BARR'S SEED GUIDE 1929

Vegetable Seeds
and
Flower Seeds
of Highest Quality

BARR & SONS

11, 12 & 13, King Street, Covent Garden, London.
Seed Trial Grounds at Taplow, Bucks.

Collections of Vegetable Seeds

Forwarded Carriage Paid and Packing Free for Cash with Order.
Prices nett.

These Collections of Vegetable Seeds are judiciously and liberally selected, and will be found suitable to gardens of various sizes; the seeds supplied are all of the best approved varieties, and such as are best adapted to secure a succession of vegetables from January to December.

Cultural Directions are printed on each packet of Seeds.

F. Barr's 12/6 Collection of Best Vegetable Seeds.

Suitable for a small Garden.

3 pkts. Peas, fine sorts for succession	1 pkt. Brussels Sprouts	1 pkt. Endive	1 oz. Spinach
1 pkt. Broad Beans	2 pkts. Cabbage	1 „ Leek	1 pkt. Spinach Beet
1 „ Runner Beans	1 pkt. Cabbage Savoy	2 pkts. Lettuce	1 „ Tomato
1 „ Df. French Beans	1 „ Carrot	1 „ Mustard	2 pkts. Turnip
1 „ Beet	1 „ Cauliflower	2 „ Onion	1 pkt. Vegetable Mar- row
1 „ Borecole or Kale	1 „ Celery	1 pkt. Parsley	1 „ Sweet Marjoram
2 pkts. Broccoli	1 oz. Cress	1 „ Parsnip	
	1 pkt. Cucumber	2 pkts. Radish	

E. Barr's 21/- Collection of Best Vegetable Seeds.

Suitable for an ordinary Villa Garden.

4 pints Peas, fine sorts for succession	1 pkt. Brussels Sprouts	1 pkt. Endive	1 pkt. Salsafy
1 pint Broad Beans, best for succession	2 pkts. Cabbage	1 „ Leek	2 ozs. Spinach
1 „ Runner Beans	1 pkt. Cabbage Savoy	2 pkts. Lettuce	1 pkt. Sea-Kale Beet
1 „ Df. French Beans	2 pkts. Carrot	1 pkt. Maize (Sweet Corn)	1 „ Spinach Beet
1 pkt. Beet	1 pkt. Cauliflower	1 oz. Mustard	1 „ Swede (Garden)
1 „ Borecole or Kale	1 „ Celery	2 pkts. Onion	1 „ Tomato
2 pkts. Broccoli	1 „ Couve Tronchuda	1 pkt. Parsley	2 pkts. Turnip
	2 ozs. Cress	1 „ Parsnip	1 pkt. Veg. Marrow
	1 pkt. Cucumber	2 ozs. Radish	2 pkts. Herbs

C. Barr's 42/- Collection of Best Vegetable Seeds.

Suitable for a Garden of moderate size.

6 pints Peas, for succession	1 pkt. Cabbage Savoy	3 pkts. Lettuce	1 pkt. Sea-Kale Beet
1 1/2 „ Broad Beans, best for succession	2 ozs. Carrot	1 pkt. Maize (Sweet Corn)	1 „ Spinach Beet

SEED TRIAL GROUNDS AT TAPLOW, BUCKS.

Group of Vegetables Awarded Gold Medal by the Royal Horticultural Society, London.

BARR'S

Gold Medal Vegetable Seeds

ALPHABETICALLY ARRANGED FOR EASY REFERENCE.

The selection of Vegetable Seeds offered in the following pages is the result of a series of careful trials made mostly at our own Seeds Grounds. Our Customers may therefore confidently rely on receiving Seeds of the best strains only. At the R.H.S. Wisley Trials our Strains of Vegetable Seeds have received exceptional recognition for high quality, many having been Highly Commended and several given First-Class Certificates and Awards of Merit.

The excellence and purity of our strains of Vegetable Seeds have been recognised by the following high awards—

EIGHT GOLD MEDALS AND EIGHT SILVER-GILT MEDALS

By the Royal Horticultural Society, London.

Three Gold Medals by the National Vegetable Society.

Three Silver-Gilt Medals at Shrewsbury and Southport.

Seeds Act, 1920.—All our Garden Seeds have been tested in accordance with the provisions of the Seeds Act, 1920, and, unless otherwise stated at time of sale, are guaranteed to be equal to or above the required minima of germination and purity.

Intensive Culture of Vegetables.—To those who wish to grow early vegetables in Frames and Cloches on the French system, we recommend the varieties marked ¶. For particulars of this special culture we recommend "FRENCH MARKET GARDENING," by Weathers, 5s. (postage 6d.).

Full Directions for Sowing are printed on each packet of Seed.

ARTICHOKES.

GLOBE ARTICHOKE.

CHINESE ARTICHOKE: Plant in rows 1 ft. apart and 6 to 9 inches apart in the row. The roots are ready for use in October, and may be dug up as wanted, or lifted and stored in sand or earth away from frost, but in a cool place.

GLOBE ARTICHOKE.—*Cynara scolymus*. French, *Artichaut*.

The young heads boiled as an ordinary vegetable are a great delicacy; the mature heads are boiled till tender, and the fleshy lower part of the scales eaten hot or cold, with a relish of vinegar, pepper, salt and oil.

LARGE GREEN PARIS, bearing fine large heads with broad green fleshy scales, per pkt., 1s. & 1s. 6d.

GLOBE ARTICHOKE PLANTS, strong plants supplied in April, per doz., 18s.

JERUSALEM ARTICHOKE. *Helianthus tuberosus*. French, *Topinambour*.

SILVER-SKINNED, a delicious vegetable either boiled, baked or fried; grated and used in soups it imparts a delicate flavour.....**Selected Tubers**, per 14 lb., 4s.; per 56 lb., 14s.

CHINESE or JAPANESE ARTICHOKE—*Stachys tuberifera*.

A delicious little vegetable which may be boiled, steamed, or roasted, and served dry or with melted butter; for a delicacy fry with salad oil.....**Selected Tubers**, per 100, 2s. 6d.

ASPARAGUS.

Asparagus officinalis. French, *Asperge*.

New Asparagus beds should be made in April, the roots being planted 18 inches apart; orders for Asparagus roots for planting out will therefore be booked for supply early in April. Forcing roots can be supplied from November.

For full cultural directions we recommend **The Book of Asparagus** by Hott, which also contains chapters on Celery, Salsify, Scorzoneria and Seakale, 3s. 6d., post free 3s. 10d.

ASPARAGUS.

BARR'S GREEN CANADIAN, of superior quality, productiveness, and evenness of growth, with fine pea-green shoots, tender and of delicate flavour. **AWARD OF MERIT R.H.S.**

2-year-old strong roots for planting out	...	per 100,	18s.
3-year-old	" " " "	" " "	25s.
4-year-old	" " " "	" " "	32s.

EARLY GIANT FRENCH "PARIS MARKET," the favourite Asparagus of the Paris markets, producing very fine heads and a little earlier than **CONOVER'S COLOSSAL**.

2-year-old strong roots for planting out	...	per 100,	18s.
3-year-old	" " " "	" " "	25s.
4-year-old	" " " "	" " "	32s.

CONOVER'S AMERICAN COLOSSAL, selected stock, a favourite large-headed variety.

2-year-old strong roots for planting out	...	per 100,	18s.
3-year-old	" " " "	" " "	25s.
4-year-old	" " " "	" " "	32s.
Extra strong roots for forcing....	per doz.,	5s. 6d.	" " 42s.

ASPARAGUS SEED.

Seed should be sown early in April as per directions given on seed packet.

Barr's Green Canadian	per oz.,	1s. 6d.
Barr's Mammoth	" "	1s. 6d.
Early Giant French "Paris Market"	" "	1s. 0d.
Conover's American Colossal	" "	6d.

AUBERGINE. See *Egg Plant*, page 16.

BARBE DE CAPUCIN. See *Chicory*, page 14.

BROAD BEANS.

Faba vulgaris. French, *Fève* or *Gourgane*.

Select for this crop a deep, strong, loamy soil, and deeply dig the ground early the previous autumn, ridging it roughly, and well intermixing a liberal dressing of rich and well-rotted manure. If the ground is of a light sandy nature too much manure can hardly be applied. Directions for sowing are printed on the seed packets. An occasional dusting with our "ANTI-BLIGHT" POWDER or a spraying with "KATAKILLA" will prevent Black Fly from settling on the plants.

	per pint.	quart.
BARR'S MONSTROUS LONG POD , an extra fine variety, bearing in great abundance very long straight pods, beans of delicate flavour.....	1	9...3 3
BARR'S MAMMOTH NEW GREEN LONG POD , a very superior variety, bearing an abundance of remarkably long broad pods, and of fine flavour and cooking qualities	1	8...3 0
BARR'S IMPROVED LARGE GREEN WINDSOR , a superior selection, large well-filled pods.....	1	4...2 6
BARR'S SELECTED EARLY LONG POD , early and very prolific.....	1	3...2 3

DWARF FRENCH or KIDNEY BEANS.

Phaseolus vulgaris. French, *Haricot* or *Phaséole*.

Dwarf French Beans like a deep, friable, and rich soil. Where the land is of a strong tenacious character, it should be deeply dug and ridged as early in the previous autumn as possible. On heavy soils a good dressing of leaf mould may be added with advantage. Full directions for sowing are printed on the seed packets. Transplanting induces early fertility, and may be practised with advantage even where the plants are raised in the open border.

	per pint.	quart.
BARR'S "EXCELSIOR," a remarkably fine variety bearing a great crop of very long, straight, fleshy pods, measuring 8 to 9 inches, boiling tender and of delicate flavour. For its very fine qualities it has been given an AWARD OF MERIT BY THE R.H.S. , 1924. The dry beans make a delicious winter dish, so that it should also be grown for this purpose, ht. 1 ft.	2	6...4 9

BEANS, DWARF FRENCH or KIDNEY—continued.

	per pint.	quart.
	s. d. s. d.	s. d.
BARR'S DWARF "FILLBASKET," a very fine new variety of dwarf growth and producing an enormous crop of very long, handsome, bright green pods, very delicate in flavour, a splendid forcing variety, ht. 1 ft. AWARD OF MERIT and COMMENDED FOR FORCING by THE R.H.S., 1919, 1920 and 1924.....	2 9...	5 3
BARR'S GREEN HARICOT, highly recommended for its delicate flavour; it produces rather late a remarkably heavy crop of smallish dark green smooth pods, and remains in condition a long time; those who use Haricots in winter should harvest this seed, which is of a pale sea-green colour when cooked, ht. 1 ft.....	2 6...	4 9
BARR'S "MONSTER NEGRO" MAMMOTH LONG POD, producing an abundance of handsome fleshy pods, 7 to 8 inches long, of splendid quality; a fine exhibition variety, ht. 22 in.....	2 0...	3 9
PERPETUAL, a fine variety, remarkable for its long period of bearing and its capability of withstanding a hot season; it is of compact growth with distinct dark foliage, and bears a large crop of medium-sized pods of delicate flavour from early to late in the season. AWARD OF MERIT R.H.S., 1924.....	1 9...	3 3
CANADIAN WONDER, Selected, remarkably productive, with very long handsome fleshy pods, which boil tender and have a delicate flavour, ht. 1½ ft. FIRST-CLASS CERTIFICATE R.H.S.....	1 8...	3 0

DWARF WAX or BUTTER BEANS.French "*Haricots Mangetout.*"

The pods of these beans are yellow or light yellow and are stringless. They are boiled whole, and furnish a most delicious dish. We can strongly recommend them.

IDEAL BUTTER BEAN, producing attractive smooth pale creamy yellow pods, measuring about 7 inches long, very prolific.....	2 6...	4 9
PERFECTION BUTTER BEAN, a good heavy cropper, bearing a profusion of bright yellow pods, 6½ inches long and slightly curved. AWARD OF MERIT, R.H.S., 1923.	2 9...	5 3
MONT D'OR DWARF, Improved, a favourite variety with pale creamy yellow stringless pods.....	2 3...	4 3

TALL RUNNER BEANS.Phaseolus multiflorus. French, *Haricot d'Espagne*.

In addition to their value from a culinary point of view, these tall runner beans are very ornamental as floral screens for hiding unsightly objects in the garden. For such purposes the SCARLET and WHITE RUNNERS with the EMPRESS should be used for a variety of bloom.

Full directions for sowing are printed on the seed packets.

Owing to unfavourable weather the crop of Runner Beans has again been short, and in consequence the seed is scarce this season.

½-pints supplied at pint rate.

	per pint.	quart.
	s. d. s. d.	s. d.
"BEST OF ALL" SCARLET RUNNER, Selected, bearing a heavy crop of long handsome pods, of splendid cooking qualities. A fine Exhibition Bean. AWARD OF MERIT R.H.S.....	2 6	4 9
SCARLET EMPEROR, bearing heavy clusters of very large handsome straight pods, some measuring as much as 15 inches in length. A fine Exhibition variety.....	2 6	4 9
PRIZEWINNER, a grand variety, producing a heavy crop of handsome long fleshy pods, measuring 11 to 12 inches in length, of splendid cooking qualities; one of the finest and a splendid Exhibition variety.....	2 6	4 9
BROOKLANDS GIANT, a splendid variety, producing a heavy crop of pods as long as those of SCARLET EMPEROR, but broader; of fine table qualities...	2 3...	4 3
EMPRESS, a first-class Runner of PAINTED LADY type, producing a great crop of large broad pods of splendid table qualities, early; strongly recommended.....	2 0...	3 9
THE CZAR (White Seeded), producing large broad pods, borne in clusters, flesh very thick and of extremely delicate flavour, almost stringless.....	2 3...	4 3
CHAMPION SCARLET RUNNER, an improvement on the ordinary Scarlet Runner, producing for a long time in succession a great abundance of large handsome pods	1 8...	3 0

B 2

SCARLET RUNNER, "BEST OF ALL."

EMPRESS, a first-class Runner of PAINTED LADY type, producing a great crop of large broad pods of splendid table qualities, early; strongly recommended.....

THE CZAR (White Seeded), producing large broad pods, borne in clusters, flesh very thick and of extremely delicate flavour, almost stringless.....

CHAMPION SCARLET RUNNER, an improvement on the ordinary Scarlet Runner, producing for a long time in succession a great abundance of large handsome pods

BEANS—continued.

CLIMBING FRENCH AND STRINGLESS BEANS, &c.

CULTURE SAME AS FOR TALL RUNNER BEANS.

† Indicates the best sorts to grow as Haricots to dry for winter use ; all, however, are suitable for use as green beans in summer. The stringless variety are known in France as "HARICOTS MANGETOUT."

	per pint.	quart.
	s. d. s. d.	s. d. s. d.
BARR'S "DELICATESSE," producing a good crop of very long straight stringless pods, measuring 9 inches in length, boiling very tender ; a delicious table bean, which should be boiled and served up whole. HIGHLY COMMENDED R.H.S.....	2 6...	4 9

† SOISSONS WHITE, a fine late variety, producing a good crop of long curved pods containing large white beans of the most delicate flavour ; the dried seeds are greatly prized for winter cooking on account of their thin skins.....	2 3...	4 0

BEET.

Beta vulgaris. French, *Betterave* or *Bette*.

BARR'S COVENT GARDEN BEET.

An open situation and a deep, light, well-trenched loam, which has been previously well manured and off which a crop has been taken, is the most suitable for Beet. For general crop sow in May and for succession in June and July. Full directions for sowing are printed on the seed packets. For very light soils we recommend the globe-shaped Beets.

☞ In order to preserve the colour in Beet the greatest care must be taken in lifting the roots and preparing for cooking not to bruise the skin, or in any way wound the root.

	pkt.	oz.
	s. d. s. d.	s. d. s. d.

BORECOLE or KALE.Brassica oleracea acephala. French, *Choux verts*.

Our Exhibit of Kales has been awarded the R.H.S. Silver Banksian Medal.

Sow from the first week in April on deeply forked ground, well exposed to sun and air, but not recently manured, covering the seed evenly and lightly. Thin the seedlings well to encourage a sturdy growth and when large enough plant out 2 feet apart in rows 2½ feet apart. To prevent the ravages of mice and birds, it will be found a good plan to steep the seed for about fifteen minutes in paraffin oil previous to sowing.

BARR'S DWARF GREEN MOSS-CURLED KALE.

	pkt.	oz.
	s. d.	s. d.

BARR'S NEW SPROUTING KALE, a very distinct Kale forming bushy plants with broadly - crimped light - green foliage veined white and producing a great crop of side shoots which boil very tender and form a delicious dish, ht. 15 ins. We have been given an AWARD OF MERIT for this fine Kale at the R.H.S. WISLEY TRIALS, 1925...s. &

Vegetable and Flower Seeds in Small Packets.

To meet the wishes of customers who, having only small gardens or allotments, do not require the usual quantity of seed contained in a full-size packet, we have made up smaller-size packets of certain popular Vegetable and Flower Seeds. The seeds are of the same high quality as contained in the larger-size packets offered in this catalogue. *List sent free on application.*

BORECOLE (Kale)—*continued*.**ORNAMENTAL KALES FOR WINTER DECORATION.**

BARR'S VARIEGATED CURLED KALES.

Our Exhibit of Variegated Curled Kales has been awarded the R.H.S. Silver Banksian Medal.

Sow thinly the beginning of May. When the plants are of a moderate size, transplant them into poorish soil in an open situation 2 feet apart; there let them remain until their colours are developed sufficiently, as they can then be transplanted without injury, at any period during the winter, to where required for decoration. The coarse underleaves should then be removed, and the Kale firmly planted so as to bring the heads close to the ground. In shrubberies, large mixed borders, wildernesses, and other situations where they can be planted about in groups of three, they form an important feature in the general Spring effect.

BARR'S VARIEGATED CURLED KALES. Specially Selected, of great beauty, having leaves ranging in colour from *ivory-white* to *bright rose*, *brilliant crimson*, *bronzy red*, and *purple*, *s. d.* many being exquisitely fringed and crested. In spring the sprouts are plentiful, and delicate when cooked. Our stock of this was **HIGHLY COMMENDED**, R.H.S., for winter decoration..... per pkt. 6d., 1s. & 1 6

"ALBINO" KALE, a very beautiful Kale, with more or less finely fringed leaves, which from October to March are *white*, beautifully veined and fringed green. Very striking and ornamental..... per pkt. 6d., 1s. & 1 6

BROCCOLI.

Brassica oleracea Botrytis. French, *Chou Brocoli* or *Chou-fleur d'hiver*.

Broccoli requires a deep, rich, firm, but well-drained soil which has not been recently dug; they then stand the winter better. Full directions for sowing are printed on the seed packets.

To protect from mice and birds, steep the seed for fifteen minutes in paraffin oil previous to sowing.

Division I.—For Cutting in Late Autumn and Early Winter.

Sow in succession from end of March to middle of April.

BARR'S FIRST OF ALL AUTUMN CUTTING, the earliest of all Broccolis, forming white medium-sized heads of fine quality, firm and finely grained. If sown in March a first cutting can be made in September, while successional sowings will provide fine heads up to December. Also valuable for forcing..... 1s. & 1 6...3 6

SELF-PROTECTING AUTUMN, producing in late autumn and winter, snowy white, firm and compact heads of medium size, well protected by dark green foliage...6d. & 1 0...2 3

WALCHEREN, the best variety for cutting in October and November, producing handsome snowy white firm heads, and dark green sturdy foliage. **AWARD OF MERIT R.H.S.** given to our selection at the **WISLEY TRIALS**..... 6d. & 1 0...2 0

Division II.—For Cutting during the Winter Months.

Sow from March to May.

BROCCOLI, BARR'S HARDY WINTER WHITE.

BARR'S HARDY WINTER

WHITE, this fine winter Broccoli is distinct from **SNOW'S WINTER WHITE**, coming in a little later, and producing pure white heads of finest quality, well protected by foliage. This splendid Broccoli cannot be too highly recommended for autumn and winter cutting. Sow from early April to May, but the main sowing should be made in May for the winter supply.... 1s. & 1 6...3 6

BROCCOLI—*continued.*

	pkt.	oz.

PHYTOBROMA.**Barr's Complete Plant Food.**

The best manure for Vegetables, Fruit and Flowers; in the case of culinary Peas its use has resulted in a considerable increase of crop and improvement of quality, especially of the early varieties. The ingredients are all of the highest quality, and, therefore, the most economical and effective in use. 2 lb. carton 1/3; 7 lb. 3/-; 14 lb. 5/6; 28 lb. 10/-; 56 lb. 19/-; 1 cwt. 36/-. Prepaid orders for 56 lbs. and upwards sent carriage paid. *Circular with analysis and full particulars on application*

BRUSSELS SPROUTS.

Brassica oleracea bullata var. French, *Chou de Bruxelles*.

A deep, strong, loamy soil is most suitable, but a good crop may also be obtained on light soils which have been deeply worked and manured. Full directions for sowing are printed on the seed packets.

To protect from birds and mice, steep the seed for fifteen minutes in paraffin oil previous to sowing.

CABBAGE.

Brassica oleracea. French, *Chou pomme*.

The most tender and delicately flavoured Cabbages are those grown on a firm, richly manured soil. Good crops, however, may also be obtained from ordinary garden soil by giving two or three liberal soakings of manure water when the plants are in active growth. Directions for sowing are given on the seed packets.

To protect from birds and mice, steep the seed for fifteen minutes in paraffin oil previous to sowing.

The Best Cabbages for Spring Sowing.

The following varieties should be sown from the middle of March to the middle of April, planting out in June and July and will be ready for use in August and September. A later sowing planted out in July and August will give a supply of Cabbages from October to Christmas.

CAPSICUM AND CHILI.**Capsicum annuum.** French, *Piment.*

Capsicum plants, loaded with their brilliantly coloured fruit, are very decorative in November and December. The best varieties for salads and table decoration, in mixture, per pkt. 6d. & 1s.

CARDOON.**Cynara Cardunculus.** French, *Cardon.*

After blanching, the stalks of the inner leaves are crisp and tender, and should be used like Celery in stews, soups, and salads; they also form together with the main root a delicate dish when boiled and served up with sauce. Directions for sowing are printed on the seed packet. Keep the plants well watered during dry weather, and when nearly full-grown carefully tie up the stalks, wrap round with straw and earth up like Celery. The plants raised in May and June should be earthed up in September.

SPANISH CARDOON, **Large Smooth Solid**, a fine selected varietyper pkt. 6d. & 1s.

CARROT.**Daucus Carota.** French, *Carotte.*

Carrots require a light, deep, moderately warm soil, which has been well worked and heavily manured the previous season. For succession sow from the beginning of the year to September. Full directions given on the seed packets.

- ¶ **BARR'S EARLIEST FRENCH SHORT HORN**, **Extra Selected**, a favourite little Carrot, flesh orange-red in colour and of delicate flavour; it is extremely early, and one of the best to sow in frames, and out of doors in succession from spring to autumn for young Carrots.....6d. & 1 0...1 9
- ¶ **EARLY PARISIAN FORCING**, a splendid little Carrot for early forcing with small flattish round, smooth roots, coming in after BARR'S EARLIEST FRENCH; it provides a delicious dish. AWARD OF MERIT R.H.S.....6d. & 1 0...1 6
- ¶ **EARLY FRAME**, a shapely little pointed Carrot, 2 to 3 inches long, of light colour, very early and of delicious flavour, specially recommended for early forcing in frames, to come in after EARLY PARISIAN FORCING. AWARD OF MERIT, R.H.S.....6d. & 1 0...1 6
- ¶ **EARLY NANTES**, a valuable half-long stump-rooted variety, very early and productive, smooth skin, flesh entirely red, and almost without core: good keeper..... 0 4...1 0
- ¶ **BARR'S STUMP-ROOTED SCARLET**, a fine early variety of medium size, uniform colour throughout, flesh firm, of delicate flavour, and excellent cooking qualities. In our Carrot trials of summer 1921, this variety withstood the drought better than any other..... 0 6...1 6

CAULIFLOWER.*Brassica oleracea Botrytis. French, Chou-fleur.*

In growing Cauliflowers the best results are obtained on a stiffish soil, which cannot be too rich or too highly cultivated. Prepare the ground by trenching to the depth of 2 or 3 ft. in the previous autumn, adding a heavy dressing of well-rotted manure, then ridge up for the winter.

For main and later crops sow seed in March in gentle heat, and in early April and May out of doors, using any of the varieties except the very early ones.

The very early varieties of Cauliflower marked are rapid growers and do not stand well the heat of summer; the seed of these varieties should be sown during September in an open situation and on a good soil which has been previously well forked up and watered. Sow thinly in drills 9 inches apart, and if the weather is hot shade slightly with branches until the seedlings are up. When the seedlings are large enough (November), transplant to prepared cold frames, 4 inches apart. During winter give free ventilation on fine days, but keep out cold rains, and when frost is severe lightly cover the frames. In March or April plant out finally, and if the weather is very cold protect with inverted flower-pots.

*Seed of these very early kinds may also be sown in heat in January and February for producing small heads in May and June. Sow in a temperature of 60°, and prick off the seedlings in 60-size pots, growing on close to the glass until March, then harden off and plant out early in April.

To protect from birds and mice, steep the seeds for fifteen minutes in paraffin oil previous to sowing.

***BARR'S EARLY DWARF "BEST OF ALL,"** an extra fine selected strain, very dwarf and compact, and the earliest of all to cut, coming in before Early Snowball, snow-white heads, well protected, and of delicate flavour. For forcing it is unequalled, planted 1½ ft. apart in frames or grown in pots. HIGHLY COMMENDED, R.H.S.

EARLY FAVOURITE, coming in after the earlier Cauliflowers, forming large flattish snowy white heads; a valuable variety for pickling. AWARD OF MERIT R.H.S....6d. & 1 0...2 6

BARR'S AUTUMN QUEEN, a very fine variety with large firm white heads, well protected, of excellent quality; it matures early, and if sown in March may be cut in September and October. HIGHLY COMMENDED, R.H.S.6d. & 1 0...2 6

AUTUMN MAMMOTH, a splendid variety coming into use two weeks earlier than Veitch's Autumn Giant, with large pure white heads.....6d. & 1 0...2 6

INCOMPARABLE, a grand late Cauliflower of vigorous growth, coming in some days before Veitch's Autumn Giant and producing very large firm snowy white heads. AWARD OF MERIT, R.H.S.6d. & 1 0...2 6

VEITCH'S AUTUMN GIANT, SELECTED STOCK, fine variety for late use.....6d. & 1 0...2 6

WALCHEREN, Selected, a well-known favourite variety and latest of all. It is very hardy and forms large handsome white heads; sow for succession at various times. At the Cauliflower trials at the R.H.S. Gardens, Wisley, our selection was given an AWARD OF MERIT.....6d. & 1 0...2 0

CELERY.*Apium graveolens. French, Celeri.*

The quality of Celery is largely dependent on good culture. From the time the seed germinates the plants should be kept growing steadily on with as little check as possible, in order to have stems and heart solid, crisp and sweet. Full directions for sowing are printed on the seed packet.

☞ The seed we offer has been saved from selected plants only, and will certainly give good results.

BARR'S NEW SOLID PINK, the best of all Celeries, producing thick, solid stems, with a rich nutty flavour; seeds saved from plants selected as stubborn seeders, the best guarantee that can be offered for a high-class Celery. Height, 26-28 in. AWARD OF MERIT R.H.S. AT WISLEY TRIALS.....1s. & 1 6

BARR'S CHAMPION SOLID WHITE, producing thick, white stems, very solid and sweet, remaining longer in condition than other white varieties. Height, 20-22 in. AWARD OF MERIT R.H.S.1s. & 1 6

WHITE PLUME, an early variety producing thick silvery white stalks, of fine delicate flavour, foliage variegated white. Height, 20 in. AWARD OF MERIT, R.H.S.6d. & 1 0

CELERY—*continued*.

Untreated Celery Seed , clean untreated seed suitable for flavouring soups or for use in the treatment of Rheumatism. (<i>Recipe on application</i>).....		
	per oz. pkt. 6d.; 4 oz. pkt. 1s. 6d.	

CELERIAC.

The following is a great improvement on the old Turnip-rooted Celery. It is a most delicious autumn and winter vegetable not as yet sufficiently known. The roots should be sliced, boiled and served up with white sauce. Full directions for sowing are given on each packet. After the seedlings are planted out the ground must be kept free from weeds and frequent waterings be given during dry weather; should any but the central leaves appear, cut them off, as this benefits the root.

SNOWBALL , producing smooth round roots of fine flavour, good compact habit. AWARD OF MERIT R.H.S. AT WISLEY TRIALS	per pkt. 1s. &	1 6
BARR'S LATE SUMMER , forming globular roots of fine flavour. The foliage which is variegated yellow and green is very decorative.....	per pkt. 6d. &	1 0
GIANT SMOOTH PRAGUE , a fine variety with large rounded smooth roots, forming a delicate dish when boiled.....	per pkt. 6d. &	1 0

CHERVIL, for Salads and Soups, etc.

Anthriscus Cerefolium. French, *Cerfeuil*.

In growing Chervil the ground should be deeply dug, well pulverised, and richly manured. For summer crops select a cool moist situation, for winter crops a dry and sheltered position. The young leaves impart a warm aromatic flavour to soups and stews, also in demand for the piquancy they give to mixed salads. Directions for sowing are printed on the seed packet.

CURLED CHERVIL	per pkt. 6d. &	1 0
-----------------------------	----------------	-----

CHICORY.

Cichorium Intybus. French, *Chicorée sauvage* or *Barbe-de-Capucin*.

CHICORY (Barbe-de-Capucin) . One of the most wholesome and agreeable of winter salads. Full directions for sowing are printed on the seed packet.....	per pkt. 6d. &	1 0
--	----------------	-----

For Large Tuberous-rooted Chicory, see Witloof, page 31.

CHOU DE BURGHLEY.

CHOU DE BURGHLEY , an interesting cross between a Broccoli and a Cabbage. It first forms a Cabbage resembling the <i>Sugar-loaf</i> , and afterwards develops a small Broccoli head; of very delicate flavour either used as a Cabbage or a Broccoli. For autumn supply sow seed under glass in March, and plant out the seedlings into richly manured ground, setting the plants 1½ ft. apart. For an early spring supply sow out of doors in May and transplant the seedlings as soon as large enough. Some of the seedlings may revert to their Cabbage parent.....	per pkt. 6d. &	1 0
---	----------------	-----

CHOU DE RUSSIE, or Russian Kale.

CHOU DE RUSSIE , a most delicious vegetable, resembling in form a Cabbage, but having curious deeply-cut glaucous foliage; in November it forms a dense head, from which are produced in early spring a profusion of sprouts, which boil very tender, and are of more delicate flavour than Kales. Extremely hardy. FIRST-CLASS CERTIFICATE R.H.S. Culture same as for <i>Borecole</i>	per pkt. 6d. &	1 0
---	----------------	-----

CHIVES. See Herb Plants, page 17.

CORN SALAD, or LAMB'S Lettuces.

Valerianella olitoria. French, *Mâche*.

A valuable rapid-growing salad plant for autumn, winter, and early spring use. On the Continent it is largely used in winter instead of lettuce. The leaves are picked and mixed with other salading plants, or served up alone. Boiled like Spinach, Corn Salad forms a most agreeable dish. Full cultural directions are given on the seed packet.

	pkt.	oz.
BARR'S EXTRA HARDY GREEN , forming a compact rosette of very dark green thick fleshy leaves, lasting long in condition.....	0 6	1 6
DARK GREEN CABBAGING , compact rosettes of short roundish dark green smooth leaves of great substance; specially recommended for salads.....	0 6	1 6
PARIS MARKET , a fine early productive variety, prized by French market gardeners...	0 6	1 6
ITALIAN CORN SALAD , a variety largely used in the south of Europe as it does not readily run to seed. Valuable for frame work during winter.....	0 6	1 6

COUVE TRONCHUDA.

The Braganza, Portugal, or Sea-Kale Cabbage.

We can very strongly recommend this delicious winter vegetable, which is not nearly well enough known. It forms a head and leaves with thick fleshy midribs which are boiled and served up like Sea-Kale. The lower leaves may be picked from late autumn. Full directions for sowing are printed on the seed packet.....

per pkt. 6d.; per oz. 1s. 3d.

CRESS.**Lepidium sativum.** French, *Cresson*.

Full directions for sowing are printed on the seed packet.

PLAIN-LEAVED CRESS, selected seed, a supply of this useful salad may be had all the year round by sowing at intervals of a few days, in or out of doors...per oz. 4d.; per pint, 2s.; per quart, 3s. 6d.**EXTRA TRIPLE-CURLED CRESS, selected seed,** beautifully curled like parsley, flavour very agreeable; always acceptable on the breakfast table...per oz. 5d.; per pint, 2s. 3d.; per quart, 4s.**AUSTRALIAN SALAD, or Broad-leaved Golden Cress,** leaves delicately tender, with an agreeable piquant flavour.....per oz. 6d.**WINTER, or American Cress,** resembles water-cress, and is quite as palatable. By sowing in July and August a constant supply may be had throughout the winter and spring months...per oz. 6d.**WATER-CRESS, Improved Broad-leaved,** a favourite in the Paris markets, being more tender than the common water-cress. Sow in prepared places in sluggish brooks and moist situations. Excellent water-cress can be grown on borders or in pans if kept constantly moist...per pkt. 6d. & 1s.**FRAME CUCUMBER.****Cucumis sativus.** French, *Concombre*.

Full directions for sowing are printed on the seed packet. As to after management, when the pots are full of roots carefully transfer the plants to their fruiting beds, which should have a bottom heat of 60° to 75°, and be made up of a rich light soil, or by preference the following compost: Two parts turfy loam, one part well-decayed leaf soil, and one part thoroughly rotted manure, a little sharp sand being added to keep the compost open and allow water to freely percolate through; four inches of well-decayed leaves at the base of the bed will conserve moisture and retain heat. A good brisk heat should be maintained until the plants are well established.

CUCUMBER.**PRIDE OF THE MARKET.**

Dust the leaves occasionally with Anti-Blight Powder (see page 102) to avoid mildew and other diseases to which Cucumbers are subject.

The following varieties we offer as a selection of the very best Cucumbers in cultivation, and we are confident they will all give our customers every satisfaction.

BARR'S "PRIDE OF THE MARKET," a specially fine variety, producing dark green handsome fruit of remarkably fine quality. A customer writes of it: "*I grew three plants of your PRIDE OF THE MARKET Cucumber in a frame and cut over 100 Cucumbers from them during the season.*" AWARD OF MERIT R.H.S.per pkt. of 10 seeds 1s. 6d.; per pkt. of 20 seeds 2 6

¶ **BLAIR'S PROLIFIC,** a very fine variety with dark green fruit a little thicker than ROLLISON'S TELEGRAPH, but without ridges and having a very short neck. AWARD OF MERIT R.H.S., 1923.....per pkt. of 10 seeds 1s. 6d.; per pkt. of 20 seeds 2 6

¶ **ROLLISON'S TELEGRAPH, Barr's Extra Improved,** a fine selection from ROLLISON'S TELEGRAPH, having handsome straight dark green fruit, 18 to 20 in. long, with a few white spines and slightly ridged; early maturing and of fine flavour. AWARD OF MERIT R.H.S.....per pkt. of 10 seeds 1s. 6d.; per pkt. of 20 seeds 2 6

¶ **ROCHFORD'S COVENT GARDEN,** a very handsome long variety remaining in good condition a long time after being cut. AWARD OF MERIT R.H.S.per pkt. of 10 seeds 1s.; per pkt. of 18 seeds 1s. 6d.; per pkt. of 30 seeds 2 6

RIDGE OR HARDY CUCUMBER.

Sow early in April or May, according to instructions given on seed packet. When planting out a situation should be selected facing south, and protected from cold winds.

PERFECTION RIDGE, the finest of all Ridge Cucumbers, the result of a cross between a Frame and a Ridge variety, bearing longer fruit than Barr's Excelsior, and of fine delicate flavour.....1s. & 1 6

BARR'S EXCELSIOR RIDGE, fruit of good form, rich colour and smooth, measuring from 12 to 16 in. long; of fine flavour, an abundant cropper6d. & 1 0

FRENCH GREEN PICKLING or GHERKIN, fruit of a fine green, hardy and prolific, succeeding well in the open.....6d. & 1 0

DANDELION, a very wholesome Salad.**Leontodon Taraxacum.** French, *Dent-de-lion*.

The blanched leaves of the Dandelion make a most delicately flavoured and wholesome salad.

Sow the seed in March or April, according to instructions given on seed packet. The plants commence to yield in autumn, and the leaves can easily be blanched by placing a sufficiently large inverted flower-pot over each plant. In the following spring the most abundant yield is obtained.

IMPROVED THICK-LEAVED, forming a large rosette of thick broad leaves, the best variety for blanching.....per pkt. 6d. & 1 0

EGG-PLANT.

Solanum Melogena. French, *Aubergine*.

A delicious vegetable when properly prepared. The flesh should be taken out of the skin and minced up with a little mushroom, tomato, bread crumbs and parsley (for those who like it, a pinch of garlic). Then add a little butter, replace in the skin and put in the oven. Another method of preparing is to slice up the fruit and fry it with a little oil. Besides its use as a vegetable it is a very ornamental plant when in fruit.

Sow end of January or beginning of February, following the directions given on seed packet.

- BARR'S "EXPRESS" EARLY PURPLE**, producing deep purple oval fruit and cropping *s. d.* earlier than other sortsper pkt. 6d. & 1 0
- BARR'S EXTRA EARLY LONG PURPLE**, one of the most suitable for our climate, being early and having medium-long handsome fruit of a shining blackish purple...per pkt. 6d. & 1 0

ENDIVE.

Cichorium Endivia. French, *Chicoree Endive*.

For the summer crops well dig the soil and give a very liberal dressing of rich and thoroughly decayed manure. For crops intended to stand the winter a light, dry, and rather poor soil is required and the most sheltered situation at command.

Full directions for sowing will be found on the seed packets. When the plants are large enough, tie up the leaves to blanch, as in the case of Cos Lettuces. The best way of blanching the winter Endive is by covering the plants with hay. They must be protected from severe frost by covering with lights or litter, or by carefully lifting and transferring to frames.

¶ Indicates those varieties which are most suitable to grow in frames or cloches on the French system of intensive culture.

- BARR'S PERFECTION SILVER MOSS CURLED**, a very superior variety for summer and autumn use, heads close, compact and tender, leaves light green, elegantly curled and crisped, quality exceptionally fine6d. & 1 0...1 9
- ¶ **EARLY PARISIAN SUMMER**, a valuable variety for forcing or for summer and early autumn culture, forming dense rosettes of finely curled rich green leaves. AWARD OF MERIT R.H.S., 1925.....6d. & 1 0...1 9
- QUEEN OF THE WINTER**, a fine variety strongly recommended for winter use, producing broad bright green lobed leaves, very hardy. HIGHLY COMMENDED R.H.S., 1925.....6d. & 1 0...1 9

INDIAN CORN, see Maize, page 19.

KALE, see Borecole, page 7.

KOHL-RABI. Knol Kohl, or Turnip-rooted Cabbage.

Brassica Caulo-rapa. French, *Chou-rave*.

BARR'S EARLY WHITE, a valuable vegetable, which will thrive in hot dry seasons and on light soils where the turnip is a failure; it forms solid pale green bulbs which should be cooked when young (about two months after being planted out), and have a delicate and most agreeable flavour, between that of a Turnip and Cabbage. For succession sow from March to May according to directions given on seed packet. After planting out the seedlings keep the ground well hoed, and give an occasional soaking of manure water. The late crops can be protected from frost by banking up the soil over the bulbs.....per pkt. 6d. ; per oz. 1s. 3d.

BARR'S EARLY PURPLE, differs from above in having a purple-coloured bulb and dark leaf stalks, and is just a little later; the flesh is white and of delicate flavour.....per pkt. 6d. ; per oz. 1s. 3d.

LAMB'S LETTUCE. See Corn Salad.

LEEK. Allium Porrum. French, *Poireau*.

For an early crop sow thinly end of February on a gentle hot-bed. Get the plants well hardened off by the end of April, and carefully transplant early in May. For later crops sow out-doors in drills in April and May, thin out seedlings, keep well watered and plant out in August.

BARR'S Selected PRIZETAKER , an extra fine selection of the <i>Lyon Leek</i> , attaining a great size with handsome broad foliage and very thick solid stems, of fine quality, perfectly hardy, valuable for early lifting.....	1s. &	1	6...	3	6

BARR'S GIANT WINTER , a handsome variety, with very broad dark green leaves and good firm stems, very hardy.....	6d. &	1	0...	2	6

MUSSELBURGH, Selected , a fine stock of this hardy leek with fine long stems.....	6d. &	1	0...	1	9

LETTUCE.

TO HAVE SUMMER LETTUCE OF REALLY FINE QUALITY, the ground should be well trenched and heavily manured, and during dry weather the plants should be freely watered.

To meet a possible shortage of Cos Lettuce in winter, a sowing may be made in gentle heat, the seedlings being pricked out into boxes and grown close to the glass.

The varieties marked ¶ are the most suitable for Frame Culture.

Full directions for sowing Summer and Winter Lettuces are printed on the seed packets.

COS LETTUCE, BARR'S COVENT GARDEN SUMMER WHITE.

Cos Lettuce.

Lactuca sativa. French, *Laitue romaine*.

Barr's Selections of Lettuces.

6 packets of best Cos and Cabbage Lettuces, 2s. 9d.

BARR'S PARAGON CABBAGE LETTUCE.

MAIZE (Indian or Sweet Corn).*Zea Mays. French, Mais sucre.*

Indian Corn, when properly cooked, forms a most delicate dish. Sow the seed in April and May, following the cultural directions given on each packet. The plants require a fairly rich soil and *abundance of water* when the weather is dry. The "cobs" or heads should be gathered *just when passing out of the milky state*, and should be steamed for fifteen minutes. This gives much better results than when the cobs are boiled. In the U.S.A. many people steam Maize with their potatoes, putting the former at the top. We indicate the relative periods of ripening by the numbers (1), (2) and (3). pkt. oz.

EXTRA EARLY PREMO , (1) one of the earliest Sugar Corns and very suitable for the English climate, cobs very tender and sweet, ht. 4—5 ft.....	s. d. s. d.	0 6...1 0
BLACK MEXICAN , (3) a fine variety, bluish purple seeds of delicious sweet flavour; the cobs should be gathered as seeds are just colouring, good cropper, ht. 6—7 ft.	0 6...1 0

WHITE EVERGREEN , (3) splendid main crop variety, producing large cobs of pure white seeds of delicious sweet flavour, ht. 5—6 ft.....	0 6...1 0	

MELON.*Cucumis Melo. French, Melon.*

For early crops sow the beginning of January and again about the middle of the month, after that sow at intervals of three weeks or a month, until the end of June. Cultural directions are given on the seed packet. *For further treatment we would refer amateurs to any good gardening book. Occasionally dust the leaves with Anti-Blight Powder (see page 102), and thus avoid mildew, etc.*

BARR'S GOLDEN BEAUTY MELON. (Received Award of Merit R.H.S.)

The following Melons are all of the highest class, and we can confidently recommend them :

BARR'S "GOLDEN BEAUTY" Improved, a remarkably fine early Melon which, in the R.H.S. trials at Wisley, Surrey, was thought very highly of and given by the Society an AWARD OF MERIT. It has a robust constitution and is a free setter, bearing handsome rounded oval fruits weighing about 6 lbs. The skin is bright golden, beautifully netted, the flesh very deep of a <i>rich salmon</i> colour and delicious flavour.....	pkt. s. d.	2 6
KING GEORGE , a very fine variety with handsomely netted buff-yellow skin and thick luscious scarlet flesh. It does not require as much heat as many other melons.....	1s. 6d. & 2 6	
EASTNOR CASTLE , a splendid Melon of medium size, with dark green finely netted fruit, with <i>deep green flesh</i> of exquisite flavour. At the R.H.S. trial of Melons at Wisley, our strain of this variety was given an AWARD OF MERIT.....	1s. & 1 6	
SUPERLATIVE , a very fine variety bearing beautifully netted medium-sized fruit, with thick richly-flavoured flesh, <i>scarlet</i> shading to green near the skin.....	1s. & 1 6	
HERO OF LOCKINGE , bearing round fruit weighing 5 to 6 lbs., with bright yellow skin netted white, <i>flesh thick and white</i> , of exquisite flavour. FIRST-CLASS CERTIFICATE R.H.S....	1s. & 1 6	
MONRO'S LITTLE HEATH , a handsome little Melon with thick <i>scarlet flesh</i> of rich flavour, very early and productive, and recommended for growing in cold frames.....	6d. & 1 0	
HARDY GREEN FLESH CLIMBING MELON , producing in succession a large number of sweet and juicy fruits about the size of an ostrich egg. Sow seed at the end of April in gentle heat, and treat as per directions given on seed packet.....	6d. & 1 0	

MUSHROOM SPAWN.

For a good practical work on the culture of Mushrooms we recommend "MUSHROOM CULTURE," by W. J. May, 1s. 6d.; post free, 1s. 9d. Directions for the culture of Mushrooms are also given in "KITCHEN GARDEN AND ALLOTMENT," by T. W. Sanders, 1s. 6d.; post free, 1s. 9d.

Fresh Mushroom Spawn of superior quality.....per bushel (16 bricks), 9s.; 8 bricks for 4s. 9d.; 4 bricks for 2s. 9d.; per brick 9d.

MUSTARD.

Sinapis. French, *Moutarde*.

To maintain a regular supply, sow at intervals of a few days from late spring to early autumn, the summer sowings being made on a shady border; during cold weather sow in shallow boxes or pans indoors. Further cultural directions given on seed packet.

FINEST WHITE MUSTARD, the best variety for salads, per oz., 4d.; per pint, 2s.; per quart, 3s. 6d.

MUSTARD, AGRICULTURAL, useful for sheep food and valuable for ploughing or digging in as a green manure; sow 30 lbs. per acre broadcast.....per lb. 1s. 6d.

ONION.

Allium Ceba. French, *Ognon*.

ONION, "FROXFIELD."

CULTURE.—Onions like an open situation and a rich, deep well-drained soil (not too heavy). The ground whereon seed is to be sown in spring, or where autumn-sown onions are to be transplanted, should be prepared the previous autumn, being deeply forked and levelled, and a liberal supply of well-rotted stable manure worked in. In a light soil cow manure is preferable.

Full directions for sowing will be found on the seed packets. After the seedlings are thinned out the soil should be kept firm by treading, and *during showery weather* in summer an occasional watering of liquid manure should be given.

In transplanting August-sown onions in February or March, set the plants 15 inches apart, only planting the fibrous roots, leaving the bulb exposed above the ground. Mulch the bed if possible with old spent manure and during dry weather keep it well watered.

If onions are required for pulling while young in spring, simply leave them in the drill and keep the soil well trodden down.

* Indicates those sorts which should be sown in spring only.

† Indicates those which should be sown only in autumn. Varieties not marked may be sown either in spring or autumn.

Flat and Semi-flat Onions.

	pkt.	oz.
	s. d.	s. d.
FROXFIELD , a grand new Onion (introduced by us) which in the trials made by the ROYAL HORTICULTURAL SOCIETY at Wisley, was unanimously voted an AWARD OF MERIT for its excellent qualities. The bulbs are large, and run from semi-flat to round, measuring 12 $\frac{3}{4}$ to 13 $\frac{3}{4}$ inches circumference, with a golden-brown skin and a firm flesh of mild delicate flavour. A grand Exhibition Onion and a splendid keeper.....	1s. 6d. & 2	6... —

* ROUSHAM PARK HERO , Barr's Extra Selected Stock, a fine Exhibition Onion, mild in flavour, large and heavy, semi-flat, skin pale brown, very handsome. Received an AWARD OF MERIT at the R.H.S. ONION TRIALS, WISLEY.....	1s. & 1	6...3 6

ONION SETS. See page 31.

POTATO ONIONS. See page 31.

PARSLEY.

Carum Petroselinum. French, *Persil.*

For Parsley select a piece of deeply dug, well-manured ground, and let it be exposed to the action of the weather for as long as possible before sowing. Sow seed from February to August, according to cultural directions given on each packet. A good supply of Parsley may be had throughout winter by sowing in August, and protecting with a hand-light.

	pkt.	oz.

MYATT'S EXTRA FINE GARNISHING , a very fine large-growing variety, beautifully curled fronds.....	0 3...0 8	

PARSNIP.

Pastinaca sativa. French, *Panais.*

Parsnips succeed best in a deep free rich soil, which has been thoroughly trenched and heavily manured for a previous crop such as celery. The application of fresh stable manure to Parsnips results in forked and badly formed roots.

For general crops and to obtain large roots, sow seeds from the middle of February. Very tender (not over-large) roots can be obtained by sowing in May and June. In the R.H.S. trials of Parsnips at Wisley our strains were *Highly Commended*.

	pkt.	oz.
BARR'S NEW WHITE MARROW , a splendid variety, with handsome smooth thick roots, the most delicately flavoured of all. HIGHLY COMMENDED IN R.H.S. TRIALS.	s. d. s. d. 0 6...1 3

THE STUDENT , a fine-flavoured variety of medium size	0 4...0 9	

PEAS. BEST GARDEN VARIETIES.

Pisum sativum. French, *Pois.*

PEA, LITTLE MARVEL.

turnes in January, and planted out on a sheltered border, the middle of March.

FOR MAIN CROPS, sow out-of-doors, in an open situation, from middle of March to middle of June, by preference on well manured, deep loamy soil which has been previously well dug or trenched. Sow the seed in drills 2 inches deep. Where other crops are not grown between the rows, the proper distance from row to row to ensure a full and heavy crop must be gauged by the height the Pea attains when fully developed. Thus, Peas growing 2 ft. high should be given a space of 2½ ft. from row to row; Peas growing 3 ft. high, allow 3 to 4 ft. between rows, and so on. We mention this as Peas, especially the taller kinds, are often weakened in consequence of the rows being too close together. The general heights of the Peas offered are given in the descriptions of each variety.

In the case of the taller-growing sorts, early crops of Spinach, Lettuce, etc., may be safely grown between the rows and gathered before the Peas have grown tall enough to injure them.

FOR VERY EARLY CROPS, sow any of the varieties in the FIRST EARLY SECTION from November to February on a warm sheltered border, where the soil is fairly dry, in drills 2 inches deep, the rows being a sufficient distance apart to suit the height of the plant; on very heavy land the seed should be covered with old potting soil. The seed should be sown fairly thick for these early crops, in order to allow for rot or destruction by pests below or above ground. As soon as the seedlings appear, protect them by drawing up a little soil on each side of the rows and dust with soot or place pea guards over them. When a few inches high, short brushwood should be given to support them in their young state. Early sowings may also be made in pots or grass

PEAS—*continued.*

To PROTECT FROM BIRDS AND MICE, steep the seed for about fifteen minutes in paraffin oil previous to sowing. To PREVENT MILDEW ON PEAS, dust the foliage with *Anti-Blight Powder* (see page 102).

The varieties we offer in the following list are a selection of the best Peas in cultivation.

Section I.—FIRST-EARLY MARROWFAT and ROUND PEAS.

If the seed is sown in March or April the crop is ready for gathering from *June* to *July*. Sowings should also be made in May and June, or later for a successional crop. See our cultural notes (page 22) as to sowing for early and speculative crops.

The Round Peas are marked with an * ; those not marked are Marrowfats.

Half-pints supplied at the pint rate.

	per pint. s. d.	per quart. s. d.

POTATOES.

Solanum tuberosum. French, *Pomme de terre.*

Specially Hand-picked for Seed.

✂ A better crop of Potatoes is obtained if the tubers are "sprouted" before planting. They should be ordered early and as soon as received put into shallow trays (the thicker end uppermost), and placed in a cool place fully exposed to the light but protected from frost.

In the following list we offer a selection of Potatoes which we consider to be among the best in commerce, their merit having been proved by exhaustive trials.

POTATO IRISH ELEGANCE.

TO PREVENT DISEASE USE ANTI-BLIGHT POWDER, or BORDORITE (see page 102) on the foliage of the Potato, commencing when the plants are about 6 in. high, and repeating the application once or twice during growth; the result will be a heavier crop, of improved quality, and free from disease.

* It should be borne in mind that best results with Potatoes are obtained on a light soil. Where, however, the soil is heavy we recommend only the varieties marked * to be used.

† The Potatoes which the Ministry of Agriculture have proved to be immune to wart disease are indicated by †.

Section I.—The Best Early Potatoes.**Specially Hand-picked for Seed.**

PUMPKIN OR GOURD.

These are greatly prized if cooked when young; and when ripe the pulp is delicious in giving a body to vegetable **Soups**, or for making "**Pumpkin Pies**," associated with apples. These and ripe Vegetable Marrows make excellent preserves. Pumpkins cannot be relied upon to reproduce themselves entirely true from seed, but a fair proportion will come like the parent. We offer a selection of the best varieties.

Sow the seed first week in May singly in 3-inch pots in light soil and place in gentle heat. Grow on without a check and when large enough transfer to 6-inch pots and grow on close to glass; when established harden off and plant out end of May in a sunny open situation.

HUNDREDWEIGHT GOURD, may be grown to an enormous size; the fruit is round, flattened at the ends, of a salmon-yellow shade with well-marked ribs; flesh yellow, sweet and of good flavour, a first-rate keeper.

LARGE RED ETAMPES, a distinct handsome Pumpkin with flat-round fruit of medium size, bright orange-red with well-marked ribs; flesh orange-yellow, sweet and of fine quality.

A favourite with the Paris market gardeners.

MAMMOTH YELLOW GLOBE PUMPKIN, round, pale yellow fruit, sometimes slightly netted, and of great size; flesh yellow, of delicate flavour, splendid keeper.

MIXED from many sorts 4d. & 0 6

(For **Ornamental Gourds**, see page 65. For **Vegetable Marrows**, see page 31.)

PURSLANE.

Portulaca oleracea. French, *Pourprier*.

GREEN PURSLANE, a dwarf annual plant with succulent leaves and stems, which, when cooked like Spinach, form a most delicate dish. It is also used raw in salads. For summer and autumn supply, sow seed from middle of May to August, and for winter and spring from December to March per pkt. 6d., per oz. 1s.

RADISH.

Raphanus sativus. French, *Radis*.

To have Radishes tender and crisp, a rapid growth is necessary.

Full directions for sowing are printed on the seed packet.

A continual supply of Radishes may be maintained from spring to autumn by frequent sowings in a cold frame on a bed of good light soil, the Radishes being pulled when quite young.

¶ Indicates those varieties which are most suitable to grow in frames.

The Winter Radishes are sown at the end of July or early in August, the roots being lifted from November to December, stored in sand or dry soil away from the frost, and used as required.

☞ Half ounces supplied where a small quantity only is required.

Olive or Oval-shaped Radishes.

Excellent for forcing and general crop; they should be eaten when about the size of filberts.

¶ **BARR'S "FIRST OF ALL" Scarlet**. Award of Merit R.H.S. { Very fine early little Radishes, } 0 9

RHUBARB SEED saved from the following varieties: Daw's Champion, Goliath, Hawke's Champagne, Monarch, Paragon, Royal Albert, Victoria, etc., IN MIXTURE.

per pkt., 6d. ; per oz. 1s. 6d.

SALSAFY, the Vegetable Oyster.

Tragopogon porrifolius. French, *Salsifis.*

To secure large, clean and well-formed roots, a deep, rich, well-pulverised soil is necessary, which has been heavily manured for a previous crop. Sow seed at the end of April, according to cultural directions given on each packet. Late in November lift the roots and store them in sand or ashes, or pit them and cover with soil till wanted for use, as with Carrots. When boiled or stewed like Parsnips the roots are delicious served up with white sauce ; they must not be scraped or bruised before cooking.

BARR'S MAMMOTH SALSAFY, the finest variety of this delicious vegetable.....pkt. 6d. ; oz. 1s. 6d.

SAVOY. See CABBAGE SAVOY, page 11.**SCORZONERA.**

Scorzonera hispanica. French, *Scorsonère.*

The Scorzonera is a most agreeable and wholesome vegetable when boiled tender, and served up like Asparagus. The roots before cooking must not be scraped or bruised.

In November, take up the roots and store them in sand, or pit them and cover with soil till required for use, as with Carrots. Full directions for sowing are given on the seed packets.

SCORZONERA, PARIS BLACK.....per pkt., 6d. ; per oz. 1s. 3d.

SEA KALE.

SEA KALE.*Crambe maritima.* French, *Crambé.*

To grow Sea Kale to the highest perfection the ground must be richly manured and deeply trenched. If the soil is of a strong tenacious character, a dressing of 2 or 3 inches of sharp sand or finely sifted well-weathered ashes should be well dug in.

Sea Kale Roots of the best forcing strain as grown for Covent Garden Market.

SEA KALE, Monster Roots for Forcing, very fine, per doz., 6s.; per 100, 45s.

„ „ **Extra Strong Roots for Forcing**, per doz., 5s.; per 100, 36s.

„ „ **Strong Roots for Forcing**, per doz., 4s.; per 100, 30s.

„ „ **Good Roots for Planting**, per doz., 3s.; per 100, 22s. 6d.

SEA KALE SEED, per pkt., 6d.; per oz., 1s. 9d.

SEA KALE BEET.

SEA KALE BEET, produces large light green leaves with very broad white midrib; a most delicate dish during summer and autumn, boiled and served up like Sea Kale.....per pkt. 4d.; per oz. 1s.

SHALLOTS. For **Shallot Bulbs**, See page 31.

SORREL.

Sow seed at the beginning of April according to directions given on seed packet. About two months after sowing, the strongest leaves may be gathered for use.

In September thin out still further, so that the plants stand eighteen inches apart. The following spring pinch out the flower heads as soon as they appear, otherwise the development of the leaves will be checked. Only gather these when fully grown, leaving the smaller ones for future cuttings.

FRENCH BROAD-LEAVED, a valuable salad plant, which is also extensively used on the Continent, cooked like Spinach.....

	pkt.	oz.
	s. d.	s. d.
	0 6	1 3

SPINACH.*Spinacia oleracea.* French, *Epinard.*

A rich deep soil and frequent waterings during dry weather are necessary for the production of good summer Spinach. In gathering for use, the largest leaves only should be taken, leaving the others to complete their development.

For the winter crop select a fairly rich soil, not too heavy and thoroughly well drained, and an open situation. Full directions for sowing are printed on the seed packet.

Spinach seed, if soaked in water for 12 hours previous to sowing, will germinate more rapidly. oz.

BARR'S DWARF THICK-LEAVED ROUND, superior dwarf variety with thick succulent leaves, and not readily running to seed; for summer and autumn sowing.....per pint 4s. 0 8

BARR'S GIANT WINTER PRICKLY, a fine large thick-leaved Spinach, valuable for autumn sowing, especially on cold soils.....per pint 3s. 6d. 0 8

TRIUMPH, Barr's Improved, a fine variety for spring and summer sowing, producing thick and succulent round crimped leaves of a very dark green colour. **FIRST-CLASS CERTIFICATE R.H.S.**.....per pint 3s. 6d. 0 8

NEW ZEALAND, produces fine succulent leaves in great abundance throughout the summer, even in the hottest weather. *For special culture, see seed packet*.....per pkt. 4d. 0 9

SPINACH BEET or PERPETUAL SPINACH, producing a constant supply of green leaves which may be cut and used as Spinach during summer, autumn, and winter.....per pkt. 4d. 0 9

SWEDES, GARDEN, see page 30.

PHYTOBROMA.**Barr's Complete Plant Food.**

The best manure for Vegetables, Fruit and Flowers; in the case of culinary Peas its use has resulted in a considerable increase of crop and improvement of quality, especially of the early varieties. The ingredients are all of the highest quality, and, therefore, the most economical and effective in use, 2 lb. carton 1/3; 7 lb. 3/-; 14 lb. 5/6; 28 lb. 10/-; 56 lb. 19/-; 1 cwt. 36/-. Prepaid orders for 56 lbs. and upwards sent carriage paid. *Circular with analysis and full particulars on application.*

TOMATO.

Lycopersicum esculentum. French, *Tomate*.

pkt.
s. d.

For general crop Tomatoes may be grown in any ordinary greenhouse or glass structure. Full directions for sowing and after-treatment are printed on the seed packet. The earlier sorts, especially those marked *, may be grown out of doors successfully if the season is favourable.

To PREVENT DISEASE dust the plants occasionally during their early growth with *Anti-Blight Powder*, see page 102.

TOMATO, BARR'S SCARLET BEAUTY.

*[BARR'S "SCARLET BEAUTY," a first-class new variety well deserving of its name, as when in full fruit it presents a beautiful sight. It is an ideal Tomato for the amateur grower. The fruit is of a rich deep scarlet, smooth and glossy, measuring about 7 inches round, with a deep flesh almost without core. Each plant produces a wonderful crop of heavy trusses, the produce from some plants being as much as from 15 to 18 lbs. of fruit. It is a wonderful bearer as a pot plant, but the finest results are obtained from this Tomato when planted out in borders under glass. It is also an excellent variety for growing outdoors, and a fine winter cropper. Our exhibit of "Scarlet Beauty" at the Royal Horticultural Society's Show, Sept. 10th, 1918, was awarded a SILVER-GILT BANKSIAN MEDAL.....	1s. 1s. 6d. &	2 6
*[BARR'S LIGHTNING, a valuable early variety, producing clusters of about 8 smooth scarlet fruits with deep flesh of delicious flavour, all ripening together. HIGHLY COMMENDED R.H.S.....	6d. &	1 0
*[BARR'S EARLY MARKET, a very prolific early bearer, producing trusses averaging 8 medium-sized flat-round fruit, brilliant red and very smooth. An excellent variety for indoors or outdoors.....	6d. &	1 0
AILSA CRAIG, producing long clusters of fine smooth medium-sized fruit, deep fleshed and of good rich colour.....	6d. &	1 0
BIDE'S RECRUIT, a popular variety producing a heavy crop of medium-sized bright scarlet fruit, smooth, solid and of good flavour. Good for outdoors in favourable seasons.....	6d. &	1 0
GOLDEN NUGGET, an improvement on "GREENGAGE," bearing fine trusses of deep golden fruit of medium size, flesh deep and solid, sweet and of delicious flavour. AWARD OF MERIT R.H.S.....	6d. &	1 0
GOLDEN SUNRISE, a heavy cropper, trusses averaging 8 medium-sized flat-round golden-yellow fruit, smooth-skinned, of delicious flavour. HIGHLY COMMENDED R.H.S.....	1s. &	1 6
HOLMES' SUPREME, a fine early free-bearing variety, averaging 10 fruits to a cluster; of medium size, round, smooth, and of good flavour. AWARD OF MERIT R.H.S.....	6d. &	1 0
KONDINE RED, Improved, a splendid market variety and a marvellous cropper; it produces evenly up the stem large bunches of rich scarlet fruit, thick-fleshed and of medium size. AWARD OF MERIT R.H.S.....	6d. &	1 0
*MARKET KING, a first-class variety producing a very heavy crop (8 to 10 on a truss) of round, smooth, scarlet fruit of medium size, solid and of fine quality; very vigorous grower and a good lasting variety for outdoor culture.....	6d. &	1 0
PEACH, a very striking variety, the fruit instead of being shiny having a peach-like bloom; a good bearer and of fine distinct flavour.....	6d. &	1 0
*[SUNRISE, a fine early robust-growing variety, valuable either for indoor or outdoor culture, bearing a heavy crop of smooth, round fruit of a fiery brilliant scarlet, with deep solid flesh of excellent flavour. FIRST-CLASS CERTIFICATE R.H.S.....	6d. &	1 0
NEW GARLAND, a very decorative variety, bearing racemes, 3 ft. long, of small brilliant red fruit the size of a cherry, of pleasant flavour. HIGHLY COMMENDED R.H.S.....	1s. &	1 6

Vegetable and Flower Seeds in Small Packets.

To meet the wishes of customers who, having only small gardens or allotments, do not require the usual quantity of seed contained in a full-size packet, we have made up smaller-size packets of certain popular Vegetable and Flower Seeds. The seeds are of the same high quality as contained in the larger-size packets offered in this catalogue. List sent free on application.

TURNIP.

Brassica Napus. French. *Navet.*

Turnips require a deep, light soil which has been deeply dug in autumn but not manured. While they are growing weeds must be kept down, and the surface soil be constantly hoed. During hot dry weather, heavy waterings should be occasionally given.

TURNIP, COVENT GARDEN SNOWBALL.

BARR'S GOLDEN NUGGET, a handsome short-topped small flattish golden-yellow Turnip, of delicious flavour, coming to perfection very quickly. Valuable for late sowing..... 0 10 *oz. s. d.*

BARR'S COVENT GARDEN SNOWBALL, an early globe-shaped white Turnip, crisp and juicy, of fine flavour. **HIGHLY COMMENDED R.H.S., 1925**.....per pint, 4s. 6d. 0 8

BARR'S YELLOW GREEN-TOPPED, a valuable mid-season variety with sweet and tender yellow flesh, a splendid keeper; a very effective Turnip for exhibition.....per pint, 4s. 6d. 0 8

EXTRA EARLY PURPLE TOP, one of the best early Turnips; a handsome purple-top variety, flesh white, crisp, juicy, and of fine flavour. **AWARD OF MERIT R.H.S.**.....per pint, 4s. 6d. 0 8

LITTLE MARVEL, a valuable little round white Turnip with short top, and very early, flesh crisp and solid; most valuable for early work and forcing. **AWARD OF MERIT R.H.S.**..... 0 8

EARLY WHITE MILAN, Extra Selected, short topped, flat, smooth and symmetrical, very early 0 8

EARLY WHITE MODEL, a handsome very early, white globe-shaped Turnip of model form, flesh crisp and juicy. **AWARD OF MERIT R.H.S.**.....per pint, 4s. 6d. 0 8

EARLY WHITE STONE, or Six Weeks, Selected, a favourite half-early variety, of medium size and solid white.....per pint, 3s. 6d. 0 6

GOLDEN BALL. See **ORANGE JELLY.**

CHIRK CASTLE BLACK STONE, white flesh, dark netted skin, good keeper, excellent variety. **HIGHLY COMMENDED R.H.S.**..... 0 6

MANCHESTER MARKET, similar in shape to *Green Top Stone*, but coming in later; it is, however, superior in quality, and will be much appreciated. **AWARD OF MERIT R.H.S.** per pint, 3s. 6d. 0 6

GREEN TOP STONE, a good all-the-year-round Turnip, standing the winter well. **HIGHLY COMMENDED R.H.S.**.....per pint, 3s. 0 4

JERSEY NAVET, an oblong white variety, very sweet, suitable for late sowing and a fine forcing variety. **HIGHLY COMMENDED R.H.S.**..... 0 9

ORANGE JELLY, Selected (syn. Golden Ball), a first-rate yellow Turnip for autumn sowing per pint, 3s. 6d. 0 6

Barr's Selections of Turnips.

4 ounces in 4 best varieties.....2s. 6d. | 4 packets in 4 best varieties1s. 4d.

SWEDISH TURNIPS and GARDEN SWEDES.

These form a very agreeable dish, and can be strongly recommended; they are hardier than ordinary Turnips and capable of standing very severe winters. They should be grown in a fairly stiff and moderately moist soil. Sow the seed from May to June where the plants are intended to stand, and thin out the seedlings 15 inches apart. The ground should be kept hoed and clean, and in hot dry weather occasional heavy waterings should be given.

SELECTED EARLY YELLOW, of fine flavour, oval-shaped, yellow-fleshed with rosy purple top..... 0 6 *per oz.—s. d.*

SELECTED EARLY WHITE, white globular roots of delicate flavour, a first-rate table variety. **HIGHLY COMMENDED R.H.S. TRIALS WISLEY, 1926**..... 0 6

CRIMSON-TOP TABLE, having a delicately flavoured deep cream-coloured flesh..... 0 6

SWEET WHITE, fine oval-shaped variety, firm sweet white flesh of delicate flavour..... 0 6

PHYTOBROMA.

Barr's Complete Plant Food.

The best manure for Vegetables, Fruit and Flowers; in the case of culinary Peas its use has resulted in a considerable increase of crop and improvement of quality, especially of the early varieties. The ingredients are all of the highest quality, and, therefore, the most economical and effective in use. 2 lb. carton 1/3; 7 lb. 3/-; 14 lb. 5/6; 28 lb. 10/-; 56 lb. 19/-; 1 cwt. 36/-. Prepaid orders for 56 lbs. and upwards sent carriage paid. *Circular with analysis and full particulars on application.*

VEGETABLE MARROW.

Cucurbitæ Pepo ovifera. French, *Courge à la Moelle.*

VEGETABLE MARROW, PEN-Y-BYD.

FOR AN EARLY CROP sow seed of the small fruiting varieties in April, following the directions given on each packet. When the plants are well established remove to a cold frame, gradually harden off, and plant out early in June on a specially prepared bed or hillock of decayed leaf soil with a foundation of half-rotten manure. Protect with hand-lights for a few days until the plants are well established.

FOR GENERAL CROPS sow the seed out of doors in May and June as per directions given on seed packet.

TABLE DAINTY, producing a prolific crop of small dark-green striped Marrows, oval, smooth, and of delicious flavour; we can strongly recommend this fine little Marrow. **HIGHLY COMMENDED R.H.S.** 1s. & 1 6

PEN-Y-BYD , a small very prolific variety of delicate flavour bearing an abundance of almost round smooth cream-coloured fruit.....	6d. &	1 0
PEN-Y-BYD, GREEN (<i>syn. Perfection</i>), of the same shape as <i>Pen-y-Byd</i> , but of a deep green with lighter coloured stripe; of delicious flavour.....	6d. &	1 0
ROTHERSIDE ORANGE (<i>new</i>), a valuable little Marrow; fruits golden-yellow, almost globe-shaped, with firm flesh of delicious flavour, very prolific, the type is now nearly fixed, but still a few green-striped fruit will now and then appear among the others.....	6d. &	1 0
BUSH GREEN , producing a heavy crop of long oval Marrows, dark green-striped, of fine flavour. HIGHLY COMMENDED R.H.S.	6d. &	1 0
EARLY WHITE BUSH , of spreading bushy habit, bearing a heavy crop of long oval, medium-sized white fruit of delicate flavour. HIGHLY COMMENDED R.H.S.	6d. &	1 0
MOORE'S CREAM, Selected , producing a good crop of oval-shaped, medium-sized, creamy white fruit, smooth and of delicate flavour. AWARD OF MERIT R.H.S.	6d. &	1 0
WHITE CUSTARD or " ELECTOR'S-CAP ," a bush Marrow, producing milky white flattened turban-shaped fruit, which, when cooked young, are a great delicacy.....		0 6
LONG GREEN , of fine rich flavour. HIGHLY COMMENDED, R.H.S.	4d. &	0 6
LONG WHITE , the best long white Marrow; a very free cropper.....	4d. &	0 6

WITLOOF.

Large Tuberos-Rooted or Brussels Chicory. A Fine French Salad.

Witloof is a great delicacy, within the reach of all, even those who possess only a very small garden.

Sow the seed in June, according to directions given on each packet. Early in November lift the roots, select out the best, shorten them to 8 or 10 inches and trim off the leaves within 2 inches of the crown. Then open a trench about 18 inches deep, in which stand the roots upright 2 inches apart. Fill up with good light, sifted soil, and whatever portion is required to be forced cover with 2 to 2½ feet of stable litter. Heat is soon generated, and in about three weeks blanched heads resembling small Cos Lettuce are produced, which are eaten as a salad, or cooked and served up in the same way as Sea Kale.

WITLOOF—Large Brussels Chicory.....per pkt. 6d.; per oz. 1s. 6d.

SUNDRY CULINARY ROOTS.

JERUSALEM ARTICHOKE, silver-skinned, selected tubers, 14 lbs. 4s.; 56 lbs. 14s.
CHINESE ARTICHOKE, selected tubers, per 100, 2s. 6d.
GLOBE ARTICHOKE, strong plants, per doz. 18s.
SHALLOTS, extra selected, per lb. 1s. 3d.
CHIVES, tufts, per doz. 6s.
GARLIC, fine selected, per lb. 1s. 3d.

HORSE-RADISH, for planting, per doz. 4s. 6d.
POTATO or **Underground Onions**, per lb. 1s. 3d.
ONION SETS, producing fine semi-flat onions 3 to 4 ins. in diameter, of fine quality and splendid keepers. They ensure an early crop, and are valuable for replacing any failures; plant in March or April, *selected bulbs*, per 100, 1s. 6d.
 „ *larger selected bulbs*, per 100, 2s.

Asparagus Roots, see page 4; *Herb Plants*, see page 17; *Rhubarb Plants*, see page 27; *Mushroom Spawn*, see page 20; *Potatoes*, see page 24; *Sea Kale Roots*, see page 28.

VEGETABLE PLANTS.

Seedling plants can be supplied in Spring of our selected stocks of the following vegetables:—

Cabbage (for summer and autumn cutting), **Savoy**s, **Borecole** (Kale), **Brussels Sprouts**, **Broccoli**, **Cauliflowers**, **Celery**, **Lettuce**, **Leek** and **Onions**. *List and prices on application.*

LAWN GRASSES, **Lawn Manures**, **Worm Killer**, etc., see pages 32 and 33.

FARM AND AGRICULTURAL SEEDS. Prices on application.

Barr's Lawn Grass Seeds

HOW TO PRODUCE AND MAINTAIN GOOD LAWNS, TENNIS COURTS, ETC.

A beautiful lawn is always a great adornment to any house, and affords a lasting pleasure to its owner. To produce and maintain such is not a matter of great difficulty.

A really fine lawn can only be obtained by sowing good grass seed on properly prepared clean ground, and not by using pasture turf which naturally contains strong growing grasses, quite unsuitable for lawns, and often objectionable weeds.

Quantity of Seed to Sow.—*The seed is sold by weight, being the only correct method of estimating the quantity needed for a given space. The quantity recommended to sow a New Lawn is 1½ to 2 cwt. per acre, or about 4 to 5 lb. to every 100 square yards; where, however, it is desired to form a lawn very quickly more seed may be used. Lawns should be renovated in Autumn, if possible, after the Summer wear, when half the quantities given above will be generally found sufficient.*

Preparation of the Soil.—The ground to be sown should be properly drained. A perfect level is also desirable, as this facilitates the mowing of the lawn, but in some instances a sloping or undulating surface may be preferable. In any case carefully avoid depressions or other inequalities of surface. The ground should be trenched two spits deep, great care being taken, as the work proceeds, to maintain a uniform depth of say six inches of surface soil of equal quality over the whole surface of the lawn. If this is not done the lawn will have a patchy appearance, especially noticeable in dry weather. In trenching, the soil and subsoil should be broken up and a liberal supply of old stable or farm-yard manure added, while all roots of perennial weeds should be removed. After trenching, roll and rake the surface repeatedly until the soil is very fine and free from stones, etc. Never rake, hoe, dig, or roll when the ground is in a wet, clammy, or sticky condition. If the ground can be thus prepared if possible some months previous to sowing, so as to allow any weed seeds in the soil to germinate and be removed before the grass seed is sown, and also to correct any irregularities which may appear on the surface due to subsidence or other causes.

Time and Manner of Sowing.—March and April and the latter part of August to the end of September are the best periods for sowing lawn grass seeds, provided the weather be favourable and the ground in suitable condition.

Before sowing, the ground should be well rolled and made firm, and the surface should be level and quite clear of weeds and stones, etc., while the soil should be in good working condition, neither too wet nor too dry.

It is very important that the seed be evenly distributed, and to this end it is well to adopt the following plan: Stretch a line from end to end of the ground to be sown and then mark off widths of three or four yards each. Sow only one width at a time, measuring out the proper quantity of seed required, and taking care that every portion of the space receives its fair share of seed. Cover the seeds by raking them into the soil with a large rake. Freely work the rake backwards and forwards over the surface, so that the seeds are well mixed with the top half-inch of soil. The ground should then be carefully rolled, provided that the soil is sufficiently dry that it will not stick to the roller.

After-Management.—Under favourable conditions the grass should be showing growth within a few weeks of sowing, and in a month present a nice green surface. *Any weeds appearing should be promptly removed* with as little disturbance to the grass as possible. When the grass is two or three inches high, mow with a scythe, or if a machine is used the knife must be raised so that the grass is not cut too short. *Never roll when the soil is so damp as to stick to the roller, or so dry as to receive no impression from the rolling.* When thoroughly established, frequent mowings and regular rolling will be necessary to keep the lawn in good condition.

Manure.—A safe and suitable manure for lawns is our special LAWN PHYTOBROMA (see page 33). To maintain the fertility of the soil we recommend a first application being made during showery weather in February or March at the rate of 5 cwt. to the acre, or 2 oz. to the square yard, and a second application, using only about half the quantity, six weeks later. Another application early in Autumn of 3 cwt. to the acre, or 1 to 1½ oz. per square yard, will be found beneficial in maintaining the fertility of the soil.

WATSON'S LAWN SAND OR WEED DESTROYER.

The Best Weed Killer for destroying Daisies, Plantains, etc., on Lawns.

Circular with full particulars and directions for use on application

General application—4 oz. to 4½ oz. per square yard.

Nett prices: Canisters, 1s. 3d., 2s. 6d., and 5s. 6d.; per ¼-cwt., 9s.; ½-cwt., 16s.; 1 cwt., 30s.

Prepaid orders for 1 cwt. and upwards sent Carriage Paid.

BARR'S WORM KILLER.

For destroying Earth Worms on Lawns, etc.

Easily applied, effectual and non-poisonous. *Full particulars and directions for use on application.*

General application—½ lb. to the square yard.

Nett prices: in bags, 7 lb., 2s. 3d.; 14 lb., 4s.; 28 lb., 7s.; 56 lb., 12s. 6d.; 1 cwt., 22s.

Prepaid orders for 1 cwt. and upwards sent Carriage Paid.

Barr's Lawn Grass Seeds

The following mixtures of grass seeds may be relied upon to give the finest results, and cannot fail to give the greatest satisfaction. They are composed of carefully cleaned seeds only, which are guaranteed to be of the highest purity and germination.

BARR'S "DWARF" LAWN GRASS MIXTURE.

(Without Rye Grass.)

FOR EXTRA FINE SMOOTH LAWNS, BOWLING GREENS, PUTTING GREENS, ETC.

A special mixture of the finest leaved and dwarfest growing perennial grasses, which from their fine close, slow habit of growth and pleasing colour, are the best suited for forming lawns of the shortest and finest herbage, thus greatly economising labour in mowing, a *very important point which should not be overlooked*. Lawns which contain Rye grass (which is frequently included in lawn grass mixtures), or other grasses of similarly strong habit, grow much quicker after mowing than do those which are composed *only* of these dwarfest perennial kinds, and it is therefore necessary to mow them much more frequently. The seeds contained in this mixture have all been separately selected for their *high quality* and *suitability*, and have been cleaned to the highest degree of perfection, so that they may be relied on for their immunity from weed seeds or the seeds of inferior or coarse grasses. This mixture is specially suitable for light and medium soils. **Where a really fine lawn is desired this mixture should be chosen.**

Per lb., 3s. 6d. ; 14 lbs., 46s. ; per bushel of 28 lbs., 90s.

BARR'S "STANDARD" LAWN GRASS MIXTURE.

(Without Rye Grass.)

FOR GARDEN LAWNS, TENNIS COURTS, CRICKET PITCHES, ETC.

This is also a very superior mixture, being composed of the fine-leaved, dwarfed-growing grasses only, all the seeds being highly cleaned and of pure and genuine quality. It is a mixture well known for its hard-wearing qualities and is suitable for medium and heavy soils.

Per lb., 3s. ; 14 lbs., 38s. 6d. ; per bushel of 28 lbs., 75s.

BARR'S "THAMES EMBANKMENT" GRASS MIXTURE.

(Containing Rye Grass.)

Specially recommended for Town Lawns where a good quick-growing serviceable Lawn is required, and for Public and Private Parks and Squares ; the seeds are all highly cleaned and of pure and genuine quality. An excellent "all-purposes" mixture.

Per lb., 2s. 6d. ; 14 lbs., 31s. 6d. ; per bushel of 28 lbs., 60s.

BARR'S "GOLF COURSE" MIXTURE.

(Containing Rye Grass.)

FOR PARKS, RECREATION GROUNDS, HOCKEY AND POLO FIELDS, ETC.

A special mixture of good hard-wearing grasses suitable for the fairway of Golf Courses, Recreation Grounds, etc. ; the seeds have all been highly cleaned and are of pure and genuine quality.

Per lb., 1s. 9d. ; 14 lbs., 23s. 6d. ; per bushel of 28 lbs., 45s.

BARR'S SPECIAL MIXTURE OF FINE GRASSES.

(Without Rye Grass.)

FOR SOWING UNDER TREES.

This mixture contains a careful selection of those grasses most suitable for sowing under deciduous trees or in shady or partially shaded places. In order to obtain a good growth of grass under trees it is necessary that the fertility of the surface soil should be maintained by regular dressings of manure and finely sifted soil, while during dry weather the ground must be freely watered. **Per lb., 3s. 9d.**

FINE-LEAVED FESCUE GRASS (*Festuca ovina tenuifolia*).

For sowing where little bulbs are to be naturalised, such as Narcissi—Cyclamineus, Minimus, Queen of Spain, etc. ; also Scillas, Chionodoxas, Snowdrops, etc. **Per lb., 3s. 6d.**

CLOVER.

No Clover is included in our Mixtures of Grasses, as we consider a lawn should consist of Grass only. If Clover is desired, however, it may be sown at the rate of 2 or 3 lbs. per acre.

Finest White Clover, per lb., 3s. 6d.

BARR'S SPECIAL LAWN PHYTOBROMA.

THE FINEST MANURE FOR LAWNS, TENNIS COURTS, AND ALL GRASS LANDS.

Barr's Lawn Phytobroma is composed of those ingredients calculated to encourage a vigorous growth of grass only, and in this respect differs from the potash manures, which are apt to stimulate clovers and coarse seeds. We can confidently recommend it for all grass lands, as, by its use, a thicker growth and a richer colour will be obtained. It is of finest quality, and therefore economical in use, 2 oz. to the square yard only being required at each application. *Full directions sent on application.* **Nett prices : 2 lb. carton, 1s. 4d. : In bags—7 lb., 3s. 3d. ; 14 lb., 6s. ; 28 lb., 10s. 6d. ; 56 lb., 20s. ; 1 cwt., 38s.** Prepaid orders for 56 lbs. and upwards sent Carriage Paid.

Notes on Raising Flower Seeds.

Short cultural directions are given on our seed packets, but the following general remarks may be found useful to amateurs as a basis for the treatment of hardy, half-hardy and greenhouse Annuals and Perennials, hardy Biennials, and hardy Alpines.

Hardy Annuals.—Under this heading are ranged those families which are sown and bloom the first season, the plants dying with the approach of winter. They include a large portion of our most brilliantly coloured summer flowers. *Sow from March to June* for summer and autumn flowering, the later sowings being confined to rapid-growing annuals only. The ground should be previously prepared by digging, working in a little manure at the same time. The surface should be made level and be finely raked. If the weather is dry, give a watering some hours before sowing. *Sow thinly* and gently press the seed into the earth, covering lightly with finely sifted soil; the very small seeds must have very little covering. Keep the soil moist and shaded until the seedlings are up; the shade can be managed with branches of evergreens or sheets of paper fastened to little stakes. *When large enough to handle, thin out freely*, leaving space for each plant to develop to its full size. Annuals are often spoilt in their effect by not being thinned out sufficiently, and consequently growing weedy and lank instead of becoming dwarf and bushy plants. *Thinning out is done best during dull moist weather, or in the evening time.* In calculating the distance that should be left between plant and plant, it may be taken as a general rule that plants which attain, when fully grown, a height of 1 ft., require to be thinned out to at least $\frac{1}{2}$ ft. apart, and so on. *In our descriptions we give the full height of each variety.*

In the country, away from smoky towns, many of the hardy annuals may be sown in August and September, for spring and early summer flowering, and if the seedlings are boldly thinned out at an early stage they become hardy and robust, producing finer plants and a greater profusion of bloom than when sown in spring. (A batch of Sweet Peas should always be sown in autumn for early summer flowering.)

HARDY ANNUALS do not, in most cases, transplant well; they should therefore either be sown where intended to bloom, or the BABY SIZE T. P. RAISERS used, *see page 98.*

Half-hardy Annuals may be sown in March or April, in gentle heat, in pans, shallow boxes or pots, a light sandy soil being used. The surface should be made perfectly smooth and level (which is best done with a circular piece of flat wood), and the seeds be very lightly covered with finely sifted soil.

Before sowing stand the seed pans or pots in an inch of water, the soil will then soon become moist and fit to receive the seeds, and thus save watering with a can and probably washing away or disturbing the seed. Shade pans from the sun's rays till seedlings are up; this can be done by simply placing a newspaper lightly over them. As soon as the seedlings are large enough to handle, prick off into shallow boxes, and when strong enough and all danger of frost is over, plant out on to well-prepared ground.

Those who have no convenience for sowing in heat can sow all HALF-HARDY ANNUALS in the open border middle of May, on finely prepared soil and in as sunny a position as possible. *The seedlings should be thinned out freely*, as recommended for Hardy Annuals.

Greenhouse Annuals.—The difference in the treatment of these and Half-hardy Annuals is that they should be sown earlier and in stronger heat. Seedlings should be pricked out from the seed pan as soon as large enough to handle, each into separate small pots as early as possible before they get drawn, and when well rooted should be transferred to larger pots, and so on to the size required for their flowering. An occasional watering of weak liquid manure will greatly assist the plants in their growth. Greenhouse Annuals, such as CELOSIAS, etc., make effective bedding plants if put out in June.

Greenhouse Perennials.—Sow thinly in early spring, in gentle heat, in pans of loam, leaf soil and sand, in equal parts, placing a piece of glass over the pan and keeping shaded and moist until the seedlings are up; pot these off singly when large enough, and replace in heat, shading and keeping close until established, when gradually inure to a suitable temperature and pot on as necessary.

Hardy Perennials.—Sow from March to July in pans or in drills on a prepared bed of light rich soil and keep shaded and moist until the seedlings appear. Prick these out as soon as large enough to handle, into shallow boxes or nursery beds, and when strong enough transplant to permanent situations. *Do not allow the seedlings to remain too long in the seed-pans or to get starved for want of water.*

Hardy Biennials require similar treatment to Hardy Perennials. If raised early in heat, many of them make decorative plants the first season.

Hardy Alpines.—Seeds of alpine and all hardy Primulacæ should be sown in pots or pans as early in the year as possible, and after a good watering should be stood outdoors against a north hedge or wall where the soil can get frozen. Then when milder weather sets in, bring the pans into gentle warmth and the seeds will germinate freely. After March or April it is better to wait and sow the seed in winter, giving the treatment as recommended above.

NOTE.—In the case of very hard-shelled seeds it will be found a good plan to steep them in tepid water for some hours, previous to sowing, as this will hasten their germination.

SWEET PEAS and seeds which are liable to attack from mice should be steeped for half an hour in paraffin oil previous to sowing.

For T. P. Seed Raisers, Cloches, Seed Sower, Labels, Manures, etc., *see List of Garden Requisites, pages 95 to 105.*

Barr's

Flower Seed Novelties and Specialities

Seeds of Rare Alpines, Hardy Perennials, Annuals and Greenhouse Plants.

Our General List of Flower Seeds commences on page 46.

☛ We were awarded the GOLD MEDAL for Annuals at the last Great International Exhibition, Antwerp.

☛ Full directions for sowing are printed on each packet of seed. See also directions on page 34.

In the descriptions given, **h.a.** = hardy annual; **h.h.a.** = half-hardy annual; **g.a.** = greenhouse annual; **h.b.** = hardy biennial; **h.h.b.** = half-hardy biennial; **h.p.** = hardy perennial; **h.h.p.** = half-hardy perennial; **g.p.** = greenhouse perennial. Height in inches or feet.

| 70 | Mixed Colours , many varied and beautiful colours; splendid border plants..... | 1s. & 1 6 |

BARR'S GIANT LONG-SPURRED AQUILEGIAS.

AQUILEGIA (Columbine).

- 71 **Barr's New Giant Long-spurred**, a grand new strain with long-spurred flowers of great size in many beautiful shades of colour: *blues, lavenders, roses, reds and yellows*, etc., 2½ ft. 2 6
- 72 **Barr's Giant Yellow and Primrose Shades**, a beautiful strain selected at our TAPLOW NURSERIES; flowers very large with broad corolla, ranging from *yellow to primrose*, sepals and spurs *pale primrose or cream*. Some beautiful varieties may be selected out of this strain, h.p., 2 ft.1s. & 1 6
- 73 **Barr's Pink, Rose and Red Shades**, flowers large, mostly with long spurs, colours *roses and pinks* with *white or primrose* corolla, also *scarlet, ruby-red* and *crimson-red* with *white, primrose, or yellow* corolla, h.p., 2 ft.1s. 6d. & 2 6
- 74 **Barr's Blue King**, a handsome short-spurred variety, producing large flowers of a *rich deep blue* with *white* corolla, 3 ft.1s. 6d. & 2 6
- 75 **Barr's Silver Queen**, beautiful new variety RAISED AT OUR NURSERIES, large elegant flowers *white to cream*, having spurs faintly tinged *rosy sapphire*, h.p., 2 ft.1 0
- 76 **Blush Beauty**, flowers very large and long-spurred, sepals and spurs *pale flesh* colour, corolla *delicate cream*, very free blooming, 33 in.2 6
- 77 **Copper Queen**, a new colour break in Columbines, flowers long-spurred having *coppery-red* petals and spurs, and large open *straw-coloured* corolla passing off *white*, h.p., 1½ ft.1 6
- 78 **Dainty Maid**, distinct and pretty, flowers having *rose-purple* sepals and spurs and a *bright yellow* corolla, 3 ft.1s. 6d. & 2 6
- 79 **glandulosa, the Blue Siberian Columbine**, flowers of large size, *clear blue* with *snow-white* corolla, borne on graceful stems, h.p., 1 ft. We were given an AWARD OF MERIT FOR THIS AT THE R.H.S. WISLEY TRIALS, 1927.2s. 6d. & 3 6
- 80 **King Harold**, a Giant Columbine RAISED AT OUR NURSERIES, having very large long-spurred flowers, sepals and spurs *rich violet-purple*, corolla *primrose*, handsome, 44 in. 1s. 6d. & 2 6
- 81 **Lavender Queen**, producing long-spurred flowers with *rich lavender-purple* sepals and spurs and a *pure white* corolla, very showy, 2 ft.2 6
- 82 **Pink Beauty**, a very attractive long-spurred variety, with *soft pink* sepals and spurs and a *creamy yellow* corolla, 2½ ft.1 6
- 83 **Rose Beauty**, a very pretty variety with long-spurred flowers having *rose-coloured* sepals and spurs and a *cream-coloured* corolla, 2½ ft.2 6
- 84 **Rose Queen**, a beautiful long-spurred large-flowered variety, flowers mostly having *pale pink* sepals and spurs and *white* corolla with *yellow* stamens, h.p., 2 ft.1s. & 1 6
- The above named Aquilegias only come partially true from seed, but the seedlings are all beautiful.*
- 85 **AURICULA McWatt's Blue**, a beautiful border variety, producing finely formed flowers of a charming shade of *blue*, h.p., ½ ft.2 6
- 86 **AZALEA procumbens (Loiseleuria procumbens)**, a charming little High Alpine shrub of dainty habit, with clusters of small *rose-coloured* flowers, hardy shrub, 4 in.2 6

CAMPANULA
TELHAM BEAUTY.

- 87 **BEGONIA, New Narcissus-Flowered**, a remarkable new race of tuberous-rooted Begonias, the inner petals being joined into a large semi-double or single corona with petals elegantly crimped at margin; the colours range mostly from *light to dark pink, rose* and *salmon-pink*, with possibly a few *yellows*, g.p. 2 6
- 88 **CALENDULA Radio**, a charming new variety of the **Pot Marigold**, producing full-double globular flowers of a beautiful *orange* colour with prettily quilled petals, h.a., 15 in.1 0
- 89 **CAMPANULA, Telham Beauty**, a grand variety of *C. PERSICIFOLIA*, introduced by us, which at the Holland House Show on July 4th, 1916, was given the R.H.S. AWARD OF MERIT. It produces on long stems very large globular open flowers, of a lovely *china-blue*, with *silvery shading* inside, h.p., 4 ft.2s. 6d. & 3 6
- 90 **CAMPANULA persicifolia "White Knight"**, producing on rigid wiry stems large *snowy white*, open, bell-shaped flowers; strong grower and free bloomer, beautiful, h.p., 3 ft.2 6

- 91 **CARNATION, New French-American Hybrids**, a very fine strain resulting from crossing the "Geant de Nice" Carnation with the **Giant American Long-stemmed Strain**. It produces very large double flowers in a great variety of colour and of perfect form, borne on long rigid stems; the blooms are highly scented, h.p., 2 ft., flowering the first year from seed..... 2 6
- 92 **CARNATION, Double "White Duchess,"** a grand border variety producing *snowy white* double flowers of the most delicious scent, h.p., 1 ft.; it blooms six months after sowing 2s. 6d. & 3 6
- 93 **CARNATION-PINK "Allwoodii,"** a valuable new race, being a cross between the **Perpetual Flowering Carnation** and the **Hardy Garden Pink**. This strain produces an abundance of flowers from spring to autumn in various charming shades of colour, all deliciously scented. Valuable border plants or for pot culture in cold greenhouse, h.p. 1 6
- 94 **CLARKIA elegans Chieftain**, a valuable addition to these charming plants; the flowers which are borne on graceful stems are large and very double, of a beautiful *soft mauve*. Valuable for borders and cutting, h.a., 2 ft. 1 0
- 95 **CNICUS syriacus**, a very ornamental thistle from Syria, with Acanthus-like prickly foliage, green with *pink* midribs, stems *bronzy green*, h.h.a., 2 ft..... 1 0
- 96 **COLEUS thyrsoides**, a lovely species from Central Africa, producing from November to February graceful racemes of *bright blue* flowers; easily grown in an ordinary greenhouse with plenty of air, g.p., 2½ ft. AWARD OF MERIT, R.H.S..... 3 6
- 97 **COREOPSIS auriculata superba**, a fine new addition to our hardy border flowers, larger in bloom and of a *richer golden yellow* than C. GRANDIFLORA, while a halo of *brownish red* encircles the *golden* central disc, h.p., 2 ft..... 1 6
- 98 **COREOPSIS grandiflora, New Semi-double**, a valuable introduction, flowers *rich golden-yellow*, semi-double and prettily fluted; a fine border plant and flowers prized for cutting, h.p., 3 ft..... 1 0
- 99 **COREOPSIS, Mayfield Giant**, a fine new variety raised in Australia, producing larger flowers than other varieties and having broader petals, colour *rich deep golden-yellow*; a fine border plant and a valuable cut flower, h.p., 3½ ft..... 1 6
- 100 **CYNOGLOSSUM, Blue Perfection**, an improved type of the Chinese C. AMABILE, producing large sprays of *brilliant blue* Forget-me-not-like flowers in early summer; a fine border plant, h.b., 3 ft..... 1 6
- DAFFODIL, Seedling Mixture, etc.** See Narcissus, page 44.
- 101 **DAHLIA, New Coltness Hybrids**, a very attractive new strain, forming bushes about 1½ ft. high only, producing in long succession single flowers in shades of *scarlet, crimson, blood-red, yellow, white, purple, mauve*, etc., all measuring about 3 inches across, h.h.p., 6d. & 1 0
- 102 **DAHLIA, New Coltness Hybrid "Yellow Gem,"** a beautiful companion plant to the above, producing in abundance clear *yellow* flowers, h.h.p., 1½ ft..... 1 0
- DELPHINIUM.** Magnificent Hardy Border Plants. The named varieties do not reproduce themselves entirely true from seed, but the seedlings are all good.
- 103 **New Giant Hybrids**, seedlings of Countess Cowley, The Shah, W. Pilkington, etc., flowers of great size, semi-double and double, mostly with *light lavender* centre and *blue* outer petals, but some of a *dark lavender* and *blue* shade, h.p., 5½ ft..... 2 6
- 104 **Blue Boy**, flowers single, *rich deep blue* with *white* centre; a vigorous grower, h.p., 6½ ft. 2 6
- 105 **Col. Sir Wyndham Murray**, flowers double, *bright blue* with *pure white* centre, h.p., 5½ ft. AWARD OF MERIT R.H.S..... 2 6
- 106 **General Sir Douglas Haig**, a grand variety with handsome trusses of double *rich dark blue* and *purple* flowers, h.p., 5½ ft. AWARD OF MERIT, R.H.S..... 2 6
- 107 **Hugo Poortman**, a fine novelty, with enormous double flowers of a beautiful *pale blue*, borne on stately stems, h.p., 6 ft..... 2 6
- 108 **In Remembrance**, forming a handsome close spike with *cobalt-blue* flowers overlaid with *mauve*, h.p., 5½ ft..... 2 6
- 109 **Lord Derby**, a valuable introduction, producing handsome spikes of large *deep rosy-mauve* flowers with *white* eye, h.p., 4 ft. AWARD OF MERIT, R.H.S., 1925..... 3 6
- 110 **Mrs. A. J. Watson**, producing enormous spikes 3 feet long of very large *deep mauve* flowers with *black* centre, h.p., 7 ft. AWARD OF MERIT, R.H.S..... 2 6
- 111 **Mrs. Townley Parker**, producing a fine truss of large single *sky-blue* flowers with *white* eye, h.p., 4½ ft. AWARD OF MERIT, R.H.S., 1925..... 2 6
- 112 **Purple Emperor**, producing long spikes of large, semi-double *sky-blue* flowers overlaid with *purple*, very showy, h.p., 6 ft. HIGHLY COMMENDED, R.H.S., 1925..... 2 6
- 113 **Taplow Blue**, a great improvement on **Capri**, producing long spikes of large open single flowers, *Cambridge-blue*, shot *rose-pink* with conspicuous *white* centre, of graceful branching habit, h.p., 7 ft..... 2 6
- 114 **Walter T. Ware**, closely set spike of large *deep purplish blue* flowers, extra fine, h.p., 5 ft. 2 6
- 115 **Willie O'Brien**, producing a splendid compact spike of flowers, *Cambridge-blue*, with *mauve* inner petals, handsome, h.p., 5 ft..... 2 6

THE SHIRLEY DIGITALIS.

116	DIANTHUS Highland Queen, a brilliantly coloured Single Pink for the rock garden, or edging, producing flowers of a dazzling scarlet vermilion, set off by a glittering white centre.....	pkt. s. d.
		2 6
117	DIANTHUS, New Hybrid Pink, "Crimson Bedder," a very decorative plant for beds, front borders and rockwork. It forms little branching bushes covered with single and semi-double fringed flowers ranging from glowing crimson to velvety blood-crimson, h.p., 1 ft.....	6d. &
		1 0
118	DIGITALIS (Foxglove), "The Shirley," Giant strain, specially selected, a magnificent strain raised by the late Rev. W. Wilks, and carefully selected each year; it produces plants 5 to 7 ft. high, with spikes 4 ft. long, carrying flowers of great size ranging from white to dark rose, handsomely blotched and spotted crimson, maroon and chocolate, h.p.....	1 6

General Descriptive List of the Best Flower Seeds.

For Rare and Beautiful Novelties and Specialities, see page 35.
Supplementary List of Flower Seeds, see page 43.

GOLD MEDAL awarded for Annuals at the last Great International Exhibition, at Antwerp.

All Orders for Flower Seeds to value 2/6 and over are sent post-paid.

In the descriptions, H.A. indicates hardy annual; H.H.A., half-hardy annual; H.B., hardy biennial; H.P., hardy perennial; H.H.P., half-hardy perennial. The height is given in feet or inches. Full directions for sowing are printed on each packet of seed.

The Seeds offered in the following List are all of the finest strains, and in every case the germination has been carefully tested.

ABU'TILON, *Nat. Ord. Malvaceæ.* Hardy Shrub. pkt.
s. d.

340 *vitifol'ium*, beautiful evergreen wall-shrub with large cup-shaped *porcelain-blue* flowers. 1s. & 2 6

ÆTHIONE'MA, *Nat. Ord. Cruciferae.* Hardy Alpine Perennial.

Charming rock-plants for sunny situations, covered in summer with bright-coloured flowers.

ÆTHIONEMA CORIDIFOLIUM.

341	<i>coridifol'ium</i> (LEBANON CANDYTUFT), <i>waxy pink</i> ,
½ ft.....	1 6
342	<i>grandiflo'rum</i> (PERSIAN CANDYTUFT), <i>pretty pink</i>
flowers, 1 ft.....	1 0
343	<i>per'sicum</i> , of bushy habit with <i>greyish</i> foliage and
<i>pink</i> flowers lightly veined rose, 10 in.....	1 0
344	<i>pulchel'lum</i> , a lovely little plant of trailing habit
with clusters of dainty <i>pink</i> flowers, ¾ ft.....	1 0

AGERA'TUM, *Nat. Ord. Cruciferae.* Half-hardy Annual.

Decorative little plants for bedding, edgings or pots, blooming from early summer to autumn.

345	<i>Barr's Dwarf Blue</i> , an <i>extra fine strain</i> , of very compact growth, covered with heads
of feathery flowers of a <i>deep lavender</i> colour, ¾ ft.....	6d. & 1 0
346	<i>Little Blue Star</i> , miniature bushes covered with clusters of flowers opening <i>light blue</i> with
<i>purple</i> centre and developing to a <i>bright blue</i> self, 5 to 6 in.....	1 0

ALYSS'UM, *Nat. Ord. Cruciferae.* Hardy Perennials and Fragrant Annuals.

Valuable plants for rockwork, edgings, and for filling beds, etc., in the spring flower garden.

347	<i>saxa'tile compac'tum</i> , the <i>Golden Alysson</i> , producing masses of <i>golden</i> flowers, con-
trasting most charmingly with the <i>white Arabis</i> and <i>blue Aubrietia</i> , h.p., ½ ft.....	0 6

374	<i>rupicola</i> , a new species from China producing pretty <i>silky white</i> flowers, 1 ft., <i>rare</i>	2 6
375	<i>sulphurea</i> , a lovely alpine, large <i>sulphur-yellow</i> flowers, and graceful fern-like foliage, 1 ft.	1 0
376	<i>vernalis</i> , flowers <i>white</i> tinted <i>lilac</i> , covered with silken hairs, a choice alpine, 5 in.	6d. & 1 0

See also Novelty List, page 35.

For Anemone Tubers, see Spring Bulb Catalogue. Anemone Plants, see Hardy Plant Catalogue.

ANTIRRHI'NUM (Snapdragon), *Nat. Ord. Scrophulariaceæ*. Hardy Perennial.**A Select List of the best standard varieties.**

For gorgeous colouring few flowers can match these Snapdragons, the *tall* and *intermediate* varieties should be freely used in flower beds and borders where they produce a most brilliant effect from summer to autumn. The *dwarf* kinds are very suitable for rockwork, old walls and edgings, and both these and the *intermediate* varieties make charming pot plants. They are also valuable Bee-flowers. A very pretty effect is obtained by blending together the tall and semi-dwarf varieties. Raised under glass in spring and planted out, they bloom profusely during summer and into autumn, while sowings made outdoors in July and August give a fine display early the following summer. About 80 per cent. of the seedlings come true to colour.

ARENA'RIA (*Sand-wort*).*Nat. Ord. Caryophyllaceæ.* Hardy Perennial.

454	<i>balea'rica</i> , quickly covering bare rocks and stones with its dwarf close vivid green foliage, besprinkled in summer with tiny white starry flowers, 2 in. Seed scarce.....	1	6
455	<i>monta'na</i> , growing into fine mounds $\frac{1}{2}$ ft. high, which in early summer are smothered with large snowy white flowers, a valuable rock plant.....	1	0

ARGEMONE (*The Prickly Poppy*), *Nat. Ord. Papaveraceæ.* Hardy Annual.

456	<i>grandiflo'ra</i> , a graceful plant, with ornamental spiny foliage and large snowy white Poppy-like flowers with golden stamens; for borders and large rockeries, $2\frac{1}{2}$ ft.....	0	6
457	<i>hyb'rida</i> " <i>Isabelle</i> ," having a very ornamental spiny light green foliage with silvery midribs and pale lemon Poppy-like flowers, $2\frac{1}{2}$ ft.....	0	6

LARGE-FLOWERED DOUBLE ASTERS.**Callistephus Hortensis, or China Asters.** Half-hardy Annual.*Barr's Extra Selected Strains.*

The list below comprises the VERY FINEST ASTERS for bedding or grouping in the flower border or to grow for cutting. GOOD CULTURE is essential in order to obtain an abundance of fine blooms. The seed should be sown at intervals from March to the end of May in order to secure a succession of flowers. Plants in bloom may be successfully potted up for indoor decoration.

Various Beautiful Asters of Recent Introduction.

We can strongly recommend all the following Asters as being distinct and beautiful.

		pkt.	s. d.
458	<i>Amethyst</i> , a very beautiful GIANT COMET ASTER, bearing large double flowers with long curling petals, opening white and developing to a clear light blue, $1\frac{1}{2}$ ft.....	1	0
459	<i>Anemone-flowered, Mixed</i> , of fine branching habit, with large many-petalled single flowers of various colours—pink, old rose, bluish, violet and white, beautiful, 15 in....	6d. &	1 0
460	<i>Aurora</i> , a very attractive Aster of the GIANT COMET type, flowers a beautiful salmon-rose, developing to shell-pink, $1\frac{1}{2}$ ft.....	1	0
461	<i>Azure Fairy</i> , bearing on long stems very large flowers of a beautiful silvery lavender, petals slightly curled, 27 in.....	1	0
462	<i>Copper King</i> , a handsome variety, flowers coppery-red with golden centre, mostly semi-double, with elegantly curled petals, 15 in.....	1	0
463	<i>Heart of France</i> , a handsome LATE BRANCHING ASTER with dark stems and large broad-petalled flowers of a rich ruby colour, 2 ft.....	1	0
464	<i>Mauve Queen</i> , bearing very large flowers of the COMET type, opening a silvery lavender and passing off pale lavender, very beautiful, 1 ft.....	1	0
465	<i>New Giant American White</i> , a fine new variety of late Branching Aster, producing in abundance large handsome snowy white full-double flowers; a grand border plant and valuable for cutting, 2 ft.....	1	0
466	<i>Pink Enchantress</i> , a very lovely variety of LATE BRANCHING ASTER, with large double flowers, white flushed shell-pink; a splendid bedder, of erect branching habit and valuable for cutting, 2 ft.....	1	0
467	<i>Queen of the Market, Mixed Shades</i> , flowering three weeks earlier than most Asters, of a very branching loose spreading habit with abundance of flowers on long stems, very decorative, $1\frac{1}{2}$ ft.....	6d. &	1 0
468	<i>Rose King</i> , bearing large double quilled flowers of beautiful bright rose, of fine branching habit, a fine border plant, $1\frac{1}{2}$ to 2 ft.....	6d. &	1 0
469	<i>Snowball</i> , a very lovely new GIANT COMET ASTER, with very large snowy white flowers having long broad petals elegantly twisted; a grand cut flower, 21 in.....	1	0
470	<i>Terra-Cotta</i> , an attractive variety of OSTRICH FEATHER ASTER, bearing very large flowers of a beautiful terra-cotta colour, with long twisted petals, $1\frac{1}{2}$ ft.....	1	0

BALSAM (*Impatiens*), *Nat. Ord. Geraniaceæ.* Half-hardy Annual.

534 <i>Barr's Improved Double Prize Strain</i> , <i>Splendid Mixed</i> , flowers very large and fully double, of beautiful and brilliant varied colours, 1½ ft. ; splendid pot-plants and valuable for filling beds and borders in summer.....	6d. &	1 0
--	-------	-----

BARTO'NIA, Nat. Ord. Loasaceæ. Hardy Annual.

- 535 *au'rea* (*syn. Mentzelia Lindleyi*), a most decorative plant, large *golden* blossoms and ornamental foliage. Valuable for flower borders and large rockeries, 1½ ft.4d. & 0 6

BEGO'NIA, Nat. Ord. Begoniaceæ. Greenhouse and Half-hardy Perennials.

For brilliancy of colour, duration and profusion of bloom, few plants can compare with the tuberous-rooted Begonias offered. For greenhouse decoration and for summer bedding they are unequalled. *Seedlings raised in heat in early spring will flower the same summer.*

Tuberous-rooted Begonias.

- 536 **Barr's Prize Strain Single Mixed**, saved from finest Exhibition varieties, all having large well-formed flowers of many brilliant shades of colour.....1s. 6d. & 2 6
- 537 **Barr's Prize Strain Double Mixed**, saved from finest Exhibition varieties, producing 70 to 80 per cent. of large double well-formed flowers in brilliant shades of colour...2s. 6d. & 3 6

See also Novelty List, page 36.

Fibrous-rooted Begonias.

Begonia semperflorens, a continuous flowering section of Begonias of the greatest value for bedding; the flowers, although small, are of brilliant colours and borne in great profusion from summer to autumn. *Seedlings of spring bloom in summer*, while seedlings of summer make valuable decorative plants for the greenhouse during winter.

- 538 **Gustav Knaake (new)**, a very attractive variety resembling the well-known Begonia Gloire de Lorraine, producing graceful *light green* foliage and a profusion of *fiery crimson-red* flowers, measuring 1 to 2 in. across, ht. 8 to 10 in. A splendid pot plant for decoration during June, July and August..... 2 6
- 539 **Scarlet Beauty**, a showy bedder, with *brown* foliage, and producing an abundance of *fiery scarlet* flowers, 10 in..... 1 0

- 672 *grandiflo'ra*, **Selected strain**, a very decorative border plant, with large *rich deep golden* flowers, produced in abundance from summer to autumn, greatly prized for vases, etc., 3 ft. Being a short-lived perennial, it is best treated as a hardy biennial.... 1 0

See also Novelty List, page 37.

CORNFLOWER. See *Centaurea*.**COS'MOS (Mexican Aster), Nat. Ord. Compositæ. Half-hardy Annual.**

COSMOS, NEW DOUBLE CRESTED.

Plants of graceful beauty, elegant fine feathery foliage and large flowers, like single Dahlias. Grand subjects for warm sunny situations in borders, also for wild and sub-tropical gardens.

- 673 New Double-Crested Early Strain**, a beautiful new strain which comes into flower sufficiently early to escape the cold autumn weather. They form bushes about 3 ft. high, covered with an abundance of double-crested flowers, *white, pink, and crimson*, h.h.a., 3 ft. 1 0
- 674 Early Large-flowered Varieties, Mixed**, colours *crimson, rose, and white*, 4 to 5 ft. 0 6
- 675 Rose Queen**, a lovely variety producing in July flowers measuring 2 to 2½ inches across of a beautiful *pale rose-pink*, HIGHLY COMMENDED, R.H.S. 1926 1 0
- 676 hybrid "Klondyke"**, large flowers of a *glowing orange-red*; quite distinct from other Cosmos in its foliage and habit. It should be treated as a greenhouse plant, and if sown in heat in January and potted on it will bloom under glass when 20 in. high 0 6

Extra Early Giant Flowered Cosmos.

A grand strain, flowers 4 to 5 inches across and blooming in 2 or 3 months from seed.

- 677 Pink Beauty**, flowers a lovely *rose-pink*, 5 ft. 6d. & 1 0
- 678 White Queen**, flowers a beautiful *pure white*, 5 ft. 6d. & 1 0

COWSLIP, Nat. Ord. Primulaceæ. Fragrant Hardy Perennial.

- 679 New Giant-flowered Mixed**, a very fine strain, of vigorous habit, producing large heads of *crimson, scarlet, orange and yellow* flowers, 15 in 1 6

CYCLAMEN Persicum, Nat. Ord. Primulaceæ. Fragrant Greenhouse Bulb.

These beautiful winter-blooming plants may be flowered from seed in about a year, if the seedlings are pricked off and grown on rapidly without interruption. The flowers have a delicate fragrance.

- 680 Barr's Prize Strain**, splendid mixture of colours, from the *purest white* to the *richest and darkest crimsons*; a grand strain, plants dwarf and compact, flowers large, broad-petalled, of good substance, and borne in great profusion well above the foliage...2s. 6d. & 3 6
- 681 Giganteum, "Scarlet King"**, a wonderful decorative plant, the large flowers coming close in colour to the *scarlet* Oriental Poppy; valuable for Christmas decoration..... 2 6
- 682 "St. George"**, a splendid decorative plant both in foliage and flower, leaves of a great size with broad *silver* zone on *dark green*, flowers *salmon-rose* with *ruby-coloured* eye 3 6
- 683 Fine mixture of many beautiful shades** 1 6

CYTISUS (Broom), Nat. Ord. Leguminosæ. Hardy Shrub.

- 684 albus**, the old *White Spanish Broom*, covered with *snowy white* flowers in May and June, 5 to 6 ft. 0 6
- 685 præcox (Cream-coloured Broom)**, an exquisite early-flowering Broom, forming an elegant bush, smothered in May and June with *creamy primrose-coloured* flowers, 5 to 6 ft. 1 6
- 686 Scoparius Andreaus**, the *Crimson and Golden-Yellow Broom*, very showy and attractive flowers, 5 to 6 ft. 0 6
- 687 "Beautiful New Hybrids, Mixed"**, very pleasing shades of *yellow, bronze, gold and brown, scarlet and gold, crimson and gold, etc.*, 5 to 6 ft. 6d. & 1 0

DA'HLIA, Nat. Ord. Compositæ. Half-hardy Perennial.

Spring-sown seedlings produce fine flowers the same season.

- 688 New Collarette Dahlias, Mixed**, from 15 choice Exhibition Varieties, a very striking new strain, the flowers having broad rounded petals with a central "collarette" of another distinct colour, 3½ ft. 1s. & 2 6
- 689 Single, Choicest Mixture**, from finest named varieties, 3 to 4 ft. 6d. & 1 0
- 690 New Large-flowered Dwarf**, flowers of elegant form, very large, measuring 7 inches across single and semi-double, colours *scarlet, crimson, buff-orange and yellow*, prized for cutting, 2½ to 3 ft. 6d. & 1 0
- 691 Peter Pan**, a charming miniature strain forming compact little bushes, commencing to flower when about a foot high, and never exceeding 18 to 24 inches. The Anemone-shaped semi-double flowers are varied in colour, many showing two colours in the one flower, all very pretty. 1 6
- 692 New Pæony-flowered**, a fine new race producing semi-double flowers of great size, like Pæonies, and in various brilliant colours, 3 to 5 ft. 1 0

DAHLIA—*continued*.

- 693 **Cactus Dahlia, Barr's Extra Selected**, saved from the finest selected named varieties; the seed will only produce, however, a percentage of Cactus-flowered Dahlias, the rest coming single, but of high quality, 3 to 4 ft. 1 6

See also Novelty List, page 37.

DAISY (*Bellis perennis*), *Nat. Ord. Compositae*. **Hardy Perennial**.

Spring-sown, seedlings flower in summer, and the best should be selected out for spring bedding.

- 694 **Double, Barr's New Giant White**, of sturdy habit, very large *snowy white* flowers, 4 in. ... 6d. & 1 0
 695 **„ Barr's New Giant Rose**, flowers measuring 2 in. across, petals *silvery blush* with *deep rose* under-surface, 4 in. 6d. & 1 0

DELPHINIUM, *Nat. Ord. Ranunculaceae*. **Hardy Perennial**, etc.

BARR'S HYBRID DELPHINIUMS.

- 696 **Barr's Beautiful Hybrids Mixed**, seed saved at our TAPLOW NURSERIES from the finest and largest flowered varieties—*pale* and *silvery blues*, *silvery mauves*, *lavenders*, *soft blues*, *brilliant blues*, and *dark gentian-blues*, etc., all very beautiful, 5 to 6 ft. 1s. & 2 6
 697 **Barr's Light Blue Shades**, h.p. 0 6
 698 **Barr's Full Blue and Gentian Blue Shades**, h.p. 0 6
 699 **Barr's Violet and Purple Shades**, h.p. 0 6
 700 **Fine Hybrids Mixed**, saved from semi-double and single varieties, h.p., 5 to 6 ft. 0 6
 701 **Belladonna Cliveden Beauty**, fine border plant, large *Cambridge-blue* flowers, h.p., 3½ ft., 6d. & 1 0
 702 **Blue Prince**, flowers *bright blue* with *white* eye, very fine, 5½ ft. 1 0
 703 **King of Delphiniums**, producing handsome trusses of large *indigo-blue* flowers, h.p., 5 ft. 1 0
 704 **Lavanda**, producing handsome spikes of double *rosy lavender* flowers with small *white* centre, very distinct, 5 ft. AWARD OF MERIT R.H.S. 2 6
 705 **Miss Britton**, flowers *cobalt-blue* overlaid with *mauve*, very fine, h.p., 6 ft. 6d. & 1 0

- 706 **Mrs. Creighton**, semi-double flowers, outer petals *cobalt-blue*, inner petals *plum*, very rich and showy colours, 5 ft. AWARD OF MERIT, R.H.S. 1 0
 707 **Queen Mary**, flowers large, of a delightful *silvery blue* with *white* centre, h.p., 4 ft. 2 6
 708 **Rev. E. Lascelles**, producing handsome spikes of large double *deep blue* flowers, the centre florets being *snowy white* edged *blue*, h.p., 5 ft. AWARD OF MERIT R.H.S. 2 6
 709 **grandiflorum, Azure Fairy**, a lovely little graceful plant with flowers of a charming *light azure-blue*, h.p., 1 ft. *Seedlings raised in spring flower the same year*. 6d. & 1 0
 710 **grandiflorum, Blue Butterfly, Improved**, an elegant plant of branching habit, flowers *deep Gentian blue* with brown spot on each petal, h.p., 1½ ft. AWARD OF MERIT R.H.S. 1 0
 711 **cardinale, the Scarlet Biennial Larkspur**, a graceful border plant of branching growth, bright *scarlet* flowers in summer, h.b., 3 ft. 1 6
 712 **nudicaule**, a fine dwarf plant bearing profusely showy *orange-scarlet* flowers, delighting in sunny situations on borders and rockwork, h.p., 15 in. *Seedlings flower the first season* 1 0

For beautiful new varieties, see Novelty List, page 37.

DIANTHUS (*Annual Pinks*), *Nat. Ord.*

Caryophyllaceae. **Hardy Annual**.

These are most decorative border annuals, and their brilliant colours render them indispensable for summer bedding and cutting. They all sport a little. Sow in spring and early autumn.

Heddewigii Single (Japanese Pinks).

DIANTHUS HEDDEWIGII.

- 713 **Barr's Extra Choice mixed**, rich and brilliant colours, flowers large and handsome with broad petals beautifully marked. In beds and borders they give a most brilliant effect, 1 ft. 6d. & 1 0
 714 **Salmon Queen**, beautiful large flowers, *brilliant madder-rose*, elegantly fringed, 1 ft. 0 6
 715 **Vesuvius**, large single fringed flowers, *rosy scarlet* to *glowing orange*, ¾ ft. 0 6
 716 **Barr's New Giant Strain**, giant single flowers with broad petals, *brilliant velvety crimson*, *blood-red*, *rose* and *white*, large *velvety crimson* centres, very handsome, 15 in. 6d. & 1 0

DIANTH'US—continued.

ERYS'IMUM, *Nat. Ord. Cruciferae*. **Hardy Annuals and Perennial.**

Handsome showy border and rock plants, much resembling Wallflowers, flowering in spring.

755	<i>arkansanum</i> (The Western Wallflower), fine showy <i>bright yellow</i> flowers, h.a., 1 ft.	0 6
	<i>linifolium</i> , <i>see Cheiranthus</i> , page 57.	
756	<i>Perofskianum</i> , flowers fragrant, <i>brilliant orange</i> , very showy in beds, borders, and on rockwork, h.a., $1\frac{1}{2}$ ft.	0 6
757	<i>rupestre</i> (The Fairy Wallflower), a charming dwarf perennial bearing a profusion of <i>lemon-yellow</i> flowers in early spring; for dry sunny spots on rockwork, etc., h.p., $\frac{1}{2}$ ft... ..	0 6

ESCHSCHOLT'ZIA, *Nat. Ord. Papaveraceae*. **Hardy Annual.**

Brilliantly coloured flowers, producing a striking effect in beds and borders. Sow in spring for summer flowering, and in August and Sept. for decoration early the following summer. A charming effect is obtained by associating these Eschscholtzias with the blue *Nigella*. They have the advantage of thriving on dry stony soils where few other plants will grow.

758	<i>californica</i> (Yellow Californian Poppy), flowers <i>clear yellow</i> , with <i>orange</i> centre, 1 ft...4d. &	0 6
759	<i>Golden Beauty</i> , flowers <i>rich golden</i> colour, shaded inside <i>orange</i> , petals prettily fluted, 15 in.	1 0
760	<i>Golden West</i> , having glaucous foliage and large <i>soft yellow</i> flowers, with a <i>deep orange</i> blotch at base of each petal, beautiful, 1 ft. HIGHLY COMMENDED R.H.S.	0 6
761	<i>Orange King</i> , the largest-flowered of all, with pretty glaucous foliage and <i>rich deep orange-yellow</i> blooms, very showy and handsome. HIGHLY COMMENDED R.H.S.6d. &	1 0
762	<i>Orange Queen</i> , producing about 90 per cent. of semi-double flowers of a striking <i>rich orange</i> shade, very free blooming, 1 ft.	0 6
763	<i>Chrome Queen</i> , lovely <i>soft buff-cream</i> flowers, blending well with the other colours, 1 ft... ..	0 6
764	<i>Mandarin</i> , flowers brilliant <i>bright orange</i> , outside of petals <i>bronzy red</i> , a rich handsome colour, 1 ft.	0 6
765	<i>Rose Cardinal</i> , flowers a pretty <i>dark rose</i> , inside <i>blush</i> , 1 ft.	0 6
766	<i>Mixed from above varieties</i> , very showy, 1 ft. 4d. &	0 6
	<i>Erec'ta</i> , a fine distinct strain with broad foliage and erect compact habit.	
767	„ <i>Ballet Girl</i> , producing elegantly frilled and fluted flowers, outside <i>cochineal-red</i> , inside <i>creamy white</i> , $1\frac{1}{2}$ ft.6d. &	1 0
768	„ <i>Fireflame</i> , having brilliantly coloured flowers in which <i>lemon</i> and <i>rosy crimson</i> are charmingly blended, 1 ft.6d. &	1 0
769	„ <i>Lovely</i> , flowers <i>satiny rose</i> with <i>primrose</i> centre, beautiful, 1 ft.6d. &	1 0
770	„ <i>Mandarin Improved</i> , colour very rich <i>golden-orange</i> , outside <i>orange-scarlet</i> , showy and handsome, $\frac{3}{4}$ ft.	0 6

ESCHSCHOLT'ZIA—continued.

		pkt. s. d.
771	Erec'ta <i>Mauve Beauty</i> , a lovely variety, producing deep mauve-coloured flowers, 1 ft.	1 0
772	„ <i>Mikado</i> , lustrous orange-crimson, shaded golden towards centre, very brilliant, 1 ft. AWARD OF MERIT R.H.S.	0 6
774	„ <i>Robert Gardiner</i> , flowers large and double of a brilliant orange shaded gold, petals prettily crimped and fluted, 1 ft.	6d. & 1 0
775	„ <i>Rosy Dawn</i> , flowers rich deep rose with cream centre, very beautiful, $\frac{3}{4}$ ft.	0 6
776	„ <i>Ruby-Crimson</i> , colour brilliant ruby-crimson with light centre, very brilliant and effective, 1 ft. AWARD OF MERIT R.H.S.	6d. & 1 0
778	„ <i>The Geisha</i> , flowers golden-yellow inside and glowing orange-crimson outside, producing in sunlight an effect of fire, petals prettily crimped, $\frac{3}{4}$ ft. AWARD OF MERIT R.H.S.	6d. & 1 0
780	„ <i>Winsome</i> , a very charming variety with frilled and fluted flowers of a beautiful <i>Malmaison salmon-pink</i> , 1 ft.	6d. & 1 0
781	„ <i>Mixed new hybrids</i> , flowers large and of brilliant and beautiful colours, includ- ing scarlet, coppery red, chrome, pink, claret, etc.	6d. & 1 0

See also Novelty List, page 38.

EUCALYP'TUS (Gum Tree), Nat. Ord. Myrtaceæ. Greenhouse Tree.

We offer seed of these GUM TREES as they are such very decorative pot plants when small and are easily raised from seed sown in January and February, producing by July very ornamental plants ($1\frac{1}{2}$ to 2 ft. high) for decoration of greenhouse and sitting-room or for bedding outdoors.

782	<i>amygdali'na</i> (Australian Kino Tree), a fine species, and one of the hardiest, may be planted in parks and shrubberies; foliage dark green, narrow, light and graceful.	6d. & 1 0
783	<i>citriodó'ra</i> (The Lemon-scented Gum), foliage dark green with a pleasant lemon fragrance; prized as a pot plant	1 0
784	<i>corda'ta</i> (The Silver-leaved Iron Bark Tree), very lovely species of light graceful habit, small rounded glaucous foliage covered with a whitish farina; strongly recommended as a pot plant or for bedding out.	1s. & 1 6
785	<i>ficifol'ia</i> (The Scarlet-flowered Gum), a grand variety for the conservatory, and the handsomest of all, bearing fiery scarlet flowers while still young	2 6
786	<i>glob'ulus</i> (The Blue Gum), fine pot-plant for greenhouse or for sub-tropical gardening	0 6
787	<i>Gun'ni</i> (The Tasmanian Cider Tree), forming a very elegant bush or small tree; foliage round (when young), dark green with silvery under-surface, almost hardy; it makes a charming pot-plant in its young state, and is valuable for bedding out.	6d. & 1 0

EUCHARID'UM, Nat. Ord. Onagraceæ. Hardy Annual.

788	<i>Brewer'ii</i> , a charming annual for flower beds and borders, blooming early from seed, flowers of elegant form, fragrant, and of a beautiful light rose, $\frac{1}{2}$ ft.	0 6
-----	---	-----

EUTO'CA, Nat. Ord. Hydrophyllacæ. Hardy Annual.

789	<i>vis'cida</i> , a lovely little plant with intense brilliant blue flowers, exceedingly effective in beds and borders, and a good bee flower, 1 ft.	4d. & 0 6
-----	--	-----------

EVERLASTINGS. See *Helichrysum*, p. 66.FLAX. See *Linum*. FORGET-ME-NOT. See *Myosotis*.FOXGLOVE. See *Digitalis*.

FUCH'SIA, Nat. Ord. Onagraceæ. Half-hardy Shrub.

790	Choice mixed varieties, saved from the newest and best single and double varieties. Seedlings raised early will bloom profusely the same season.	2 6
-----	--	-----

GAILLAR'DIA, Nat. Ord. Compositæ. Perennials and Annuals.

791	<i>grandifló'ra</i> , Barr's Extra Selected Large-flowered Hybrids, mixed, grand border plants, with large gorgeously coloured flowers, valued for cutting, h.p., 2 ft.	1 0
792	„ <i>“Dazzler,”</i> a grand border plant, very large flowers often 4 to 5 inches across, bright golden with rich maroon-red centre, very handsome, h.p.	1 0
793	„ choice mixed hybrids, from a fine named collection, h.p., 2 ft.	0 6
794	Choice mixed annual varieties, very showy, h.h.a., $1\frac{1}{2}$ ft.	4d. & 0 6

See also Novelty List, page 38.

GENISTA (Hardy Brooms). See *Cytisus*.

GENTIA'NA (The Gentian), Nat. Ord. Gentianaceæ. Alpine Perennial.

These lovely hardy alpine should have a place in all borders and rock gardens. Their shades of blue surpass in beauty and brilliancy those found in almost any other family of plants.

795	<i>acau'lis</i> (Gentianella), large intense deep blue flowers in spring and summer, 3 in.	0 6
796	<i>asclepiad'ea</i> (The Willow Gentian), a very handsome plant, producing long leafy stems well furnished late in summer with attractive purple-blue flowers all up the stem, 2 ft.	0 6
797	<i>crucia'ta</i> (Crosswort), producing whorls of dark vivid blue flowers, $\frac{3}{4}$ ft.	0 6
798	<i>Freynia'na</i> , a fine species after the style of <i>G. septemfida</i> , producing in late summer ter- minal clusters of intense indigo-blue flowers, 1 ft.	2 6

Lupinus Hybrids, beautiful Hardy Perennials, the result of crossing and intercrossing

LUPINUS POLYPHYLLUS and LUPINUS ARBOREUS VARIETIES, combining in many instances the characteristics of each parent. They are all very free-flowering and make valuable border plants. For these hybrids we have received an AWARD OF MERIT by the Royal Horticultural Society and the GOLD MEDAL OF THE NATIONAL HARDY PLANT SOCIETY. Only a proportion of the seedlings come true to type, but the sports are all charming and many new varieties may be selected out as being distinct.

LUPINUS HYBRIDS.

960	1 pkt. each of 12 beautiful hybrids.....	5s. 6d.	—
961	1 pkt. each of 18 beautiful hybrids.....	7s. 6d.	—
962	Barr's New Hybrid White Strain , of more branching habit than the polyphyllus type and having long sprays of <i>pure white</i> flowers which remain long in bloom...	6d. &	1 0
963	Angela (new) , flowers <i>rose-pink</i> and <i>amber</i> , passing off <i>cream</i>		1 6
964	Athene (new) , <i>deep gold</i> shading to <i>rosy purple</i> , lower petals shaded <i>rosy mauve</i>		1 0
965	Bacchus (new) , flowers <i>straw-colour</i> flushed <i>rose</i> , passing to <i>purplish rose</i> with <i>rose-coloured</i> upper petals	6d. &	1 0
966	Bulstrode (new) , a very attractive and distinct variety, buds <i>rosy mauve</i> , lower petals <i>slate-blue</i> , upper petals <i>old gold</i> , spike 1½ ft. long. 3 ft.....		1 6
967	Chameleon , flowers <i>blue</i> and <i>primrose</i> changing to <i>blue</i> and <i>white</i> , long spikes, attractive, 4½ ft.....	6d. &	1 0
968	Cream Beauty (new) , flowers of a charming <i>cream</i> colour		1 0
969	Downers Delight , producing beautiful large spikes of <i>deep rose</i> flowers, assuming a darker tint with age, 3 ft. AWARD OF MERIT, R.H.S.		1 0
970	Eastern Queen , (<i>syn.</i> EVENING GLOW), producing from May to August long spikes of beautiful flowers, opening <i>mauve</i> and <i>yellow</i> and passing to <i>rosy buff</i> and <i>fawn</i> , 4 ft.....	6d. &	1 0

MATTHIOLA, Nat. Ord. Cruciferae. Fragrant Hardy Annual.

- 1027 *bicornis* (Night-Scented Stock), the flowers emit in the morning, evening, and after a shower a delicious perfume perceptible at a considerable distance, h.a., 1 ft. The seed should be scattered freely about the garden, as done with Mignonette.....per oz. 2s. 6d. 0 6

MECONOPSIS INTEGRIFOLIA MAXIMA.

MECONOPSIS, Nat. Ord. Papaveraceae.
Hardy Biennials and Perennials.

- 1029 *integrifolia maxima*, a splendid variety of the Giant Yellow Poppy from Tibet, forming a rosette of glaucous hairy foliage from the midst of which rises a bold stem carrying up to 30 very large globular lemon-yellow flowers, about three times the size of the old *M. integrifolia*, h.b., 2½ to 3 ft. FIRST CLASS CERTIFICATE R.H.S. It is a self-seeder and thrives best in a fairly moist but well-drained soil..... 2 6
- 1030 *latifolia*, producing an abundance of lovely pale lavender flowers with crinkled petals and golden stamens, having ornamental hairy foliage, self-seeder, h.p., 15 in. It likes a dry bank or nook on rocky..... 2 6
- 1031 *nepalensis*, a rare and beautiful Himalayan species with claret-coloured flowers, h.b., 3 to 4 ft.; it thrives in cool, shady, moist spots..... 2 6
- 1032 *paniculata*, true (The Sulphur-coloured Himalayan Poppy), a striking and beautiful plant of stately appearance and bearing large pale yellow flowers, h.b., 4 ft.....1s. 6d. & 2 6
- 1033 *Prattii*, one of the best of the Blue Poppies; a lovely plant producing from a tuft of foliage stems clothed all the way up with smallish flowers deep sky-blue with white anthers, thriving in a well-drained but dampish soil, h.b., 15 in. 1s. 6d. & 2 6
- 1034 " *alba*, a rare and attractive pure white variety of the blue *M. Prattii*, reproducing itself true from seed, h.b., 15 in..... 3 6
- 1035 *pseudo-integrifolia*, flowers lemon-yellow, a little smaller than those of *M. integrifolia*, but erect and borne at top of stems..... 2 6
- 1036 *racemosa*, a lovely poppy from Tibet, producing a rosette of narrow hairy foliage, from which rises a stem bearing racemes of large flowers, deep blue to mauve, h.b., 15 in.... 1 6
- 1037 *rigidiuscula*, resembling the beautiful *M. Prattii*, but a stronger and taller grower, h.b., 15 in.....1s. 6d. & 2 6
- 1038 *rudis*, flowers a lovely satiny lilac shaded purple towards centre, anthers white, h.b., 15 in. 1 6
- 1039 *simplicifolia*, Bailey's Variety, a lovely species, producing from a tuft of foliage stems bearing large solitary flowers of a glorious light peacock-blue, tinted rosy purple at base, h.b., 2 ft.; it likes a rather damp situation, but a well-drained soil..... 2 6
- 1040 *simplicifolia*, Perennial Variety, a very beautiful species with handsome purple flowers, h.p., 2 ft.; it likes a well-drained soil in a rather damp situation, rare..... 3 6
- 1041 *Wallichii* (The Blue Himalayan Poppy), one of the MOST STATELY OF POPPIES bearing large handsome saucer-shaped flowers, pale blue with golden stamens, self-seeder, 4 to 5 ft. It thrives best in a cool, moist, shady situation, in rough peaty soil, h.b.....1s. & 1 6
- 1042 *cambrica auran tiaca*, a variety of Welsh Poppy, bearing mostly rich orange flowers, very attractive: a charming little plant for old walls and rockwork, h.p., 1 ft..... 1 0
- 1043 " *fl. pl.* (The Double Welsh Poppy), saved from yellow and orange double flowers, very pretty, h.p., 1 ft..... 1 0

See also Novelty List, page 39.

MESEMBRYANTHEMUM.

MESEMBRYANTH'EMUM, Nat. Ord. *Ficoideae*.

Half-hardy Annual.

pkt.
s. d.

- 1044 **tri'color**, a lovely little annual for sunny banks and warm nooks on rockwork, having daisy-like *rose-carmine* flowers with *purple-crimson* centre, 3 in..... 0 6

crystallinum. See *Ice Plant*.**MIGNONETTE (Reseda), Nat. Ord. *Resedaceae*. Fragrant Hardy Annual.**

Seed should be scattered freely in flower and shrubby borders, also on dry banks, old walls, margins of gravel paths, close to the wall of the house, and in any dry sunny situations.

- 1045 **Barr's Covent Garden Favourite**, bushy plants, well furnished with bold flower-heads, richly scented; one of the best for pot culture, 1 ft.....per oz., 3s. 6d.; 6d. & 1 0
- 1046 **Barr's New Red**, of compact growth, large handsome heads of *coppery red* flowers, richly scented, very attractive, $\frac{3}{4}$ ft..... 1 0
- 1047 **Machet Improved**, large heads of good colour, plants dwarf, robust, and compact, $\frac{3}{4}$ ft..6d. & 1 0
- 1048 „ **Golden King**, bearing massive heads of *orange-coloured* flowers, very fine, $\frac{3}{4}$ ft..... 1 0
- 1049 „ **White Pearl**, producing large compact flower-heads, mostly *pearly white*, sometimes showing *red* stamens, which render them still more attractive, 1 ft...6d. & 1 0
- 1050 **Golden Goliath**, a very fine new variety with *deep golden-yellow* spikes of immense size, very striking, $\frac{3}{4}$ ft..... 1 6
- 1051 **Orange Queen**, producing handsome heads of richly scented *deep brick-red* flowers of sturdy compact habit, 10 in.....6d. & 1 0
- 1052 **Common Mignonette, Improved**, sweet-scented, 1 ft.....per oz., 9d.; 4d. & 0 6

MIM'ULUS (Monkey-flower), Nat. Ord. *Scrophulariaceae*. Hardy Perennial.

Splendid plants for the conservatory, sitting-room, or outdoors (in warm, shady, damp situations).

- 1053 **Barr's Giant Strain**, flowers of large size and brilliant colours, richly tiger-spotted, $\frac{3}{4}$ ft.6d. & 1 0
- 1054 **Fine Mixed**, containing many beautiful colours, $\frac{3}{4}$ ft.....4d. & 0 6

MUSK-PLANT, Nat. Ord. *Scrophulariaceae*. Hardy Perennial.

- 1055 **Musk-Plant (*Mimulus moschatus*)**, bearing an abundance of flowers, larger than those of the type; recommended for pots, window-boxes, etc., $\frac{1}{2}$ ft.....6d. & 1 0

MYOSO'TIS (Forget-me-not), Nat. Ord. *Boraginaceae*. Hardy Perennial.

M. sylvatica and its varieties should be largely used for naturalising along woodland walks, in copses, wild gardens, etc., and especially in semi-damp situations. For very early flowering *M. dissitiflora* and *M. Star of Love* are recommended. *M. palustris* and its varieties flower throughout summer in damp and shady situations. All Forget-me-nots, if potted up in autumn and kept under glass, flower throughout the winter.

- 1056 **azo'rica**, a very beautiful Forget-me-not from the Azores, of close compact habit and flowers of a beautiful *violet-blue* with dark crimson shading towards centre, $\frac{1}{2}$ foot. This beautiful species may be grown in pots in a half-damp peaty soil or out of doors in a sheltered spot in dampish peat and half shade..... 1 6
- 1057 **dissitifo'ra**, of free graceful habit, flowers large, *bright Cambridge-blue*, early, $\frac{3}{4}$ ft.....6d. & 1 0

MYOSOTIS, BARR'S BLUE KING.

- 1058 **Star of Love**, a beautiful hybrid flowering soon from seed, and forming compact spreading tufts covered with large *bright sky-blue* flowers; specially suitable for edgings or pot-culture, 4 in. 1 0

sylvat'ica (The Wood or Sub-Alpine Forget-me-Not). Should be sown freely along woodland walks, in copses, etc., and especially in semi-damp situations.

- 1059 „ **Barr's "Blue King,"** one of the *richest and deepest blue* Alpine Forget-me-nots, flowers large and beautiful; of fine compact habit, 1 ft.....6d. & 1 0
- 1060 „ **Barr's Dwarf Blue Bedder**, a most valuable dwarf free-flowering variety for edgings and front of borders, of spreading habit, plants smothered in *brilliant blue* flowers, ht. 6 in.....6d. & 1 0
- 1061 „ **Barr's Rosy Gem**, compact little bushes well furnished with clusters of *rose-pink* flowers, valuable to associate with *BLUE KING*, $\frac{3}{4}$ ft.....6d. & 1 0

- 1062 ***sylvat'ica* White Lady**, very beautiful, covered with clusters of *white* flowers having a small striking *yellow* eye, valuable to associate with *BLUE KING*, 10 in..... 6d. & 1 0

MYOSOTIS—continued.

Marsh Forget-me-Nots.

		pkt.	s.	d.
1063	palustris grandiflora , a large-flowered variety of the MARSH FORGET-ME-NOT , flowers a beautiful <i>bright blue</i> with <i>yellow</i> eye; a charming plant to naturalise in damp places, such as the side of watercourses, etc., $\frac{3}{4}$ ft.....	6d.	1	0
1064	semperflorans , a dwarfier variety with <i>bright blue</i> flowers, remarkable for its long period of flowering, $\frac{1}{2}$ ft.....	6d.	1	0

See also Novelty List, page 40.

NASTURTIUM, Tom Thumb, Nat. Ord. Geraniaceæ. Hardy Annual.

Few summer-flowering plants can surpass the **Nasturtium** in brilliancy of colour and profusion of bloom. They should be given a dry poor soil, as on a rich or manured ground they are inclined to run to leaf; in such cases lime rubbish should be mixed with the soil. To those who have no glass Nasturtiums are a boon in case of deficiency or failure of "bedding plants." **The sorts we enumerate are the most decorative and beautiful.**

Our Nasturtium Seeds are all specially cleaned ready for sowing.

1065	Beauty of Malvern , specially selected, a remarkably fine variety, plants of dwarf compact habit covered with flowers thrown well above the foliage, colour very brilliant, glowing <i>vermilion-scarlet</i> , wonderfully effective, free-flowering, $\frac{3}{4}$ ft.....	per oz. 2s. 6d.; 6d.	1	0
1066	Scarlet King , Barr's Selected, flowers <i>intense scarlet</i> , 1 ft.....	per oz. 1s. 6d.; 4d.	0	6
1067	Golden King , Barr's Selected, flowers <i>brilliant golden-yellow</i> , 1 ft.....	per oz. 1s. 6d.; 4d.	0	6
1068	Empress of India , Barr's Selected, flowers <i>rich velvety crimson-scarlet</i> , profusely covering a compact bushy plant, <i>rich dark</i> foliage, 1 ft.....	per oz. 1s. 6d.; 4d.	0	6
1069	Aurora , <i>rosy apricot-coloured</i> flowers with <i>crimson</i> blotch, 1 ft.....	per oz. 1s. 6d.; 4d.	0	6
1070	Bronze , flowers of a curious <i>coppery buff</i> or <i>bronze</i> colour, 1 ft.....	per oz. 1s. 6d.; 4d.	0	6
1071	Fireball , flowers <i>rich orange-scarlet</i> , foliage <i>dark green</i> , a wonderfully showy variety, producing a brilliant effect in the garden, 1 ft. AWARD OF MERIT, R.H.S.....	6d.	1	0
1072	Pearl , flowers <i>creamy white</i> to a beautiful <i>pale chrome-yellow</i> , 1 ft.....	per oz. 1s. 6d.; 4d.	0	6
1073	Ruby King , Barr's Selected, flowers a charming <i>ruby-rose</i> , 1 ft.....	per oz. 1s. 6d.; 4d.	0	6
1074	Rudolph Virchow , flowers large, <i>brilliant cerise</i> , a very telling colour in the flower border; a few sports may appear, but these can easily be pulled up, 1 ft.....	6d.	1	0
1075	Choice Mixed , specially made up from the <i>finest</i> showy varieties, 1 ft...per oz.	1s. 6d.; 4d.	0	6
1076	Fine Mixed , all colours, a good mixture, 1 ft.....	per oz. 1s.	0	4
1077	Liliput , Mixed, compact little bushes covered with small flowers of brilliant colours, $\frac{1}{2}$ ft.	0	6	
1078	Queen of Tom Thumbs , a dainty little Nasturtium, with pretty <i>silver-variegated</i> foliage, and small <i>velvety maroon-crimson</i> flowers, 10 in. Grow on poor light soil to obtain variegation.....	6d.	1	0
1079	Rosy Scarlet , remarkably showy, with beautiful <i>silver-variegated</i> foliage and <i>bright rosy scarlet</i> flowers, $\frac{3}{4}$ ft.....	6d.	1	0
1080	Choice Mixed , having <i>silver-variegated</i> foliage and flowers of various bright colours, 10 in.....	6d.	1	0

NASTURTIUM, Climbing, Nat. Ord. Geraniaceæ. Hardy Annual Climber.

1081	Collection, 1 packet each of 6 beautiful colours.....	2s.	—			
1082	Scarlet.....per oz. 10d. ; pkt. 4d.	1087	Nankeen-yellow.....per oz. 10d.	0	4

1091	Variegated-leaved Climbing, Mixed, foliage blotched <i>cream</i> , flowers <i>crimson, scarlet, yellow</i> , etc., grow on a poor light soil to obtain a good variegation of the foliage.....	6d. &			1	0
1092	Ivy-leaved Climbing, Princess Juliana, a very distinct and pretty variety, with <i>very dark green</i> Ivy-shaped foliage and <i>bright yellow</i> flowers with <i>crimson</i> blotch and fringed petals.....	6d. &			1	0

NEMESIA, Nat. Ord. Scrophulariaceæ. Half-hardy Annual.

1093	Blue Gem , one of the most lovely little plants for edgings, small beds, or massing along the front of borders and as a groundwork for Rose beds; the flowers are of a delightful <i>soft azure-blue</i> , $\frac{3}{4}$ ft. Mr. William Robinson, writing from Gravetye, says: "No Gentian of the Alps, given the best of rock gardens, could do so much for garden beauty."...6d. &	1	0
1094	strumo'sa Aurora , a very striking and decorative variety, producing compact little plants $\frac{3}{4}$ ft. high, lower petals <i>white</i> , upper petals <i>blood-red</i>	1	0
1095	strumo'sa Orange Prince , producing flowers of a very brilliant colour, varying from <i>rich orange</i> to deep gold.....	1	6
1096	strumo'sa Sutto'ni , flowers large, of brilliant varied colours— <i>blood-red, scarlet, fiery orange, yellow, carmine, rose, pink, and purple</i> , some beautifully spotted and blotched; a lovely plant for flower beds and borders or pot culture, 15 in. Seedlings of spring flower from June to September. HIGHLY COMMENDED, R.H.S., 1926.....6d. &	1	0

NEMESIA—continued.

- 1097 **strumosa**, Barr's New Dwarf Hybrids, flowers large and of brilliant colours—*vivid red, vermilion, orange-scarlet, brilliant rose, purple, etc.*, producing a splendid effect in flower beds and borders from summer to autumn, $\frac{3}{4}$ ft. **HIGHLY COMMENDED**, R.H.S., 1926ls. & 1 6

NEMOPHILA, *Nat. Ord. Hydrophyllaceae*. Hardy Annual.

- 1098 **atomaria** Blue Bell, flowers *ultramarine-blue* with *white* throat, 6 in..... 0 6
- 1099 **insignis grandiflora**, large flowers, of a *clear light blue* with *white* centre, the favourite variety for beds, ribbons, and borders, very effective, $\frac{3}{4}$ ft.....4d. & 0 6

NICOTIANA (Tobacco Plant), *Nat. Ord. Solanaceae*. Half-hardy Annual.

These Tobacco plants are prized for their flowers and can be recommended as greenhouse plants, also for summer borders outdoors. *Raise in heat in spring and plant out in May.*

- 1100 **affinis**, large *pure white* flowers, deliciously scented, a valuable pot plant, 3 ft.....6d. & 1 0
- 1101 **Sand'erae**, of elegant branching habit, bearing on light graceful stems beautiful *rosy carmine* flowers; a valuable border plant, remaining decorative summer to autumn, 2 ft.....6d. & 1 0

NIGELLA MISS JEKYLL.

- 1102 **Sand'erae** Crimson King, flowers *rich dark ruby*, handsome, 2 ft.6d. & 1 0
- 1103 **Sand'erae**, mixed hybrids, flowers *crimson, rose, flesh-colour, etc.*.....6d. & 1 0
- 1104 **sylvestris**, long tubular *white* flowers, which do not close up in the day-time, 4 ft..... 0 6

NIGELLA (Love-in-a-Mist), *Nat. Ord.**Ranunculaceae*. Hardy Annual.

Very graceful border plants, the flowers being partially hidden by the curious fine feathery *green* bracts. The curious horned seed pods are also very ornamental. A charming effect is obtained by associating NIGELLAS and ESCHSCHOLTZIAS.

- 1105 **damasce'na celesti'na**, flowers of a charming *azure*, $1\frac{1}{2}$ ft.4d. & 0 6
- 1106 **Miss Jekyll**, a lovely variety, bearing on long stems large semi-double flowers of a lovely *azure-blue*, nestling in fine feathery foliage, $1\frac{1}{2}$ ft.....6d. & 1 0
- 1107 **hispanica atro-purpurea**, large *deep purplish blue* flowers, very handsome, $1\frac{1}{2}$ ft.....4d. & 0 6
- 1108 **Fine mixed** 4d. & 0 6

ÆNOTH'ERA (Evening Primrose), *Nat. Ord. Onagraceae*. Perennials, etc.

These Evening Primroses are all very effective in beds, borders, shrubberies, or rock gardens.

- 1109 **Afterglow**, flowers *bright yellow* with *brilliant red* calyx, dark green foliage, very attractive, h.b., 3 ft..... 0 6
- 1110 **bien'nis grandiflora** (*syn. Lamarckiana*), true, the GIANT EVENING PRIMROSE, producing tall spikes of immense *bright yellow* flowers, very handsome, h.b., 5 ft..... 0 6
- 1111 **missourien'sis** (*syn. macrocarpa*), producing large *rich yellow* flowers on long trailing stems; a grand plant for front borders, banks and rockwork, h.p., $\frac{1}{2}$ ft..... 0 6
- 1112 **specio'sa**, a beautiful border plant, producing fragrant *white* flowers, prized for cutting, h.p., 2 ft.....6d. & 1 0
- 1113 **trichocalyx**, a pretty species of Evening Primrose, with silvery glaucous foliage and producing a large number of *snowy-white* flowers with *golden* anthers, and remaining open all day, a good border plant, h.b., 12—15 in..... 1 6

OMPHALODES linifolia. See *Venus Navelwort*, pages 91.

EXHIBITION PANSY.

PANSY or **HEARTSEASE** (*Viola*),*Nat. Ord. Violaceae*. Hardy Perennial.

Seed sown in winter and spring produces flowering plants for spring and summer. In order to obtain fine blooms the Pansy should be given a fairly rich and not too dry soil. During dry weather the plants must be kept well watered, and if large flowers are desired only a proportion of the shoots should be allowed to bloom, the rest being pinched back.

Show and Fancy Pansies.

- 1114 **Barr's Choicest Exhibition Pansies**, a grand strain producing large handsome flowers of the richest colours and most beautiful markings, strongly recommended, $\frac{1}{2}$ ft.....ls. 6d. & 2 6
- 1115 **Choice Fancy Strain**, a beautiful strain of fancy Pansies in the greatest variety of colour and markings, including *reds, browns, bronzes, purples, etc.*, some beautifully margined, flowers large, $\frac{1}{2}$ ft. ... 1 6

SPECIAL NOTICE

We beg to draw our customers' attention to our catalogue of
Hardy Perennials & Alpines

which will be published in February. This catalogue is carefully compiled with a view to being of assistance to the garden lover by giving many helpful cultural directions, and contains a comprehensive list of the best alpines and hardy perennials in cultivation. Our customers may rely on receiving plants of the very best quality and true to name in all cases. We have held the highest reputation during the past 68 years by strictly maintaining the quality of everything supplied.

BARR & SONS

Established 1860

PANSY—continued.

		pkt. s. d.
1116	Parisian Giant Blotched, a very fine French strain with large flowers in great variety of brilliant colours, $\frac{1}{2}$ ft.	1 0
1117	Trimardeau, Peacock, a very attractive variety, flowers of good size, upper petals blue bordered ruby, lower petals ruby-rose slightly splashed blue; all the petals have a picotee margin of silvery white, $\frac{1}{2}$ ft.	6d. & 1 0
1118	New Crimped Strain, flowers very large, with petals elegantly waved and fluted at margin, of various charming shades of colour, $\frac{1}{2}$ ft.	1s. & 1 6
1119	Fine Mixed Varieties, saved from a good variety of colours, very decorative, $\frac{1}{2}$ ft.	0 6

Fine Bedding Pansies.

The following Bedding Pansies have been specially selected as having a more fixed character than many others; but still a small percentage will sport, and it is therefore best to plant out the seedlings and select out the finest when they are in bloom for propagating purposes.

1120	Barr's Giant Yellow, flowers very large yellow with dark velvety blotches, $\frac{1}{2}$ ft.	6d. & 1 0
1121	Barr's Giant Purple, large handsome flowers, velvety violet-purple with dark blotches, $\frac{1}{2}$ ft.	6d. & 1 0
1122	Apricot Queen, flowers a lovely colour, chrome and chamois with orange-yellow eye, $\frac{1}{2}$ ft.	1 0
1123	Black King, flowers crêpe-like black, with small golden eye, $\frac{1}{2}$ ft.	0 6
1124	Golden Queen, producing large brilliant yellow flowers, a fine bedder, $\frac{1}{2}$ ft.	0 6
1125	King of the Blues, bright azure-blue with dark velvety purple blotch in centre, $\frac{1}{2}$ ft.	0 6
1126	Lord Beaconsfield, velvety purple, upper petals pale lavender shaded white, $\frac{1}{2}$ ft.	0 6
1127	Queen of Sheba, flowers very large, velvety violet-black, with small golden eye, $\frac{1}{2}$ ft.	0 6
1128	Snow Queen, pure white, a fine bedder, $\frac{1}{2}$ ft.	0 6
1129	Victoria Red, velvety ruby-crimson with dark blotch and small golden eye, very beautiful, $\frac{1}{2}$ ft.; some very pretty varieties may be selected out of this strain.	0 6
1130	Mixed from above named varieties.	6d. & 1 0

Barr's Beautiful Tufted Pansies or Bedding Violas.

These TUFTED PANSIES give a continual mass of bloom of bright and attractive colours from spring to autumn; cut back in July after the first flowers are over, the plants again burst into bloom and remain decorative for a long time. The flowers are mostly self-coloured and rayless.

We offer only a mixture as the different colours do not come true from seed.

1131	Choice Mixture, saved from various beautiful named varieties, $\frac{1}{2}$ ft.	1s. & 1 6
------	--	-----------

PAPA'VER (Poppy), Nat. Ord. Papaveraceæ. Hardy Perennials, etc.

All valuable decorative border plants, the cut flowers being prized for vases, etc.

1132	alpinum (Alpine Poppy), Mixed Colours, graceful miniature Poppies, having dainty flowers, white, rose, yellow, and orange-red; charming for rockwork, h.b., $\frac{3}{4}$ ft.	1 0
------	--	-----

PAPAVER ORIENTALE.

orientale (Giant Oriental Poppy), Beautiful Large-flowered Hybrids, grand hardy Perennial Poppies with elegant greyish foliage and very large handsome single flowers; a proportion of the named varieties may be expected to come true from seed.

1133	Barr's Mixed Hybrids, flowers blood-red, fiery scarlet, cherry-rose, silvery rosy mauve, shrimp-pink and blush colours, most of them having large black blotches, h.p., 3 to 4 ft.	6d. & 1 0
1134	Barr's White, well-formed satiny-white flowers, with purple-black blotch at base of each petal.	1 6
1135	Cerise Beauty, flowers a beautiful salmon-cerise with aglittering black blotch at base of each petal, of erect habit, 2 $\frac{1}{2}$ ft.	1 0
1136	Crimped Beauty, beautiful shade of shrimp-pink with small maroon blotch at base of petals which are daintily crimped, 2 $\frac{1}{2}$ ft.	6d. & 1 0
1137	Crimson King, producing large handsome flowers of a vivid blood-crimson with dark glossy blotches at base of petal, of erect growth, 4 ft.	AWARD OF MERIT, R.H.S. 6d. & 1 0
1138	Gerald Perry, flowers a delightful shade of soft apricot-rose; the seed produces a proportion of pretty light shades, 3 ft.	1 0
1139	King George, a very striking variety, large brilliant scarlet flowers, about 25% or more having the petals fringed like a Parrot Tulip, 2 $\frac{1}{2}$ ft.	AWARD OF MERIT R.H.S. 1 0
1140	Lord Lambourne, another beautiful variety, producing about 25% of flowers with deeply fringed petals, very large flowers, brilliant orange-scarlet with striking black blotches, 3 ft.	AWARD OF MERIT. 1 0
1141	Magog, producing immense flowers of a glowing crimson-scarlet, a very rich colour, 3 ft.	1 0
1143	Mahony, flowers a curious art shade of maroon-red with bronze flush, h.p., 2 ft.	6d. & 1 0
1144	Mrs. Harkness, flowers of great size, lovely shrimp-pink with lilac blotch on petals, h.p., 2 $\frac{1}{2}$ ft.	1 0

PAPAVER Orientale (Poppy)—continued.

		pkt. s. d.
1145	Mrs. Perry, <i>soft shrimp-pink</i> , very beautiful, h.p., 3 ft. AWARD OF MERIT R.H.S.....	1 0
1146	Mrs. Stobart, flowers an exquisite <i>rose-cerise</i> , 2½ ft. AWARD OF MERIT R.H.S.....	1 0
1147	Orange Glow, selected, flowers brilliant <i>orange-yellow</i> ; of stiff erect habit, h.p., 2 ft.....	1 0
1148	Perry's White, large handsome <i>satiny white</i> flowers with <i>purple-black</i> blotch at base of each petal, 2½ ft.....	1 6
1149	William of Orange, flowers of a <i>bright orange-yellow</i> with <i>maroon</i> blotch at base of each petal, very showy, 2½ ft.....	1 0

MUNSTEAD ICELAND POPPIES.

Papaver nudicaule varieties.

These Poppies are the perfection of grace, and it would be impossible to over-estimate their value and beauty in the rock garden and for front of borders; also charming to cut for vases. They bloom the first season from seed. Hardy biennials. (See also *Novelty List*, page 40.)

1150	Munstead Iceland Poppy, Barr's New Art Shades. Extra Selected. Producing from May to Sept. graceful satiny flowers of beautiful delicate art shades, <i>shell-pink</i> , <i>coral-rose</i> , <i>salmon</i> , <i>buff</i> , <i>pale lemon</i> , <i>yellow</i> , <i>pale orange</i> and <i>orange-red</i> , h.b., 1 ft. As cut flowers greatly prized.....	1s. & 1 6
1153	nudicaule Tangerine, a very beautiful new variety with very large single <i>orange-coloured</i> flowers, 15 in. 1s. &	1 6
1154	nudicaule Mixed, <i>yellow</i> , <i>orange</i> and <i>white</i> varieties....	0 6
1155	nudicaule Double White Queen, having beautiful double <i>pure white</i> flowers, 1 ft.	0 6

1156	nudicaule Double mixed Shades, producing about 30 to 40 per cent. of very beautiful double and semi-double flowers, <i>white</i> , <i>yellow</i> , and <i>orange-red</i> , h.b., 1 ft.....	0 6
------	--	-----

Indian Poppies, see *Meconopsis*. Annual Poppies, see page 80.

PEAS, Sweet. See *Sweet Peas*, page 88. **Everlasting Peas.**—See *Lathyrus*.**PELARGONIUM, Nat. Ord. Geraniaceae.** Greenhouse Perennial.

1157	Mixed Large-flowered Show Varieties, saved from a fine English Exhibition strain of best colours varying from <i>deep crimson</i> to <i>pure white</i> , variously blotched, 1½ ft.....	3 6
------	---	-----

PENTSTE'MON, Nat. Ord. Scrophulariaceae. Hardy & Half-hardy Perennials.

A handsome family of border plants. To cut for vases they are all valuable.

1158	Barr's New Large-flowered Varieties in Mixture, large flowers of most brilliant colours, h.h.p., 2 ft. Seedlings of early spring flower in summer and autumn.....	1s. 6d. & 2 6
1159	Fine Mixed Florists' Varieties, saved from many colours, h.h.p., 2 ft.....	6d. & 1 0
1160	barbatus coccineus (Chelone), long spikes of <i>bright coral-red</i> flowers, h.p., 3 ft.	0 6
1161	isophyllus hybridus, a cross between P. ISOPHYLLUS and the large-flowered florists' varieties; plants of light elegant growth producing a great profusion of flowers, <i>roses</i> and <i>reds</i> to <i>purple</i> , h.p., 2½ ft.	1 0

PETU'NIA, Nat. Ord. Solanaceae. Half-hardy Perennial.

For its decorative value in summer bedding the Petunia is of the greatest value; also for training on trellis work and rustic fences. As pot plants and for hanging baskets the Petunia is most valuable, continuing in bloom until late in autumn.

1162	Barr's large-flowered Single, Extra choice mixed, a fine strain with large handsome flowers, mostly flanged, and of brilliant and rich colours, 1½ ft.....	1s. & 1 6
1163	Barr's large-flowered Velvety Purple, a very fine strain with handsome <i>velvety violet-purple</i> flowers, in some cases blotched <i>white</i> , very effective, 1½ ft.....	1 6
1164	Barr's Superb Double-fringed, a very select strain producing about 40 to 60 per cent. of large double fluted and crimped flowers of beautiful varied colours, 1½ ft.....	2 6
1165	Fine mixed, saved from many beautiful colours, very decorative, 1½ ft.....	0 6

See also *Novelty List*, page 40.

Dwarf Bedding Petunias, charming for small beds and edgings.

1166	Blue Prince, flowers a beautiful <i>dark velvety violet-blue</i> , an effective bedder, ½ ft.....	1 0
1167	Rosa Bonheur, of compact and bushy growth, flowers double, <i>pure light rose</i> , a lovely little bedder, 10 in.....	1 6
1168	Rosy Morn, flowers a very lovely <i>rose</i> shading off to <i>white</i> , with <i>yellowish</i> centre, ½ ft.....	0 6

PHACEL'IA, Nat. Ord. Hydrophyllaceae. Hardy Annual.

1169	campanularia, a very beautiful annual, producing a terminal raceme of <i>intense gentian-blue</i> flowers with conspicuous <i>white</i> anthers; very effective for edgings, etc., and a charming pot-plant, 8 in.....	6d. & 1 0
1170	Parry'i, beautiful and attractive, producing freely panicles of <i>rich royal-blue</i> flowers, 8 in.	0 6

POLYANTHUS-PRIMROSE—continued.

		pkt. s. d.
1198	Blue Beauty , very beautiful strain, flowers <i>deep-violet to lavender</i> , $\frac{1}{2}$ ft.....	2s. 6d. & 3 6
1199	Munstead Giant Polyanthus-Primroses , a very robust-growing strain bearing on tall stems large flowers.....	1s.; 1s. 6d. & 2 6
1200	" " Yellow , saved only from good <i>yellow</i> s and <i>primroses</i>	1s.; 1s. 6d. & 2 6
1201	" " White , saved only from <i>pure white</i> varieties.....	1s. 6d. & 2 6
1202	The New Spetchley Strain , raised by the late Mrs. Berkeley, of Spetchley Park. The plants are dwarf and robust, covered with very large flowers ranging through a great variety of beautiful colours and art shades, $\frac{1}{2}$ ft. AWARD OF MERIT, R.H.S.....	2 6

See also **Novelty List**, page 40.

POPPY (Papaver), Nat. Ord. Papaveraceæ. Hardy Annual.

POPPY CARNATION-FLOWERED.
DOUBLE WHITE.

These favourite flowers should be largely used in flower beds and borders, shrubberies, woodlands, and for distant effect generally.

POPPY CARNATION-FLOWERED.
DOUBLE WHITE.

1203	Barr's Scarlet King , large double flowers, <i>brilliant deep scarlet</i> , 2½ ft.....	0 6
1204	Barr's White Colossal , a grand Poppy with massive <i>snowy white</i> double flowers, 2½ ft. HIGHLY COMMENDED R.H.S.....	6d. & 1 0
1205	Barr's Rose Brilliant , a lovely variety, with large double <i>soft salmon-rose</i> flowers, 2 ft.....	6d. & 1 0
1206	Barr's White King , very large single flowers, <i>snowy white</i> , with elegantly fluted petals, 5 ft.....	6d. & 1 0
1207	Burbank's Silver Lining , a beautiful variety with <i>brilliant red</i> flowers, each petal having a <i>black blotch</i> with a <i>white veil-like</i> covering, 15 in.....	6d. & 1 0

MIXED FLOWER SEEDS for Naturalisation, containing a large assortment of *Annuals* and *Perennials*, dwarf and tall, for naturalising in WOODLANDS, WILDERNESSES, on RAILWAY EMBANKMENTS, HEDGEROWS, MOORS and HEATHS, or wherever it is desired to *naturalise a flora*. (The mixture is quite unsuitable for the flower garden.) For a SUMMER AND AUTUMN DISPLAY, sow March, April, and May, at the rate of six to seven pounds per acre; sow the seed thinly in isolated patches here and there, covering with a little soil, then tread or roll the ground. The seed should not be scattered amongst long grass, but in such places patches should be specially cleared for sowing. For a SPRING AND EARLY SUMMER DISPLAY sow in August or September.

per oz. 4d.; per lb. 4s. 6d.

MIXED ORNAMENTAL GRASSES for Naturalisation, containing a large assortment of beautiful grasses. Suitable for the same purpose as the Mixed Flower Seeds. A GARDEN OF ORNAMENTAL GRASSES is an object of great beauty.....per oz. 2s.

For many fine Novelties and Specialities in Flower Seeds, see pp. 35 to 42.

For Supplementary List of Seeds of many beautiful and interesting Plants, see page 43.

XL-ALL Fumigating Shreds. No apparatus required for burning; in boxes, for 1,000 cubic feet, 1/-; 2,500 cubic feet, 1/6; 5,000 cubic feet, 2/9; 10,000 cubic feet, 4/6.

FUMIGATORS (complete with lamp), for vaporising the XL-All Compounds, small size for 1,000 to 2,000 cubic feet, 2/6 each; for 5,000 cubic feet, 3/- each. Spare glass lamps, 1/- and 1/3 each.

MANURES, SOILS, FIBRE, AND CHARCOAL.

“PHYTOBROMA,” Barr's Complete Plant Food for Flowers, Vegetables, and Fruit.

We can confidently recommend this manure to our customers as a valuable food for all kinds of plants, being rich in those chemical properties essential to the health and productiveness of vegetable life. It is composed of suitable quantities of Sulphate of Ammonia, Sulphate of Potash, Steamed Bone Flour, and Superphosphate of Lime, thus giving a proper proportion of phosphates and potash salts, together with the necessary nitrates in a form immediately available to the plant; the ingredients used are all of the finest quality, and consequently it gives better results and is more economical in use than lower grade compounds. *Further particulars, with directions for use, sent on application.* Net prices: per 2 lb. carton, 1/3; 7 lb., 3/-; 14 lb., 5/6; 28 lb., 10/-; 56 lb., 19/-; 112 lb., 36/-. (Prepaid Orders for 56 lbs. and upwards sent carriage paid.)

LAWN PHYTOBROMA,” Barr's Special Manure for Lawns, Tennis Courts, Bowling Greens, Golf Links, Cricket Grounds, and all Grasslands. Confidently recommended for all grasslands; very economical in use, a small quantity only being required at each application. *Full particulars on application.* (Prepaid Orders for 56 lbs. and upwards sent carriage paid.)

Net prices: per 2 lb. carton, 1/4; 7 lb., 3/3; 14 lb., 6/-; 28 lb., 10/6; 56 lb., 20/-; 112 lb., 38/-.

Basic Slag, finest quality, 14 lb., 1/9; 28 lb., 3/-; 56 lb., 5/6; per cwt., 10/6.

Bone Flour, best quality, 7 lb., 1/9; 14 lb., 3/6; 28 lb., 6/6; 56 lb., 12/-; per cwt., 22/6.

Bone Meal, best quality, 7 lb., 1/9; 14 lb., 3/6; 28 lb., 6/6; 56 lb., 12/-; per cwt., 22/6.

„ „ ½ inch Crushed Bones, 7 lb., 2/-; 14 lb., 3/9; 28 lb., 6/9; 56 lb., 13/-; per cwt., 25/-.

Clay's Fertiliser, tins, 10d. & 1/6; bags, 7 lb., 3/6; 14 lb., 6/-; 28 lb., 10/-; 56 lb., 18/-; 1 cwt., 32/-.

Hop Manure (Wakeley's), in bags of about 1 bushel, 3/-; about 4 bushels, 7/-.

Kainit, 7 lb., 1/-; 14 lb., 1/9; 28 lb., 3/-; 56 lb., 4/6; per cwt., 7/6.

LIME—Most soils are benefited by an occasional dressing of lime, at the rate of about ½ lb. to the square yard, raked into the surface soil; a dressing is specially recommended 3 or 4 weeks before the application of artificial manures.

Hydrated Lime, a very finely prepared lime, which may be applied at any time of the year; recommended for *medium and heavy soils*, per cwt., 12/6; 56 lbs., 6/6; 28 lbs., 3/6; 14 lbs., 2/-.

Ground Quick Lime, recommended for cleaning vacant ground and for general application of lime to *medium and heavy soils*, per cwt., 10/6; 56 lbs., 5/6; 28 lbs., 3/-; 14 lbs., 1/9.

Carbonate of Lime (finely ground chalk), slower in action than either of the above caustic limes, recommended for *light sandy soils*, per cwt., 10/6; 56 lbs., 5/6; 28 lbs., 3/-; 14 lbs., 1/9.

Mortar Rubble, Genuine Old Screened Mortar Rubble, per bushel, 5/-.

Manure, Well-rotted Horse Manure, per 2 bushel bag, 4/6 (bags free).

„ **Well-rotted Cow Manure,** per bushel bag, 3/6; 2 bushel bag, 5/6 (bags free).

Muriate of Potash, 7 lb., 2/-; 14 lb., 3/9; 28 lb., 6/9; 56 lb., 13/-; per cwt., 25/-.

x Poisonous preparations can only be supplied to our regular customers or by special introduction.

MANURES, SOILS, ETC.—continued.

Nitrate of Soda, per 7 lb., 2/6; 14 lb., 4/6; 28 lb., 8/6; 56 lb., 16/-; per cwt., 30/-.
 Sulphate of Ammonia, 7 lb., 2/6; 14 lb., 4/6; 28 lb., 8/6; 56 lb., 16/-; per cwt., 30/-.
 Sulphate of Iron, 7 lb., 2/-; 14 lb., 3/9; 28 lb., 6/9; 56 lb., 13/-; per cwt., 25/-.
 Sulphate of Potash, 7 lb., 2/6; 14 lb., 4/6; 28 lb., 8/6; 56 lb., 16/-; per cwt., 30/-.
 Superphosphate of Lime, per 7 lb., 1/3; 14 lb., 2/-; 28 lb., 3/9; 56 lb., 6/9; per cwt., 12/6.
