Young's Mid-Fall BARGAINS

The cheapest price by THIRTY to FIFTY per cent lining out stock has ever been offered to the trade. These prices as listed are just fifty per cent lower than you have ever paid me before. Besides I offer you, prior to December 1st

30 Percent Additional Discount for one-half cash with order

An Apology and Explanation to My Competitors and Customers

It is not fair competition when one firm steps out and undersells his competitors thirty to fifty percent as I am doing at the present time, and I would not offer this stock at this price, which is below cost of production, if I were not forced to do so. I have been to considerable extra expense this year, also invested several thousand dollars in a branch nursery in Western North Carolina, which has placed me in a very embarrassing financial condition, making it absolutely necessary that I raise several thousand dollars in a short time. So to be sure of raising this money from sales of my stock I am offering you the greatest opportunity you will probably ever have to secure lining out stock of the highest quality at unheard of low prices. I have offered big cash discounts in the past, but the list prices were thirty to fifty percent higher than the prices in this list. Compare these prices with any

reliable firm and you will be surprised at the big saving you will make by sending your order in before the time limit on this offer expires, and I sincerely hope I will never again be compelled to offer my stock at such low figures.

I wish to assure you that each and every order will have my personal attention and that the same care will be given in digging, grading and packing as I have always given in the past. Remember, my packing has been proven the best in America by a standing offer of \$500 over a period of four years to anyone who could show me a better method of packing.

ROBERT C. YOUNG,
Greensboro, N. C.

LIGUSTRUM NEPALENSE (Nepal Privet)		
Medium size, dark green, glossy leaves; uniform, compact spreading growth. A very attractive plant, essential to landscape planting in masses, hedges or groups. Fills space between tall rank growing shrubs and the very low growing types.		
2 yr. 8-10 in.	4.50	40.00
2 yr. 6-8 in.	3.50	30.00
1 yr. 4-6 in.	3.00	25.00
1 yr. 2-4 in.	2.50	20.00
MAGNOLIA		
MAGNOLIA GRANDIFLORA (Southern Magnolia)		
This is the grandest of all our native broad-leaved evergreen trees. It is a native of the middle sections of the Southern States, and succeeds best in a rich soil. Nothing more conspicuous can be seen among evergreens where its large, white flowers are fully expanded. Their period of blooming begins the middle of April and lasts until August. Hardy at Philadelphia.

Nandina		
NANDINA DOMESTICA (Nandina)		
The delicate foliage of the Nandina is a brilliant dash of gorgeous orange red or crimson color in winter. It is dense and stocky, being one of the dwarfish plants of Japanese garden. The leaves are rich red when young, dark green at maturity, and boldly veined in winter. Nandina thrives well in soil well drained, loamy soil, and is fairly hardy. In autumn it is covered with snowy clusters of small red berries. This plant is one of the three plants most used in the better class of landscape work.

Picea, The Spruces		
PICEA ALBA		
Described by Bailey, the eminent horticulturist, as "A native of the Northern part of America." Derives the name White Spruce due to its light frosty green foliage, slightly tinged with blue.		
2 yr. 2 in.	3.50	30.00
1 yr.	2.50	20.00

PICEA EXCELSA (Norway Spruce)		
For many years Norway Spruce has been highly appreciated because of its rapid growth, its thinness, and its heavy masses of deep green foliage. Some of the forest old hedges are of Norway Spruce, as the trees are readily be pruned to any desired height. On farms and around houses all over the country Norway Spruce wind-breaks are giving substantial protection to stock and buildings. Norway Spruce is a tall, picturesque, and hardy tree, graceful in all its lines, and well adapted to planting on a wide range of territory.

2 yr. beds 4-6 in.	3.00	25.00

PINUS STROBUS (White Pine)		
The White Pine is the largest of all coniferous native to the eastern part of the United States. It readily adapts itself to both dry and moist soils, for it is found on the poorest and driest sand, and on steep, rocky slopes, and also on moist clay hills and river bottoms. It grows rapidly and has long, flexible corded, whitish branchlets.		
3 yr. 0-8 in.	5.00	45.00
2 yr. 2-4 in.	3.00	25.00

PINUS THUMBERRII (Japanese Black Pine)		
Tree to 100 feet tall. Large winter buds silvery-white. A handsome picturesque tree.		
2 yr. 4-6 in.	3.00	25.00

Thuja, The Arborvitae		
THUJA OCCIDENTALIS (American Arborvitae)		
The American Arborvitae is the most popular tree from which one of many distinct types have been developed. The native forests of Arborvitae have long been of great commercial value for timber, producing tall, straight trunks much used for telegraph poles. The Arborvitae is very hardy and dependable in almost any situation. Stands trimming well, and for this reason is widely used for hedge purposes. It usually grows bushy at the bottom and tapers toward the top. Foliage is very soft and flexible and of deep green color.

REGALE LILY		
LILIUM REGALE (Regale Lily)		
"One of the most beautiful of all known lilies. The exquisite blending of tints and colors forming a charming contrast with the rich, deep green foliage. Highly recommended for general culture, both for pot and the open ground. Strong growing and permanent as far north as Boston." (Bailey)		
"L. Regale came to us from China. With its large flowers, white corolla with pink and with a yellow throat, it is one of the most strictly of all. Trained like L. Speciosum rubrum of L. Aureum, it appears to be as hardy as either, and a most welcome addition to what we already have. It can be grown and flowered in pots."

Dear Sir:-
Your shipment to hand, and upon unpacking, we find them to be in first-class condition. We are quite pleased with them, as we did not think they would stand the distance of transportation as well as they did.

NOTICE TO CUSTOMERS

I would say to those unacquainted with me that I was born and grew up in nursery work on my father's nursery and have been engaged in the nursery business all my life. After spending eight years in northern nurseries, I returned south and devoted my time and small capital to growing boxwood and evergreens, today I have millions of evergreens growing in one of the largest evergreen producing plants in the south.

Located in the Piedmont section of the State we have severe cold weather, but there is very seldom a week from September to May in which we can not dig and ship. You get your stock from me when you want it and when you must have it for results. I do not pack my stock in a cold storage or put it in a greenhouse to ship out during the winter months and early spring.

I dig your order right out of the ground where it is growing, puddle the roots at once, also puddle again before packing, wrap the roots in damp moss and over this wrap wax paper.

My packing is done in a cool damp cellar and I absolutely guarantee my stock to reach you in perfectly healthy condition.

I personally look after digging and packing each and every order. When you buy of me you get real service and good stock treated in the proper way.

A trial will convince you.

REFERENCE

As to my responsibility, I refer to any bank or business house in Greensboro, N. C., the commercial agencies and the leading nurserymen of the U. S.

STRANGERS will be required to comply with the above, or send cash with order.

OUR LIABILITY AND GUARANTEE. We exercise the greatest care to keep our trees true to name, and hold ourselves in readiness at all times to replace, on proper proof, all stock that may prove otherwise, but it is mutually agreed between the purchaser and ourselves that we shall not at any time be liable for any amount greater than the original price paid for trees. If goods are not accepted upon these conditions, they must be returned and money will be refunded.

TELEGRAPHIC ORDERS are usually filled the same day received.

CODE—Use Nurseryman's Telegraphic Code, published by the American Association of Nurserymen.

Dear Sir:-
In this connection we want to say you sure know how to pack stuff. This shipment arrived in the best condition we have ever received from any grower of lining out stock. Also the stock you sent us all looked very nice.

Dear Mr. Young:-
Your packing method is certainly all that you claim for it and the plants came through in splendid condition.

Dear Mr. Young:-
My most humble apologies for not having acknowledged the additional box boxes.
There came through in good shape and I was afraid a mistake had been made in view of the uncertainty with which you had replaced the missing plants.
