ceptions. No Charges
For Packing.

CLAIMS: All claims for errors must be made upon receipt of goods. Should any errors be made at any time, we desire to be informed at once, so as to rectify same without delay.

When ordering, give plain and explicit directions as to route, express or freight.

All goods travel at purchasers risk. Claim for delay or loss must be made to forwarders.

To Our Customers

The Ocean Springs Pecan Nursery was established in 1883 and is the oldest pecan nursery in the State. The first GRAFTED pecans were produced on our home place after years of patient trials.

We aim to grow only FIRST CLASS ROOT GRAFTED stock and guarantee all trees true to name, as we own all our bearing trees of the different varieties listed, besides other new ones in trial grounds, but not listed until proven to be as good as the best we have so far.

Our shipping facilities are first-class as the L. & N. Railroad passes in front of our nursery.

We have no connections with any other nursery.

Our responsibility extends only to persons purchasing direct from us; dealers purchasing from us sell upon their own guarantee.

Jackson County, Miss., is the banner county for fancy pecans. Stuart, Pabst, Russell, Schley, Jewett, Delmas, Success, and others were all originated here and these varieties stand at the head of the pecan industry today.

Let any other county, or even state, make as good a showing.

PABST

Soft Shell, large, well-filled, splendid and constant bearer; considered the best of dessert nuts..

SUCCESS

Large nut, good filler, quality fine.

A splendid nut of good size and best of quality. Bringing the highest price in all markets.

Cherries 4 feet high, 75c each. Five
feet high, \$1.00 each.

Myer Lemons, 2 to 3 feet high, \$1.75
each.

OUR CLAIMS

Having grown grafted pecan trees for
the last 32 years, we can claim to be able
to furnish only the best of stock, stake
trained, rootgrafted, all scions from our
own bearing trees eliminating all chances
of mixing varieties, a combination of
points that cannot be beaten.

HOW TO PLANT PECAN TREES

The best time is from the falling of the leaf up to the end of February, though the earliest planted trees have a better chance to get settled and callous the freshly cut roots.

In a heavy, rich soil, it would be best to plant fifty feet apart; in the lighter soils, forty feet or even closer if a larger revenue is desired at once, and the planter will have the requisite courage to cut out when the trees begin to crowd each other.

Never let the trees get dry being left in the sunshine or wind. Always have the roots covered with a wet sack or two, and only uncover one at a time as needed. Trim the roots with a keen knife and set fully as deep as in the nursery, rather too deep than too shallow. Keep brush and stable manure out of the hole and use only a fine brand of bone meal, well mixed with soil..

Do not forget to tramp well the soil over the roots; the closer the contact of soil with the roots the better the results.

After being planted cover with a few inches of loose soil for a mulch.

Any cultivated crop may be grown between trees, so as to cover all cost and have a revenue besides, or cowpeas and velvet beans may be grown, though care must be taken to keep the vines from choking the trees.
