150 VARIETIES OF

IRIS

FOR 1928

IRIS SUSIANA

SOUTHLAND
IRIS GARDEN

J. N. GIRIDLIAN, PROP.

976 PALM TERRACE
PASADENA, CALIFORNIA

FOREWORD

WE are offering herewith a list of 150 varieties and species of iris from the surplus stock of a large iris collection. Our ideal Southern California climate insures healthy and vigorous plants, and large, well curled rhizomes. We believe our plants are all true to name, but we will be glad to replace any plant sent out that proves to be mislabeled.

TERMS

Our terms are cash with order. No mail order accepted for less than \$1.00.

With orders amounting to \$10.00 or more, you may select extra plants to the amount of ten per cent of the order.

PRICES

Prices quoted herewith are for single standard rhizome. The size of the root varies according to variety and season.

Six plants of same variety will be sold for the price of five single plants, and twelve plants of same variety for the price of nine single plants.

RATINGS

The figures placed before the names of the varieties are the official ratings given by the American Iris Society; 100 being the standard of perfection.

ABBREVIATIONS

(S.) designates the "Standards" or the three upright petals of the flower, and (F.) designates the "Falls" or the three lower petals.

CULTURE

Irises will do best in a dry, sunny location. They will succeed in any kind of soil that is not stagnant. Plant the roots twelve inches apart and cover with half inch of soil. Dig up and separate the plants once every four years.

Do not use fresh manure. Lime and bone meal are the safest fertilizers to use.

DELIVERY

We can deliver Irises any time of the year (except when they are in bloom), or as in case of some species, when they are dormant. Whenever possible, we shall mail orders within two days after the receipt of the order.

Shipments are to be made by parcel post, prepaid.

86	AFTERGLOW (Sturt.). Grayish lavender shading to yellow in the center....	\$.50
	ALBA. A dwarf white.....	.25
73	ALBICANS (Species). Pure white. Early	.15
