GENERAL INFORMATION

PLEASE READ BEFORE ORDERING

Order Early—All orders filled in rotation—ordering early insures reservation of varieties that may later be sold out. Small orders receive the same careful attention as the large ones.

Substitution—Orders are filled with varieties called for, and we never substitute unless directed to do so.

Guarantee—We guarantee every root and plant to be true to name and in good growing condition when sent out by us. We will cheerfully replace any that may prove otherwise, but will not be held responsible for any amount in excess of the purchase price. If for any reasons tubers fail to sprout, we will replace same with a perfect root or refund the purchase price if sold out. However, we will not be responsible if they are kept in a too dry place a long time before planting or otherwise abused.

Shipping—We begin shipping dahlia tubers after May 1st, unless notified for earlier delivery. Green plants after May 15th. Dahlias ordered shipped before April 15th will be sent only at purchaser's risk of drying out or freezing.

Terms—Cash with order or in advance of shipment. No goods sent C. O. D. unless 50 per cent. of purchase price accompanies order.

Remittances—Should be made by bank draft, post office money order or registered letter. Postage stamps accepted up to \$2.00.

Size of Tubers—The size of the root does not in any way indicate the size of the plant or flower. Some varieties of dahlias always produce small roots, while other varieties make large ones. A good many of the best varieties have very small roots, so do not consider small roots worthless. Any root with a good growing bud will grow, and make a good plant if properly looked after.

Cultural Directions—Enclosed with each order.

Errors—In the rush of the shipping season, errors are possible to occur. Kindly notify us promptly so that proper adjustment can be made at once. Kindly keep a copy of your order for comparison.

Notice to Foreign Customers

Money orders from foreign countries should be made out to the post office at Willimantic, Conn., U. S. A.

Canadian Customers Please Note

In accordance with the ruling governing the importation of Nursery Stock from the United States into Canada, it will be necessary to obtain a permit from the Secretary of the Destructive Insect and Pest Act Advisory Board, Department of Agriculture, Ottawa, and file same with the Collector of Customs before shipment can be cleared. Seeds are exempt from this ruling, and may be shipped into Canada without a permit. Gladiolus bulbs come under the classification of Nursery Stock.

This ruling must be complied with in order to make delivery, and we ask you, in the event of an order, to secure this permit, advising us of the number of same, that we may mark it on the outside wrapper.

DAHLIA GREEN PLANTS

Our green plants are propagated right, grown right, and guaranteed to reach you in good condition. We ship every year thousands of plants to all parts of the country, and the repeat orders from satisfied customers, and our increasing new business has made it necessary to increase our propagating space. Our method of packing insured safe delivery.

1-9-2-9

Our 1929 catalog brings greetings to our friends, old and new, and we take this opportunity to express our appreciation for the generous patronage we have received in the past, and to assure you that we will do all in our power to merit a continuance of your support in the coming season.

While our collection is not "The Largest in the World," we consider it one of the best selections of up-to-date dahlias that have stood the test in the trial gardens and shows. Every year we discard many varieties, no matter how much they cost us, if they do not measure up to our standard.

We spray and dust all our growing stock regularly during the growing season, so are in position to fill your orders with clean, healthy, field-grown stock.

We extend a cordial invitation to one and all to visit our gardens, where you will find growing the latest novelties in dahlias, delphinium, gladiolus, and other garden favorites.

We are located on the Willimantic-Norwich trunk line, adjoining the Willimantic Camp Meeting ground.

Thanking you again for past favors, assuring you that all orders will receive our best attention.

GEO. W. FRASER.

Member American Dahlia Society, Connecticut Horticultural Society, Dahlia Society of New England, National Association of Commercial Dahlia Growers.

COLLECTIONS

To those not acquainted with the various classes and varieties of dahlias, we would suggest that you leave the selection to us. Tell us what colors you most prefer, and the amount of money you wish to invest, and we send you a collection that cannot fail to give you satisfaction.

DELPHINIUM

(Perennial Larkspur)

They are not hard to grow, any well drained garden soil suits them if reasonably well fertilized, and given plenty of water during the growing season.

For a number of years we have been growing these beautiful hardy perennials, until now we have one of the best collections of our own, and of other specialists' originations.

Our strain of Delphinium Hybrids are unsurpassed by any in the country for their wonderful size, and exquisite beauty. The plants often attain eight to ten feet in height, and the spikes are covered with double and semi-double flowers of marvelous size and beauty.

We won several medals at the various shows with them last year. From selected named varieties. We offer for spring delivery, strong, pot-grown seedling plants, guaranteed to reach you safely, \$1.00 each; \$10.00 doz.; \$80.00 per 100.

Strong, pot-grown seedlings from choice hybrids, 50c each; \$5.00 doz.; \$35.00 per 100.

Seed selected from the choicest varieties such as Advancement, The Bishop, The Villain, Monarch of Wales, mixed, \$2.50 pkt.

Seed general run of hybrids \$1.00 pkt.

GLADIOLUS

How to Grow Gladiolus

The gladiolus, like the dahlia, will thrive in almost any climate and any kind of soil.

The bulbs should be planted from four to six inches deep after the ground has warmed up in the spring and the danger of frost over.

Cut the flowers as soon as the lowest bud opens, taking care to leave four or five of the lower leaves to help the growth of the new bulbs.

Lift the bulbs in the fall and store in a dry place, free from frost.
