Hardy Perennial Flower Plants

FOR SPRING, SUMMER, AND FALL PLANTING

These old-fashioned hardy garden flowers are becoming more popular each year. Twenty-five years ago, very few of them were grown, but today almost everyone who is fortunate enough to have even a small garden devotes at least a part of it to hardy plants. Their popularity is not surprising when we consider the many varied and pleasant changes which take place throughout the entire growing season in a well-arranged hardy border, in which, every week and nearly every day brings forth something fresh and new to interest and delight even the most critical. Beginning in April, the early-flowering varieties open their flowers often before the snow has entirely disappeared; these are followed by others with constantly changing variety, throughout the summer and fall when only severe freezing weather will stop such persistent late-blooming kinds as Japanese Anemones, Hardy Chrysanthemums, Gaillardias, Eupatoriums, Tritomas, etc.

Hardy Perennials are much used for planting in borders, for filling in the front of shrubbery, for massing on lawns, for cut-flowers, and for many other purposes. They are hardy, living outdoors during winter, and when once planted they last for many years, increasing in size and beauty each year.

Collections of Hardy Perennial Flower Plants

As many people are not acquainted with the different sorts, I am offering my customers the following Collections, all good, strong plants of blooming size, which when planted will, with little care, keep the garden gay with flowers from early spring until late autumn and will give the buyer greatest satisfaction from year to year. These collections are made up of species and varieties strictly of my selection, and I am unable to submit list of contents, as the assortment varies at different periods during the spring, summer and fall.

COLLECTION NO. 1—18 distinct species, all blue, from early to late, my selection, postpaid, \$4; by express, \$3.65.

COLLECTION NO. 2—18 distinct species, for shady places, from early to late, my selection, postpaid, \$4; by express, \$3.65.

COLLECTION NO. 3—18 distinct species, for cut-flowers, from early to late, my selection, postpaid, \$4; by express, \$3.65.

COLLECTION NO. 4—25 distinct species, many different colors, from early to late, my selection, postpaid, \$4.90; by express, \$4.50.

Dear Sir: I am inclosing herewith money order for \$7.42 and an order for plants. The greater portion of the order is to replace plants received from other concerns and which died. I thought I was saving some money by not sending my order to you but I lost out on the long run. I must compliment you on the quality of plants you send out. I lost only three plants on my last order and that was made up on the good count in filling same. So it pays to pay a little more and get good plants that will grow.—J. H. CURGAN, 1432 S. 58th St., Philadelphia, Pa.

Berry Plants

Strawberries

The eight varieties listed below are among the very choicest grown, combining in the highest degree all the qualities looked for in high-grade Strawberries. Among them are the earliest and latest varieties, as well as the midseason sorts, and some of the largest, sweetest, and most productive. All are perfect-flowering and need no other varieties planted near them to produce a crop.

Strawberry plants can be supplied any time during the spring and also during the fall from September 20 until the ground freezes.

Big Joe. Midseason to late. A large, firm berry of exquisite flavor; very productive.

Chesapeake. Midseason to late. Berries are large, firm, bright crimson, of delicious flavor.

Early Ozark. Early. Very productive. Berries dark red, large, firm, and of high quality.

Howard No. 17. Very early and bears for a long time. Produces a heavy crop of large, delicious berries.

Lupton. Very late. Berries are bright red, large, firm, and of the best quality.

Marshall. Midseason. An old favorite in New York and the New England States. One of the largest and best-flavored varieties; very productive.

Premier. Very early. The best and most popular early Strawberry. Wonderfully productive and has a very long fruiting season. Berries are bright red to the center, very large, and of delicious flavor.

Ryckman. Midseason. The largest, most productive, and best-flavored Strawberry grown. It is not only a wonderful table berry but is also a very profitable market berry, selling for the highest prices. It is of very vigorous growth, succeeding on even very poor soil, and is noted for producing good crops on the same ground for several years in succession.

GUARANTEE: I warrant my stock true to name, with the explicit understanding that should any prove untrue, I will return the money paid or replace it with other stock; but I am not liable for damage beyond this. Certificate of inspection is attached to each shipment.

[illegible]

SUBSTITUTION: It is my custom, should the supply of any variety become exhausted (which will occasionally occur), to substitute in its stead a similar sort properly labelled, of course. When it is desired that I shall not do this it must be so stated in the order. To simply affix the words "No Substitution" is all that is necessary.

Less than 6 of a variety cannot be ordered at the dozen rate; less than 25 cannot be ordered at the hundred rate, nor less than 250 at the thousand rate.

General Directions to Customers

The attention of my customers is respectfully called to the following directions, which will, if followed, be an aid to them as well as myself.

GUARANTEE. I warrant my stock true to name, with the explicit understanding that, should any prove untrue, I will return the money paid or replace it with other stock; but I am not liable for damage beyond this. A sure indication of the purity of my stock is the fact that customers of former years continue to deal with me. Certificate of inspection is attached to each shipment.

HOW TO ORDER. Order early. Remember that delays are always liable to occur on account of a rush of orders, bad weather, scarcity of help, and other causes. Write plainly your name, post office, county, and state; also give number of street or post office box, and the nearest express office.

PRICES in this Catalogue cancel all previous quotations. The prices quoted are for the quantities specified of a single variety. But 6 of any variety will be supplied at the dozen rate; 25 at the 100 rate; and 250 at the 1,000 rate. Less than 6 of any variety will be sold at the each rate only; less than 25 at the dozen rate only; and less than 250 at the 100 rate only.

SHIPMENTS BY PARCEL POST AND EXPRESS. All plants can be shipped by parcel post or express. They cannot be safely shipped by freight. On each item I have quoted prices "postpaid" and "by express." At the "postpaid" prices, I ship plants to any post office in the United States, postpaid; at the "by express" prices, I ship plants by express, and the purchaser pays the express charges.

SAFE ARRIVAL OF PACKAGES. I guarantee the safe arrival of all goods sent by express or parcel post to points within the United States. If a package sent by express or parcel post is injured or lost, I will replace it as soon as informed of the fact. Claims must be made promptly upon receipt of goods. I do not hold myself responsible for failures after delivery of the goods in good condition. Most of the failures with plants are due to causes beyond my control, such as unfavorable weather or soil conditions, too deep or too shallow planting, improper care and management, etc., which renders it impossible for me to guarantee success. It must, however, be plain to everyone who gives the matter the slightest thought, that it is to my best interests to send out only such stock as will grow and prove satisfactory.

PACKING. Plants are packed very carefully and special efforts are made to pack lightly so that transportation charges will be as low as possible. Everything is labeled.

SUBSTITUTION. It is my custom, should the supply of any variety become exhausted (which occasionally occurs in all nurseries), to substitute in its stead a similar variety, properly labeled, of course. When it is desired that I shall not do this, it must be stated in the order. To simply affix the words "No substitution" is all that is necessary.

TERMS OF PAYMENT. Cash with order or before goods are shipped. I prefer to make no shipment C. O. D., but will, when requested, ship in this way, provided 25 per cent of the amount is sent with the order. All orders are acknowledged as soon as possible.

REMITTANCES may be sent by Money Order, Check, or Draft. If you send cash, use registered letter.
