Your home may be made a center at a very small cost. A few dollars and a little loving care will transform any residence into one of ideal beauty.

LAKETON, INDIANA

Retail Price List

The following listed stock is all first class of the grade named. In case of your ordering any item in a grade we are sold on, we reserve the right to give you the next higher or lower grade. In case we are entirely sold on any item you may order, we would be glad to select some other variety of equal merit, color and season. Our judgment of what is best is at your command.

Let us book your order and we will hold until you come for it, or until time to ship.

Orders desired shipped will be packed, F. O. B. our station.

Where it is possible, it will pay you to drive to the nursery. You can drive 40 or 50 miles, get your trees, get back home and plant all or part of it same day.

We have a commodious packing house, where stock is heeled in and properly cared for, and especially for spring is this an advantage, as we can hold stock back, so that stock may be safely handled and planted later in the season.

The percent of new trees planted each year is far below the percent of trees that are dying each year.

With the advent of modern up to date machinery for the farm, with every modern device for convenience in the home, and which includes modern up to date furniture in the home, good roads, and the luxury of travel—the automobile, people are awakening to the fact that “Its not a home until its planted.”

Anticipating the needs and the demands along this line we have an unusually large and complete line of hardy Shrubbery, Roses, Hedge Plants, Climbing Plants, Shade Trees, a full line of Fruit Trees, Hardy Perennial plants for the “Flower Garden,” bulbs, etc.

Last but not least we have a fine large supply in all the standard varieties in Evergreens. You should see them to appreciate them.

We have been in the business for forty-five years. Our customers are our best advertisers. We solicit your business.

NOTE—If in need of stock in larger quantities than are named in list, write for prices and will make you special quotations.

NOTE—We will allow 5 at 10 rate and 50 at 100 rate.

NOTE—In growing large quantities of stock there is sometimes stock in off grades, either smaller or larger than herein quoted.

If interested in such grades, ask for prices.

TERMS—Cash, or if sent by express, C. O. D. on delivery.

WHY NOT BUY MORE FRUIT TREES?

How many dollars a year do you spend for fruit—either fresh or in cans?

Did you ever stop to think that one-tenth that sum invested in a few rees, would give you many times the amount of fruit you buy—and keep on giving it to you, year after year?

If you have ground enough for a fair-sized garden, you have room enough for fruit. A single tree will yield from 50 to 150 quarts of fruit. We have seen 20 16-quart baskets taken from a single tree, under regular commercial culture. A good young apple tree will give from two to four barrels of fruit.

Fruit trees require so little care, as compared to vegetables, that your whole home orchard will not take many hours work during the entire year.

You can grow as fine peaches and apples as sold anywhere if you plant the right kind of trees.

VARIETIES—Windsor, Gov. Wood, Black Tartarian, Napoleon, Bing, Yellow Spanish, Lambert.

Burbank Plums

PLUMS

The plum, like a pear, succeeds best in a rather heavy soil with some clay and being generally free from disease is profitable. They should be gathered a few days ahead of use that they may develop their perfect flavor. For family use they especially do well in poultry yards, or where the hogs keep the ground free from fallen fruit. The varieties should be mixed.

MAKING THE HOME BEAUTIFUL

More attractive homes! Homes larger, better built, more convenient, more attractive. Not only for more heat, more light, more comfort, but also more beauty.

When God made this country it was a place of trees, shrubs and flowers. Today men are beginning to realize that God's way is the best and everywhere men and women are striving to retain as much of that former beauty as they can. Parks and reserves for everybody, playgrounds for children, green lawns and shrubs and trees and flowers. Civic centers for making better citizens.

Your own home, too, may be likewise a center of beauty at how small a cost many people do not realize. A little loving care is the largest item. Making the desert blossom like the rose is figurative, but making the home grounds more attractive is one step in the process.

SPIREA

All the Spireas bloom extravagantly. This family contains more attractive varieties than any other. They range in height from dwarf to tall, color of blossom from white to red, and period of bloom from early April to August. There is a great variety in their inflorescence and in the habit of the shrubs, so there can be no danger of monotony in such a collection. All the species are very hardy, easily grown, and will be found useful for specimens, groups, screens, borders, ornamental hedges, etc.

CLIMBING VINES

Without climbing vines many homes would lack much of their beauty. Then it follows that many homes that are still dull and unattractive can be made beautiful from early spring, when the tendrills of hardy climbers take on new life, till Winter comes again.

This is Important Information

The man who contemplates the building of a home, first decides on a plan, and to secure the plan, he seeks the help of a competent mechanic.

Next—he builds his house and properly grades and levels the lawn.

THEN—

It's not a Home 'till It's Planted"

Knowing that a great many planters are at a loss to know "What to plant and where to plant it," we offer our services to all who may desire it. If interested, call or write us and a representative will call and see you, go over the matter with you, take measurements, and draw you a sketch plan.

The plan will then be brought to you for your inspection. Remember that our services are **FREE**, and our making you a plan in no way obligates you to accept it.

If our plan is satisfactory, we have two propositions to offer you.

FIRST—That we will sell you the stock and you do your own planting.

OR, we will deliver, plant and guarantee the stock for one year. Any that die, will be replaced free of charge.

TIME

An Important Element

April and May in Spring and October in Fall are very busy months with us, and the earlier you call us the more time we can give to "making plans."

HEDGE PLANTS

A small amount of money invested in beautiful hedges will add more value to a country or city home property, dollar for dollar, than any other similar investment. A hedge planted about the borders of a lawn will transform a heretofore bare looking spot into a place of beauty, and you can keep it low or let it go high, as a screen. City lots may be divided by Hedging with fine effect.

ROSES

Roses thrive best in a medium light clay soil. Before planting prepare the soil by spading and thoroughly working over to a depth of about 18 inches, fill in well-rotted stable manure while spading and work it carefully into the soil. After the plants are set, for best results cut all branches back to within 3 or 4 inches of the top of the ground. The new growth coming out will make a much nicer head than if the plant were not pruned, and the bushes will bloom all the better.

Hardy Evergreens

The Evergreen has vouchsafed man in order to give him to understand more fully the Eternal promise of life everlasting. Evergreens typify permanency, defy time and the elements: In the bleak Northern winters the Evergreen stands out in the landscape, fresh, green, and full of cheer. An Evergreen must not have its roots exposed to the sun or wind not even a minute. For this reason large sized trees are dug with a ball of dirt left with the roots and a burlap cloth sewed tightly about it. On smaller sizes of trees we are able to mud the roots heavily and cover with wet moss and also cloth.
