Sweet Clover

Threshing Sweet Clover

As the years go by, it is becoming more apparent that SWEET CLOVER is the farmer's best reliance for keeping up the fertility of his fields.

Farmers that were timid at first about sowing it, are our best customers now for this seed.

If a "high powered" salesman offered you stock in a company guaranteed to yield 500 per cent profit, you would set the dog after him, because you would not believe it.

But where you sow SWEET CLOVER in your oats or wheat, you will get at least 10 bushels more of corn per acre next year on that field.

All right! 10 bushels of corn at 60c per bushel is \$6.00; cost of seed \$1.00; a direct net profit of \$5.00 on a \$1.00 investment. This is a plan in which you are President, Vice President and Board of Directors. No big salaries and the profit is all yours. It has been done thousands of times. You can do it.

Seed for 1928 is very low in price and I have 100,000 lbs. of it. Ask for sample.

Greeting to My Friends and Customers

FOR many years I have been sending out this little TREE and SEED BOOK in Eastern Nebraska. You may have been getting the BOOK regularly, or it may be that this is the first one you have had. In either case I hope you will look it over carefully and that you will find some items of interest.

If you are a farmer you may want to plant some of the FARM SEED I am offering this season.

A large amount of new seeding will be done this year, especially of the CLOVERS and ALFALFA.

Most all seed is lower in price than last year which is greatly to your advantage.

By judicious purchases of large quantities of seed, and by my direct "By Mail" plan, I can meet all honorable competition.

So when you begin to figure out your Spring requirements on Seed, I will be glad to have you compare my prices and quality with others.

Perhaps you will want to plant some FRUIT TREES, SMALL FRUIT, VINES or SHRUBS. Look over my list as the prices and quality will certainly be of interest to you.

Many of your neighbors have planted some of my NURSERY STOCK and SEED at a big saving over agents' prices. Thousands of our FRUIT TREES are in full bearing, that came from my NURSERY.

Just drive in with your auto this Spring and see for yourself what I have to offer both in SEED and NURSERY STOCK.

The year 1928 is ahead of us; the sun will shine; the trees will put on their mantle of green; the flowers will bloom and then the harvest will arrive as usual.

There is no better place anywhere in which to live, and enjoy life than right here in this part of the U. S. A.

Thanks for reading this page.

J. A. YAGER.

READ THIS PAGE CAREFULLY

HOW TO ORDER. For your convenience we enclose an Envelope and Order Sheet, to be used when ordering from this book, but you can send the order on ANY kind of paper, in any kind of an envelope. We will get the order, and you will get the goods you want, we guarantee that.

WHEN TO ORDER. Place your order as early as possible, as delay and confusion are thus avoided and better service is assured.

ACKNOWLEDGMENT. When we get your order we write you immediately, stating the amount of money received, and giving the approximate time of shipment.

AM I RESPONSIBLE. You have a right to know. Three Fremont Banks say I am **RELIABLE** and that I keep all my promises. Your own banker has my "rating," ask him about Yager. You take no chances whatever.

MY TERMS. Cash should accompany your order, but the money is yours till you get the goods. You may remit by **DRAFT, EXPRESS ORDER, POST OFFICE ORDER** or **PERSONAL CHECK**, (in which case add 10c exchange.)

OUR LOCATION. Fremont, Nebraska is in Dodge Co., being 37 miles Northwest of Omaha and 50 miles north of Lincoln.

SHIPPING FACILITIES. Three railroads enter Fremont, namely, Union Pacific, B. & M., and the C. & N. W., thus giving good service to all points. Also we have the American Railway Express Co.

GUARANTEE. I promise that all Nursery Stock will reach you in good live condition. Each variety will be plainly marked, and everything will be packed in the best possible manner. Errors on our part will be cheerfully rectified.

AGENTS. This book is my **ONLY SALESMAN**. I have no agents, no one has authority to represent my Nursery Co.

REPLACING STOCK. I do not replace Nursery Stock. When the agent sells you an order, he promises to replace stock that dies, but the price he asks you covers his expense of replacing, so you really pay for the replace whether you get it or not. So you get more for your money from me than from the nursery that replaces at half price.

FREE FREIGHT. The Freight or Express will be paid by me on all Nursery orders (but not Seed) amounting to \$10.00. Neighbors may combine orders and get **FREE DELIVERY**.

INSPECTION. All my Nursery Stock has been inspected by the official known as the State Entomologist, who has given me a "Clean bill of health."

CLAIMS AND DELAYS. If a shipment should arrive in a damaged condition, have the Railroad or Express Agent note same on your receipt, and write us at once. We notify you the day shipment is made. If goods do not arrive in a reasonable time, notify us, so we can trace same.

YAGER NURSERY AND SEED COMPANY

Fremont, Nebraska

APPLES

WHETHER you own a farm or a city lot, you should have some Apple Trees. Many of the old trees that were planted years ago have served their purpose and new ones should be started to take their places. A few dollars invested now will yield big returns in the years to come. We only offer the best and hardiest varieties. Plant mostly the Winter kinds, with a few Summer and Fall varieties, and perhaps a few crabs. Plant the trees 25 feet apart each way. Protect from rabbits the first two years. Cultivate the soil around the trees and you will be well paid for your efforts.

PRICES ON APPLES AND CRABS

	Each	Per 10
XX select 3 year old, well branched.....	\$0.60	\$5.70
5 to 6 feet tall, 3 year old, first class	.55	5.00
4 to 5 feet tall, 2 year old, choice	.40	3.50

Summer Apples

DUCHESS. Very hardy, bears young, red striped. Juicy and tart. Best for sauce and pies. Ripens in July.

EARLY HARVEST. Pale yellow. Fine quality, early bearer. Good eating apples, Quite hardy. Ripens in July.

YELLOW TRANSPARENT (Russian). Waxed yellow. Beautiful, highest quality. Bears second year from planting. Extremely hardy. Ripens at harvest time.

Fall Apples

MAIDEN BLUSH. Rather large. Bears every year. Yellow with red cheek, good for eating. Hardy and juicy. Ripens in September.

WEALTHY. Dark red cheek. Good size. Hardy everywhere. Bears very young. The best cooking and baking apple. Ripens in October.

SNOW (Fameuse). Bright red. White flesh. Spicy flavor. One of the best. Ripens in October.

PRICES SWEET. Splashed with red. Fair size. Bears annually. The best fall sweet apple. Entirely hardy. Ripens in September.

Winter Apples

JONATHAN. Good size, glossy, dark red. The prince of apples. Spicy and delicious. White flesh. Keeps till March. (Can't be beat).

Wealthy (Best Fall Apple)

DELICIOUS. This is truly a great Winter Apple. It is hardy in this latitude. Bears well, the fruit is unsurpassed.

In shape it resembles the Sheepnose. Prices same as others.

BEN DAVIS. Large size. Red splashed cheek. Bears every year. Quality fair. Produces more bushels than any other kind. Keeps well till April.

JANET (Geniton.) Small size. Pale green and red. Late blossom. Tender and crisp. Good quality. Very late keeper. Keeps till May.

**YAGER APPLE TREES
BEAR.**

WINTER APPLES—Continued

GANO. Good size. Beautiful red toward the sun. Good quality. Fine for the market. Tree hardy. A money maker. Keeps till April.

RAMSDELL SWEET. Rather large. Dark red. Best winter sweet apple. Hardy and productive. Keeps till February.

SALOME. Good size. Yellowish red covered with bloom. Best flavor. Juicy and fine. Hardy on the prairies. Keeps till May. Highly recommended.

NORTHWESTERN GREENING. Very large, greenish yellow. Extremely hardy. Vigorous grower. Good quality. Fine for baking. Keeps till March.

WINESAP. Fair size. Dark red. Flat shape, juicy and tender. Tree hardy. Early bearer. Good for home orchard or market. Keeps till May. (Be sure and plant some.)

GRIMES GOLDEN. Medium size. Rich, golden yellow. Quality the very highest. Tender and spicy. Hardy. Keeps till February.

INGRAM. Fair size. Red striped. Very late bloomer. Splendid quality. Tender flesh. Keeps till May. (A good one.)

IOWA BLUSH. Medium size. White with red cheek. Quality fine. Hardy on the prairies. Keeps till February.

CRAB APPLES

A FEW trees of the Crab Apple should be planted in every orchard, as they fill a place occupied by no other fruit. The crabs are hardy everywhere. The Whitney is especially desirable, as it is good for eating as well as other uses. (Price same as apples).

Whitney.
The Best Crab of All

FLORENCE. Medium size. Yellow and red. Very handsome. Fine quality. Yellow flesh. Extremely hardy. Ripens in August.

HYSLOP. Large. Dark red. Very hardy. Good for pickles and jelly. Abundant bearer. Ripens in September.

TRANSCENDENT. Fruit medium size. Red and handsome. Fine for jelly and preserves. Great bearer. Ripens in September.

WHITNEY NO. 20. Largest size. White splashed with red. Juicy, but not sour. Hardy everywhere. Fine for eating in haying time. Ripens in August.

Our Apple trees are grown in the most skillful manner, propagated with the greatest care, and handled all the way through with a view of giving you the highest satisfaction possible.

Early Richmond

NOTE—Our Cherry trees this year are unusually well rooted, well branched, and just about perfect in every way. They will please the most critical person. Plant some of them.

CHERRIES

THE Cherry is one of our best cultivated fruits. A few trees in the back yard will yield a supply for the table and leave plenty for canning. These trees bear at an early age, usually two years from planting.

Every farmer needs a few Cherry trees. This fruit is exceptionally free from insect injury, or any form of tree disease.

Plant trees 12 feet apart in the row. The varieties listed below are the best known kinds.

PRICES ON CHERRY TREES

	Each	Per 10
5 to 6 feet tall, extra select (Splendid roots).....	\$0.75	\$7.00
4 to 5 feet tall, choice trees (Splendid roots).....	.60	5.50
3 to 4 feet tall, good stock (Splendid roots).....	.45	4.00

LARGE MONTMORENCY. Very large size. Light red color. Mild flavor. Rapid grower. Bears second year from planting. Ripens last of June. (One of the very best.)

DYEHOUSE. This variety is not as sour as the other early cherries. A very early and sure bearer.

EARLY RICHMOND. Fair size. Rich red, very juicy. The best for cooking, canning and shipping. The earliest to ripen. Bears very young and is hardy. Ripens early in June.

ENGLISH MORELLO. Medium size. Nearly black when ripe. Fruit juicy, dark and rich. Small seed. Quite hardy, good bearer. A good late kind. Ripens in July.

MAY DUKE CHERRY

If you want a Cherry a little better than anybody else has got, plant the May Duke. It is a beautiful grower; the fruit is very large and not as sour as other Cherries. Some folks call it a "Sweet Cherry." Price same as other kinds.

If you don't have a good supply of Cherries, you are passing up one of the best fruits we have.

PLUMS

Sapa Plums

WHETHER you own a city lot, or a big farm, you should have some Plum trees. Plums bear the second or third year from planting. They require no special care, and take up but small space. You can have Plum Butter, Plum Jelly, Canned Plums for winter, Plum Pudding, and be "Plum Happy," if you plant a few trees.

The varieties I offer are selected with special reference to their good qualities; such as hardiness, early bearing, large size and best flavor.

A few dollars invested in Plum Trees will return better dividends than we get from some of the "Get Rich Quick" schemes we invest in sometimes.

PRICES ON PLUM TREES

	Each	Per 10
5 to 6 feet tall, 3 year old, extra select	\$0.80	\$7.50
4 to 5 feet tall, 3 year old, choice trees	.65	6.00
3 to 4 feet tall, 2 year old, good stock	.50	4.50

AMERICAN SORTS

DESOTO. Good size. Yellow with red cheek. Best for canning. Very sweet. Bears young. Entirely hardy. One of the best. Ripens in August.

HAWKEYE. Very large. Yellow with red blush. Firm flesh. Very sweet. Perfectly hardy. Bears young. Ripens in September.

STODDARD. Largest size. Purple and red. Good grower. Hardy and prolific. Best for canning and market. A good one. Ripens in August.

WYANT. Good size. Purple and red. Very hardy. Nearly a free stone. Heavy bearer. One of the best kinds. Ripens in September.

WOLF. Medium size. Yellow mottled. Firm and sweet. A freestone. Hardy and prolific. Ripens in August.

FOREST GARDEN. Largest size. Yellow with red cheeks. Very sweet and juicy. Small pit; thin skin; delicate flavor. Hardy everywhere. Bears early. Ripens in September.

HANSEN'S HYBRID PLUMS

Professor Hansen of South Dakota has introduced three Hybrid (crossed) varieties of Plums that are remarkable for hardiness, high quality and early bearing.

These plums combine the best traits of the whole Plum family. If you want a supply of Plums, plant some of these, especially the Waneta.

HANSEN'S HYBRID PLUMS—Continued

WANETA. This is the largest of the Hansen Plums; a heavy annual bearer. Fruit largest size; quality unsurpassed. Has delicious flavor, extremely hardy. Bears second year from planting.

SAPA. Another Hansen Plum. Early

bearer. Very hardy. Purple color when ripe. Shows fruit second year. A fine canning plum.

OPATA. A Hansen kind. Large in size. Olive green color when ripe. Freestone. Pleasant flavor. Very desirable

PEARS

YOU can raise Pears almost any place that corn is grown successfully. They bear quite as often as Apples and add greatly to the family fruit supply. As a canned fruit they have few equals. I offer only the hardiest kinds, and especially recommend Flemish Beauty and Keiffer.

PRICES ON PEAR TREES

	Each	Per 10
5 to 6 feet tall, 2 year old, select	\$0.80	\$7.50
4 to 5 feet tall, 2 year old, choice	.65	6.00
3 to 4 feet tall, 1 year old, good	.45	4.00

DUCHESS. Very large size. Dull green color. Rich flavor. Bears the second year from planting. Juicy and rich. Ripens in September.

FLEMISH BEAUTY. Good size. Red cheek. Very hardy. Strong grower. Sweet and good bearer. Ripens in September.

BARTLETT. Large. Rich, golden yellow. Juicy and buttery. Fine flavor. Bears young. The best early pear. Ripens in August.

KEIFFER. Medium size. Beautiful yellow. Late keeper. The best late canner and market pear. The pear for everybody. Very hardy. Ripens in October and November.

**ALL OUR TREES ARE
VERY BEST QUALITY.**

Keiffer

APRICOTS

THIS fruit is prized by all because of its excellent qualities. The tree is hardier than the peach, and should be planted by all lovers of fruit. The Russian varieties are hardiest. The two listed below being the best.

PRICES ON APRICOT TREES

	Each	Per 10
5 to 6 feet tall, 2 year old, select	\$0.80	\$7.50
4 to 5 feet tall, 2 year old, choice	.60	5.50

ALEXANDER (Russian). Medium to small, light orange, yellow flecked with red; flesh tender, juicy, sweet and good quality; hardy; productive. July.

BUDD (Russian). Medium to large; light orange with blush on sunny side; flesh sweet, juicy, with flavor of the peach; hardy and productive. August.

PEACHES

THE Peach is one of our most delicious fruits, but is not extremely hardy in this latitude except in sheltered locations. By planting the hardy varieties you will have a fair degree of success. Below are offered the hardiest known kinds.

PRICES ON PEACHES

	Each	Per 10
5 to 6 feet tall, 2 year old, extra	\$0.60	\$5.50
4 to 5 feet tall, 2 year old, choice	.50	4.50

ALEXANDER. Fair size. White skin. Red cheek. Juicy and sweet. A clingstone. The earliest of all. Hardy. Ripens in July.

CRAWFORD'S LATE. Very large. Rich golden yellow. Freestone. The best canning peach. Perfectly hardy. Ripens in late September.

BOKARA. Raised from seed procured in Bokara, Asia. Fruit large yellow, with red cheek, of good quality. Perfect freestone. Skin tough. A fine shipper. Ripens in August.

RUSSELL. Of Nebraska origin. Good size. Very attractive. Highest quality. Juicy and sweet. Freestone. Exceedingly hardy. Ripens in August.

ELBERTA. Largest size. Yellow with red cheek. Good quality. Freestone. Very hardy. The market peach. Ripens in September.

Concord
(The Standard Grape)

GRAPES

NO YARD is too small and no farm too large to have a place for some Grape vines. The beauty about this fruit is that it comes into bearing in so short a time after planting, and is almost a sure cropper. You cannot make a better investment than to plant some Grape vines.

Below are given the very choicest and hardiest varieties.

Plant six feet apart each way.

The Grape is one of the most satisfactory of all small fruits, because it gives quick returns and is good for years to come.

PRICES ON GRAPE VINES

	Each	Per 10	Per 100
Concord, 2 year, extra heavy vines.....	\$0.15	\$1.30	\$12.00
Concord, 1 year, select, good plants.....	.12	1.00	7.50
All other varieties, extra heavy, 2 year.....	.25	2.25	21.00
All other varieties, good vines, 1 year	.20	1.75	15.00

GRAPES—Continued

ELVIRA. White color. Compact sweet. juicy bunch. Often used for wine. Very hardy and prolific. Ripens before Concord.

POCKLINGTON. White color. Good cluster. Large berries. Very prolific, sweet and tender. A good table grape. Ripens after Concord.

CONCORD. Black color. The standard grape both for home and market. The hardiest of all. Bears one year from planting. Juicy and sweet. Ripens in September.

MOORE'S EARLY. Blue-black color. Large cluster. Very hardy. Better quality than Concord. Ripens two weeks before Concord.

WORDEN. Blue-black color. Very high quality. Pleasant flavor. Juicy and sweet. One of the best for table or market. Ripens just before Concord.

AGAWAM. Rich red color. Large loose bunch. Tender, juicy and luscious. Fine for table. Ripens in September.

BETA. A black Grape and the hardiest one yet discovered. Is grown successfully in Dakota and Minnesota. Vines never winter-kill. The fruit is medium size and of good quality. It is a heavy producer and is an iron-clad. I especially recommend this grape to you.

Beta Grape (Very Hardy)

GOOSEBERRIES

YOU will always find room for a few Gooseberry bushes. They are hardy everywhere and often show fruit the next year from planting. This fruit is prized by all. I especially want to call your attention to the Carrie variety, as it is a very superior fruit in every way, and if you like Gooseberries, try Carrie.

PRICES ON GOOSEBERRIES

	Each	Per 10
2 year old, any variety	\$0.15	\$1.40

Houghton Gooseberry
(One-fourth natural size)

CARRIE. Originated in Minnesota. Fruit of largest size. A very strong grower and highly productive. Quality best. Not as sour as other varieties. Extremely hardy and most desirable.

CHAMPION. Medium in size. Quality good. Fairly free from mildew. Good grower, and quite productive.

DOWNING. Large size fruit. Whitish green flesh. Juicy and pleasant. A good grower. Fairly prolific.

HOUGHTON. Fruit is medium size. Plant is productive, healthy and a good grower. The old well known sort.

CURRENTS

CURRENT jelly for color and quality takes first place, that is the verdict of the woman folks. This fruit needs no special care, is entirely hardy. Bears annually, and should be found in every garden. The North Star is my first choice.

PRICES ON CURRENTS

	Each	Per 10
2 year old, any variety, strong plants.....	\$0.15	\$1.40

NORTH STAR......This currant produces the largest sized bunches, and each berry is large size. The fruit is very rich in quality, not as sour as other kinds. A good market sort, and most desirable for jelly, as well as dessert.

RED CROSS. Brilliant red color. Fair size berries. Ripens early and a good producer. Quite reliable.

CHERRY. A well known sort. Large bright crimson berries. Very sour, but an old favorite. Berries in bunches, fair size.

WHITE GRAPE. Large size berry and bunch. The best white currant grown. Flavor quite mild. A good grower and satisfactory in every way.

North Star Currant

RASPBERRIES

BY ALL means plant some Raspberries. They are one of the leading small fruits and will bear the next year after planting. Give good cultivation and start with the right kinds and you will have success.

For pies, jam and canning they fill a "long felt want."

A big improvement has been made in Raspberries in the last two or three years. The Black Pearl and Cumberland are the best black ones; St. Regis is the best red one.

PRICES ON RASPBERRIES

All varieties, two year old	Per 10	Per 25	Per 100
	\$0.75	\$1.75	\$ 5.00

BLACK PEARL. The Raspberry is one of our best fruits. Black Pearl has merits possessed by no other. Give it "half a chance" and it will surprise you. It won't sprout up all over the country. The canes are large and strong. The fruit is borne

in great clusters. Never freezes out. Stands drouth well. Berries largest size. Its chief merits are as follows: Fruit largest size—Bears Second year—Most delicious flavor—Remarkably prolific—Possesses extreme hardiness.

Black Pearl

RASPBERRIES—Continued

CUMBERLAND. Largest size of all. Very firm and sweet. A strong grower. Entirely hardy. A good shipper. Annual bearer.

LOUDON. Large, fine and sweet. Dark crimson color. Entirely hardy. A good one for market or home use.

EVERBEARING ST. REGIS RED RASPBERRY. The past season this remarkable berry has again proven its merit. It bears throughout the entire season; stands dry weather well, and does not winter kill easily. Will bear fruit the first season planted. The fruit is a brilliant crimson color. Berries largest size. The quality of the fruit is unrivaled. Bears abundantly.

Everbearing St. Regis

EVERBEARING STRAWBERRIES

WHEN the Everbearing Strawberry was announced, people said, "Ah Ha! Pure Moonshine; same as the White Blackberry, the Tree Gooseberry, the Wonderberry, and the Blue Rose." Folks who tried them, soon found them to be as represented, and have eagerly sought this splendid fruit; because of its exceptional merit.

The plants fruit the first year. Berries are as large as other sorts. The quality is unsurpassed. Just as sweet, no more seeds than others. Richest red color. Perfectly hardy. Multiply rapidly. Plant and cultivate them the same as other kinds and you will be pleased with results. We mail the plants to you the same day they are dug, so you get them fresh and vigorous. The Progressive Everbearing is the best.

Progressive Everbearing

PRICES ON EVERBEARING STRAWBERRIES.

Progressive Everbearing, Postpaid, Per 25, 50c; per 100, \$1.40; per 1000, \$10.00.

500 or more at the 1000 rate.

Special prices on larger quantities.

NOTICE—When your bundle of trees arrive, don't look for the Strawberry plants, as they are always sent separately by Parcel Post, Prepaid and fresh.

LISTEN! If you don't have anything else in your garden you should have at least a Strawberry bed. No other fruit comes into bearing quicker and strawberries and cream are about the best thing known to man.

BLACK BERRIES

I DON'T know who discovered this fruit, but whoever did, conferred a great benefit on mankind. There is nothing else that will take the place of Blackberries with sugar and cream. A blackberry pie is just about the "best ever."

Snyder Blackberries
(One-third Natural Size.)

This fruit is easy to raise. Just give them half a chance and you'll sure get the fruit. The Snyder is the hardiest and best of all and is my first choice.

SNYDER. The old standard. Very hardy, consequently much raised in cold climates. Berries medium size, juicy, rich; strong, stout cane, thrifty growth and a very broad leaf.

PRICES ON BLACKBERRIES

	Per 10	Per 25	Per 100
Snyder, best variety	\$0.80	\$1.75	\$ 6.00

STRAWBERRIES

A LONG in June, when you happen to call on your neighbor, and find her making a "three layer" shortcake, from berries picked fresh that morning from her own garden, you will at once plan to plant a patch for yourself.

Everyone can have strawberries in abundance. They are easy to raise, and require only a small space to grow. Spring planting is best.

The June varieties such as the Dunlap, will not fruit much the first year, but the Everbearing will fruit the first year.

The Senator Dunlap is undoubtedly the best June variety for hardiness, size and bearing habit. It is self-fertilizing and may be planted alone. For variety, the other kinds listed here are the most desirable.

PRICES ON JUNE BEARING STRAWBERRIES.

	Per 25	Per 100	Per 1000
Any variety listed below.			
Postpaid	\$30.40	\$1.00	\$ 7.00
500 or more at the 1000 rate. Special prices on larger quantities.			

SENATOR DUNLAP. The largest size berries. Bright red color. Peculiarly aromatic. A good shipper. Ripens midseason and is the most prolific and best berry yet discovered.

BEDERWOOD. Good size berries. Very sweet and firm. Rapid grower and heavy cropper.

CLYDE. Large berries. Crimson color. Flesh rich pink. Tender and delicious. Hardy and prolific.

SPLENDID. Large round berries. Dark red fruit. Mid-season sort. Elegant quality.

Senator Dunlap

ASPARAGUS

ABOUT the best thing for "Spring Fever" is a mess of home grown Asparagus. It is about the earliest good thing that comes from the garden. A bed of it will last for twenty years, and gets better all the time. The doctor says it is very beneficial to the health.

It never freezes out, no insects attack it. You can cut it during a long period, and the fact is, every family should have it in the home garden.

PALMETTO. Best kind, largest size, tender, early, crisp, hardy.

PRICES ON ASPARAGUS

Per 25 Per 100 Per 1000

Palmetto, 2 year old\$0.75 \$2.00 \$12.00

Palmetto—best kind, largest size, tender, early, crisp, hardy.

Palmetto Asparagus

RHUBARB or PIE PLANT

Victoria Rhubarb

IF ALL other garden products should fail, you can be sure of having nice juicy pies, and delicious sauce if you have a few hills of Rhubarb. Once planted it lasts for years. It just keeps growing and you keep using it. Rhubarb is the nearest thing to being an automatic pie factory of anything I know. The Victoria is best.

VICTORIA. Extra early; tender stalk; very juicy; not as sour as other kinds. Can be used for many weeks. Best for canning.

PRICES ON RHUBARB OR PIE PLANT

Per 5 Per 10 Per 100
Victoria, 2 year old....\$0.50.. \$0.90 \$ 8.00

Free Offer

GOOD UNTIL MARCH 25, 1928

Five beautiful PHLOX plants. Hardy, perennial; pink, red white and salmon colors.

Send me an order for Nursery Stock (not seed) for \$8.00 or more before above date and I will send you five plants—FREE.

ORNAMENTAL DEPARTMENT

SHADE AND ORNAMENTAL TREES

A TREE is the silent friend of man. The Landscape would truly be cheerless and desolate without trees. The humblest home can be sheltered at small expense as well as the palatial mansion, by the planting of trees.

Land values are enhanced by suitable trees, whether it be in the city or on the farm.

A cottage by the roadside surrounded by trees and shrubs is the embodiment of our ideal of the most sacred place on earth—the HOME.

ASH, WHITE. Rapid growing tree of fine, symmetrical outline. A valuable street or park tree, and should be extensively planted.

MOUNTAIN ASH. Very hardy and handsome with fine clusters of scarlet berries hanging on the trees in winter. A beautiful tree for the lawn.

NORWAY MAPLE. Of spreading habit, dense foliage; dark green leaves; very hardy; a rapid grower; a rich and majestic shade tree for yard or street planting.

MAPLE, SOFT. Everybody knows this fine native tree. A rapid grower. Very graceful and hardy. Splendid for street and shade tree. This tree transplants easily.

ELM, WHITE. A splendid native. Easy to transplant. Very hardy. Graceful habit. One of the very best for lawn, street or shade tree.

LINDEN (Basswood). Rapid grower. A hardy and graceful tree. Has large, clean leaves. Produces sweet flowers much sought by bees.

Plant Some Trees

The Elm

Norway Maple, 6 to 8 feet.....	2.00	18.00
Mountain Ash, 6 to 8 feet	1.75	15.00

Forest Tree Seedlings

EVERY farmer should have a windbreak or shelter belt. You save feed for your live stock through winter by having them behind a grove, and the friendly shade in summer is of great value. Start with some of my little forest trees and in a short time you will have a shelter, wood, poles and posts, besides adding 100 per cent to the looks of your farm.

PRICES ON FOREST TREE SEEDLINGS

Maple, 18 to 24 inches tall	1.75	15.00

WEEPING TREES

Trees of this class are much desired for their grace and beauty. As single specimens upon the lawn, along the street, or in the cemetery, they are highly prized for their elegance.

Forest Tree Seedlings

CATALPA (Weeping Bungeii). This tree is grafted six or eight feet from the ground; has a straight body, and forms a remarkable dense, round head that presents the appearance of a beautiful green umbrella. Most desirable for lawn or street effect. This tree is hardy and dependable.

PRICES ON WEEPING TREES

Catalpa Bungeii, 6 ft. stems, 2 year heads\$2.00 each

Catalpa (Weeping Bungeii)

ORNAMENTAL SHRUBS

YOU may have a home of stately proportions, or it may be only a modest cottage, but the picture is not complete unless you have an assortment of Shrubs. The diversity of foliage and bloom extending from May until winter is such as to afford a succession of cheer and beauty throughout the growing season.

No better investment can be made than in a few hardy Flowering Shrubs. My list comprises the hardiest and best bloomers for this latitude.

SPIREA (Bridal Wreath). The best Spirea of all. Perfectly hardy. An annual bloomer, producing a wealth of white flowers. A good grower and makes a beautiful hedge. Can be sheared if desired.

HONEYSUCKLE (Bush Form). Not a vine but a splendid hardy shrub. Flowers in June and produces a profusion of sweet pink flowers, followed by showy red berries. Very desirable.

BARBERRY THUNBERGII (Japanese). A great acquisition for hedges or specimens. Perfectly hardy. Will thrive anywhere. Handsome foliage, green and copper-colored, but turning to orange and red in the fall. Scarlet berries line the branches all winter.

SNOWBALL. The old favorite. Hardy and free bloomer. Pure white blossoms in June. Blooms young and is very desirable.

ALTHEA (Rose of Sharon). A hardy shrub unsurpassed for profusion of bloom. Rich foliage and blooms until frost. We

Spirea Bridal Wreath

can furnish them in the following colors: Deep red, purple, white and rose.

WEIGELIA (Rosea). This shrub blooms from June until fall. Erect habit. Attractive foliage. Very hardy and graceful. Flowers delicate pink.

LILAC (Persian). Purple flowers, sweet scented, willowy branches. Heart-shaped leaves. Very hardy and stronger than the common purple.

LILAC (White.) Very much the same habits and form as the Purple Lilacs except that it has pure white flowers. Very hardy.

Hydrangea

BUTTERFLY BUSH

(Buddleia Magnifica)

The latest thing in gorgeous shrubs. Grows four feet tall. Has great clusters of lilac colored flowers. Very fragrant. Attracts large numbers of butterflies, hence its name. Exceedingly attractive. 35c each.

FARM SEED

Spring, 1928

Dear Friend:

I have lived in eastern Nebraska for more than 50 years, and am familiar with farm conditions and seed requirements.

My men and myself buy large quantities of seed each fall direct from the growers.

All of our **RED CLOVER** is bought within 40 miles of Fremont, and we haven't one bushel of foreign seed of any kind except **RAPE**.

We never buy any seed that contains noxious weed seed, and if there is any doubt about it, samples are sent to Lincoln for test.

All "Home Grown" seed we buy is run over our Clipper Mill and comes out perfectly clean and bright.

Our **SWEET CLOVER** seed is bought mostly in Dakota in car lots and is scarified thoroughly and tested for purity and germination.

This year we have the genuine **GRIMM ALFALFA** seed in sealed bags, state tested.

The crop of Canadian Variegated **GRIMM ALFALFA SEED** that we have handled for several years was a failure in Canada in 1927, so we have none to offer this year.

FREE BAGS are furnished by me, "weighed in". Full bags weigh 90 lbs. (1½ bu.) and are convenient to ship or handle.

We Are Prepared to Help You with Your Seeding Problems

To all those who are not familiar with questions regarding the sowing of **FARM SEED**, we will be glad to help you, especially on the following items.

Quantity Per Acre—You should not waste your money by sowing too many pounds per acre of good seed. The kind of land you have, the place it is located and general conditions should govern quantity sown per acre.

Adaptability—Be sure and know that the seed you are sowing is adapted to your farm. Whether you have valley land or higher ground makes a difference with the quantity of seed you sow, and the suitability of the seed to the land.

Time to Sow—Much seed is wasted each year by being sown at the wrong time. Many farmers sow **ALFALFA** seed too early. The same is true of **CANE** and **MILLET**. Don't sow until your ground is thoroughly warm and danger of frost is past.

Soil Preparation—You will not have success with the best seed in the world if your soil is not thoroughly prepared and if the seeding is not done in the proper manner. Some men sow their seed and do not cover it sufficiently. Others cover it too deeply. Some sow broadcast, others drill. Some use a roller. All these things are highly important for success.

Nurse Crops—Most farmers use a nurse crop where the **CLOVERS** and other seeds are sown. Too often a farmer will sow three bushels of oats per acre with his **CLOVER** or other seed and if a wet season follows, his grain will lodge and smother his **CLOVER**, therefore you should reduce your nurse crop some for best results.

Many other questions come up in which we can give you our advice, and assist you in gaining success in your sowing of seed.

NURSERY STOCK

I like to deal directly with you, and to know my customers personally. We have no agents for **NURSERY STOCK**, but send you this little book so you can make your own selections.

It is folly for you to pay an agent for **NURSERY STOCK**, 50 cents on the dollar for taking your order, when you can buy the same items from me at about half.

Many people come to my **NURSERY** and select the stock, good and fresh, and save money thereby,

If you live too far away to come here, you are entirely safe in sending me your order by mail as I will give it my personal attention.

Thousands of people have planted my **NURSERY STOCK** in the last 25 years and doubtless there are people in your neighborhood who can testify to the quality of **YAGER'S TREES**.

Much of our business comes from old friends and patrons, but we are always glad to have new friends come to us, and assure them the fairest and most cordial treatment.

ORNAMENTAL SHRUBS—Continued

HYDRANGEA (Paniculata). The best of the late flowering shrubs. Very hardy. A free bloomer. Produces immense clusters of creamy-white flowers. Blooms the first year from planting. One of the best.

MOCK ORANGE (Syringa). A very hardy upright shrub. Large, white, sweet-scented blossoms appear in May or June. The finest perfume of the garden.

PRICES ON SHRUBS

Any variety offered,

	Each	Per 10
2 to 3 ft. tall.....	\$0.60	\$5.50
18 to 24 inches tall.....	.50	4.50

Note—These shrubs are good large, thrifty plants, and not to be compared with the small immature shrubs offered by some.

HARDY VINES

THERE is nothing more attractive than a vine in bloom by the porch or on a trellis. Vines may be used to cover fences, or to hide some unsightly object. Nothing is more pleasing than the fragrance and beauty of the Paniculata Clematis. The Honeysuckles are most attractive, also. The Wisteria with its wealth of purple is a benediction. The Woodbine affords shade and a riot of autumn hued foliage.

PRICES ON HARDY VINES, 2 year old

	Each
Clematis: Jackmanni, Henryi, Mme. Andre.....	\$0.90
All other vines offered	.50

CLEMATIS, Creamy White, (Henryi). A beautiful rich white flower, very large, often 4 inches in diameter. Hardy and attractive.

CLEMATIS, Crimson (Mme. Andre). Crimson red. Large flowers, 4 inches in diameter. Striking color. Good climber. Splendid foliage. Hardy.

CLEMATIS, Purple (Jackmanni). The queen of all vines for size and richness of flowers, which are violet purple, 3 to 4 inches in diameter. Needs winter cover.

CLEMATIS, White (Paniculata). The best hardy white Clematis. Vigorous, sweet-scented pure white flowers. Blooms late in summer.

HONEYSUCKLE (Scarlet Trumpet.) A good hardy climber. Free bloomer. Flowers the shape of a trumpet. Fine for a trellis.

HONEYSUCKLE (Yellow Trumpet). Similar to above except that flowers are yellow. Very hardy and vigorous.

VIGOROUS CREEPER. A new hardy woodbine. Better than Boston Ivy. Good thick foliage. Splendid for clinging to walls of all kinds. Will grow anywhere. The best vine.

WISTERIA (Purple). A rapid hardy-growing vine. Produces large drooping purple clusters of flowers in May and June.

Clematis, White (Paniculata)
(This is best of the Clematis
Family)

HARDY ROSES

THE ROSE is the finest cultivated blooming plant. The diversity of color and perfume is remarkable. The Rose is an emblem of purity, and its fragrance is ennobling. It softens the cares of life and gives us a glimpse of the beyond.

General Jack.

Hardy Climbing Roses

FLOWER OF FAIRFIELD (Perpetual Flowering Crimson Rambler.) The best new hardy climbing rose yet discovered. Its flowers are produced in marvelous clusters like the Crimson Rambler, but the color is more brilliant. It is a strong grower and flowers freely throughout the entire season. You will not be disappointed in this rose.

CRIMSON RAMBLER. Rich crimson red. Bears immense clusters. Very rapid grower. The best climbing rose known. Hardy everywhere.

DOROTHY PERKINS. Shell pink. Borne in clusters. Strong grower. Very hardy and rapid grower. The best pink climber.

PRAIRIE QUEEN. Rose red. Large flowers, not fragrant. Rapid climber. Very hardy. The good old-fashioned rose.

PRICES ON ROSE BUSHES

All varieties listed. Good strong 2
year old plants. Each\$0.55
For 10 plants 5.00

Bush Roses

FRAU KARL DRUSCHKI. White American Beauty. Pure snow, long buds, perfect double flowers; vigorous grower, of upright habit, luxuriant foliage.

PAUL NEYRON. Bright pink. The largest rose grown. Hardy, splendid fragrance. Strong grower.

GEN. JACQUEMINOT. Bright red. Large double. Fragrant, very hardy, and takes first place.

EARL OF DUFFERIN. Rich velvet maroon. Very double and fragrant.

PRINCE CAMILLE DE ROHAN. Dark red, almost black. Large, sweet, double and most elegant. Very hardy. The best dark rose.

MADAM PLANTIER. Pure white, not fragrant. Profuse bloomer. Very hardy. Often used for cemetery purposes.

CLIO. Creamy white, pinkish center. Large double flower. Delicate perfume. Very vigorous grower.

MAGNA CHARTA. Rose pink. Hardy, splendid fragrance, strong grower.

Crimson Rambler Rose

ORNAMENTAL HEDGES

IN LANDSCAPE work, and yard decorations, hedges are being planted more than formerly. As a division line, a hedge is most desirable, or it may be placed on either side of a drive with splendid effect. As an outer enclosure, it is very attractive.

The three kinds offered here are the best for this latitude. The Privet and Spirea may be sheared to the desired height, thereby producing a formal effect. The Barberry should be allowed to grow naturally, thus preserving its beauty.

AMOR PRIVET. Extremely hardy. Has no thorns. Dark glossy green foliage. Makes a dense growth. May be sheared to produce pleasing effect. Very attractive.

SPIREA VAN HOUTTEI. Often called Bridal Wreath. Very hardy. Long, delicate branches, covered with beautiful white flowers in June. Makes a splendid hedge.

Amoor Privet Hedge

Barberry Thunbergii

THUNBERGII BARBERRY. Sometimes called Japanese Barberry. Hardy anywhere. Grows two or three feet tall. Branches covered with handsome little flowers, followed by small red berries that remain all winter. You can't beat it. (See picture.)

Hardy Perennial Plants

THERE is no class of plants more desirable than these. They are better than the annuals because you plant them but once, and each spring they come forth with renewed vigor to gladden the heart and embellish the landscape. The plants listed here are all hardy, and afford a profusion of bloom throughout the season.

Bleeding Heart

BLEEDING HEART. A great favorite, curious heart-shaped blossom. Fine for border or as a single plant. Blossom light red. Very hardy. Blooms in April and May.

GOLDEN GLOW. A fine hardy plant. Good for background. Very hardy. Flaming yellow, double flowers. Blossoms in August and September.

PRICES ON HARDY PERENNIAL PLANTS

	Each	Per 10
Phlox (Best Assorted Colors)	\$0.18	\$1.60
Golden Glow (Yellow)	.18	1.60
Yucca (White Flower)	.20	1.75
Marvel Mallows	.20	1.75
Bleeding Heart (Pink)	.75	7.00

PHLOX (Hardy). The most charming flowers. Blooming from June till November. Flowers range from pure white to darkest crimson. Plant in groups.

YUCCA. (Adam's Needle.) Stalks grow four to six feet tall. Are covered with large, bell-shaped flowers. Foliage green the entire year. Extremely hardy and conspicuous.

MARVEL MALLOWS. This is one of the finest and best perennials yet introduced. The plant is perfectly hardy and never fails to bloom. The flowers are often six inches in diameter, almost pure white, with a velvety crimson center. Plants attain a height of four or five feet. A delightful object for the yard.

Yucca

Dakota Spruce

Evergreens

Try some of my Dakota Spruce trees. They grow fast, and are very hardy. All nursery grown, and have good roots, and will grow to be trees of beauty, both winter and summer.

PRICES ON SPRUCE TREES

2 to 2½ feet tall.....	\$2.25
2½ to 3 feet tall	3.00
3 to 3½ feet tall	3.50
Balled and Burlapped.	

PAEONIES

THESE flowers stand in a class by themselves, being entirely hardy, having no insect enemies, and never failing to produce an abundance of fragrant blooms each year. Next to the Rose, the Paeony is the grandest flower under cultivation. Plants have been known to have bloomed for twenty-five consecutive years. They never fail you. The finest Decoration Day bloom.

The following kinds are the very choicest of the hundreds of known varieties. Order by number.

No. 1—DUCHESS DE NEMOURS. The largest white Paeony of all. Very double. Has a delicate fragrance. The heart is touched with pink. Flower often four inches in diameter.

No. 2—F. ORTEGAT. Large crimson bloom. Very double. Bewitching perfume. Buds resembling the rose. Long stems.

No. 3—FLORAL TREASURE. Great pink flowers. Free bloomer. Very double and sweet perfume. A fine cut flower.

No. 4—L'MARTINE. Double pink bloom. Peach blossom color. Slender stems. Moss rose fragrance. Early bloomer.

No. 5—LOUIS VAN HOUTTE. Dazzling red. Rose shape. Medium size flower. Very double. Apple blossom odor. Blooms in mid-season.

No. 6—OFFICINALIS RUBRA. Dark rich crimson. Semi-double. Golden center. Always in bloom for Decoration Day. Very earliest.

Duchess de Nemours

FARM SEED

For many years I have been handling FIELD SEED for farmers.

During 1927 I distributed more than ten carloads of FARM SEED in Eastern Nebraska.

During the harvest season, my men go to the farmers and buy our seed direct from the producer, using great care to select only the best, after which, all our seed is cleaned by us, so that the Germination and Purity conform to our State requirements.

When you buy FIELD SEED such as ALFALFA, RED CLOVER, SWEET CLOVER or any of the legumes, you are making a profitable investment. Future crops depend upon the fertility of the soil, and you cannot afford to let your land become exhausted.

If you buy an automobile, it begins to deteriorate the next day in value. If you sow CLOVER SEED, it enhances the value of field crops that you raise thereafter.

100% on the investment seems too big to be true, but I know of many such instances, where farmers have sown the Clovers.

WHEN you receive this book I will be ready to supply at once, anything that is listed and at the prices specified.

But I cannot promise to maintain the prices on **FIELD SEED**, as the values may change. Nursery prices are good for the season.

As to **FIELD SEED** I have a large supply now on hand and will try to give you the best possible values for 1928.

On large quantities I can sometimes make a substantial reduction.

MY TERMS

PRICES. The prices quoted here are for seed delivered at depot or Express office at Fremont, Nebraska. You are to pay the Freight or Express charges. Terms, strictly cash.

SACKS. I make no extra charge for sacks. The sacks are "weighed in" as seed. Great care is taken to have good strong sacks, and in most cases I double sack the seed to avoid leakage.

GUARANTEE. I guarantee all seed shipped to you, to reach you in good condition. If sacks are torn or seed damaged, require the R. R. or Express Agent to note same on your freight or express receipt. Then notify me.

APPROVAL. When you get your shipments of seeds from me, if they are not as represented, write me about it, and I will adjust the matter satisfactorily with you. I will do everything possible to please you.

DISCLAIMER. The Yager Nursery & Seed Co. gives no warranty, express or implied, as to description, quality, productiveness or any other matter of any Seeds or Plants it sells, and will not be responsible for the crop.

FREE SAMPLES. Ask for free samples of seed. I like to have you see just what you are buying, and the seed I send will be exactly like the sample you get.

SUBJECT TO SALE. I have a large supply of seed on hand, bought right and all good stuff, and the prices I make you now are only good till the present supply is exhausted.—J. A. YAGER.

QUANTITY. On mail orders, I do not care to fill any orders for seed for less than \$1.00, as cost of handling smaller orders is excessive.

WEIGHTS PER BUSHEL AND POUNDS PER ACRE.

	Lbs. Per Bu.	Sow Per Acre
Alfalfa	60	12 to 15 lbs.
Red Clover	60	10 to 12 lbs.
Alsike Clover	60	6 to 8 lbs.
Sweet Clover	60	15 to 18 lbs.
White Clover.....	60	5 to 6 lbs.
Timothy	45	15 to 18 lbs.
Rape	50	8 to 10 lbs.
Sudan Grass	40	18 to 22 lbs.
Golden Millet.....	50	35 to 50 lbs.
Amber Cane	50	75 to 100 lbs.
Blue Grass (Ky.).....	14	30 to 50 lbs.

Yager Nursery and Seed Co.
Fremont, Nebraska

NOTE: We use the utmost caution to have all the seed we handle, to be of good Purity and Germination. Also to be adapted to this climate and soil.

None of our seed is from irrigated fields. All dry land grown.

ALFALFA

Since Eastern Nebraska farmers have gone into the Dairying business more extensively than ever, it has become necessary that they have suitable hay and pasture for their herds.

Every farmer should have at least a few acres of ALFALFA for his farm animals, as no other legume exceeds it in value for all farm stock.

Sowing ALFALFA serves two purposes. It saves you buying high priced hay from your neighbors and greatly improves your soil for future crops.

Sow 12 to 15 lbs. per acre. (See colored sheet for prices.)

REMEMBER, we have genuine, certified, GRIMM ALFALFA in sealed bags this year.

All our Red Clover Seed was raised in this locality, and is genuine "Home Grown." It has been well cleaned and contains no noxious weeds so far as we know.

RED CLOVER

When your land begins to get "run down," "poor" and "played out," and you begin to get short crops, then you think of RED CLOVER, because you know it is the salvation of your soil.

Your neighbor across the wire fence gets 28 bushels of corn to the acre; you get 55 bushels to the acre because you have "Clovered" your land.

This is no idle dream. Just look around your neighborhood.

It would be unnecessary for me to try to tell you the benefits of RED CLOVER to your land. Every farmer knows what they are. The County Agent tells you. The farm paper says so, and I say so, so there is no argument.

CLOVER on your land for two years gives you the equivalent of 12 loads of barn yard fertilizer per acre.

Get a sample of my seed, or come in and see me. I certainly can please you on quality and price.

Sow 10 to 12 lbs. per acre. (See colored sheet for prices.)

Sweet Clover

Most all our Sweet Clover seed is grown in the Dakotas, and is all scarified (scratched), free from weeds. Has good purity and growth. Sow the yellow for pasture and hay.

The White is the best fertilizer known.

SWEET CLOVER

Wherever farmers congregate and discuss BIG CROPS, the subject generally turns to the discussion of SWEET CLOVER.

I went out the other day where some neighbors were shelling corn and the owner estimated that his corn would only make 31 bushels per acre. A man who lived a mile from there said, "Well, my corn made 56 bushels per acre, but you see boys, I use SWEET CLOVER on all my land."

I could fill this book full of true stories—scores of them, of men I know who voice their approval of SWEET CLOVER on their farms.

If you had a pile of barn yard manure as high as your house and paid a man \$2.00 a day to haul it out on your land, the benefit derived from it would be much less than you would get from SWEET CLOVER seed which would cost you only about \$1.00 per acre.

SWEET CLOVER seed has never been as cheap as this year. I have three carloads on hand as I write this page.

Sow 12 to 15 lbs. per acre. (See colored sheet for prices).

Alsike Clover

GOOD FOR Pasture.
 MAKES fine hay.
 Improves the soil.
 Likes wet soils.
 Sow with Timothy.
 Bushel sows 10 acres.

ALSIKE CLOVER

THIS Clover is often called "Swedish Clover." In appearance, it resembles both the White and Red Clover, and by some is believed to be a hybrid between the two. Alsike will grow successfully where Red will not. In fact, where soils are too poor and exhausted for the Red Clover, Alsike will usually give most satisfactory results.

Like the Red, this Clover is a good fertilizer, adding both humus and nitrogen to the soil.

This Clover is especially adapted to low, wet soils, where the Red does not thrive, but is equally adapted to upland soils.

Sow 6 to 8 lbs. per acre. (See Price List.)

TIMOTHY AND ALSIKE Mixed

Many farmers produce a fine pasture by sowing a combination of TIMOTHY AND ALSIKE.

This mixture when grown for hay furnishes wonderful results as the TIMOTHY holds up the ALSIKE and makes it easier to cut and more easily cured and if pastured, stock is not so liable to bloat on this mixed pasture.

The seed we offer contains 20 per cent or more of ALSIKE and weighs 45 lbs. per bushel.

The seed is cheaper than usual this year and this combination has been very popular with farmers.

Sow about 15 lbs. per acre. (See colored sheet for prices.)

NOTE: Our TIMOTHY seed is all HOME GROWN 1927 crop. TIMOTHY seed deteriorates rapidly so you should always sow new seed. Our seed is very Fancy and will surely please you.

Fine for PASTURE.

TIMOTHY

THIS is one of our best known hay and pasture crops and will succeed on any good soil where corn can be raised. In many sections, it is grown as an exclusive crop of hay for feeding horses, being recognized as very superior for this purpose.

Where soil has a tendency to wash, Timothy is sown, as the stiff sod prevents erosion.

A mixture of Timothy and Alsike Clover is very desirable either for hay or pasture, the seed required being Timothy 8 to 10 pounds and 3 to 4 pounds Alsike.

Grain crops following Timothy are materially increased by reason of the added fertility.

Seed should be sown in the spring. Sow 15 lbs. per acre.

WHITE CLOVER (for Lawns)

THIS is sometimes called the White Dutch Clover and is the well known kind seen growing in pastures and on our lawns. For pasture, in combination with Blue Grass or Alsike, this Clover is very desirable.

KY. BLUE GRASS

THIS plant is too well known to need a description. It is the kind we use on our lawns, and is found growing in our tame meadows, often being sown with White Clover. The plant is extremely hardy and endures almost all conditions of climate and weather.

AMBER CANE (Sorghum)

EVERY farmer knows the value of CANE because it is one of the most nutritious feeds we have.

It will stand severe drought but thrives better, of course, under normal conditions.

It is not unusual to obtain 5 tons of splendid good feed an acre from CANE.

Mules, cattle and horses keep in fine winter condition on well cured CANE.

This seed should not be sown too early as it is a hot weather plant. The AMBER CANE is the variety that is more popular than any other.

If sown heavily, the stems will be small, and the foliage more abundant, thereby producing better feed and less waste.

Sow late in Spring $1\frac{1}{2}$ to 2 bushels per acre. (See colored sheet for prices.)

NOTE: I have a carload of genuine BLACK AMBER CANE from Kansas—very high test and very cheap this year.

RAPE—Dwarf Essex

IF YOU have a bunch of pigs, calves or sheep and want to see them grow and fatten rapidly, just turn them into a patch of Rape. This is a great green feed crop, and produces ten to fifteen tons per acre, and can be pastured continuously till killed by frost.

Hog breeders place a high value on this crop for cows and little pigs, because it promotes growth and vigor. 8 to 10 lbs. per acre.

GERMAN MILLET

THIS is doubtless the best of all the Millets. A good feed for cows and calves but not for horses. It may be sown late in the season where other crops have failed. Should be cut for hay before seed matures for best results.

Sow three-fourths to one bushel per acre.

SEE PRICE LIST.

SUDAN GRASS

AND now we come to this wonderful annual forage plant which is being so universally used in all parts of the country.

You can take more pounds of milk and butter out of an acre of SUDAN hay or pasture than anything I know of. You see you get two good cuttings each Summer from SUDAN and then you have some good Fall pasture left until frost comes.

Many farmers cut this hay with a binder and shock it up for curing. Much of the SUDAN seed grown in Eastern Nebraska does not mature well, and has a low germination.

All kinds of stock devour SUDAN hay greedily in Winter and come out sleek and fat in the Spring.

Failure with this crop frequently results from being sown too early. Do not sow this seed until late, or until the ground is thoroughly warm.

I was fortunate in securing a carload of this seed from Southern Kansas. It is as bright as a dollar, and of very high Germination, and the price is low.

Sow 20 lbs. per acre. There are 40 lbs. to a bushel. (See colored sheet for prices.)

*P. S. Send in your orders for Seed
and Nursery Stock as early as possible.*

*We will give your order our best per-
sonal attention, and fully Guarantee Satis-
faction to all our patrons. J. A. Y.*

FOR THE LAND'S SAKE
USE
McQueen's Inoculator

The Modern Legume Inoculator

MODERN farmers demand modern methods of farming, and agree that all legume seed should be inoculated. McQueen's Inoculator is the modern legume inoculator—made for farmers—by farmers—to make farming pay. It is field bred and farm grown and is able to give fine results under your field conditions.

McQueen's Inoculator is the only nitrogen fixing bacteria that is

ABSOLUTELY GUARANTEED

to give satisfactory results or your money back. This is for your protection. You can't find a better seed than for your protective alfalfa, your sweet clover, soy beans, vetch, lucerne, peas, beans and clovers of all kinds with McQueen's Guaranteed Inoculator that hastens maturity, increases the crop, improves its quality, enriches the soil and saves fertilizer bills.

Simple directions for mixing Inoculator with your seed are printed on each and every package of McQueen's. Only a few minutes of your time is required to inoculate your legume seed. Many Master Farmers use McQueen's. Tremendous sales on McQueen's Inoculator enables us to offer this quality merchandise at the following

REDUCED PRICES

FOR CLOVER AND ALFALFA
