Special Notice to Market Gardeners

We sell to Market Gardeners, Truckers and Farmers' Clubs at special wholesale rates, and solicit your inquiries for close prices on round lots.

To Our Friends And Customers

It has always been our aim to keep abreast of time and to adapt our organization and methods of business to the ever changing needs of the farmers and growers. We pride ourselves on being permitted to conduct one of the oldest **SEED HOUSES** in the State, and in placing our services at the disposal of our customers. We do so with confidence in our ability to give every satisfaction.

Sincerely,

Wilson S. Brower

Etoile de France. Crimson Red.
Francis Scot Key. Deep even Red.
George C. Waud. Orange red Vermillion.

Lady Alice Stanley. Carol Pale Flesh Pink.
Los Angeles. Luminous Flame Yellow Pink.
Madam Butterfly. Yellow Pink.
Madam Jules Bouche. Pearly White.
Radianee. Light Silvery Flesh Pink.

Get Our List of Over 50 Varieties to Choose From

GLADIOLUS

Alice Tiplady. A splendid bright orange saffron, good, large flowers.

America. Color, soft lavender-pink. More flowers are open at one time on the symmetrical spike of this Gladiolus than any other.

Baron J. Hulot. The best deep blue; deep violet-blue with many open flowers on tall spike.

Empress of India. Deep burnt lake, shading to a Bordeaux. Lower petals are Bordeaux red and have a white stripe in center and a white carmine throat.

Halley. Salmon pink with a slight tinge of rose. Creamy blotch on lower petals with bright red stripe through center.

Le Marshall Foch. Very pale pink, self-color except for small old rose stripe on lower petals.

Niagara. Primrose-yellow striped and splashed with bright pink. Large flowers on good strong spike. A favorite sort.

Mrs. Francis King. Jasper red, lower petals splashed deeper red, throat lighted.

Peace. White with pale violet feathering on lower petals. Very large flowers well placed on a tall graceful spike. Should be planted early.

Panama. Rich rosy pink. Large fine flowers.

Schwaben. Very vigorous and free flowering. Color clear, canary-yellow shading to sulphury yellow when open.

Independence. Salmon shading to yellow.

Mary Pickford. An extraordinary flower of the most delicate white with throat of soft sulphur yellow.

War. A magnificent, dark variety with tall spikes well filled with large flowers of a rich blood red shaded with crimson black.

We Carry Many Other Varieties Not Mentioned Here

Glorious Cannas

**Most Popular and
Brilliant of All
Summer
Bedding Plants**

Red Shades with Green Foliage

THE PRESIDENT. The finest red Canna, enormous individual flowers.

MADAM CROZY. Vermillion scarlet with narrow edge of bright yellow, 3½ feet.

Yellow Shades with Green Foliage

HUNGARIA. Most popular pink variety, large flowers of deep rose borne on enormous trusses, height 3½ feet.

ORANGE BEDDER. Beautiful bright orange, suffused with scarlet, very attractive.

Pink Shades with Green Foliage

MRS. ALFRED CONARD.

Very fine salmon pink. Well formed truss, 4 feet.

Bronze Leaved Varieties

BRONZE FOLIAGE YELLOW KING HUMBERT.

Another beautiful sport of King Humbert with all of its fine qualities. Light bronze foliage with large orange flowers, height 4 feet.

KING HUMBERT. The most popular Canna of all. Orange scarlet flowers with purple foliage, 4 feet.

WYOMING. Fine orchid flowering variety, large orange colored flowers with purple foliage, height 3 feet.

White and Cream With Green Foliage

MONT BLANC IMPROVED. Almost white, large flowers, 3½ feet.

Tuberose

Dwarf Double Pearl. 6-8 inch.

Dwarf Double Pearl. 4-6 inch.

BULBS HARDY LILLIES

**LILIUM
TIGRINUM**

Tiger Lily

**LILIUM
RUBRUM**

Pink Spotted, with white margin.

**LILIUM

PEONIES

Pink White Red

DAHLIAS

JERSEY'S BEAUTY. The sensational dahlia of a decade. A grand color, a beauty for cutting. It is a large, perfectly formed flower, of a clear erosine pink, held upright on a long wiry stem over a well-branched bushy plant.

MRS. I. DE VER WARNER.

This exquisitely beautiful blossom of soft orchid, or rich rosy mauve, is one of the most admired and best of all cut-flower dahlias that we have grown.

JACK ROSE. The best crimson for garden or cutting; that brilliant crimson red that made the "Jack" Rose popular and suggested the name.

QUEEN MARY. A grand decorative that has proven its worth as the best deep pink for all purposes. The size is large, full high center, even up to November, when killed by frost. Color clear silvery cerise pink.

YELLOW COLOSSE. Clear canary yellow of fine form and produced freely on long stems. The plant is a strong, vigorous grower with luxurious lace like foliage.

SYLVIA. Deep pink, tinting to light pink at the center. den yellow suffused orange.

MAUDE ADAMS (show), blush white, tipped mauve pink; continuous and abundant bloomer, excellent for cutting.

JUDGE MAREAN (dec), glowing salmon pink, blended with iridescent orange yellow and gold; large flowers and strong, tall stems.

PRIDE OF CALIFORNIA.

One of the largest free blooming red decorative. Large flower on a very strong stem.

JOHN BOWMAN. Large decorative yellow; one of the leaders in its class of color; free bloomer and strong grower.

RED CROSS. Decorative. Red and white, variegated. Strong straight stem, and always an attraction wherever shown.

F. A. WALKER. This variety is one of the best lavender decorative dahlias, continuous and abundant bloomer.

WE CARRY HYACINTHS, TULIPS, DAFFODILS, PAPER WHITE NARCISSUS, AND MANY OTHER BULBS IN SEASON.

SPECIALTIES FOR 1929

TOMATO

MARGLOBE. This new main-crop or midseason tomato is a wilt-resistant variety bred for use in disease infected districts. In addition to being wilt-resistant, it is a handsome deep red globe shaped tomato of great merit. The plants are vigorous and productive and the fruits are quite large. In our trials they averaged $7\frac{1}{2}$ ounces in weight. The flavor seems to be a happy medium between the acid and non-acid sorts. The shape and size of the fruits makes this a very desirable salad or slicing tomato and the color and quality seem ideally fitted for canning. 1 oz. 90c; $\frac{1}{4}$ lb. \$3.00.

LETTUCE

NEW YORK or LOS ANGELES. This is the variety used almost exclusively in our markets and is grown on an immense scale. The variety is deep green, but when prepared for the table the head is almost white and very crisp. It thrives in cool weather and is not recommended for the house garden in mid-summer. The proper name for the variety is **NEW YORK**, under which name it was introduced into America years ago, and in ordering, customers should use this name to get the true variety. We have an excellent and highly developed strain of it which is used in large quantities by the big shippers. For garden culture, sow the seed thinly and thin the plants when in the fourth leaf to at least twelve inches apart. This will seem like a wide distance, but to make solid heads, the plants need plenty of room. The soil should be well fertilized and irrigated. 1 oz. 45c; $\frac{1}{4}$ lb. \$1.25.

WHITE BIG BOSTON (Special). It resembles the Big Boston in appearance, with leaves a trifle smoother than most varieties of White Boston and which do not turn red in cool or cold weather. The head and frame is just as large as is possible to produce; it will cut as many crates per acre as the regular Big Boston. The fact that it does not turn red in cool weather makes it a most valuable shipper for it often brings 50 cents per crate more than the Big Boston. The commission men are always anxious to get hold of a good stock of well grown White Boston. This is the type to grow to please them. It is an exceptionally fine variety for growing under cold-frames or for the first planting outside in the spring. 1 oz. 75c; $\frac{1}{4}$ lb. \$2.50.

BEETS

EARLY WONDER. Roots are of globe shape with small top and the color of the flesh is deep blood red slightly zoned. Quality is excellent. May be used for both early and late plantings. 1 oz. 15c; $\frac{1}{4}$ lb. 50c; 1 lb. \$1.50.

CAULIFLOWER

DRY WEATHER. Very similar to Danish Giant, and as its name implies is especially adapted to those sections which experience long seasons of hot, dry weather. 1 oz. 3.50.

SNOW BALL (Catskill). One of the finest strains of Snow Ball Cauliflower. Very early. 1 oz. \$2.50; $\frac{1}{4}$ lb. \$8.00.

SPINACH

VIRGINIA SAVOY—The Blight or Yellows Resistant Savoy Spinach. For many years growers of spinach around Norfolk have lost considerable money each season because of a disease in spinach commonly called "Spinach Blight," which often destroys whole crops. Several years ago the Virginia Truck Experiment Station at Norfolk began experiments to get rid of this disease, and after six years of hard work succeeded, by hybridization, in breeding a spinach that was practically "Blight Resistant," and which we have named Virginia Savoy. This variety should be used in preference to ordinary Bloomsdale Savoy in sections where "blight" is prevalent. Oz. 15c; $\frac{1}{4}$ lb. 30c; 1 lb. 75c.

PRINCESS JULIANA. This improved late seeding spinach is one of the best varieties for spring sowing, as it is of splendid quality, very productive and slower to shoot to seed. The leaves are savoyed and quite dark in color. 1 oz. 15c; $\frac{1}{4}$ lb. 30c; 1 lb. 75c.

Novelties

CHOICEST STRAWBERRIES

HOW TO GROW AND ENJOY THEM

There should be room in even the smallest garden for a Strawberry bed. Considering the ease with which these most delicious fruits can be grown in almost any soil throughout the season, with the help of the everbearing varieties, the gardener who is not growing them is depriving himself of a genuine succession of delights.

Strawberries give the greatest yield and the largest berries when grown in rich soil; hence no pains should be spared in preparing the bed carefully before planting, by digging or plowing deeply, and turning under, a liberal supply of well-rotted manure. At fruiting-time a top dressing of ground bone will be beneficial.

Strawberry plants should be set out in rows 2 feet apart and the plants a foot apart, cutting off all runners as they appear. For field culture the rows should be $3\frac{1}{2}$ feet apart, then cultivation can be made with horse and hoe harrow. The varieties we offer are all perfect flowering and therefore need no association with any other variety for perfect fruiting. **Price on Application.**

Pedigreed Mary Washington

THE BEST HIGH PRODUCING, TENDER,
GREEN ASPARAGUS FOR MARKET
AND HOME USE

There is no variety of asparagus as good as the Washington and no strain of the Washington near as good as the "Mary."

The Washington stock is all descended from the male Washington and most of the seeds and roots of this variety now available commercially are descended from the female Martha and other unnamed females. The female "Mary," however, like the male Washington, is the greatest find in the history of asparagus breeding. There is no other progeny descended from the male plant Washington that compares with the "Mary."

It is earlier, produces more, has larger stalks, possesses highest rust resistance and will net a great deal more money per acre.

"Mary" is recognized as the best and we are pleased to announce that we can now offer you selected roots grown from the seed of this superior asparagus, produced from a fine field of second generation Mary Washington.

The very recent descent from the Washington male and "Mary" female places an extremely high value upon our stock of roots, the importance of which should not be overlooked by any one desiring the best.

"Mary" is so much better you can see the difference."

Seed Catalogue

FOR 1929

Prices Subject to Change.

It is our endeavor to maintain the prices quoted in this Catalogue throughout the season, but owing to the present very unsettled conditions they are subject to change without notice.

Wilson S. Brower Co., Inc., give no warranty, expressed or implied, as to the description, quality, productiveness or any other matter of any seeds, bulbs or plants they send out, and they will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned, not tested seed so marked to comply with Chapter 228, Laws of N. J., 1916.

ARTICHOKE

German, Artichocke; French, Artichaut; Spanish, Albachofa.

	Pkt.	Oz.
French Globe	\$0.10	\$1.25

The Seeds should be sown early in the spring, in drills an inch and a half deep, and one foot apart. The next spring transplant to permanent beds, in rows or hills three feet apart and two feet between the plants. Plant in a deep rich, moist loam, and the plants should be protected in winter by a covering of leaves or coarse manure. A bed will continue bearing for several years.

Jerusalem Artichoke, Tubers25 cents each

ASPARAGUS

German, Spargel; French, Asperge; Spanish, Esparrago.

Pkt. 5 cents

	Per oz.	¼ lb.	Per lb.
Conover's Colossal	.15	.40	1.00
Palmetto, a light green variety	.15	.45	1.25
ROOTS			
	Per 50	Per 100	Per 1000
Roots Palmetto, 2 years	1.00	1.50	12.50
Roots Mary Washington, 2 years	1.75	3.00	23.00

Sow the seeds early in spring, in drills 15 inches apart, and about a dozen to the foot in the drill; keep the soil mellow and free from weeds during the summer, and in the succeeding spring transplant to permanent beds which should be done in the following manner as described by a cultivator of Oyster Bay Asparagus.

Plant on sandy soil. To grow Asparagus in perfection, the soil need not necessarily be richer than it must be to produce a good crop of corn. Some experiments have shown that by heavily manuring the crop cannot be made permanently greater than by moderate dressings. It is not desirable to plant them out very early; more plants will fail to grow than when the planting is deferred until the soil is dry and warm.

In planting for private use; set out in rows two feet apart, and allow twelve inches in the row. Set the plants at least six inches below the surface. For market on a large scale set four feet apart one way and two the other, which will allow the use of a horse and cultivator to keep the weeds under.

BEANS

10 cents Pkt.

German, Gartenbohne; French, Fève de Marais; Spanish, Hava. English or Broad.

	1 lb.	2 lb.
Broad Windsor	\$0.50	\$0.95

This class is very hardy and should be planted as soon as the soil is in good state in the spring. Plant four inches apart, and two inches deep in drills four feet apart. To insure well filled pods, pinch off the tops as the lower pods begin to set.

Bountiful, Extra Early. Very prolific and long bearing. Flat green pods, tender and stringless. **Shortage.**

Valentine Black, long round, green, solid pod, very early. 1 lb. 40c; 2 lbs. 75c; 10 lbs. \$3.50.

Valentine, Giant Stringless, about seven days later than extra Early Valentine. Slightly curved pod, brittle and stringless; a strong grower and good yielder. 1 lb. 40c; 2 lb. 75c; 10 lb. \$3.50.

Valentine, Early. Productive, tender and of excellent flavor. 1 lb. 40c; 2 lb. 70c; 10 lb. 3.00.

Beans, French's Horticultural. These are a late sort, usually listed under the Dwarf, Green Podded variety, but they are between a bush and a pole bean, having some runners but do not require poling. Pods are 7 to 8 inches long, and in the green stage can be used for a snap bean, and later as a shell bean. The pod is splashed with red. 1 lb. 50c; 2 lb. 90c; 10 lb. 4.00.

Burpee's Stringless Green Pod, the best stringless bean grown. Ten days to two weeks earlier than the valentine; pods full and fleshy, extremely crisp and absolutely stringless. Very productive. 1 lb. 45c; 2 lb. 80c; 10 lb. \$3.50.

Refugee or Thousand to One. (Late variety.) The pods are round and full, stringless and of fine quality. 1 lb. 40c; 2 lb. 75c; 10 lb. \$3.50.

DWARF LIMA AND DWARF WHITE BEANS

Burpee's Improved Bush Lima. Beans are large as Large Lima, stout growth, branches vigorously, bearing 50 to 200 large pods well filled with very large beans. 1 lb. 45c; 2 lb. 85c; 10 lb. \$3.75.

Fordhook Bush Beans. 1 lb. 65c. **Shortage.**

White Marrowfat, grown for sale in the dry state. 1 lb. 30c; 2 lb. 50c; 10 lb. 2.50.

DWARF WAX VARIETIES

Improved Kidney Wax Beans. Semi-round-pod. Very prolific and stringless. Far superior to Golden Wax. 1 lb. 45c; 2 lb. 80c; 10 lb. 3.50.

Sure Crop Stringless Wax. 1 lb. 40c; 2 lb. 75c; 10 lb., \$3.50.

Round Pod Kidney Wax, same as Wardell's, only round pods. 1 lb. 40c; 2 lb. 75c; 10 lb. \$3.50.

Wardell's Kidney Wax, extra early, long flat pods, very productive. 1 lb. 45c; 2 lb. 80c; 10 lb. \$3.50.

NOTICE—Due to the poor growing season there is a shortage of Beans.

BEANS—Dwarf Wax Varieties, Continued

	1 lb.	2 lb.	10 lb.
Curries Rust Proof , very early and prolific. The pods are long, full, stringless; of very fine quality	.45	.85	\$4.00
Davis' White Wax , beans pure white; pods yellow, flat, tender, rich	.40	.75	\$3.50
Golden Wax . This valuable variety is about ten days earlier than the black wax pods, large, long semi-round, brittle, stringless	.40	.75	\$3.50
Blossoming time sends up a tendril a foot longer than vein which drops off.			
Hodson Wax , very large, tender, pods stringless, very productive	.40	.75	\$3.50

BEANS, Pole or Running Varieties

Challenger Lima . Potato variety, five and six in a pod	.45	.80	\$3.50
King of Garden Lima . Vigorous in growth and immensely productive, pods large, numerous and well filled and beans of an enormous size. Generally grown for main crop	.45	.80	\$3.50
Large White Lima . 9 greatly esteemed variety	.40	.75	\$3.25
Kentucky Wonder, or Homestead Extra Early . Pods long, tender and good flavor, very productive	.40	.75	\$3.25
Scarlet Runner . Beautiful scarlet flowers; for ornamental and table use	.45	.80	\$3.50
Beans, London Horticultural, Pole . This is a late green shell bean. The leaves are light colored, pods are about 5 inches long and are light green when young but take on a more yellowish appearance spotted with red as they grow older	.45	.80	3.50
Early Golden Cluster . Bright yellow pods, stringless, in clusters..	.40	.70	\$3.00
Yard Long, French . Pods sometimes grow from 2 to 3 ft. long, are very slender like a pipe stem; should be grown on pea bush	1.25		

Sow Bush sorts in drills about two feet apart, and drop the beans about three inches apart in the drill, cover two inches or less for a succession, sow at intervals of two weeks. Lima beans should not be planted until settled weather; make rich hills, four feet apart each way set a pole eight or ten feet high in each; press the beans into the soil eye down, six or eight to each pole, and when they are well up, thin out to four.

A quart of Limas is sufficient for 75 to 80 hills, and a quart of Bush Beans will sow a row 100 feet long.

BEETS

German, Runkelrub; French, Bourrache;

Spanish, Remolacha.

Detroit Dark Red (Special). A splendid beet for market or home use, of a deep color, tender and of delicate flavor.

Oz., 15c; $\frac{1}{4}$ lb., 40c; 1 lb., \$1.25

Dark Red Egyptian Crosby's (Special). The earliest beet in cultivation, color deep crimson; of excellent quality.

Oz., 15c; $\frac{1}{4}$ lb., 40c; 1 lb., \$1.25

MANGEL-WURZEL AND SUGAR

Varieties used for feeding stock. Sow 6 lbs. per acre.

Special Price in Quantities

	1 oz.	$\frac{1}{4}$ lb.	1 lb.
Mammoth Red Mangel-Wurzel. Producing roots of mammoth size, very regular, and with a small top.....	.10	.25	.75
Long Yellow Mangel-Wurzel. Good for general crop	.10	.20	.65
Giant White $\frac{1}{2}$ Sugar Beet. Extensively grown for feeding stock and manufacture of sugar	.10	.25	.75
Lane's Improved Sugar Beet. Improved variety of the French Sugar Beet, obtained by careful selection in this country	.10	.25	.75

A rich, deep open soil is the best suited to the culture of Beets. Fresh manure is undesirable, but land that has been well manured the previous year is highly suitable. For an early supply sow in the spring as soon as the ground becomes fit to work, in drills about one foot apart and two inches deep. For main crop sow the first week in May, and for winter use sow in June. When the plants have obtained three or four leaves, thin out, so that they may stand eight or nine inches apart. Keep free from weeds by hand weeding and hoeing. Those intended for winter use may be taken up in October, and stored in dry sand in the cellar or outhouse. Before storing, leaves and fibers must be cut off, but care must be taken not to bruise the main root.

BORAGE

10 cents Pkt.

German, Borritsch; French, Bourrache; Spanish, Berraja.

	Per oz.	$\frac{1}{4}$ lb.	lb.
Borage, used as a pot herb; also as a salad, or can be boiled, and also for garnishing, but chiefly required for claret cups and other cool- ing drinks. Bees are very partial to the flower	.30	.80	\$3.00

BROCCOLI

10 cents. Pkt.

German, Spragel Kohl; French, Chou Brocoli; Spanish, Broculi.

	Per oz.	$\frac{1}{4}$ lb.
Calabrese (Imported Italia)	\$2.50	\$7.50
Purple Cape, differing from the preceding color, greenish purple	\$0.50	\$1.50
White Cape	\$0.50	\$1.50

A favorite European vegetable, nearly allied to the Cauliflower, but more hardy and surer to head; the seeds should be sown in this district in the early part of May and transplanted in June; farther south the sowing should be delayed until June or July; and the transplanting accordingly from August to October. In parts of the country where the thermometer does not fall below 20 or 30 degrees, Broccoli may be had in perfection from November until March. It succeeds best in a moist and rather cool atmosphere.

BRUSSELS SPROUTS

10 cents Pkt.

German, Sprossen-Kohl; French, Chou de Bruxelles; Spanish, Breza de Brussels.

Dalkeith Dwarf Improved, a variety producing compact sprouts of excellent quality. Pkt. 10c; Oz., 50c; $\frac{1}{4}$ lb., 1.50.

A tender, delicious vegetable. The plant grows two or three feet high, and produces from the sides of the stalks numerous little sprouts, one or two inches in diameter, resembling cabbage. The leaves which look like a Savoy should be broken down in the fall, to give the little cabbages room to grow. They are very tender and sweet after early frosts. Sow early in hot-beds, or in seed-beds in May transplant and cultivate the cabbage.

CABBAGE

10 cents Package, except quoted otherwise.

German, Kopfkohl; French, Chou; Spanish, Berza de Pepollo.

1 oz. $\frac{1}{4}$ lb. 1 lb **Copenhagen Market.**

The finest, large, round-headed, early

Cabbage; very solid and of fine quality; short-stemmed.

.45 1.50 4.75

Chinese (Pe Tsai)

L. I. or Hudson Red

Earliest R. I. Red

For very early use plant in the autumn from 10th to 25th September, in a seed bed, and protect in cold frames during the winter, being careful to set them down to the first leaf. Transplant in the following spring, as the soil will admit. For autumn and winter use, plant in seed-bed in May and early part of June, and when six inches high transplant into rich soil, two feet apart each way for the early varieties, and three by two and a half feet for the large winter varieties. To secure the best results, the soil should not be too dry, but should be thoroughly enriched, and the crop should be hoed at least once in ten days. Sow in hot bed early in spring, seed of the early kind for a second crop; also the late varieties for winter use.

CARROT

All 5 cents Package

Except Quoted Otherwise.

German, Mochern; French, Carotte.

The Carrot, like other root crops, delights in a sandy loam, deeply tilled. It should never be sown on newly manured ground as forked roots are sure to be the result. It is best to sow on ground that has been well manured the previous year for some other crop such as Celery, Potatoes, Onions or Peas, but avoid such crop as Cabbage and Turnips, or any of the tap rooted sections. For early or main crops sow the latter part of April; for later crops, they may be sown any time until the beginning of June. Sow in rows about 15 inches apart and half an inch deep, thinning out to three or four inches between the plants.

Early Scarlet Horn. Old and favorite sort, much esteemed for early summer, oz., 15c; $\frac{1}{4}$ lb., 35c; 1 lb., \$1.25.

Half Long Danvers (Special). A variety intermediate in size and period of maturity between the preceding and the Long Orange, oz., 15c; $\frac{1}{4}$ lb., 35c; 1 lb., \$1.00.

Half Long Chantenay (Special). Like Nantes, broader shoulder, oz., 15c; $\frac{1}{4}$ lb., 35c; 1 lb., \$1.00.

Half Long Stump Guarande or Oxheart.
Half Long Stump Nantes
Long Orange Improved. Roots of large size, equally adapted for garden or farm culture

DANVERS CARROT

EARLY SNOW BALL CAULIFLOWER

Early Snow Ball (Catskill). The finest strain of Snow Ball Cauliflower. Very early. 1 oz. \$2.50; $\frac{1}{4}$ lb. \$8.00.

CAULIFLOWER

German, Blumen-Kohl; French, Chou-fleur; Spanish, Coliflor.

Extra Early Paris. This is one of the earliest and best varieties, heads large, white and compact, of fine quality. Pkt. 10c; oz., \$1.00; $\frac{1}{4}$ lb., \$3.00.

Large Early Snowball. Best for forcing under glass or open ground. Pkt. 25c; $\frac{1}{4}$ oz., \$1.00; $\frac{1}{2}$ oz., \$1.75; 1-oz., \$3.00; $\frac{1}{4}$ lb., \$8.50.

Early Dwarf Erfurt. Best for forcing. 1 oz., \$2.50; $\frac{1}{4}$ lb. \$8.00.

Early London. Pkt., 15c; 1-oz., \$1.00; $\frac{1}{4}$ lb., \$3.00.

Denmark, Special Large Late. Very fine variety, large white, compact heads, the space necessary between plants is greater than other varieties. Pkt. 25c; $\frac{1}{4}$ oz. 1.25; $\frac{1}{2}$ oz. 2.00; 1 oz. \$3.00; $\frac{1}{4}$ lb. \$9.00.

Danish Giant or Dry Weather. 1 oz. 3.50; $\frac{1}{4}$ lb. \$10.00.

CAULIFLOWER—Continued

Cauliflower delights in rich, moist soil and in dry seasons should be abundantly watered. The seeds may be sown in September and wintered over in the same manner as described for early cabbage. Where this is not practicable, it may be had nearly as well by sowing the seed in the hot-bed in January or February and transplanting the plants at two or three inches apart in boxes, or in the soil of another hot-bed, until such time as they are safe to be planted in the open ground, which in this latitude, is usually from the 15th of March to the 10th of April. If properly hardened off, they are seldom injured by being planted out too early.

CELERY

10 cents Package, except quoted otherwise.

German, Celeri; French, Celeri; Spanish, Apih.

	Oz.	¼ lb.	lb.

CELERIAC
KNOB-CELERY

10 cents Pkt.

German, Knob-Celeri;
French, Celeri Rave.

Giant Prague. For soups, etc. When sliced and cooked makes good winter salad. Oz., 40c; ¼ lb., 1.25; 1 lb., 3.00.

The seeds may be sown in the open ground in April, as soon as the ground can be nicely worked. Sow about half an inch deep, and be careful to firmly press the soil over the seed; this should be done by treading over the rows with the feet after sowing; this prevents the air drying up the seed, which thereby loses its vitality and fails to germinate. Many valuable crops are annually lost by inattention to this important particular. After the seed is up, keep carefully clear of weeds until the time of planting June and July; the crops may be shorn off once or twice before planting; this makes them "stocky" and they suffer less in being transplanted. After the ground has been well prepared, plant in rows from three to four feet apart, according to the variety, setting the plants about six inches apart and pressing the soil firmly about the roots.

CHERVIL

Package 10 Cents

German, Bisenlauch; French, Cerfeuil;
Spanish, Cerafolio.

Curled Per. oz., 15c

The young leaves are used in soups and salads. Sow thinly in May, in drills of an inch deep, one foot apart.

Clark's Special (Long Green). Very productive,disease resistant	.25	.50	1.75

Cucumbers succeed best in warm, moist, rich loamy ground. They should not be planted in the open air until there is a prospect of settled warm weather. Plant in hills about four feet apart each way. The hills should be previously prepared by mixing thoroughly with the soil in each a shovelful of well rotted manure. When all danger from insects is past, thin out the plants, leaving three or four of the strongest to each hill.

DANDELION

ENDIVE.

EGG PLANT

All 10 Cents Pkt.

German, Eier Pflanz; French, Aubergine; Spanish, Bereinfena.
1 oz. ¼ lb. 1 lb.

New York Improved. Superior market variety of large size and fine variety.....	.65	1.75	6.00
Black Beauty Tendage. Earlier than New York. Improved and as large; purplish black.....	.65	1.75	6.00

The Egg Plant is a tender vegetable, and must not be planted out until the weather is warm and settled. Sow early in spring in hot-beds, or if they are not convenient, sufficient plants may be raised for a small garden by sowing a few seeds in common flower pots or in boxes in the house. Plant out early in June from two to three feet apart.

Witloff or French

Endive. 1 oz., 25c; ¼ lb., 75c; 1 lb. \$2

Endive is one of the best salads for fall and winter use. Sow for an early supply about the middle of April. As it is used mostly in the fall months, the main sowings are made in June and July, from which plantations are formed at one foot apart each way in August and September. It requires no special soil or manure, and after planting, is kept clear of weeds until the plant has attained its full size, when the process of blanching begins. This is affected by covering up the plants as they grow, with slats or boards, which serves the purpose of excluding the air and light.

NEW YORK EGG PLANT.

KALE

Pkt. 5 Cents, except where noted.

German, Blatter-Kohl; French, Chou Vert; Spanish, Breton.

Oz. ¼ lb. 1lb.

Siberian German Green or "Sproute." This variety is extensively used for early greens for which it is sown in the fall in rows one foot apart and treated in the same manner as Spinach; it is ready for use in early spring. Sowing can also be made in spring15 .35 1.00

Dwarf Green Curled Scotch. Beautifully fringed dwarf growing kind, with bright green leaves, 10c pkt... .20 .50 1.50

Tall Green Curled Scotch. Tall growing, very hardy variety, leaves a bright green, beautiful curled. 10c pkt.20 .50 1.50

KALE

Kale may be grown in almost any soil, but the richer it is the more abundant the product. Sow early in the spring, in prepared beds, covering the seeds thinly and evenly; transplant in June and treat in the same manner as for cabbage. Of all the cabbage tribe this is the most tender and delicate and would be much more extensively grown than it is, if its excellent qualities were generally known. The varieties are all extremely hardy, and are best when touched by frost.

KOHL-RABI

KOHL-RABI

Pkt. 10 Cents.

German, Kohl-Rabi; French, Chou Rave; Spanish, Colinabo.

Per oz. ¼ lb. 1lb.

Early White Vienna. Flesh white and tender; best market sort; good for table use25 .75 2.25

Early Purple Vienna. Differing from the above in color, which is of a bluish purple25 .75 2.50

Kohl-Rabi or Turnip stemmed cabbage, is a vegetable that is not so much cultivated as it deserves to be. The stem above the ground swells into a bulb, somewhat resembling a turnip: this again is covered with leaves. The edible part is the bulb, which is dressed and served like turnip, is very delicate and tender when young. It is very hardy, withstands severe drought, and is a good keeper. Cultivate the same as cabbage, but in hoeing be careful not to throw dirt into the heart of the plant, or the bulb cannot form.

LEEK

Pkt. 5 Cents.

German, Lauch; French, Poireau;

Spanish, Puerro.

Large American Flag.	oz.	¼ lb.	lb.
The kind mostly grown for market	.25	.75	2.50

Giant Musselburg, producing fan-shaped foliage; quite a strong grower, and a desirable market variety	.30	1.00	3.00
--	-----	------	------

Large Rouen. Very large and fine	.25	.75	2.50
---	-----	-----	------

The Leek is very hardy and easily cultivated; it succeeds best in a light, but well enriched soil. Sow as early in the spring as practical, in drills one inch deep and one foot apart. When six or eight inches high they may be transplanted in rows ten inches apart each way, as deep as possible; that the neck, being covered, may be blanched. If fine leeks are desired, the ground can hardly be made too rich.

LEEK.

LETTUCE

Pkt. 5 Cents.

German, Laitick; French, Laitue; Spanish, Lechuga.

For early crop, the seed may be sown in the open ground in September, and transplanted to coldframes as soon as large enough to handle. In dry, sheltered spots, by covering up with leaves late in the season. Lettuce plants may be saved over Winter without glass covering. The plants for setting out in Spring are also sown in coldframes in February, and in hotbeds in March, and by careful covering up at night make plants to set out in April.

ROMAINE OR COS VARIETIES

Trianon Cos. The best of the Cos variety.....	.25	.75	2.25
White Paris Cos (Romaine). Sow early; tie up to blanch	.25	.75	2.25

Lettuce is the most popular of all salads. Boiled, is quite equal to Spinach; and it is also sometimes used in soups. It is easy of cultivation, but likes a good rich soil. For early use, sow Simpson and Tennis Ball under glass in February and March and transplant as soon as the ground can be worked. Later sowings may be made in the open ground for successions as long as the weather permits; thin out well or the plants will be weak, and set in rows two feet apart and eight inches between the plants. The best early plants are obtained by sowing in the open ground in September, and transplanting to cold frames the latter part of October, being wintered over in the same manner as early Cabbage. Lettuce requires good ground and abundant moisture.

MAY KING LETTUCE

LETTUCE—Continued

German, Laitick; French. Laitue; Spanish, Lechuga.

	Per oz.	¼-lb.	lb.
Special Big Boston W. S. (See Specialties)	.75	\$2.50	\$8.00

Shotwell's Brown Head. Large and handsome; heads hardy; standing summer heat without injury	.20	.60	2.00
Boston Market. Large solid heads, very fine for forcing, and of fine flavor.	.20	.60	2.00
Iceberg Favorite Summer Lettuce. Heat resisting. Very crisp, strong center ribs which bend toward center of plant, keeping it thoroughly blanched	.25	.75	2.50
Unrivalled. An improvement on the White-seeded Big Boston, forming very solid, large, pale green heads without the reddish brown tinge, and of excellent quality. Forms a head in six weeks; at least ten days earlier than the regular Big Boston. May be sown all through the year and stands heat remarkably well. Is crisp, tender, and solid	.25	.85	2.75

MELON, MUSK

Package 5 Cents

German, Melone; French, Melon; Spanish, Melon Muscatel.

Per oz. ¼-lb. lb.

Hearts of Gold. A selection from Hoo Doo, this melon runs very uniform in size. It is a splendid shipping variety and is increasing in use. While originally it was identical with Hoo Doo	.20	.60	1.75
Tip Top. This kind cannot be excelled for its eating qualities. The flesh is a bright salmon color, remarkably thick, sweet and spicy. It varies from round to slightly oblong and with a green skin turning to a lemon color as it approaches maturity	.20	.60	1.75
Honey Dew. Large, round, delicious, rich green flesh	.20	.60	1.75
Paul Rose. Handsome, oval, orange flesh, sweet	.15	.40	1.25
Long Island Beauty. Similar to Hackensack; very early	.15	.40	1.25
Miller's Cream or Osage. Flesh and salmon color and very thick	.15	.45	1.50
Golden Netted Gem. Early, round, small, fine flavor	.15	.40	1.25
Hackensack. Variety of Green Citron, well known among the New York market gardeners, grows to a very large size, productive, exquisite flavor	.15	.40	1.25

Long Yellow Cantaloupe.

Yellow flesh, suitable for the market

.15 .40 1.25

Rocky Ford. Very sweet; spicy flavored, small and oblong, most popular sort

.15 .40 1.25

Montreal Market. A very large green "Nutmeg" type, almost round, heavily netted; thick, luscious flesh; late and especially adapted to cooler climates

.15 .45 1.50

Melons thrive best in a moderately enriched live soil; the hills should be six feet apart each way. Previous to planting incorporate well with the soil in each hill a couple of shovelfuls of thoroughly rotted manure; plant twelve or fifteen seeds in each hill in May, and when well up, thin out three or four of the most promising. Pinch off the leading shoots as the growth becomes too luxuriant, and if the fruit sets too numerous thin out when young, which will increase the size of those remaining, and cause them to ripen quicker.

MELON, WATER

Package 5 Cents

German, Wassermelone; French, Melon d'Eau; Spanish, Zaudia.

HONEY DEW MELON.

Tom Watson. Long and 8 to 10-in. diameter. Thin rind, crisp flesh, fine flavor	Per oz.	¼ lb.	lb.
Pride of Georgia. Dark green, oval in shape; crisp and sweet; very large.			
Mountain Sweet. One of the very best for culture; color dark green; and rind thin; flesh scarlet; solid, very sweet and delicious			
Black Spanish. Shape round, rather small; skin dark green, flesh red, sweet, rich			
Phinney's Early. Flesh deep red, of a very superior quality; a valuable early market variety	.15	.40	1.25
Ice Cream. (White seeded), fruit of medium size, nearly round; skin pale green; rind thin; flesh scarlet, solid crisp, excellent			
Kleckley's Sweets. Vines vigorous and productive; fruits are medium to large, oblong, tapering slightly toward the stem end; dark green. The flesh is very bright, rich red and exceedingly sweet, crisp, and tender. Combines earliness, size and quality			
Cole's Early. Early variety suitable for home market, but on account of its thin rind is not a good shipping melon. Medium size, skin dark green with light stripes; flesh, rich, dark red; luscious and sweet.

round handsome fruit
of small size and
used in the making of
sweetmeats and pre-
serves

.15 .40 1.25

IRON CLAD.

Plant in hills directed for Muskmelons, giving them more room, as their vines extend much farther. If they are wanted of a large size, three or four melons to each plant will be sufficient, and when only one is allowed to grow from each plant they will grow to an immense size.

MUSHROOMS

German, Chimpignoubrut; French, Champignon; Spanish, Hongo
American Spawn Bricks Per brick, 35c; 10 bricks, \$2.50; 25 bricks, \$5.50

Mushrooms should be grown either in a building especially erected for the purpose or some shed, stable or cellar, where the temperature of from 40 to 60 degrees can be kept up in winter. To every barrow load of fresh horse droppings add about the same weight of loam or soil of any kind that has not been manured. Turn the heap every day, so that it is not allowed to heat violently, until you have quantity enough to form a bed of dimensions required. Be careful that your heap is under cover, so that it cannot possibly get wet. The most convenient size is from three to four feet long and eight inches deep.

MUSHROOMS.

Prepare the mixture of loam and manure, making the bed in layers and pounding down each with the back of a spade. Leave this to heat through for a few days, and as soon as the heat subsides to 90 degrees, make holes in the bed about a foot apart each way into which put pieces of spawn two or three inches in diameter; fill up the holes with the compact and at the expiration of a week or ten days the spawn will have thoroughly diffused itself through the bed. Now spread a layer of fresh soil

over the heap to the depth of two inches, firm it down moderately and cover with three or four inches of hay or straw. Examine the bed often to see that it does not get dry. When water is given it should be at a temperature of about 100 degrees. One brick to each 10 square feet.

MUSTARD

5 Cents Pkt.

German, Senf; French, Moutarde; Spanish, Mostaga.

White London. Best for saladsPer oz. ¼-lb. 1b.
\$0.10 \$0.25 \$0.60

Mustard in the green state is a refreshing salad, mixed with Cress, Lettuce, or other salad plants. It is necessary to make frequent sowing of it, as it should be cut and used in a very young state, even before the first rough leaf appears. The seed should be sown thickly in light soil the surface of which should be made very smooth. The seed should be pressed into the soil with the back of a clean spade.

ONION

Package 10 Cents

German, Zweibel; French, Oignon; Spanish, Cebolia.

Per oz. ¼ lb. 1b.

Early Red Flat. About ten days earlier than the Large Red, and not quite so large..... .35 1.00 3.00

Large Red Wethersfield. The staple variety of the Eastern onion growers; of large size, deep in color, a good keeper..... .30 .85 2.75

Southport Red Globe. Similar to the large Red in flavor and color, but quite distinct in form, being nearly globular30 .85 2.75

Yellow Globe Danvers. An excellent variety, mild and very productive; ripens early and a good keeper30 .85 2.75

White Portugal or Silver Skin. A handsome onion of mild flavor; extensively grown for pickling.. .35 1.25 3.75

Southport White Globe. Form nearly ovoid symmetrical, keeps well, is an excellent variety..... .35 1.00 3.50

Southport Yellow Globe. As above except color25 .75 2.50

Yellow Globe Prize Taker, 90 days.

White Queen. The earliest variety, very mild, pure white skin and flesh Does not grow to a large size, usually about 1½ inches in diameter, and slightly flattened shape45 1.25 4.00

Prizetaker. Grows uniform in shape; is of immense size, measuring from 12 to 16 inches in circumference, while under special cultivation specimen bulbs have been raised to weigh from 2 to 3 pounds each; its pure white flesh is fine-grained, mild and delicate in flavor30 .85 2.75

The onion thrives best in a rather strong, deep, rich loamy soil, and unlike most vegetables succeeds well when cultivated on the same ground for successive years. The ground should be deeply trenched and manured the previous autumn, and laid up in ridges during the winter to soften. As early in the spring as the ground is in working order, commence operations by leveling the ground with a rake, and tread firmly; sow thinly in drills about a quarter of an inch deep and one foot apart; cover with fine soil and press down with the back of a spade or a light roller. When the young plants are strong enough, thin gradually so that they stand three or four inches apart.

Extra Double Curled. A fine dwarf variety excellent for garnishing	\$0.15	\$0.40	\$1.25
Plain Leaves. Hardier than the curled variety.....	.15	.40	1.25
Hamburg, or Rooted. Edible roots.....	.15	.40	1.25

Should be sown very early in the spring in beds or in lines, and the seeds which are somewhat slow to vegetate should be previously soaked 24 hours in warm water. The soil should be kept free from weeds, which should be extracted by the hand, so as to avoid disturbance of the seed when about to germinate. As soon as the plants are large enough they should be thinned out so as to stand five or six inches apart.

PARSNIPS

Package 5 Cents

German, Pastinake; French, Panais; Spanish, Chirivia

Per oz. ¼ lb. lb.

Long Smooth or Hollow Crown.
Long roots15 .40 1.10

They succeed best in a deep rich soil that has been well manured the previous season, as manure freshly applied tends to the production of forked and ill-shaped roots. Sow the seed early in spring in drills eighteen inches apart in the garden, and three feet apart in the field, thin the plants to six inches in the drill.

PARSLEY

Package 5 Cents

	Per oz.	¼ lb.	lb.
Extra Double Curled. A fine dwarf variety excellent for garnishing	\$0.15	\$0.40	\$1.25
Plain Leaves. Hardier than the curled variety.....	.15	.40	1.25
Hamburg, or Rooted. Edible roots.....	.15	.40	1.25

Should be sown very early in the spring in beds or in lines, and the seeds which are somewhat slow to vegetate should be previously soaked 24 hours in warm water. PEAS

Package 10 Cents

German, Erbsen; French, Pois; Spanish Guisantes.

Extra Early Varieties

1 lb. 2 lb. 10 lb.

*World's Record. Among early main-crop Peas of medium height, Gradus, or Prosperity, takes first place; happily named, indeed, on account of its high yield and superb flavor. In World's Record these points are more than maintained; the yield is as high and the quality, if anything, is enhanced. The great point in favor of the new sort is its earliness, the period from seed to maturity being less by a week than the standard Gradus	.40	.75	3.00
Laxtonian. Dwarf early wrinkled. Very prolific, large pods, height 1½ ft	.40	.85	3.25
Gradus or Prosperity. Earliest wrinkled Pea grown. Can be sown early as the round sorts. Large peas and pods, splendid flavor. Requires no sticks, reaching only 36 inches in ordinary good soil. Height, 3 feet....	.40	.75	3.25
Thomas Laxton. A cross between Gradus and one of the extra early sorts Ripens within a day or two of the earliest round varieties; very productive. The pods are large and contain 7 or 8 large, wrinkled Peas of the finest flavor	.40	.75	3.25

PEAS—Continued.

	1 lb.	2 lb.	10 lb
Nott's Excelsior. Extra dwarf wrinkled, pods larger than American Wonder, 1 foot....	\$0.30	\$0.55	\$2.50
Alaska. Earliest of all	.35	.65	2.50
First and Best. One of the best extra early Peas. An improved strain of the Extra Early Market, height 2½ feet.....	.35	.65	2.50
Little Gem. A dwarf green wrinkled Market, very prolific, of superior flavor, and a first early, 1½ feet	.35	.65	2.50

SECOND EARLY VARIETIES.

Everbearing. Good size pea, long pods, height 2½ feet....	.40	.75	2.75
McLean's Advancer... Early green wrinkled varieties, delicious flavor, height 2½ feet..	.35	.65	2.50
Pride of the Market. Very large pods, green peas, sow thin, height 2 feet	.30	.50	2.00
Dwarf Telephone. Same quality and productiveness as Telephone excepting the vines grow 2 feet high, pods are large and filled with immense peas of excellent flavor and sweet	.40	.75	3.00

GENERAL CROP.

Champion of England. A popular wrinkled variety of delicious flavor, profuse bearer. Peas are very large, tender, height 5 feet	.35	.65	2.75
Telephone. This is the best pea for general crop, both for home and market use. Immediately productive and of finest quality. Vines very strong, averaging 18 to 20 large pods per stalk, 4 feet.	.40	.75	2.75
Dwarf, Sugar. Edible pods.....	.40	.75	2.75

Peas come earlier to maturity in light soil. For general crop a deep rich loam, or strong loam inclining to clay is best. For early crops decomposed leaves or leaf mould should be used, or if the soil is very poor, strong manure may be employed. For general crop a good dressing should be applied, and for the dwarf growing kinds the soil can hardly be too rich. When grown as a market crop, peas are not staked, but sown in single rows, two or three inches deep, two or three feet apart according to the variety. When grown in small quantities for private use

PEAS—Continued.

they are sown in double rows six or eight inches apart, and the rows three feet apart, the tall varieties staked up by brush. For an early crop, sow as soon as the ground can be worked, and make repeated sowings every two weeks for succession. A quart is sufficient for a row of about eighty feet

PEPPER

Package 10 Cents

German, Pfeffer; French, Piment; Spanish, Pimento.

PEPPERS.

H-Hot—S-Sweet

	Per oz	¼ lb.
Ruby King. S. Very large; bright red	\$0.60	\$1.75
Large Bell or Bull Nose. H. An early variety of mild flavor	.60	1.75
Sweet Mountain or Mammoth. S. Of large size, best for mangoes	.60	1.75
Chinese Giant. S. Double the size of Ruby King. This is the largest and finest mild Red Pepper. Flesh is thick and unusually mild. Productive bearer	.75	2.50
Long Red Cayenne. H. Used for Pepper sauces; very pungent	.50	1.50
Chili. H. Very piquant and prolific, fruit conical, bright scarlet	.60	1.75
Hot Mango Pepper. H. Very Hot, best for Pepper Sauce and Pickling	.50	1.75
Neapolitan. S. Early	.50	1.50

The Pepper or Capsicum is valuable for its seasoning qualities, as well as for pickling. Sow early in heat and transplant when the weather is warm and settled, or sow in warm situation in the garden about the middle of May. Plants should be set a foot and a half apart.

POTATOES

German, Kartoffel; French, Pomme de Terre; Spanish, Petata.

Houlton Rose. The standard variety. Early	Prices on application.
Houlton Green Mountain. Late variety, good keeper, white and mealy	
Houlton Irish Cobbler. Very early, round white; good winter keeper	

HARDWOOD ASH

Unbleached Hardwood Ash with its valuable Potash and Lime qualities is highly recommended for use in green houses, flower gardens and lawn work

Long Scarlet. One of the leading market kinds.	.15	.40	1.25
Rose China Winter. Flesh firm and piquant; excellent for winter use	.15	.40	1.25
White Summer Turnip. A summer variety of mild flavor	.15	.45	1.25
Black Spanish Winter. Long, one of the hardiest and best for winter use	.15	.40	1.25
Half Long Black Spanish	.15	.40	1.25
Black Spanish. Round	.15	.40	1.25
White Strasburg. Very large German sort	.15	.35	1.00
White Vienna or Lady Finger. Crisp and tender in summer	.15	.35	1.00
Icicle. Long, pure white, suitable for forcing	.15	.40	1.25
Sparkler. Standard variety, with round roots, top half of which are deep scarlet and lower half pure white. Solid and crisp, very attractive	.15	.40	1.25

There are two classes of Radishes, those for Spring and Summer use, which are small and arrive quickly at maturity, and with proper care can be kept all winter. The summer radishes should be used while young and tender; if allowed to grow too long they become tough and stringy; they thrive best in high rich soil. For a successful supply, sow from the middle of March until September, at intervals of two or three weeks. For an early supply they may be sown on a mild hotbed in February. The winter varieties may be sown from the latter part of July to the middle of September.

RAPE

Italia Broccoli Rape 1-lb. 4.00

SORREL

SPINACH—Continued

Per oz. ¼-lb. lb.

Imperator. Our Imperator Spinach is of the long standing without going to seed type, very dark green leaved, growing close to the ground, rather later in growing than Savoy but very attractive having a very heavily crumpled leaf and standing for a very long period without going to seed	.10	.25	.50
Bloomsdale Savoy Leaved. A large, curled, thick leaved variety, the market gardener's favorite.....	.10	.20	.40
Virginia Savoy Yellows or Mosaic Disease Resistant. A variety originated by the Virginia Truck Experiment Station, a cross between Resistant Bloomsdale Savoy and Manchurian. This is a cool weather variety, for winter in the South and fall in the North. The leaves have markedly the Savoy characteristics	.15	.35	.75
New Zealand. Produces leaves in great abundance throughout the summer, should be raised in heat and transplanted three feet apart each way into light rich soil	.15	.25	.75
King of Denmark Spinach. Large flat tufts. Early. Good keeper. Will stand 2 to 3 weeks longer than the very best long standing variety	.10	.20	.50
New Spinach (Princess Juliana). This is a new type of "Long Season" Spinach. The leaves are of good size, very dark green, well crumpled and thick. The first plants of Spinach to bolt to seed are the male plants. (Spinach is generally dioecious, i. e.; these are male and female plants.) This first bolting seed has been eliminated in this new race by the production of hermaphrodite plants, these plants seeding much later than male plants	.10	.20	.50

Sow in fall for spring use, in drills a foot apart, thinning out the plants to three inches apart in the rows. Spinach is very hardy and does not require protection except in very exposed places, where a covering of straw or leaves is useful. For summer use sow as early as possible in spring, and at frequent intervals, during the season for succession.

SALSIFY, OR OYSTER PLANT

Package 10 Cents

German, Bocksbart; French,

Salsifis; Spanish, Salsifi.

Mammoth Sandwich

Island \$0.30 \$0.85 \$2.75

This very nutritious vegetable requires the same cultivation as Carrots or Parsnips. It is quite hardy and the roots may remain in the ground all winter; a quantity can be taken up and packed in earth or sand, and stored away for use when needed. It makes a fine soup, like the oyster. It is also half-boiled, grated fine, made into small balls, dipped into butter, and fried.

Per oz. ¼-lb. lb.

SQUASH—Package 5 Cents

Mammoth Summer Crookneck. Twice size of Summer Crookneck	\$0.20	\$0.50	\$1.50
Early Golden Bush Scalloped. True bush growth producing fruit ready for use early in the summer	.15	.40	1.25
Early White Bush Scalloped. A white variety of the above	.15	.45	1.50
Summer Crookneck. Early, productive and of good quality	.15	.45	1.40
Boston Marrow. A very valuable medium early variety, an excellent keeper and of superior quality	.15	.40	1.25
Golden Hubbard. The best Winter Squash; fine grained, dry, keeps well and is of excellent flavor	.20	.50	1.50

Mammoth Chili. Grows to a large size, often weighing two hundred pounds.

Excellent for stock 15 .45 1.50

Vegetable Marrow. A favorite English sort, skin greenish yellow, flesh white, soft and rich flavor 20 .50 1.75

Italian (Cocozella di Napoli) grows 20 inches long with diameter of 3 or 4 in. Green or Marbled Yellow. 25 .50 1.75

SQUASH—Continued.

Squashes are divided into two classes, Summer and Winter. The Summer varieties come into use about midsummer, and are eaten when the rind and flesh are young and tender. The Winter varieties are left on the vines until they are thoroughly ripe, gathered in the Fall, and stored away for Winter use. If well ripened and kept in a good cellar, they can be preserved until May. Prepare hill for the seeds by incorporating two or three shovelfuls of well rotted manure with the soil for each hill. For the bush varieties, from three to four feet each way, and for the running sorts from six to eight feet. Eight or ten seeds should be sown to each hill, thinning out after they have attained their rough leaves, leaving three or four of the strongest plants.

SWISS CHARD OR SILVER BEET

5 Cents Package

SWISS CHARD.

Silver Leaf. This is a Beet producing leaves only of a quality superior to those of the ordinary Beet, and excellent greens. Cultivate about the same as spinach, by sowing in early spring in drills about a foot apart. Oz., 15c; $\frac{1}{4}$ lb. 35c; 1 lb. \$1.25.

Giant Lucullus. Large, crinkled leaves; tender and of fine flavor; dark green; pure white ribs. Oz., 15c; $\frac{1}{4}$ lb., 35c; 1 lb., \$1.25.

TOBACCO

-----	-----	-----

White or Sweet German. A large solid variety.

.15	.30	.85
-----	-----	-----

Laing's Improved, Globe-Shaped, with small top and tap root.

.15	.30	.85
-----	-----	-----

For spring crop commence sowing early varieties as soon as the ground can be worked, in drills fourteen inches apart; thin out the plants to five or six inches apart. Keep clear from weeds, and when the bottoms begin to enlarge, brush away the earth from about the roots the depth of an inch or more and give them a light dressing, of wood ashes. This is the surest mode of obtaining fair and smooth Spring Turnips in old gardens where they are almost certain to grow wormy if the earth is allowed to remain in contact with the roots. It is important to get them started very early so that they may have time to grow a sufficient size before very hot weather, when they will soon become tough and strong. For the Fall and main crops, sow from the middle of July to the last of August in drills as directed for the Spring sowing. In the field, Turnips are more generally sown broadcast though much larger crops are obtained by drill culture.

SWEET POT AND MEDICAL HERB SEEDS

Herbs are valuable for culinary and medicinal purposes, but they do not always receive the attention which they deserve. They are easily grown, and when preserved by drying are ready for use at any season of the year. Sow in Spring as soon as the weather is warm, and thin out as the plants grow up.

	Pkg.	Oz.
Anise (<i>Pimpinella anisum</i>), an annual, cultivated for its seeds and its leaves, which are used for garnishing and for seasoning.....	\$0.10	\$0.25
Balm (<i>Melissa officinalis</i>), a hardy perennial, used for making balm tea and balm wine	.10	.35
Basil, Sweet (<i>Ocimum basilicum</i>). This is a tender annual, cultivated for its leaves, which are much used for flavoring soups and sauces	.10	.35
Borage (<i>Borago officinalis</i>), hardy annual, sometimes used as a pot herb, and also for garnishing, but chiefly for claret cup and other cooling drinks. Bees are very partial to the flowers	.10	.35
Caraway (<i>Carum cauri</i>), hardy biennial, cultivated for its seeds, which are largely used in various kinds of confectionery and for giving flavor to liquors.....	.10	.25
Coriander (<i>Coriandrum salivum</i>), an annual, raised for its seeds, which are used by confectioners, and sometimes to disguise the taste of medicine	.10	.25
Dill (<i>Anethum graveolens</i>), annual, the leaves are used in soups and sauces, and the seeds are sometimes added to pickle cucumbers to heighten their flavor. Medicinally they are good for flatulence and colic in infants, ¼-lb., .50; 1 lb., 1.25	.10	.25
Sweet Fennel (<i>Anethum foeniculum</i>), hardy perennial, leaves used for garnishing, and in the preparation of various fish sauces.....	.10	.25
Florence Fennel. An excellent salad plant and is also boiled. The flavor is somewhat spicy. ¼-lb., .60; 1 lb., 1.75	.10	.30
Horehound (<i>Marribium vulgare</i>), hardy perennial	.10	.40

Thyme, Broad Leaved English, hardy perennial. Thyme is used in various ways for soups, sauce and dressings, and a tea is made of the leaves which is a great remedy for nervous headaches	.10	.50
Wormwood (<i>Antemesia abietnum</i>), used for medicinal purposes; it is also beneficial to poultry and should be planted in poultry grounds	.10	.35

American Ready-Lite Lamp and Lanterns

Light With Matches—No Alcohol Torch Necessary

“The Sunshine of the Night”

Ready-Lite With Special Design OPAL SHADE

Gives a brilliant white light of 300 candle power, softened and diffused by the opal shade, making it restful and pleasing to the eyes. The best lamp to read, study or work by and an ornament in any room. Height 20 inches, diameter of fount 8½ inches; capacity 3 pints; burns 18 to 20 hours on one filling. Packed in corrugated box with pump, wrench, tip cleaner, mantles and one extra generator. Each\$8.50

Ready-Lite Lantern With Mica Chimney and Reflector

The New Ready-Lite marks a great improvement in gasoline lanterns, especially in the construction of the generator. This new match-lighting generator has no coils to obstruct and hold impurities in the gasoline and will give unusually long service. It is very inexpensive and may be replaced quickly without breaking the mantle. The New Ready-Lite is more substantially built, better finished than similar lanterns. Price\$6.98

READY-LITE ADVANTAGES

BRILLIANT—300 Candle Power, strong pure, white light. Brighter than 20 old style lamps or lanterns.

SAFE—Can't spill fuel or explode even if tipped over. Can't be filled while lighted.

CLEAN—No greasy wick to trim. No dirty chimney to wash. No smoke. No soot. No odor.

ECONOMICAL—Cost to use less than half a cent per hour.

CONVENIENT—Make and burn their own gas—light with matches. Lamp holds 3 pints—burns 18 hours on one filling. Lantern holds quart—good for 12 hours per filling.

DURABLE—Made of brass, heavily nickel plated, and highly polished.

SPONGE RUBBER KNEELING PADS

Excellent for the Home Garden Use

Price, \$1.48

ABOUT LAWNS AND LAWN GRASS SEED

FORMATION OF LAWNS FROM SEED.

There is nothing more attractive than a well kept lawn.

Many things are to be considered in connection with the making and proper care of lawns. A good lawn cannot be made in one season, success coming only through intelligent care for a period of years.

The ground should be thoroughly drained and well prepared. The soil ought not to be too rich, as a rapid growth is not wanted in the grasses of a lawn; but the surface should be as much alike in quality as possible and thoroughly pulverized. After sowing, the ground should be rolled and cross-rolled in order to press the seed firmly into the soil, and ten days or so thereafter a light application of Muzzy's Lawn Fertilizer mixed with an equal quantity of good loam or sand, will serve to stimulate the growth of the young grasses. The proper time to sow grass seed depends, of course, upon the latitude. In the central and eastern states from March 15 to the middle of May is the best time; but in favorable seasons the sowing may be done up to July 1. Seed may also be sown in the Fall, from the latter part of August to the end of September. The sowing should be done when the ground is moist, or before an expected rain, and a subsequent rolling is always advisable. As to weeds in newly-made lawns, it may be generally known that many weed seeds actually lie dormant in the ground for six or seven years and will germinate and make their appearance when the soil is turned up. The annual wild grasses, such as crab grass or Summer grass, must be pulled up by the roots before they ripen their seed in the Fall.

Rolling.—As soon as the frost is out of the ground in the Spring, the land should be gone over with a heavy roller. Winter frosts loosen the soil, and rolling is necessary to compress it again. Roll frequently.

Mowing.—All turf-forming grasses are improved, both in vigor of root-growth and in fineness of texture, by frequent mowings. It is impossible to say just how often the grass should be mown, as that depends upon the rate at which it grows. Too close cutting should be guarded against, however, especially during the hot Summer months, when the roots require some top-growth to protect them from the burning sun. A good top growth is also necessary to protect the roots from severe Winter frosts.

It is a good plan to sow on good land, in any out-of-the-way place, strips for sod to be used for patching poor parts of the lawn, or for grass borders, etc. The best mixture of seed for this purpose is *Cynosurus cristatus* (Crested Dog's-tail). Kentucky Blue Grass and Fancy Red Top.

OUR CELEBRATED LAWN GRASS

	½lb.	1lb.	2lb.	5lb.	20lb.
Standard Lawn Grass. Composed of a mixture of the finest grasses; sow three bushels per acre	\$0.30	\$0.50	\$1.00	\$2.25	\$8.00
Velvet Lawn Mixture. This extra choice mixture contains a large proportion of the finer and more expensive special of grasses, in extra heavy samples, producing a turf of the closest and finest texture possible	.35	.65	1.20	3.00	11.00
Shady Lawn Mixture. A mixture of grasses that thrive in shady situations, under trees, or close to walls where there is little sun	.35	.65	1.20	3.00	11.00
Special Lawn Mixture. Adapted specially for new ground; that is, when no lawn existed. It grows quick and abundantly. It has the finest grass	.35	.65	1.20	3.00	10.00

QUANTITIES TO BE USED

Plot 20 feet by 20 feet, sow 1 pound.

Plot 25 feet by 100 feet, sow 6 pounds.

Plot 25 feet by 50 feet, sow 3 pounds.

Plot one acre, sow 80 pounds.

For large lawns, where turf has become bare through constant use, it is only necessary to sow fresh seed at the rate of one to two bushels to an acre.

Grassland

If the story of Grassland could ever be fully told, a wonder of nature would develop before your eyes that would surpass any imaginative fiction.

It's a wonderful place—Grassland—endowed with beauty of character and grace which only a God could give it. We sweep a handful of tiny brown specks over an ugly bare spot—and lo—it begins to live. It soothes and calms weary eyes from its first tiny sprout. Ultimately it charms and captivates all men. Developed into a rich carpet of softest velvet, we find it everywhere.

However, this heritage, rich though it is, is sometimes wantonly wasted and often the most elementary principles regarding its care are disregarded.

Yet its care is so easy and simple.

Take your own lawn as an example.

Look at it just as it is today! There are brown spots here and there; bare spots; even little places where moss has gained a foothold; and weeds

Then compare it with some of those wonderful places you pass along the road where the lawn always seems bright, clean and crisp; and is always the freshest looking green spot in all the land.

That good looking lawn is alive. Your lawn where the brown spots are, is dead; where the weeds are, it's dying; where the moss is, it's ruined—and all for the lack of a little care. (G.)

Our Celebrated Lawn Grass Mixtures have a sustained reputation, covering many years. With our long experience and carefulness we are in a position to give our customers the right seed for the condition that exists in their particular case.

What About Your Lawn?

Your Flowers Need Food

Flowers are delicate, tender, living plants that need food as well as water. Like you and me, they eat, drink and breathe. Water them well, **FEED** them properly, and they will flourish with increased health and beauty.

Bowker's Lawn and Garden Dressing, manufactured by The American Agricultural Chemical Company especially for use with flowers, shrubs, and bushes, is a complete plant food, containing all the essential elements, good health, and beauty of blossom and foliage. Bowker's Lawn and Garden Dressing is put up in 10, 25, 50 and 100 lb. bags. As easy to handle as sugar and salt. Use Bowker's Lawn and Garden Dressing liberally and make sure your flowers get all the food necessary to develop the fullest, fairest life. It is cheaper than manure, cleaner, and more effective. Directions with each package.

10 lbs. 90c; 25 lbs. 1.50

SOLD BY WILSON S. BROWER CO., Inc.

HOW TO APPLY BOWKER'S LAWN AND GARDEN DRESSING

For annual flowering plants Bowker's Lawn and Garden Dressing should be broadcasted after spading the soil at the rate of 10 to 20 pounds per thousand square feet. Rake thoroughly in such a manner as to mix it well with the upper two to five inches of soil. Wait for a rainfall before planting. For perennials, roses, and shrubs, scatter three or four handfuls over the root area of each plant, keeping it away from the stalks or butts. If not on a lawn, the fertilizer should be worked into the soil to a depth of two or three inches.

50 lbs. 2.50; 100 lbs. 4.50

What a difference a few of these magic tablets make!

Picture a plant—struggling gallantly but vainly—in a feeble, fruitless search to find food in soil that contains none. Faded, drooping, flowerless, **you** call it a failure. But is it?

A few of the magic plant food tablets called Plantabbs would have made this pathetic little plant a big success!

We now sell and recommend Plantabbs. Odorless, clean, easy to use, they're Trojans for work. A forkful of stable manure won't do as much for your plants and flowers as one of these concentrated, odorless white tablets! As they dissolve in water almost instantly, they make a wonderful liquid fertilizer, and when used in this way make the most wornout soil rich and fertile overnight.

Plantabbs are so perfectly balanced, so chuck full of growth producing, health giving, energizing plant food, that many florists and professional growers purchase them in quantities for their own use.

To raise potted plants of amazing beauty, to enjoy a gorgeous garden with a profusion of brilliantly colored blooms, to raise tender succulent vegetables, use Plantabbs! Leading horticulturists and State Agricultural Departments approve them—and **we guarantee** to refund your money if they fail to benefit your plants when used according to the instructions which come with each package.

A season's supply for your garden costs only \$3.50; other sizes sufficient for potted plants, sell for \$1.00, 50c. and 25c per package. Include in your next order.

Guaranteed

your plants

Turn Garden Refuse Into Rich Manure

Do not destroy garden refuse. It represents more than half the yield of the soil. By the simple ADCO process it can be converted into manure and turned back to nourish that same soil.

Anybody can use ADCO, and every good gardener should use ADCO. Nothing takes the place of manure, and with ADCO you can make quantities of it, rich, odorless and clean.

25 Lb. Bags \$2.00
100 Lb. Bags \$7.00

GRASS SEEDS

Hard Fescue (<i>Festuca duruiscula</i>), admirable pasture grass of fine quality, thrives well in dry situations. 30 lbs. to the acre	Market Price
Meadow Fescue (<i>Festuca pratensis</i>), this is excellent for hay when sown with other grasses, such as Orchard Grass and Timothy, and is also considered one of the greatest grasses for permanent pasture on a great variety of soils. 40 lbs. to the acre.....	Market Price
Sheep's Fescue (<i>Festuca ovina</i>), does well in high, dry and open pastures, is of short, dense growth, and valuable in lawn mixtures, 30 lbs to the acre.	Market Price
Orchard Grass (<i>Dactylis glomerata</i>), is one of the most desirable of all pasture grasses, coming early in the Spring and remaining later in the Autumn than any other. 3 bu. to the acre. 14 lb. bu.	Market Price
Fancy Red Top Grass , cleaned like Timothy; free from chaff	Market Price
Rhode Island Bent Grass (<i>Agrotis Tennis</i>), best of all grasses for lawn where only one variety is used.....	Market Price
Rye Grass English (<i>Lolium perenne</i>). Probably one of the most important and valuable of the cultivated grasses; is naturally adapted to almost any soil; matures early, and is very productive, but contains less nutrition than Orchard Grass.....	Market Price
Rye Grass Italian (<i>Lolium Italicum</i>). This ripens much sooner than the English Rye Grass, and is greatly preferred by cattle and greedily eaten by them, either in a green or dry state.....	
Tall Meadow Oat Grass (<i>Avena Elatior</i>). As a crop to cut for hay, this is very desirable because of its early and luxuriant growth. It shoots up very quickly after being cut, and produces a thick crop of aftermath, which also makes it valuable as a soiling crop. It has been lately in demand and is much valued in the South.....	Market Price
Timothy, Herd's Grass (<i>Phleum pratense</i>). As a crop to cut for hay, this is probably unsurpassed. It thrives best on moist, peaty or loamy soils, and is not suited to light or sandy soils, although on such it can with care, be made to produce fair crops. Price according to market, 45 lbs. to bu...	Market Price.
Wood Meadow Grass (<i>Poa nemoralis</i>). This grass grows well both on shady and exposed situations. 30 lbs. to the acre	Market Price
Tall Oat Grass (<i>Avena Edatior</i>), good for dry pastures and meadows. Is much relished by sheep.....	Market Price
Golden or German Millet . This variety is a heavier cropper than the Hungarian Grass, and needs a longer season and stiffer soil. Grows from three to five feet high, stands up well, is easily cured; gives general satisfaction. Three pecks to the acre. Per bushel of 48 lbs.	Market Price
Japanese Millet . This wonderful Millet yields possibly more fodder than any other forage plant that requires so little to sow an acre. Frequently as high as 12 tons of green food have been obtained from an acre. It is somewhat coarse in texture, growing sometimes as high as 8 feet; it is, however, ideal for silo or hay purposes. If sown early in May, it may be cut twice in one season. It branches out at the roots, and more than 12 lbs. per acre broadcast cannot be sown to advantage. Sow any time from May 1 to June 15.	Market Price
Hungarian Grass . A valuable forage plant, succeeds well on dry, light soil; withstands the drought remarkably, remaining green when all other vegetation is parched up, and if its development is arrested by dry weather, the least rain will restore it to vigor. Sow broadcast. Three pks. to the acre Per bushel of 48 lbs.	Market Price

Prices on above subject to market fluctuations without notice.

GRASS SEED—Continued.

These Prices are Subject to Variation.

Blue Grass Kentucky (<i>Poa pratensis</i>), extra clean; does well on light dry soils; recommended for permanent pasture; it requires two or three years to form a good sod, and does not arrive at its perfection as a pasture grass until it is much older; valuable in mixtures for lawn. 14 lb. bushel.....	Market Price
Blue Grass Canada. Little coarser than Kentucky	Market Price
Creeping Bent Grass, Florin (<i>Agrotis stolonifera</i>), used for lawns, well adapted to most places	Market Price
Crested Dogtail (<i>Cynosurus cristatus</i>), good for permanent pasture for sheep, is productive and early, suffers but little from dry weather, and is one of the best grasses for lawns, 25 lbs. to the acre	Market Price

CLOVERS

(Subject to Variation in Price).

Red Clover. Medium (<i>Trifolium pratense</i>). Price variable, 60 lbs. to bushel.	Market Price
Red Clover, Large or Pea Vine. Price variable	
White Clover. (<i>Trifolium repens</i>)	
Alfalfa or Lucerne. Requires a deep rich soil, and in such will produce several crops every season. Fifteen pounds to the acre.....	
Alsike or Swedish (<i>Trifolium hybridum</i>). Ten pounds to the acre.....	
Crimson or Italian (<i>Trifolium incarnatum</i>), sown in Autumn, it furnishes an early fodder and is excellent for soiling. Twenty pounds to the acre. Price variable.....	

MEADOW AND PASTURE MIXTURES

The formation of permanent and productive meadows and pastures is of great value to farmers, and has been given thorough study by numerous experts, resulting in formulas that will give good results under the varying conditions of our climate.

It is a well known fact that a heavier and more prolonged growth is produced by a mixture of many sorts of grasses than by only one or two. Some sorts do best on high, dry soil, while others prefer plenty of moisture. Some mature so early and others so late that there is no time in the season when one sort or another is not at its best. Grass seed may be sown either early in spring or fall, from September to the middle of October in this latitude. Below we give mixtures that we are confident will give good results.

MEADOW MIXTURE FOR ONE ACRE

- No. 1. On Good Land,
Neither Too Dry nor Too Wet
Price 15.00 for 40 lbs. Sow 40 lbs. to the acre
- No. 2. For High and Dry Land.
Price 15.00 for 40 lbs. Sow 40 lbs. to the acre
- No. 3. On Wet Land
Price 15.00 for 40 lbs. Sow 40 lbs. to the acre

PASTURE MIXTURE FOR ONE ACRE

- No. 4. On Good Land.
Neither Too Wet nor Too Dry.
Price 15.00 for 40 lbs. Sow 40 lbs. to the acre
- No. 5. On Dry Land
Price 15.00 for 40 lbs. Sow 40 lbs. to the acre
- No. 6. On Wet Land
Price 15.00 for 40 lbs. Sow 40 lbs. to the acre

GRAINS

All grains are selected expressly for seed, and are strictly pure and true to name.

Sold at Market Prices and Subject to Change.

SPRING WHEAT, 60 lb. Bushel.

Marquis Spring. This variety has been grown with great success for a number of years in Canada, and is very highly recommended, is bearded, yields well and the kernels are larger than those of other Spring varietiesMarket Price.

White Russian. This variety, recently introduced, has proved very valuable in many localities in the Northwestern States. Straw of good length, strong, does not lodge. It is not inclined to rust. Heads of large size and well filled with plump kernels weighing 60 to 63 lbs. to the bushel. Has produced 40 to 50 bushels to the acre..... Market Price.

WINTER WHEAT, 60 lb. bushel.

Red Man. Also known as the Seneca. This is a beardless white wheat. It proves early and hardy, has a stiff straw, yields larger crops than any otherMarket Price

Fultz. A beardless amber variety, grown largely in some sections of Pennsylvania and with very satisfactory results. It is very hardy and productive, and the straw is of medium length and very strong; makes excellent flourMarket Price

Red Mediterranean. (American). This is the imported variety fully acclimated and is a standard wheat. The heads are bearded and well filled. It succeeds well in nearly all localities and ripens earlyMarket Price

OATS, 32 lb. bushel.

SWEDISH. Very popular and standing well until fully ripe

Spring and Winter Rye, 56 lbs. to Bushel

SPRING BARLEY, 48 lb. Bushel

Vermont Champion (two rowed)

BUCKWHEAT, 48 lb. Bushel.

Silver Hull. This variety is a great improvement on the common Buckwheat. Sown at the same time it will continue to bloom longer, matures a few days sooner, and yields nearly or quite double under the same conditions.

JAPANESE BUCKWHEAT.

Yields twice or three times as much as Silver Hull and ripens a week earlier

General List of Flower Seeds

CULTIVATION OF FLOWER SEEDS

HARDY ANNUALS

Successive sowing may be made from March to the end of September; March, April and May are the best months for general Summer display; June and July for Autumn blooming, and August and September for Spring flowering. The soil should be carefully prepared by being finely pulverized and made light and rich.

Sow thinly; cover with a very thin coat of fine dry earth—the smallest seeds needing but a mere dusting to cover them—and from the first keep the plants thinned sufficiently to prevent overcrowding, which weakens them and produces poor blooms.

HALF HARDY AND TENDER ANNUALS.

These include some of the most beautiful and varied of our Summer flowers, among which may be mentioned Asters, Balsam, Ten Weeks Stocks, Phlox, Drummondii and Double Zinnia, which in form, size and brilliancy of flowers, and their great diversity of color, are now brought to a high state of perfection.

Sow from the beginning of March to June; when sown in March and early part of April, sow thinly in well-drained pots, pans or boxes; place in the greenhouse or a frame where there is a mild heat, or in the absence of these a sunny window in the house will do; cover the seeds lightly, press down the soil firmly and give a gentle watering with a fine rose watering pot.

Separate the plants when large enough to handle, and firmly plant out in May, as soon as the weather is sufficiently warm where intended to flower. The seed can be sown in the open ground in May and June.

HARDY BIENNIALS AND PERENNIALS.

These can be grown at all seasons of the year in the open garden without protection, and may therefore be placed among the most useful of our flowering plants their variety is almost endless, producing almost every form of flower and shade of color.

The seeds may be sown from May to October, but the best time is in May and June. Select for sowing a shady, moist situation, and in order to secure fine, strong plants, sow thinly, and as soon as large enough transplant in showery weather to nursery beds, and finally plant out in October and November, those sown in Autumn are best planted out in March or April, where intended to flower. Many Perennials, if sown early and treated as Annuals will flower the first season. The Pansy, Petunia, China Pink and its several splendid varieties, and many others do better as Annuals than Perennials.

ANNUALS FOR WINTER BLOOMING

Many Annuals are very desirable for the greenhouse for Winter blooming; these should be sown in July or August. The most important are Browallia, Candytuft, German Stocks, Lobelia, Mignoneite, Schizanthus, Sweet Alyssum and Dwarf Nasturtiums. Many varieties as well as the above may be sown in the Fall and Winter for blooming early in the Spring, such as Acroclinium, Ageratum, Antirrhinum, Apple-scented Geranium, China Pinks, Dianthus, Mimulus, Myosotis, Pansy, Petunias, Phlox Drummondii, Salpiglossis, Salvia, Verbena Vinca and others.

Abbreviations and Signs used in the following list

A. Annual, refers to those plants that last but one season and must be raised annually. B. Biennial, raised one year, bloom and die the next. P. Perennial, lasts two or more seasons. h. Hardy, as those that may be grown at all seasons in open air, without protection. hh. Half hardy, require the protection of a frame pit; or handlight till May, when they may be transferred to the open garden.	t. Tender, require to be raised and grown under glass, and will only do in the open air in July, August and September. cl. Climbing, as Cypress Vine, Morning Glory, etc. spr. Spreading or trailing as Verbena. g. Greenhouse, those plants which require to be grown under glass. s. Shrubs, plants of a shrubby or bushy habit.

Those Biennials, and Perennials marked with an (*) will bloom the first year if sown early.

Price on Application

Early Flowering Spencers—Sweet Peas are annually becoming more popular with Florists, both for growing under glass and outdoors. In some localities these Early Flowering Spencers have displaced the original or later flowering type for outdoor planting. Reports from those in the Seed Trade who supply the most critical Florists with their planting stock speak most enthusiastically as to the pureness and quality of our stocks.

Per ton	\$28.00		

PULVERIZED LIMESTONE

You are interested in getting the largest possible return in money, comfort and social advantages from the crop you grow. "Lime Crest" is one of the essentials in securing good crops. Every State Agricultural Department is stressing the use of Lime. It is a waste of time and energy to cultivate the soil until this need of Lime is supplied.

First—Lime is an essential plant food.

Second—Lime aids decaying organic matter to make humus.

Third—Lime prevents humic acid and other compounds from being leached from the soil.

Fourth—Lime prevents the growth of injurious bacteria.

Fifth—Lime aids the liberation of potash and phosphorus.

Sixth—Lime renders clay soils granular and more porous.

"Lime as a fertilizer depends largely on the available calcium which it adds to the soil."

To be effective, Lime must be in form of a powder, and the finer the powder the more valuable the product. "Lime Crest" brand of Calcite Pulverized Limestone contains up to 95% of carbonates; is so finely powdered that 70% of it will pass through a 200 mesh sieve, that is, a sieve with 40,000 openings to the square inch. "Lime Crest" is also white in color, and when shipped is packed in 80 pound bags, either cloth or paper, which makes it easy to handle.

Ground Limestone packed in 80 lb. sacks, price \$1.00; \$15.00 per ton.

Special Prices to Garden Clubs and Farmers.

The Philadelphia Line

STYLE L

The style L Mower is designed for the home which demands a well built mower for use on small and medium size lawns.

It has medium-size wheels, four crucible steel blades in the revolving cutter, and is made on the same tools and by the same workmen who produce the higher grade mowers.

14 inch	\$8.98
16 inch	\$9.48

STYLE H

Style H is a new open-wheel and open-side frame mower with high wheels. It is exceptionally light in weight and made in the best possible. It is equipped with adjustable roller bearings which make it very easy running. The large diameter revolving cutter is equipped with four crucible steel blades. It is an exceptional mower for the price.

16 inch	\$14.98
18 inch	\$15.48

STYLE K

Style K is equipped with Arguto Oilless Bearings.

These mowers are particularly adapted for use on household lawns where a high-grade mower is desired for general use. The materials and workmanship are fully guaranteed. It is a five-blade mower.

14 inch	\$19.50
16 inch	\$21.50
18 inch	\$23.50
20 inch	\$25.50

STYLE S C

Style SC is a new pressed steel mower built for that class of trade requiring a mower for ordinary household use.

This mower has nine-inch drive wheels, four crucible steel blades in the revolving cutter. It also is equipped with radial ball-bearings that do not require adjustment or any other attention from the operator.

15 inch	\$21.50
18 inch	\$23.98

TRIMMER

The Philadelphia Lawn Trimmer is the most efficient ever built. It is really a "half-portion" of one of our higher grade mowers designed to mow close to trees, fences and around flower beds and edges—in tight places where a standard-size mower cannot be used.

6 inch	\$11.75
--------------	---------

The Philadelphia Motor Mower

The Philadelphia "21-Inch" Motor Mower is a small-size motor machine that can be depended upon to do the work required.

The cutting unit is constructed in the most up-to-date manner developed to accommodate the motor and with stand rough usage. The revolving cutter can be removed from the frame for regrinding without distributing any other parts.

The motor is a single-cylinder, air-cooled, four-cycle engine of $\frac{3}{4}$ to $1\frac{1}{2}$ H. P. There are but two controls—one for the clutch and one for the gas. The magneto is self contained in the flywheel.

This unit is, in our judgment, the most economical type of mower for lawns of from $\frac{1}{2}$ to 3 acres.

The wide pressed-steel wheels are unbreakable.

The clutch is the most effective ever designed.

It is guaranteed for materials and workmanship.

21 inch \$150.00

The William Penn Mower

The William Penn is one of the finest ball bearing mowers built. It has a 16-inch cutting blade and is equipped with 10 in. open drive wheels, making it as light as possible.

Price, \$16.50

THE MIRACLE OF MULCH PAPER

Mulch Paper is not offered to the planter as a panacea for all farming ills and as a miracle worker among all types of crops or under all conditions—though it has wrought miracles in hundreds of tests in this country and abroad in the form of increased and earlier yields.

Gator-Hide Mulch Paper is essentially an agent for increasing soil warmth, soil temperature and for eliminating some of the drudgery of weeding and cultivating that has been the lot of the farmer for centuries. It adds heat units to and conserves moisture units in the soil mass in much the same way that fertilizers add to the natural store of plant food elements.

Obviously, there are certain conditions where additional soil warmth and soil moisture are not needed to effect healthy plant development, and since the action of Gator-Hide Mulch is based upon certain scientific principles which we have barely touched upon here, an understanding of these will permit the farmer to use Gator-Hide to the best possible advantage at all times. Its use, however, will hardly require any more judgment than the farmer customarily gives to all agricultural practices.

\$3.50 Per Roll, 18 in. Width

Either Type "A" or Type "B"

\$7.00 Per Roll, 36 in. Width

Type "A" Contains 300 Lineal Yards
18 in. Weighs About 30 Lbs. Per Roll

Type "B" Contains 150 Lineal Yards
36 in. Weighs About 60 Lbs. Per Roll

The Meeker Smoothing Harrow

"Helps Good Seeds Grow"

Prepares Any Soil for Planting

THE MEEKER HARROW is a perfect pulverizing and smoothing harrow and land roller combined.

As the illustration shows, it has four sets of rollers, equipped with 46, 58 or 82 discs, depending upon the size. These discs are set in alternating rows so that the entire surface is thoroughly worked. They grind up all lumps, leaving the soil fine and smooth. Even in damp soil, the alternating arrangement of the discs prevents clogging.

The board in the center serves as a leveler. It is set at an angle and can be adjusted up and down. It smoothes down ridges and fills up the hollows.

Price 6 ft., 8 in. x 6 ft., with 8 discs, \$40.00
Price 4 ft., 6 in. x 4 ft., with 8 discs, 36.00

THE BOSS PLOW

This is the best one horse convertible Plow ever sold for the use of market gardeners and farmers generally. By changing the Moldboards and Shares that come with the Plow, the purchaser actually has four plows in one. Price complete \$12.48

No. 1½ Moldboard and Share makes a large one horse Plow.

No. 2½ Moldboard and Share making a medium sized one horse Plow, a cabbage Moldboard and Share making a complete Cabbage Plow, and by using the Plow without the moldboard with the small Share bolted to the standard, makes a superior Plow for working among cabbage, strawberries, etc.

LIME, HYDRATED

The value of lime as a soil improver is so well known that little need be said about it here. Although it possesses little fertilizing value in itself, it is indispensable for correcting acid soils, improving the mechanical condition of the soil, for grass and farm crops. It is finely pulverized. Acting very quickly.

50 lb. Sack 75c

CEMETERY FURNITURE

Cemetery Settees, Chairs, Urns, Etc.

(PRICES ON REQUEST)

We Carry In Stock a Full Line of Lawn Settees, Park Benches, Chairs, Lawn Swings, Etc. in Season

The Eclair No. 1 Sprayer—Has no plunger nor complicated mechanism. Its simple diaphragm pump eliminates the usual pump troubles. Pressure can easily be maintained at forty pounds.

Vermorel Eclair No. 1 Knapsack Sprayer

In reliability and efficiency the Eclair No. 1 has no equal. Its ease of operation makes spraying a real pleasure.

Furnished in either brass or copper. **Price \$20**

Vermorel Dusters are simple and compact—economical and efficient. For applying sulphur, arsenate of lead, calcium arsenate, Bordeaux Mixt., nicotine dust, etc., either of these models will give excellent results.

Vermorel "DOUBLE ACTION" Duster

Double Action—Principally in the fact that it functions both on up and down strokes, thus giving forth a semi-continuous flow. **Price \$20**

Planet Jr. Garden Tools

Planet Jr. tools are designed and built to do a greater variety of work and to do it better than any others available for the use of the home gardener, market gardener, trucker, and general farmer.

OHIO SPIKE TOOTH HARROW - 60 Teeth

The U-bars, channels, oscillating bars and teeth, are made of high carbon steel, precluding all possibility of bending. The channels, being placed at the ends of the U-bars, prevent them from catching on obstructions as is frequently the case with the open end harrow. Strong and well made but carrying no superfluous weight. Corner braces, oscillating castings and lever castings of malleable iron. Made in one 30 tooth section, and with $\frac{5}{8}$ teeth, \$13.98, or in Two 30 tooth sections with $\frac{5}{8}$ teeth, \$26.00.

Flexible - but doesn't crack or break

CEL-O-GLASS is also ideal for greenhouse and hotbed sash. Its extremely light weight and the fact that it is unbreakable permits of lighter construction and resulting economies

heretofore impossible with ordinary glass.

CEL-O-GLASS IS NOT A FABRIC. It has a tough wire mesh base which gives it almost unbelievable strength. It is unbreakable, hail-proof, snowproof, rainproof and heatproof. Thousands of florists and growers have proved the durability of CEL-O-GLASS in actual use. It is easy to apply and presents a very neat and attractive appearance. An ordinary hammer, a few tacks and a pair of scissors are all the tools you need. No glazing, no expensive labor. No breakage.

CEL-O-GLASS comes in rolls 3 feet wide, in any length desired. Include a trial roll of CEL-O-GLASS in your next order. Price, 17c sq. ft.; roll, 15c sq. ft.

MAIL BOXES—Rural Gem No. 4, With Self-Closing Door

Approved by Postmaster General

DESCRIPTION.

Made from 22-ga. galvanized steel; absolutely storm-proof; the door is hinged at the bottom and yet is kept constantly closed by a spring hinge—cannot carelessly be left open nor blown open by the wind; has a large flag, visible for a long distance and easily operated; has inside

letter and penny holder; has a drop-letter hole in door; has substantial steel padlock-hasp; words "U. S. Mail" and "Approved by Postmaster General" are embossed in door and will remain as long as the box lasts; finished in weather-proof aluminum, fully one inch taller than most boxes of this style, \$1.48.

KEEP PLANT INSECTS AWAY

M-G-K QUALITY
EVER GREEN
 NON-POISONOUS INSECTICIDE

Kills both chewing and sucking varieties—Aphis, Thrip, Leaf Hopper, Leaf Roller, Cut-worms, Rose Chafer, Squash Beetle, Cabbage worm, Tent caterpillar, etc.

Harmless to man, livestock, birds and pets. Will not burn or harm tender plants or flowers. Safe and pleasant to use.

Just mix with water and stir—it stays in solution and won't clog sprayers or corrode metal.

Mailable—being non-poisonous, Ever Green may be sent through the mail.

MAKE YOUR FLOWERS AND VEGETABLES GROW FASTER

STIM-U-PLANT

THE MAGIC FERTILIZER IN TABLET FORM

STIM-U-PLANT is the only complete plant-food in tablet form. The three mineral plants (flower and vegetable) are nitrogen, phosphoric acid, and potash. Because of this fact, STIM-U-PLANT tablets are made up of these three in a balanced ration of 11 per cent. Nitrogen, 12 per cent. Phosphoric Acid, 15 per cent. Potash—all of which elements are water-soluble and immediately available to the feeding root-hairs of the plant.

Small size, 30 tablets\$0.25 Medium size, 100 tablets\$0.75

Large size (pail), 1,000 tablets, (enough for season's supply for medium-sized garden) \$3.50.

Insecticides and Remedies for Plant Diseases

Volek. The Scientific Insecticide for nursery, greenhouse and garden. Controls scale insects, mealy bug, white flies, red spiders, rust mites, aphids and thrips. $\frac{1}{2}$ pint, 50c; pint, 75c; qt., \$1.00; gal., \$3.00; 5 gal., \$12.00.

White Helleboro. An excellent remedy against currant worms, rose slugs, caterpillar, etc. Can be used either dry or in water; $\frac{1}{4}$ lb., 18c; $\frac{1}{2}$ lb., 25c; 1 lb., 45c.

Lime and Sulphur Solution. For San Jose scale, 1 gal. makes 15 by adding water. 1 qt., 50c; 1 gal. 1.00; 5 gal. 3.75; $\frac{1}{2}$ bbl. (30 gal.) 25c; 1 bbl. (50 gal.) 20c gal. Dry—lb. 30c; 5 lbs. 1.25; 10 lb. 2.00; 25 lb. 4.00.

Fish Oil Soap. One of the most effective agents used for destroying scale bug, plant lice and all other insects injurious to vegetation.

Price, 1-lb. box, 30c

ARSENATE OF LEAD—DRY

Its great advantages are that it adheres well to the foliage and spraying does not have to be repeated, as it does not readily wash off by rain.

1 lb. lots 30c; 5 lb. lots \$1.25; 10 lb. lots \$2.20

25 lb. lots \$5.00

PEACH TREE BORER—(para—Dichlorobenzine)—A successful remedy for Peach Tree Borer. Recommended by U. S. Department of Agriculture and the State Experimental Station—Price, 1 lb., 50c.

Poultry Netting

Our Poultry Netting is woven from the best quality of steel wire of full standard gauge. It is heavily galvanized after weaving, thus insuring the greatest durability.

Wire 2 inch Mesh, 1 ft., 2 ft., 2½ ft., 3 ft., 4 ft., 5 ft., 6 ft. No. 20 Wire 1 inch Mesh, 1 ft., 2 ft., 2½ ft., 3 ft., 4 ft., 5 ft. and 6 ft.

Market Prices.

Ornamental Fences and Gates

Our Ornamental Fences are exclusive in design, and embody many highly meritorious features not to be found in those of any other manufacture.

Our fabrics are made by cabling horizontal wires and inserting, at regular spaces, heavy upright or picket-wires which are corrugated either at intervals or continuously to engage the cabled line-wires, reversing the twist of the cable on each picket—thereby causing the cables to become firmly seated in the corrugations of the uprights, thus forming an immovable joint, and providing for contraction and expansion. Will not unravel when cut. Made of copper bearing steel.

Have a Conkey Corner in Your Poultry House

Raising poultry is pleasant and profitable when "good luck" is with you. Good luck, however, is not merely a matter of chance, but of BEING PREPARED. For more than twenty-five years Conkey has been THE POULTRY DOCTOR. Take his advice. Install a Conkey Corner of remedies in your poultry house as insurance against disease, trouble, loss and disappointment. We sell Conkey's Poultry and Stock Remedies because we know they are reliable and we can guarantee them as follows:

Your money refunded cheerfully if any Conkey Remedy does not satisfy.

Conkey's Roup Remedy

When Roup breaks out there's no time to experiment—start treatment at once—the disease is very contagious. Cold, rainy weather and changeable conditions intensify Roup. When birds sneeze, froth in eyes, or run at nose put Conkey's Roup Remedy in the drinking water. Sick birds doctor themselves and others are protected from catching the disease. Better still, always at the first sign of "roupy weather," place Conkey's Roup Remedy in fountains—it's a great preventive.

Pkgs. 30c, 60c, \$1.20; or 35c, 65c, \$1.30 postpaid; 1½ lb. can \$2.50 postpaid; breeder size (5 lb. can) \$5.75 postpaid.

Conkey's Scaly Leg Remedy

Pkg. 25c; or 30c postpaid.

When ordering any remedy by mail always send postpaid price.

Conkey's White Diarrhea Remedy

Once you have used this old reliable preparation, you will never be without it. As a preventive of bowel troubles, White Diarrhea and other digestive complaints, it has given great satisfaction for many years. Once started diarrhetic conditions often sweep away the whole hatch—hundreds of chicks. Play safe—keep this remedy in the drinking water until the danger period is past. This remedy is also recommended as a preventive measure and for treatment of coccidiosis.

4 qt. Jugs	75c

Charcoal

Prepared expressly for poultry, absolutely pure, essential to health of fowls and aids to digestion. We carry three grades:

No. 2. Fine, for use on mash mixtures.	
No. 1. Medium, for small chicks.	
No. 0. Coarse, for fowls, 1 lb. 10c.	
5 lbs., 35c. 10 lbs., 60c. 25 lbs., \$1.00	
50 lbs., \$1.75 100 lbs., \$3.25	

Ground Bone

Fine and Granulated.

Ground Bone is made from Dry Bone, and contains Phosphates, Lime and Protein and is especially valued as an egg producer.

Prices on application.

Gold Leaf Tobacco Powder

Controls Round Worm in Poultry

Mix 2 pounds of GOLD LEAF TOBACCO POWDER in 100 pounds of your customary mash.

Feed this mixture regularly for two or three weeks and then discontinue for the same period. Alternate this treatment as long as is necessary.

Thoroughly clean and disinfect the house; provide new litter and keep the birds off infected ground.

Oil Brooders

IMPROVED RELIABLE VALVELESS OIL LEVEL, BLUE FLAME HOVER

This hover has the same chick capacity as the coal burning brooder. They are made in three sizes, 30 inch, 42 inch, and 52 inch hover. A few of the special points on this oil heated hover are as follows:

Burns Coal Oil. No Wick to Trim. Steady Blue Flame. Abundance of Heat. Comfortable and Easy to Operate. No Oil Fumes. Visible Oil Feed. Economy of Operation. Convenient and Safe. No Coal, Smoke or Gas. The Flow of Oil is Regulated Automatically.

A Clean, Odorless, Disease—Free Substitute for Manure Free from Weed-Seed. Entirely Unlike Any Domestic Product

IMPORTED GRANULATED **PEAT MOSS** TORF MULL

assures better lawns and gardens. It will lighten and make more friable clay soil and will help to retain the moisture in sandy soil. Use it wherever a mulch is needed. Improves Roses, Dahlias, Gladiolas, Peonies, Foliage and Vegetables. Absolutely necessary for good Rhododendrons and other Broad leaved Evergreens; also the Cone Bearing Evergreens.

Bales containing sufficient material to cover 240 square feet, one inch deep, \$4.00 per bale

“O. K.” SANITARY POULTRY LITTER

Peat Moss Will Do for you What It Has Done for Others—

O. K. POULTRY LITTER

“—controls trouble with cold, wet floors and consequent disease.”

Is a light, natural, imported Peat Moss—different from any domestic material—no other product similar.

For Health, Eggs and Profit Use

POULTRY REGULATORS REMEDIES, LICE KILLERS AND BABY CHICK FOOD

Pratts

POULTRY REGULATORS

The original and leading poultry regulator. Added to any mash it makes more eggs and better health. Not a dope or stimulant. Use it the year round to supply minor food necessities, tone up system, aid digestion, regulate bowels, ward off disease, increase vitality and make greater profits. Satisfaction or your money back. 25c, 50c and \$1.10 pkgs. 12 lb pail \$1.65, 25 lb pail \$3.00, 50 lb drum \$5.50 and 100 lb drum \$10.00.

Pratts

BUTTERMILK BABY CHICK FOOD

Start your chicks right on the original "baby food for baby chicks." Pays for itself in the extra chicks you save and raise. Made of finest, clean, pure, selected ingredients, mechanically predigested. Leg weakness, diarrhea and other chick troubles are avoided. Absolutely guaranteed. In packages and 10, 14, 25, 50 and 100 lb bags.

Pratts White Diarrhea Tablets

Use them in the drinking water for the first ten days and avoid losses. They are cheap "life insurance for baby chicks." A wise investment for every chick raiser. 25c and 50c pkgs.

Pratts Powdered Lice Killer

A powerful, safe, non-poisonous powder for use on fowls, in nests and dust baths. Also rids horses, cows, sheep, dogs, cats, etc., of lice, fleas and other vermin. Easy and cheap to use. 25c and 50c sifter top cans.

Pratts Roup Remedy (Tablets or Powder)

Made in powder and tablet form for flock or individual treatment. Very effective in treating or preventing colds, roup, catarrh, diphtheria, etc. Keep a box on hand for emergencies. 25c, 50c and \$1.00 pkgs.

Pratts Poultry Disinfectant

Cheap, powerful, safe disinfectant. A gallon makes a barrel. Acts as a disinfectant, deodorizer, germicide and liquid lice killer. Use it to prevent spread of contagious diseases. 1 qt. 55c, 2 qts. 90c, 1 gallon \$1.50.

Pratts Poultry Worm Powder

A safe, sure and easy way to rid flocks of round, tape and other common intestinal worms. Costs only about half a cent per bird. Fully guaranteed. 50c pkg.; 25 lb \$3.00; 100 lb \$9.00.

Other **Pratts** Remedies

Condition Tablets—To relieve colds, catarrh, mild cases of roup; for tuning up system after attack of colds, bronchitis, liver or bowel trouble. $\frac{1}{4}$ oz. 25c; 5-8 oz. 50c.

Sore Head Chicken Pox Remedy— $2\frac{1}{2}$ oz. 30c, 7 oz. 60c.

Scaly Leg Ointment, 25c.

Fly Chaser—1 qt. 50c, 2 qts. 85c, 1 gal. \$1.35.

There's a Guaranteed Pratt Remedy for Nearly Every Curable Disease

Pratts Fly Chaser, 85c and \$1.25.

March Automatic Rain-maker

The New and Modern Way of Keeping Lawns Green—Gardens Growing—Flowers Beautiful

Its Beautiful Fountain-Like Operation is an Asset to Every Lawn

HERE ARE A FEW OF ITS ADVANTAGES

1. No hose holding
2. Larger coverage—few changes necessary.
3. Lesser hose investment
4. Waters square areas only—No dry spots
5. No stepping on watered area—just hose to move.
6. Easily adjusted to smaller areas
7. Water falls like natural rain
8. No digging in on new ground
9. No drowning or souring of soil
10. Easily moved and stored when not in use
11. Use common garden hose
12. Uses less water—saves labor

Thriving Beautiful Lawns are obtained with the RAIN-MAKER

The natural rainlike fall of water develops deeper root growth without disturbing soil—Dissolves soluble matter in fertilizer—No burning.

BEAUTIFUL FLOWERS—SHRUBS and GARDENS are the result of watering the MARCH way. Your Florist uses the Overhead System to produce prize winning blooms. You, too, may enjoy the best with less labor.

Use a RAIN-MAKER

It's Automatic!!

Fascinating!!

Efficient!!

Have a
Demonstration
Today

Study these pictures—they tell the story. The entire pipe, bearing the nozzle outlets, is slowly rotated back and forth by the TURN-MOTOR, giving even distribution and perfect coverage.

GOODWIN GRASS SHEARS are made to cut grass. They're built to get around close corners easily with the buckles well up out of the way. But that isn't all—Goodwin's are easy on the wrist. The grip is natural. Ball bearing action, blades sharpened enduringly from point to hilt. Will swing through a month's growth of edge grass without an ache. **Price \$1.50.**

"Irrigation Headquarters" — March's Irrigation

The Ten Outstanding Points of March's Super System

1. **FROST PROTECTION** to temperature of 26 degrees.

2. Reproduction of natural rainfall within 15 per cent. variation. Guaranteeing uniform even water distribution over field with maximum yield and quality possible to attain. (Closest competitor over 150 per cent.)

3. Dependable **TURN-MOTORS**. There are over 50 to 1 more March Turn-Motors in use than all competitors combined.

4. Complete **SOLID BRASS EQUIPMENT**. Everything but the pipes and posts themselves made of this life-time lasting material and furnished only by us. Irrigation is not brought every day and 15 to 20 years more service is desirable as well as lowest in cost and maintenance.

5. **LARGER SIZE PIPES IN LINES**. (Smallest size 1 inch.) Better volume and water distribution along full length of line.

6. **PATENTED LONG THROW NOZZLES INDIVIDUALLY SCREENED**. (Five to 10 foot longer throw with same pressure.) Screens practically eliminate plugging up troubles.

7. **GRADUATED SIZE DISCHARGE NOZZLES**. A special feature found only in **MARCH SYSTEM**. Worked out after three years' study and experimentation. Guaranteeing even water distribution.

8. **AUTOMATIC FLUSH VALVE**. (Patent applied for.) All lines drained and cleaned automatically with no attention. Eliminates clogging of pipes and nozzles. Prolongs life of system if water has lime or other chemical content.

9. **NON-CLOGGING, SELF-PACKING TURNING UNIONS** of solid brass, non-corrosive and rust-resisting. A big feature and appreciated by every practical grower.

10. **SIMPLICITY OF INSTALLATION**. Very important to every buyer. With complete and understandable instructions and specifications the ordinary man does not need the services of a plumber. Work is done in half the ordinary time. We will also contract your job —get our estimates.

REMEMBER—Your only idea in buying irrigation is from the profit to be made from its use. If you buy on a business basis you will buy **MARCH'S**.

March Twin Turn Motor

Turns lines 300 feet long on 25 pounds pressure. Will turn lines up to 660 feet long. Guaranteed on 50 pounds pressure. Lines turn 2 to 3 times per minute depending on pressure. It is especially timed for frost protection and is recognized throughout the country as the only successful **FROST PROTECTION MOTOR**.

Wooden Post Hanger

MARCH'S HANGERS have several exclusive improvements. The main object of a hanger is to enable a pipe line to roll with least amount of friction and wear and to reduce wear on automatic Turn-Motor and to save water pressure.

These hangers have 2 point roller bearing. "Pin" extra large. Never is there a possibility of rusting. Are complete brass throughout. Outlasts other hangers 30 years. Lasts a lifetime. Can be used with any make irrigation line.

Screened Field Nozzle

WATER COOLERS

THE "OUT-U-KUM"

WEED PULLER

An Entirely New Principle

A slight Push and Pull thoroughly loosens the surrounding soil and removes not only the weed, but the entire root.

When pushed into the ground, the two points guide the BRIDGE down alongside the weed, loosening the soil from that side. It then crosses under the root disengaging the latter. As the tool is withdrawn the BRIDGE slips up the opposite side of the weed, loosening the ground from that side and engages the head of the weed above the ground. The now thoroughly loosened weed is readily withdrawn in its entirety with little or on clinging soil.

FOODS FOR DOGS AND CAGE BIRDS

Spratt's Song Restorer

An invigorating tonic and treat for Canaries, Linnets, Gold-finches and Seed-eating birds.

Spratt's Fibo

A unique granulated food, containing a large percentage of Spratt's world-famous Meat Fibrine. It is very appetizing and highly recommended for shy and dainty feeders, as a change of diet or as a suitable food for any dog at any time. Can be given either dry or soaked.

Spratt's 'Sing-Song'

An appetizing food and pick-me-up for all songsters.

Meat Fibrine Dog Cakes
For sixty years the standard dog food, used by the leading breeders and fed at the principal dog shows throughout the world. The best results are obtained by giving the biscuits dry, not soaked, thereby compelling the dog to gnaw the food and thus producing a copious flow of saliva which materially aids digestion.

Build a Better Lawn - Make a Richer Garden

Ideal Soil Improver for Lawns, Flower and Vegetable Gardens

HYPER-HUMUS is pure organic material from an especially fine natural deposit. It is thoroughly aerated and then specially processed to prepare it for commercial and home use.

Hyper-Humus is odorless and weedless. It also acts as a de-odorizer, absorbing objectionable odors.

Whatever the character of your soil, Hyper-Humus will make it more productive. It lightens and aerates clay soils; it binds together sandy soils and makes them more compact. Most important of all, it increases the water holding capacity of all soils. There is no better medium for nitrifying and other useful soil bacteria.

Hyper-Humus MUST BE mulched into the soil for BEST RESULTS.
