Seed Novelties

Try a few in your garden!

Garden Huckleberry

The Garden Huckleberry grows from seed the first year. A new fruit that cannot be excelled for Pies and Preserves. Very prolific, yielding an immense crop of fruit. It is annual and must be planted each year from seed. Grows and thrives in all climates and on all kinds of soil. The fruits grow larger than the common Huckleberry or Blueberry. You will be delighted and astonished with this easily grown and wonderful novelty.

Vine Peach

Ripe Fruit in 80 Days After Seed is Planted

This wonderful Vegetable Peach is the most beautiful of all vegetables. They resemble oranges in color, shape and size, and grow on vines like melons. Extremely early, of the easiest culture and very prolific, covering the ground with golden fruit. They grow from seed in 80 days.

Banana Muskmelon

Surpasses all other melons in its delicious fragrance. The flesh (the melon being nearly solid) is of a rich quality and very sweet and melting. It is very prolific. Grows from 18 to 36 inches in length and looks almost like an overgrown banana.

Ground Almond

A delicious nut with a flavor resembling the cocoanut or almond. The meat is clear white, covered with a thin shell or skin of brown. Grows close to the surface; very prolific, a single nut yielding from 200 to 300 nuts in a hill. Does well in any soil. Planted in the Spring the same as potatoes. Everybody likes them.

Wonder Bush Cherry

These bushes grow about 18 inches high and bear heavy crops of the best flavored fruit. Although many use the fruit raw, all claim it makes better pie than tree cherries. The Wonder Cherry, sometimes called ground cherry, will bear fruit 8 weeks after planting seed.

New Orange Sunberry

Berries the size of gooseberries, grow in clusters, when ripe are of a beautiful orange color. Plants grown from seed sown in the spring will yield a big crop of fruit the following fall. The plants are wonderfully productive. The handsome orange colored fruits are excellent for preserves, pies, jelly, jams, etc. You will be delighted with this new berry.

Japanese Giant Radish

The great Sakurijima Radish from Japan. The largest radish grown, often attaining the enormous weight of 15 lbs., and sometimes 20 or 30 lbs. It is not only a curiosity but a radish of extraordinary quality.

The Chestnut Bean

This wonderful Bean looks like a gigantic Pea. When boiled it has a flavor like boiled chestnuts, and is one of the most delicious beans grown. Grows in form of tall bush, completely covered with pods. For soup and turkey stuffing it cannot be surpassed.

It is a Spanish Bean, and is known as the "Garbanzo." We have but a limited amount of seed to offer.

Japanese Climbing Cucumber

Vines extra strong, vigorous and great climbers, producing surprising amount of superior fruit on poles, fences, side of house, etc. Three times the usual crop from a given area can be grown with this variety. Fruits of large size, nice green color, and fine for slicing and pickling.

Yard-Long Bean

An interesting curiosity. The vines are rampant growers and produce an enormous crop of long, slender, round pods, which are of excellent quality for snap beans. The round pods grow from 2 to 4 feet in length having the thickness of a lead pencil. Tender and of fine flavor.

Gigantic Guinea "Bean"

The New Guinea Butter Vine is a wonderful vegetable; extensively advertised as the Gigantic Guinea "Bean." Grow to enormous size, one fruit often weighing 15 lbs. and from 4 to 5 feet long. Delicious eating and of fine flavor. Will grow anywhere.

New Climbing Watermelon

A superb variety that may be tied to trellis, etc. Melons the size of cocoanuts; crimson flesh of the highest quality; rich and sweet. Fruit ripens for a long period, unlike other sorts which ripen their fruit mostly at one time. An ideal melon for the small garden.

Price 10c per packet, 6 for 50c, 12 for \$1.00
