Price List of Gladioli For Spring Delivery 1928

Grown By E. A. GARDNER

R. R. 2, Box 116, Boulder, Colo.

TERMS

Cash with order. One dozen at the price of ten; one hundred for seven times the dozen price, if I have them; six at the rate of a dozen; fifty at the rate of one hundred; one pint of bulblets at the rate of a quart. Prices are net, but I will give liberal count and extras with each order, the larger the order the more extras.

All orders subject to prior sale. Post paid anywhere in the United States. I will not send until all danger of freezing is past.

CARE OF GLADIOLUS

No single item less than ten cents, and no orders will be filled that amount to less than one dollar, as these can only be filled at a loss.

I exert the greatest care in keeping the stock pure, but cannot assume any responsibility for crops other than to replace any bulb not found true to name or refund the money received for the same.

SIZES OF BULBS

I only list three sizes. The large are one inch and up, the medium are under one inch to one-half inch, and the small one-half inch and down.

Open the packages as soon as you receive them so that they may have air, and store in a cool place until planting time. Any good garden soil will grow Glads if well tended. Plant in full sunshine away from trees or building. Plant bulblets as soon as ground can be made in fine shape. Sow bulblets like peas and cover about one and one-half inches deep. Plant bulbs later, any time from May 1st to June 10th in Central states. Plant small bulbs two inches deep; large bulbs three to four inches deep. Give them a good soaking once a week in dry weather if possible and cultivate as soon as ground is in good condition. However, Glads will endure lots of dry weather if planted in good soil and kept well cultivated. When cutting the flower spikes leave at least four leaves on the plant to mature the bulbs. Dig in fall when leaves have turned brown or after the first frost. Cure in partially shaded place a few days, then remove old bulbs and store in cool, frost-proof cellar in sacks or boxes not over four inches deep.

Can also supply fine mixtures; large bulbs grown from bulblets or small bulbs at thirty-five cents per dozen, one hundred for two dollars and twenty-five cents. Small bulbs at one-half this price.

I also have a few bulbs of several other varieties. Write for the prices on what you want and I will quote you the price if I have the bulbs.

If you will send me the names and addresses of your flower loving friends when you order bulbs, I will include extra free bulbs for your trouble.

We also have Mastodon strawberry plants for sale. This is a new variety of strawberry which was introduced a few years ago and we have the genuine stock. This variety has been greatly advertised by nearly all plant growers and seems to be a success wherever planted. The plant is very thrifty, grows large, has a fine root system and fruit is at least twice as large as other varieties of everbearing strawberries. The leaves are very large which protects the fruit from the sun.

Prices on Mastodon everbearing strawberry plants: Prepaid, 50 plants, \$1.50; 100 plants, \$2.40; 1,000 plants, \$18.00.
