling. Originated on the grounds of Judge Hugo Muench of St. Louis. We recommend it as the best late yellow cling.

PICQUET'S LATE (Yellow free)—A variety of large size; yellow, with red cheek; flesh yellow. September.

PHILLIPS' CLING (Yellow cling)—Large; yellow; flesh clear yellow to the pit, which is very small; exceedingly rich and of high flavor. One of the best canning sorts. September.

October Beauty

RINGGOLD CLING (White cling)—Much larger than Heath, and in every way an improvement on that popular kind. A very valuable peach. September.

STUMP (White free)—Late freestone of very fine quality. September.

¶ We want all our customers to plant OCTOBER BEAUTY (Late Yellow Cling) as the LATEST and BEST. Medium-sized, high color and quality. ¶

Showing Different Sizes of Peach Trees

Plum Trees

First class trees, 5 to 6 feet.....	
First class trees, 4 to 5 feet.....	
First class trees, 3 to 4 feet.....

.75	7.00	50.00
.60	5.00	40.00
.50	4.00	30.00

- AMERICA**—Large, red, early plum. Very hardy and productive.
- ABUNDANCE**—A hardy, productive Japanese sort. Large, purplish-red; quality very best. Season, early in July.
- BLACK BEAUTY**—The best Japan sort we have ever grown. Large, very dark purple, almost black. Persimmon shape. Quality and size of Abundance. Originated with us.
- BURBANK**—Large, varying less in size than the other Japanese plums; it is nearly globular; clear cherry-red with a thin lilac bloom; flesh deep yellow, firm and meaty; tree vigorous and productive. Last of July.
- COMMON DAMSON**—Well known and very productive. Season, September.
- GERMAN PRUNE**—Very profitable and will succeed wherever Common Damson can be grown. Very large. We consider it the best of European sorts. August and September.
- LOMBARD**—Medium, oval, violet-red; juicy, pleasant and good. Tree vigorous and productive. It is a valuable market variety; one of the most hardy and popular. August.
- NEWMAN**—A very late red plum. Tough skin. Highly regarded because of its lateness.
- SHROPSHIRE DAMSON**—A plum of fine quality, sprightly. In market it has commanded nearly double the price of the Common Damson; enormously productive. Last of September.
- WILD GOOSE**—Large, rich, crimson, beautiful; flesh soft, melting delicious, with a full, fruity flavor. Tree a strong grower, prolific.

German Prune

Shropshire Damson

For the Home Orchard, plant Abundance, Burbank, Black Beauty, Common and Shropshire Damson.

Pears

Our Pears are especially clean, smooth and well rooted, grown on XX French imported stocks.

	Each	10	100
Leading sorts, first class, 5 to 7 feet, 2-year.....	\$1.00	\$9.00	\$80.00
Leading sorts, 4 to 5 feet, 2-year.....	.80	7.50	70.00
Leading sorts, 3 to 4 feet, 1-year, very fine.....	.70	6.00	50.00

For Kieffer and Garber in quantities of 300 or more, write us for special low prices.

Summer Pears

BARTLETT—Large, skin very thin, clear lemon-yellow, with soft blush on the sunny side; flesh white, buttery, very juicy and highly flavored. The best summer pear in existence for quality.

KOONCE—The handsomest, best and most valuable; very early pear; tree vigorous, upright grower, free from blight; magnificent foliage, which it retains late in the season; fruit medium to large; skin yellow, does not rot at the core, juicy, sweet. Is an excellent shipper.

SECKEL (Little Sugar Pear)—Small, rich, yellowish-brown with bright red cheek. Juicy, buttery and melting.

Autumn Pears

FLEMISH BEAUTY—Large, beautiful, juicy, melting, rich and fine; strong grower and good bearer; hardy everywhere. September and October.

GARBER—Originated in Pennsylvania. Fruit is large and beautiful; color bright yellow, with red; juicy and good; delicious canned.

KIEFFER—Tree a remarkable grower, with so vigorous a constitution that it rarely blights. Fruit of fine size, rich color and good quality. Brings high prices in competition with other varieties. Best when picked at maturity and house-ripened. October and November.

Selecting only the Best

Cherries

There are few more desirable fruits than Cherries, and they can be grown for market with great profit. Along the street or avenue as ornamentals; they are strong, vigorous growers, with large, glossy leaves and open, spreading heads, making a fine shade. Cherries thrive in almost any well-drained soil. The fruit is equally delicious whether eaten from the tree or preserved, and it will always find a ready market at profitable prices.

Our Cherry trees are all budded on Imported French Mahaleb stock. They have fine roots and nice heads. All well rooted and will be graded full size indicated, and up.

	Each	10	100
Leading sorts, extra select, 2-year, 4½ to 6 feet.....	\$1.00	\$8.50	\$70.00
Leading sorts, first-class, 2-year, 3½ to 5 feet.....	.85	7.50	60.00
Leading sorts, first-class, 1-year, 3 to 4 feet.....	.60	5.00	40.00

BLACK TARTARIAN—Sweet. Large size, meaty and good. Productive. Last of June.

ENGLISH MORELLO—Medium to large, blackish-red; acid; juicy. Very productive. Short lived. July.

EARLY RICHMOND (Kentish Virginian, or Early May)—Medium size; red; melting, juicy, sprightly, acid flavor. This is one of the most valuable and popular of the acid cherries, and is exceedingly productive. First of June.

GOV. WOOD—One of the best sweet cherries, very large, white with pink cheek, juicy, rich and delicious. Tree healthy and a great bearer. May and June.

MONTMORENCY—One of the finest acid cherries; tree very hardy and an immense bearer; commences to fruit while young and is loaded annually thereafter with fine crops; fruit of good size; fine flavor, and of bright, clear, shining red; valuable everywhere, especially for Northern latitudes; larger than Early Richmond, and fully ten days later. Season, end of June.

MAGANN—A sweet cherry. Fruit large, almost black when fully ripe, growing in large clusters. It will pay you to include some of these in your order for other stock.

NAPOLÉON—White cherry with red cheek. Large. Tree grows large. Very productive. July.

For Middle West we suggest as best commercial sorts in Cherry—Richmond, Montmorency, Magann.

St. Louis County, Mo.
February 22, 1927.

I am glad to tell you that the 400 Jonathans which I bought from you and set out in the fall of 1925 not only came through the drouth last summer in good shape, but were uninjured by the severe winter just past, there being only one dead tree to replace.

O. K. Bovard.

Montmorency Cherries

St. Charles County.
January 14, 1927.

I planted a complete orchard of your trees and never lost one. I am very proud of my orchard, for I have never seen trees that did better. Some bore a few apples last year and they were all true to name.
Ben Kersting.

Lincoln County, Mo.
November 11, 1927.

Trees came O. K. They were shipped in excellent manner. No shipment could have been better. The trees are sure fine and were in good condition, and were wrapped so very carefully and completely.

Shade and Ornamental Trees

BOX ELDER—Ash-leaved Maple. Of spreading habit, rapid growth, and succeeds in many places where other varieties do not thrive. 7 to 8 feet, each 80c; 10 for \$7.00.

CATALPA BUNGEI (Umbrella Catalpa)—Grafted on straight stems, it makes an umbrella-shaped top without pruning. Perfectly hardy, and flourishes in all soils and climates.

	Each	10
5 to 7 feet.....	\$1.50	\$12.00
4 to 5 feet.....	1.00	8.00
3 to 4 feet.....	.80	6.00

CATALPA (Speciosa)—Hardy Catalpa. Has very large, broad leaves and fragrant purplish white blossoms. Excellent for post timber as it is very resistant to rot. 6 to 8 feet, each 50c; 10 for \$4.00.

Soft Maple

Lombardy Poplar

ELM (American)—A native tree of large size. Wide spreading head and graceful drooping branches. A hardy grower. One of the best park and street trees. 7 to 8 feet, each \$1.00; 10 for \$8.00.

LINDEN (American)—A tree of beautiful form and size. Admirable for street or lawn planting. Leaves large, round, soft, dull-green. Valuable for its beautiful white wood. Its flowers appear in July. 5 to 7 feet, each \$1.25; 10 for \$10.00.

MAPLE (Soft)—A native tree of very rapid growth. Hardy everywhere and easily transplanted. Leaves are finely cut, bright green on upper and whitish on lower side. 6 to 8 feet, each \$1.00; 10 for \$8.00.

POPLAR (Lombardy)—A tall, rapid grower. Always makes a striking feature in any landscape. For tall screens and backgrounds, this tree is admirable. 6 to 8 feet, each 60c; 10 for \$5.00.

PUSSY WILLOW—Very popular for ornamental purposes because of the attractive catkins formed on the branches early in the Spring. Each 60c; 10 for \$5.00.

SYCAMORE—One of the tallest of our native trees. Very shapely and much admired because of its white spotted bark. One of the best trees for cities. 5 to 6 feet, each \$1.25; 10 for \$10.00.

TULIP TREE—A tall, robust tree of magnificent appearance. Leaves of unusual form. The blossoms are tulip-like in shape. 5 to 6 feet, each \$1.00; 10 for \$8.00.

Ornamental Shrubs

It's Not a Home

Till It's Planted

ALTHEA (Hibiscus, or Rose of Sharon)—
Handsome, late, summer-flowering shrub.
Assorted colors. **Each 50c, 10 for \$4.00.**

DEUTZIA (Pride of Rochester)—Flowers pure
white, double, tinged with pink. Profuse
bloomer. Tall shrub. **Each 60c; 10 for \$5.00.**

FORSYTHIA (Golden Bell)—A spreading
bush with dark, shining foliage. Deep yellow
flowers appear before the leaves. **Each 50c;
10 for \$4.00.**

HYDRANGEA (Arborescens Grandiflora)
(Hills of Snow)—Blossoms large, snow
white. Blooms from June to September.
Each 70c; 10 for \$6.00.

HYDRANGEA (Paniculata Grandiflora)—
Blooms early in August and continues until
freezing weather. White, turning to pink.
Each 70c; 10 for \$6.00.

LILAC (Purple)—A good grower. Flowers and
young wood fragrant. **Each 80c; 10 for \$7.00.**

LILAC (White)—When planted with purple
makes a very desirable contrast. **Each 80c;
10 for \$7.00.**

MOCK ORANGE (Philadelphus)—Flowers
white. Deliciously perfumed. Flowers re-
semble orange blossoms. **Each 50c; 10 for
\$4.00.**

Ornamental Shrubs— Continued

PRIVET (California)—A vigorous-growing variety of fine habit; thick; glossy. The finest of all ornamental hedge plants.

	Each	10	100
2-yr. No. 1—2 to 3 ft., extra heavy.....	\$.10	\$.80	\$ 7.00
2-yr.—18 to 24 inches, first class.....	.08	.60	5.00

PRIVET (Ibodium)—A new variety. Similar to California Privet in growth. Perfectly hardy.

	Each	10	100
2-yr.—2 to 3 ft.....	\$.10	\$.80	\$ 7.00
2-yr.—18 to 24 inches...	.08	.60	5.00

SPIREA (Van Houtti)—An extremely graceful shrub with long, drooping branches completely covered with clusters of white flowers in May and June. Makes a beautiful hedge. Perfectly hardy. 2 to 3 feet, each 30c; 10 for \$2.50; 100 for \$20.00.

Mock Orange (Philadelphus)

Catalpa Bungei

Catalpa Bungei (Umbrella Catalpa) makes an umbrella shaped top without pruning. Always making a symmetrical tree; very desirable for formal effects, or for lawn, park and cemetery planting.

Ornamental Shrubs— Continued

SNOWBALL (Common)—Flowers white, in clusters; very attractive. May to June. 2 to 3 feet, each 80c; 10 for \$7.00.

SNOWBERRY (White)—An old-time shrub. Delicate pink flowers which produce clusters of pure white berries, which remain practically all winter. 2 to 3 feet, each 60c; 10 for \$5.00.

SNOWBERRY (Red) (Indian Currant) (Coral Berry)—Berries red, somewhat smaller than White Snowberry. 2 to 3 feet, each 50c; 10 for \$4.00.

WEIGELA (Rosea)—An elegant shrub, with fine rose-colored flowers. Erect, compact growth. Blooms in June. 2 to 3 feet, each 60c; 10 for \$5.00.

Cooper County, Mo.

I have dealt with you people thirty-five years and always found you straightforward. Always have a good word for Bagby & Sons.

L. S. Geiger.

Weigela Rosea

Dahlias

Jack Rose Dahlia

JACK ROSE—(Decorative). Crimson red. Very much like Gen. Jack rose. Free bloomer. Each 35c; 10 for \$2.50.

For best results plant Dahlias late in June or early in July. Cultivate thoroughly.

AUTUMN PERFECTION—(Peony Dahlia). Very early and continuous bloomer until killed by frost. A beautiful shade of orange and copper. Large. Full to center. Each 50c; 10 for \$4.00.

CALIFORNIA PEONY—Large flowers. Fine bloomer. Yellow with pink shading. Each 50c; 10 for \$4.00.

FLORAL PARK JEWEL—(Ball Dahlia). Red speckled with white. Long stems. Each 35c; 10 for \$2.50.

MINA BURGLE—(Decorative). Best red. Very free bloomer. Very much resembles poinsettias. Each 50c; 10 for \$4.00.

ORANGE—(Peony). Very large flower. Deep orange with deeper shading. Very rank grower. Free bloomer. Each 50c; 10 for \$4.00.

PEARL de LYON—(Cactus). Pure white. Large. Good stems. Each 40c; 10 for \$3.50.

QUEEN VICTORIA—Ball Dahlia. Pure yellow. Free bloomer. Each 20c; 10 for \$1.50.

MIXED—Ball Dahlias. Red, lavender and yellow. Each 20c; 10 for \$1.50.

Crimson Rambler.
Dorothy Perkins—Pink.

Johnson County, Mo.

I want to thank you for the fine lot of trees you sent me. They went beyond my expectations. You were very prompt with my order. The trees were packed exceptionally well, so there was not the slightest bruise. The quality is exceptional. I cannot speak too highly of your goods.

Theo. A. Dowler.

Elberta County, Ga.

Am in receipt of my little shipment and I want to congratulate you on your thorough method of packing. I was very much pleased with the plants. Want to thank you for the extra tree.

T. J. Mercer.

Dickens County, Texas.

The trees came in perfect condition and I assure you it is a pleasure to receive such stock as I believe they were as near perfect as any trees I ever bought.

J. E. Johnson.

Acadia County, La.

This is to inform you that I have received the trees you expressed to me recently. The trees are such as I wanted. They are healthy and of fine shape; even the packing was first class. I thank you for your prompt delivery.

P. J. Robidaux.

Alfalfa County, Okla.

I have found your trees to be satisfactory, for all of my trees are from your nursery.

John F. Parr.

General Information

About Agents

This price list is our agent but we shall be pleased to have you get a club among your neighbors, and on club orders amounting to \$100.00 or more, at single or ten rates, we allow you 10 per cent additional stock. We put up each order in a separate package, so that upon receipt of goods you have only to hand out the different lots as ordered. Many of our best customers buy in large quantities at the lowest rates and distribute in lots as ordered by their neighbors.

We also desire to sell to nurserymen and dealers who buy to sell again, and special prices will be made on carloads or larger quantities than indicated in this list.

References

We refer to any bank or business house in New Haven, Mo., as to our responsibility and standing in the community. We do our local business with the Farmers Savings Bank, New Haven, Mo.

Distances for Planting

Standard Apples.....	30 feet apart each way
Standard Pears and Strong-growing Cherries.....	20 feet apart each way
Duke and Morello Cherries.....	18 feet apart each way
Standard Plums, Apricots.....	18 to 20 feet apart each way
Peaches, Nectarines.....	18 to 20 feet apart each way
Dwarf Pears.....	10 to 20 feet apart each way
Grapes.....	rows 10 to 16 feet apart, 7 to 16 feet in rows
Currants and Gooseberries.....	3 to 4 feet apart
Raspberries and Blackberries.....	3 to 4 by 5 to 7 feet apart
Strawberries for field culture.....	1 to 1½ by 3 to 4 feet apart
Strawberries for garden culture.....	1 to 2 feet apart

Number of Trees on an Acre

30 feet apart each way.....	50
25 feet apart each way.....	70
20 feet apart each way.....	110
18 feet apart each way.....	135
15 feet apart each way.....	205

Rule—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill; which, divided into the number of square feet in an acre (43,560), will give the number of plants or trees to the acre.

We Grow Our Own Stock

We mail this list of prices to our friends and customers, and will ask that you favor us with your orders as early as practicable. All stock clean and healthy, and of our own growing. ENTOMOLOGIST'S CERTIFICATE WITH EACH ORDER.

Planting and Pruning

Care of Stock

The bundles should be opened, the roots dipped in water, then heeled in moist ground so that the mellow earth will come in contact with the roots and thoroughly protect them from the air, having the earth tramped solid about them. When ready to plant, take up only a few at a time puddle the roots and do not allow them to lie exposed to the sun or air. The ground should be carefully prepared by deep plowing and firming down with a disc and harrow.

Planting

The holes for planting must be large enough to receive the roots freely, without cramping or bending them from their natural position. All broken or mutilated portions of the roots must be cut off so as to leave the ends smooth and sound. All trees should be planted about as they stood in the nursery row; **pack the soil very firmly about the roots**, being careful not to bark or break the roots. Leave three inches of the surface soil loose to serve as a mulch. If the ground is very dry apply one or two pails of water before this soil mulch is in place, and after the water has soaked away it can then be placed over the moist soil.

Pruning When Planted

All fruit trees require more or less pruning when planted, and thereafter from year to year. On Apple, Pear and Cherry remove unnecessary branches and cut back growth of remaining branches to insure good growth the first season. On Plum and Peach remove branches to within one inch of body of tree and cut back the top leader to the desired height for a new head. The usual rule with Peach and Plum is to prune to rough stick form to about three feet in height. The above instructions on pruning are for freshly planted trees only.

Mulching

Unless thorough surface cultivation will be practiced during the summer a mulch should be applied. This may be a layer of coarse manure or vegetable matter around the trees three to six inches deep, and extending out from the trees three or five feet. Mulching protects the soil against the sun and drying winds; against alternate freezing and thawing, and provides some plant food.

Shrubs

If planted in beds or groups the ground should be spaded deeply and well worked. If shrubs are set as individual specimens they should be planted the same as trees.

Hedges

Privet—Dig trench about twelve inches deep and set the plants two to three inches deeper than they stood in the nursery row, or deep enough so the lower branches will be partly under the ground. Such planting will make a compact hedge down to the ground line, but if the plants are set too shallow there will always be undesirable open spaces at the base of the hedge. Privet and Spirea can be set about nine inches apart in the row.

Treatment of Nursery Stock

That has been Frozen in the Packages or Received During Freezing Weather.

Place the package UNOPENED in a cellar or some such place that is COOL but free from frost, until completely thawed. DON'T be in a hurry to open. The stock can remain in the packages for TWO WEEKS OR LONGER if necessary, without injury. If boxes are covered with sawdust, earth or something to exclude the air, it will be better.

After the FROST is ALL OUT the stock can be opened up and treated as above.

MISSOURI STATE PLANT BOARD
Office of the Chief Inspector, Columbia

Certificate of Nursery Inspection

No. 1C 121

Issued 9-2-27

This is to Certify that in accordance with the provisions of the Missouri Plant Act of 1925, the nursery and premises thereof belonging to New Haven Nurseries of New Haven, Mo., have been inspected by a duly authorized inspector and were found to be apparently free of injurious insect pests and plant diseases.

This certificate is not transferable and may be revoked for cause. This certificate expires Sept. 1, 1928.

L. HASEMAN,
Chief Inspector.

We are prepared to fumigate all consignments to states requiring fumigation. No Scale or Yellows have ever been found in our establishment, and we take pride in sending out only clean, healthy stock.

Spraying

Spraying is a vital necessity if money is to be made from fruit. It doesn't pay to miss one season, even if enemies are not visible. Spraying has an invigorating effect on trees, besides controlling enemies.

There are three classes of enemies spraying will control—chewing insects, sucking insects, and fungi. Each class requires a different remedy, but the remedies can be combined most of the time.

Spraying during the dormant period is distinctly different from spraying on foliage. Materials several times as strong can be used and are needed to control the scales.

On account of the life habits of enemies, often only two to seven days are available for any one spraying. Do the work then. Put the material on with force and cover every inch of bark and leaf.

Get a sprayer that is big enough, that will give one hundred to two hundred and fifty pounds of air pressure, that is adapted to your land and trees, and that is durable. Get a power outfit, if possible, for it does better work than a hand pump can.

The spraying program ordinarily resolves itself into two, three or four applications—one while trees are dormant, with lime-sulphur solution, and the other on blossoms and fruit with self-boiled lime-sulphur, or diluted lime-sulphur, or one of the soluble oils, with arsenate of lead added, or maybe with Bordeaux and lead. All applications must be guided by careful study.

BORERS WILL ATTACK FRUIT TREES IN SPITE OF ALL WE CAN DO, and will kill many trees if left alone. Trees must be gone over several times each year, and should be gone over each April and August.

We Grow Our Own Stock

We mail this list of prices to our friends and customers, and will ask that they favor us with their orders as early as practicable. We have now growing in our nurseries over one million fruit trees by actual count. All clean and healthy. **ENTOMOLOGIST'S CERTIFICATE WITH EACH SHIPMENT.**

Shipments to Pacific Coast and Southern States from our frost-proof storage during winter months via Southern Routes.

WE ARE GROWERS OF WHAT WE SELL. Many nurserymen are simply jobbers in the trade, and cannot sell stock with the same certainty of being true to name and free from disease.
