Advance Offer of Bulbs for Autumn Planting

R. & J. FARQUHAR COMPANY, 6 South Market Street, BOSTON, MASS.

Farquhar's Giant Darwin Tulips

The Giant Darwins are the most popular of all Tulips. Their massive, wavy leaves are often 4 inches across, and the large blooms are carried on stout stems 2 to 3 feet tall. They bloom with the columbines, three or four weeks after the Single Early Tulips, and are effective for bedding and also for planting along perennial borders and shrubbery.

Lily-flowered Tulip Sirene

Farquhar's Single Early Tulips

Tulips are such universal favorites that it is scarcely necessary to dwell upon their merits. In them we possess a range of colors and combination of shades which no other class affords. Besides, the standard sorts are so reasonable in price that they can now be planted in quantity. For bedding, pot culture, and forcing for cut-flowers in winter they are invaluable. The letters A, B, C following the varieties indicate the relative time of flowering and the figures the average height in inches. Those marked * are best for forcing.

White

Single Early Tulips in Mixture

FARQUHAR'S SPECIAL RAINBOW MIXTURE.

The varieties included in this mixture are grown separately and are all popular, large-flowered, bedding sorts of decided merit. Colors are carefully proportioned and include white, yellow, pink, scarlet, crimson, and many beautiful shades and combinations of these colors. The sorts are selected to flower at nearly the same time and with slight variation in height. For massed beds and grouping, our Rainbow Mixture is unsurpassed. The bulbs offered are of the largest size and finest quality. 75 cts. per doz.; \$6.00 per 100; \$55.00 per 1,000.

SUPERFINE MIXTURE. Extra-quality bulbs in many beautiful and varied sorts, flowering nearly together. 60 cts. per doz.; \$4.00 per 100; \$38.00 per 1,000.

Double Tulips

Double Tulips should be planted one sort in each bed, as grouping different varieties does not produce such a good effect. The large, double peony-like blooms appear about two weeks after the Single Early Tulips and are remarkable for their beauty and lasting qualities. The figures following the names indicate the average height in inches. Those marked * are the best for forcing.

* Azalea. 12. Beautiful shade of deep rose; splendid forer. 100 \$1 15 \$9 00

FARQUHAR'S RAINBOW MIXTURE. This Mixture is composed of the best named sorts of bedding Double Early Tulips, grown separately and put together in studied proportions, and contains a liberal allowance of the showy light colors. 70 cts. per doz.; \$5.00 per 100; \$45.00 per 1,000.

Botanical Tulips and Species

Charming wild species, mostly native of Asia, these showy Tulips make splendid subjects for naturalizing in the rock-garden or herbaceous border. In such favorable surroundings, when once established, they will increase and flower in the greatest profusion.

Clusiana (Lady Tulip). Dainty, dwarf species with small, brightly colored blooms. The outer petals are brilliant cherry-red, inner petals creamy white, base violet-blue. Select a warm, sunny part of the rockery or border and plant the bulbs about seven inches deep. Height, 8 in. \$1.00 per doz.; \$7.00 per 100.

Eichleri. Rare and beautiful Tulip from Turkestan. The flowers are very large, strikingly colored fiery crimson, and have glossy black centres shaded orange-gold. Plant in good soil, about 6 to 8 inches deep, and in groups for the best results. Height, 10 in. \$2.00 per doz.; \$15.00 per 100.

Florentina odorata (Wild English Tulip). One of the earliest of all flowering bulbs producing exquisite, sweetly scented flowers on long, graceful stems. The blooms have a dainty drooping habit and are clear, buttercup-yellow in color. Planted in a sheltered part of the garden, this charming class will flourish for years. The delicately drooping flowers with their delicious fragrance make splendid cut-flowers. Plant about 6 inches deep. Height, 18 in. \$2.00 per doz.; \$14.00 per 100.

Greigi. A gorgeous species with dazzling, flaming orange-scarlet flowers and coal-black centre blotch. Plant in a good sunny situation in the rockery or border and place the bulbs about 6 inches deep. \$4.00 per doz.; \$32.00 per 100.

Kaufmanniana. A desirable dwarf variety with immense creamy-white flowers, tinged rosy red; centre marked canary-yellow. The best situation for this Tulip is a semi-shady spot, preferably in the shelter of large rocks in the rockery or under shrubs or trees in the border, where it should be massed for the most pleasing effect. Plant about 6 inches deep. Height 6 in. \$4.00 per doz.; \$30.00 per 100.

Hyacinths

Farquhar's Selected Forcing Hyacinths

This highly decorative class of Hyacinths is of unsurpassed excellence for producing fine color effects in public parks and private grounds. Being of distinct and decided shades, of almost uniform height, and blooming at the same time, they admit of the most artistic grouping. They are also very desirable for forcing singly in pots or grouped in bulb pans.

Large Unnamed Hyacinths for Bedding and Forcing

These are well developed, sound, flowering bulbs, superior in size and strength to the Mixed Hyacinths usually offered. They are specially adapted for groups in borders and informal beds, where they will give a brilliant display of very handsome flowers and on account of their low price are also extensively forced for winter-blooming and cutting. Care is exercised to include only sorts which bloom at the same time and are of nearly uniform height.

Narcissi and Daffodils

American-Grown

If to be sent by Parcel Post, add postage at zone rates.
Weight per doz., 3 lbs.; per 100, 18 lbs.

The Narcissi offered by us this season are all American-grown and selected from flowers and bulbs we have personally seen. We believe that they will compare favorably with Dutch stock, importation of which is prohibited.

The quantity of really **High-Quality Bulbs** available this season is limited, and we suggest that customers place their orders early. The prices quoted in the following pages are for bulbs of the best **Selected Quality**, which is the only grade we carry.

Narcissi may be planted effectively along shrubbery beds, among herbaceous plants, or naturalized in woodlands, etc.

Farquhar's Polyanthus Narcissi

Ready in November

If to be sent by Parcel Post, add postage at zone rates. Weight per doz., 2 lbs.; per 100, 12 lbs.

A very decorative class of bulbous plants for greenhouse and window cultivation, but not hardy out-of-doors in our climate. They produce enormous trusses of delicately fragrant flowers.

Early Large-flowering Paper-White. The largest and most vigorous form of the Paper-White and the best of all for very early forcing; pure white. They can be grown in water with pebbles in a shallow bowl and may be planted at intervals throughout the season for a succession of bloom. Extra-Large bulbs. \$1.25 per doz.; \$10.00 per 100.

Crocuses

If to be sent by Parcel Post, add postage at zone rates. Weight per 100, 3 lbs.

The bulbs should be set 2 inches deep and should be planted in October or early in November to insure success. They are very effective when combined with Daffodils and other spring flowers. For a natural effect they can be scattered in handfuls and planted where they lie. Crocuses may also be grown indoors either in pots or bulb pans in loam or in dishes filled with wet moss in which the bulbs are set closely, half an inch below the surface.

Wild Crocuses and Crocus Species

These charming flowers may be divided into two classes, spring-blooming and autumn-blooming. They are equally valuable for rock-gardens or borders.

Autumn-Blooming Species

The following varieties make a welcome addition to the few late-flowering plants available for the border or rock-garden. The brightly colored blooms appear in October, followed in the spring by the foliage. It is well to plant these bulbs as soon as possible after arrival from Holland. Set bulbs about 2 inches deep.

Sativus (<i>Saffron Crocus</i>). Showy Doz. 100	1,000
blooms of purplish lilac, with a deep penciling of violet, ornamented by the rich orange stigmas. Will make a brilliant showing after a season or two in which to become established.	\$0 60 \$4 00

AUTUMN-BLOOMING CROCUS SPECIES continued

Speciosus. Bright violet-blue, handsomely feathered; orange anthers and pure yellow throat. Decidedly attractive in the rockery or border.	Doz. 100	1,000
	\$0 75	\$5 00 \$48 00
Zonatus. Rosy lilac, with bright yellow centre and orange zone—a color combination of unrivaled beauty. Plant bulbs in groups in a favored spot of the garden and the flowers will appear in a surprisingly short time.	75	5 00 45 00

Spring-Blooming Species

These have flowers a trifle smaller than the Dutch varieties, but are desirable for naturalizing in rock-gardens and borders. If given a good sunny place, they will bloom very often before the snow is gone. Plant the bulbs about 2 inches deep.

Susianus (<i>Cloth of Gold Crocus</i>). Deep golden yellow, with rich brown markings on outer petals. Given a suitable sunny situation, this bulb will bloom for years with little or no care.	Doz. 100	\$0 60 \$4 00
Thommasinianus. A charming, distinct species with a slender, deep throat. The color varies from delicate mauve to deep purple in charming variety. The bulbs should be planted in a warm exposure where they will increase rapidly.	60	4 00

Anemones

Very lasting and popular for cut-flower use and for table decoration. Plant in October or November, six roots in a 6-inch pot or bulb-pan, covering them 1 inch. They may be kept in a cellar or frame protected from frost until spring when they may be placed in the greenhouse or window to bloom.

Single De Caen (*Giant French Poppy-flowered Anemone*). These produce an abundance of very large flowers of brilliant and varied colors. 90 cts. per doz.; \$7.00 per 100.

Freeseas

Plant eight to ten bulbs in a 6-inch bulb pan, covering them 1 inch. The soil best suited is a mixture of rich loam, leaf-mold, or humus and sharp sand. It is essential that root-growth be encouraged by placing the potted bulbs in a cool temperature for several weeks, when they may be brought to bloom in a gentle bottom heat.

Lilium regale

Lilies for Forcing

If to be sent by Parcel Post, add postage at zone rates.
Weight per dozen, 10 lbs.

The bulbs may be potted from August onward in a compost of equal parts turfy loam, leaf-mold, rotted cow manure, and sand. It is best to start them in pots not exceeding twice their own diameter, in which they may remain until started 8 inches or more. They should be transferred then to larger pots in which to bloom, exercising great care not to disturb the roots or break away the soil from about them, and setting them considerably deeper in the larger pots. This method prevents the soil from becoming sour, and enables the roots forming at the base of the stem to become feeders, greatly increasing the number and size of the blossoms.

Pot-grown Strawberry Plants

All varieties offered are strong, pot-grown plants

Farquhar's "Select" Varieties August and September delivery

Early Varieties

Arabine. Extra early. Very large, bright red berries of high quality. Heavy cropper and vigorous grower.
Howard 17. This is undoubtedly one of the finest early Strawberries. The fruit is of attractive, conical form, bright red in color, and of delicious, mildly acid flavor. It is hardy and ships well.
Glen Mary. Large, conical, finely flavored, bright red berry.
Premier. A productive variety, bearing large, bright red berries of beautiful form and delicious flavor.
Senator Dunlap. The fruit is large, dark red clear to the centre, and of very rich flavor. Does not readily rot on the vines.

Medium-Early Varieties

Marshall. The fruit of this remarkable sort is enormous, of handsome, glossy dark crimson color, and delicious, unexcelled flavor. As it does not thrive in all soils, it should not be planted extensively until its adaptability is ascertained.
Big Joe. Magnificent variety of robust habit and a prolific cropper. The mammoth berries are light crimson and of superior flavor.
New York. A medium-early variety, with cone-shaped, deep crimson fruit having a delicious aromatic flavor.
Brandywine. Large, heart-shaped berry of perfect form, firm and bright red clear through, and pleasing spicy flavor. It is a great cropper and generally succeeds everywhere.

Late Varieties

Gandy. This popular old variety is more largely grown than any other late sort. It is large, well-formed, deep red, and agreeably flavored. Requires a fairly heavy soil.
William Belt. Deep glossy red, delicious berries.
Commonwealth. The latest of all Strawberries, bearing large, conical crimson fruit, extremely sweet and of delicious flavor.
Judith. Large, luscious berries, deep red clear to the core, uniform in size, pointed. Prolific.
Pot-grown plants of the above "Select" Varieties, \$7 per 100; \$60 per 1,000. 250 or more of one variety at 1,000 rate.

Everbearing Strawberries

A fine late crop may be assured from this class of Strawberries by keeping the blossoms picked off the plants until July and cutting away the runners during the summer.

Mastodon. The fruit is of extraordinary size, bright red, and of delicious quality. Very prolific. \$10.00 per 100; \$90.00 per 1,000.
Superb. One of the best of this class, the fruit being deep red, firm, and finely flavored. \$8.00 per 100; \$70.00 per 1,000.
Progressive. This variety produces an abundance of deep red fruit of good size and flavor. \$8.00 per 100; \$70.00 per 1,000.

Farquhar's Hardy Perennial Flower Seeds

For complete list see our Garden Annual

Hardy perennials are easily raised from seeds. The simplest method is to sow them in a frame, protecting the seedlings from the sun as they appear above ground. The soil should be kept evenly moist but not saturated. Transplant the seedlings once or twice if necessary to prevent crowding.
