~~21-22 October, 1966 night~~

22 October, 1964

Logan Trail.

I saw 83 birds ^{at the same} _{time.}

the small pond at the north
end of the logan -

21-22 October, 1966 night

1. The first thing I noticed when I stepped
out of the plane was the cold air. It was
like a giant hand reaching out to grab me.
I had heard that the weather was bad, but I
didn't realize it would be this cold. The
pilot had said that the temperature would
be in the negatives, and he was right. I
was wearing a heavy coat, but it wasn't
enough. I shivered as I walked through
the airport. The ground was covered in a
thin layer of snow, and the trees were
bare. It was a beautiful sight, but I
wasn't in the mood for sightseeing. I
just wanted to get to my room and
rest. I took a taxi to the hotel and
checked in. The room was nice, but I
wasn't happy. I had booked a room with
a view, but the view was of a parking
lot. I called the front desk and
complained. They said they couldn't
do anything about it. I was angry.
I had paid a lot of money for a room
with a view, and they were giving me
a parking lot. I decided to leave.
I packed my bag and went back to the
airport. I took a different taxi and
went to a different hotel. The room was
small, but it had a view. I was happy.
I had found a room with a view, and I
wasn't angry anymore.

a large donut lying on its
side in the Blue Pacific. its edge
a broad belt of off-white coral sand
its rim a bright scoria
green, low & lush grading
abruptly to sand and clumps
of bunch grass, to bunch
grass and a narrow dense
covering of *Ipomoea*, to
a brackish lagoon.

~~Against~~ the blue sky,
rock marked with
out of focus white clouds
are dotted with the black
Great Frigatebirds and ^{white} ~~atolls~~
~~Boobys~~ Red-tail Tropic birds
and black & white Red-footed
and Blue-faced Boobys.

In the evening the air
is filled with the
shapes of Wedge-tailed
Shearwaters and
Bonin Island Petrels -
Blue & Common Noddy
 Terns are everywhere
but, since its October,
only a few Sooty Tern
can be seen overhead
Sooty white Terns follow
you about while
Gaysen Terns dart from
beneath your feet.

as you walk from the
beach to the lagoon -
on the shores of this
large pond of water
hundreds of Reddy Tarantulas

+ Golden Plover
while with water,
leeds, squabbling or
resting about the
shore bays. Teal

Every now & then a
Bristle Thighed
Curlew can be heard
from the entire plain
compared for with
the Blue faced Booby
for Attention.

The water, though warm,
is delightfully cool in
comparison to the 1400 Sun
which drives the swimmers
off in ten minutes
