The Park Nurseries

Supply Hardy Plants for Northern Gardens

WHEN the Holm and Olson organization was founded thirty-four years ago they were among the pioneers of the horticultural industry here in the north. At that time almost all out-of-door plants were brought in from the older nurseries of the Atlantic States. The delays and hazards of these long shipments of a perishable material were most disadvantageous but of even more concern was the apparent impossibility of succeeding here with many of the plants that grew well under milder climatic conditions.

It became evident that to provide those kinds of plants that would thrive under our northern conditions that the stock must be grown locally. So "The Park Nurseries" were established and for many years have been supplying the home owners of the great northwest with hardy and acclimated plants and with practical and dependable horticultural information.

Why You Succeed With H. & O. Plants

Strong, thrifty plants that are nourished by a vigorous root system and that have been produced under our northern climatic conditions are almost certain to grow well when moved to your grounds. At "The Park Nurseries" the plants are cared for by gardeners who are skilled through training and experience in the most modern nursery practices. Through every chapter of the plant's life, from tiny seedling to a mature specimen, our experts direct and encourage the growth. The plants possess the unusual hardiness of Minnesota stock together with the full shapeliness and ornamental beauty of their natural forms. Such material will produce results and create satisfaction when planted on your grounds. The "H. & O. Quality" has become a trade-mark of a high standard of excellence in our plants and our service and our customers have learned to confidently expect "the best" when they order from us.

You Are Invited to Visit Our Nurseries

Come to the Park Nurseries and see our large assortment of hardy plants. Make personal selections in our fields if you wish and our superintendent will tag the specimens for delivery at the proper planting season.

"The Park Nurseries" are located at 1200 Saint Clair Street, Saint Paul, and are easily accessible from either of the Twin-Cities by motor or street car. Telephone to or stop at our downtown offices at 20-22-24 West Fifth Street (just a few doors from the Saint Paul Hotel) for all information desired.

How We Serve You—Our Business Terms

EARLY ORDERS enable us to better serve you with timely shipments and the first selection of plants.

CATALOG PRICES are based on stock at our nurseries. Packing free.

YOUR SHIPPING INSTRUCTIONS, whether Freight, Express or Parcel Post and any preference as to route will be followed carefully. When not instructed we will use our best judgment.

ACCOUNTS are due by the 10th of the month following date of purchase.

LIBERAL REPLACEMENT OFFER to share any loss of plants with you.

Everyone knows there is some risk in transplanting trees and shrubs dependent upon such matters as weather and soil conditions, planting methods, after-care and such factors that are hard to control. We have every confidence in the vitality of our hardy, northern-grown plants and know they will succeed when planting conditions are at all favorable.

We agree to re-supply F. O. B. our Nurseries at one-half of the purchase price any nursery stock bought at catalog rates, that may fail to make growth the first season after planting from causes other than abuse or neglect. This offer applies only to accounts that are promptly paid when due. Any labor involved in planting such replacements is to be charged for as used.

Should any plant prove untrue to variety ordered we will replace it without charge or refund the purchase price but in no case are we to be liable for more than the cost of the plants.

PLANTING INSTRUCTIONS

are sent with every order acknowledgment. Ask us freely for any further information you may need. We welcome the opportunity to help you.

It is Easy to Have Beautiful Grounds

You want your home grounds to be just as attractive as you can have them. Make full use of our experienced "Landscape Service"—everything from plan to planting—to aid you in making your yard a beauty spot.

The beauty of this dooryard pleasingly welcomes you to the home.
Residence of Mr. Samuel Friedman.

We Help You With a Plan

For every yard there is some one way of landscape development that will bring the most beauty and usefulness to the place. A Landscape Plan, as designed by our experts, considers the practical uses of your grounds together with their natural advantages and shows you just how to make your property most attractive. By following a definite landscape plan you economize in both time and expense and most of all, you are assured of satisfactory results.

A Special Plan-By-Mail Service

Your Landscape problems can be solved through our special plan-by-mail service. Send us a plat of your yard showing the position of the house, walks, trees and other features and giving measurements from point to point. Our designers can then suggest practical ways of improving and beautifying your grounds and give careful cost estimates.

Consult Us. We Plan With You

You will like the way our gardeners plan **with you** whether your requirements are very modest or concern a large estate. Every inquiry receives prompt and personal attention. Our service is equally available whether you live out of town or in the Twin-Cities.

How to Plant a Tree

An Attractive Yard is a Splendid Investment.

Evergreens

THE splendid form and color of evergreens is most keenly appreciated in the winter when by contrast their rich green gives a note of warmth and cheer to the cold winter landscape. This same characteristic beauty of evergreens gives them individual distinction even in the summertime. Their hardiness, their variation in form, color and habit make evergreens almost indispensable in any planting.

Our evergreens are given special care, handled carefully, and transplanted frequently to put them in the proper condition to be successfully moved from the nursery.

Ask our Landscape Service Department for planting suggestions.

Blue and Norway Spruces, Arborvitae and Pfitzer's Juniper are combined in this lawn grouping of evergreens.

ARBORVITAE - Thuja

ARBORVITAE, American (*Thuja occidentalis*). A native tree with fan-shaped leaves. Foliage is soft and flexible, usually bushy at bottom and tapering toward top. Used very generally in planting singly or with other evergreens. Stands trimming well to any size. 20 ft.

	Each
18 to 24 in.	\$ 2.50; 2 to 3 ft. \$ 3.75
3 to 4 ft.	6.00; 4 to 5 ft. 9.00
5 to 6 ft.	12.00; 6 to 7 ft. 15.00

Larger specimen trees priced on request.

Arborvitae, Globe (*Thuja occidentalis globosa*). A dwarf, bushy evergreen that grows naturally into a rounded, ball-like form. Keeps its rounded shape without trimming. Fine for low borders, foundation groups, tubs and urns. 4 ft.

12 to 18 in. spread	\$4.00
18 to 24 in. spread	6.00
24 to 30 in. spread	7.50

Larger specimen trees priced on request.

Arborvitae, Pyramidal (*Thuja occidentalis pyramidalis*). An attractive, solid pyramid of green that retains its shape without shearing. Seldom measures over 30 inches in diameter at the base even when mature. 18 ft.

18 to 24 in.	\$ 4.00
2 to 2½ ft.	6.00
2½ to 3 ft.	7.50
3 to 3½ ft.	9.00
3½ to 4 ft.	11.00
4 to 5 ft.	15.00
5 to 6 ft.	20.00

Planting Evergreens

A hole should be dug of ample size for the ball of earth. Place the tree in the hole, loosen and pull back burlap covering and after filling the hole two-thirds full of good soil, then flood with water and allow this to soak into the ground. Soil can then be filled in to nearly the ground level. Give the Evergreens plenty of water throughout the summer.

Arborvitae, Siberian (*Thuja wareana siberica*). A compact, dense, bushy evergreen, conical in outline; foliage rich dark green. The hardiest of the Arborvitae. 8 ft.

18 to 24 in. ...	\$ 5.00; 2 to 2½ ft. ...	\$ 7.00
2½ to 3 ft. ...	8.00; 3 to 4 ft. (bushy)	12.00

CEDAR. See Juniper.

FIR - Abies

FIR, Balsam (*Abies balsamea*). A hardy, native evergreen. Regular and symmetrical growth. Thrives in moist soils and cool climates. 40 ft.

5 to 6 ft. ...	\$10.00; 6 to 7 ft.	\$15.00
----------------	--------------------------	---------

Fir, Douglas (*Pseudotsuga douglasii*). Quick growing tree of open, broad, sharp pointed pyramidal shape. Large bluish-green needles. A splendid ornamental evergreen where a large tree is wanted. 40 ft.

	Each
3 to 4 ft.	\$ 7.50
4 to 5 ft.	11.00
5 to 6 ft.	15.00
6 to 7 ft.	20.00

JUNIPER - Juniperus

JUNIPER, Pfitzer's (*Juniperus pfitzeriana*). Branches horizontally spreading and slightly drooping. A graceful, bushy form suited to foreground plantings. 8 ft.

Flowering Shrubs

Hardy Varieties For Northern Gardens

MUCH of the beauty in the landscape planting of any home is supplied by shrubs. Their uses are legion and their cost is nominal. It is the softening grace of such shrubs as Spirea (in variety) Snowberry, Hydrangea, Barberry and others of like nature used about the angles and corners of the house, which makes the transformation from bareness to beauty. Tall shrubs, such as Lilacs, Honeysuckles, Mock-orange, etc., find their proper place in the border along the boundary or in plantings which serve to screen out unattractive views. In fact there is a place where most every type of shrub can be effectively used. By choosing carefully it is possible to have practically continuous bloom in the shrub border. A few of the colored twig sorts will liven up the planting in winter.

How to Plant Shrubs

Space the tall shrubs, such as Lilac, 4 to 6 feet apart; the medium-height shrubs, such as Bridal Wreath, 3 to 4 feet apart; and the dwarf growers, such as Barberry, 2 to 2½ feet apart. Dig the holes of ample size, place the plant and after filling in the hole two-thirds with top-soil, add water. Allow this to settle then complete the filling with soil up to the ground level. ALWAYS SHORTEN BACK THE TOP GROWTH BY CUTTING AWAY AT LEAST ONE-THIRD THE LENGTH OF THE BRANCHES. The heavy lines on the branches indicate where to trim them. Use no fertilizer excepting as a surface dressing.

A water feature in the garden of Mrs. G. C. Bohn of Saint Paul.

Hardy Hedges Make Friendly Fences

WHAT can be finer than a living wall of green to mark the boundary of one's property? Hedges, through their adaptability to fill the need for attractive and ornamental barriers, have become immensely popular. The first cost is the last cost. Year by year they become more beautiful. A well kept hedge is always ornamental and valuable to any home. Where a dense unpenetrable hedge is desired you have but to use Buckhorn or Cotoneaster.

BARBERRY, Thunberg's (*Berberis thunbergii*). Very satisfactory for a low hedge of close growth. Can be trimmed or allowed to grow naturally. Bears attractive red berries in the fall.

ROSA RUGOSA (Japanese Rose). Desirable for an open, untrimmed division hedge. Foliage and bright flowers are highly ornamental.

Strong, 2 yr. plants\$6.00 \$50.00

SPIRAEA vanhouttei (Bridal Wreath). The most satisfactory of hardy shrubs for use as a flowering hedge. Plant only where close trimming is not required

2 to 3 ft.....	\$5.00	\$40.00
3 to 4 ft.....	6.00	50.00

How to Plant Hedges

A trench should be dug where the planting is to be done, excavated to a depth of a foot, and 18 inches wide. Such a trench gives an even line to guide the planter. Discard any soil of poor quality and use surface loam. Varieties such as Japanese Barberry, Buckthorn and Cotoneaster, or those that are to be kept closely cut, should be spaced a foot apart in the row. In using Bridal Wreath or other open-growing varieties which are not to be kept sheared, a spacing of 2 to 2½ ft. is proper. After planting, cut off at least one-third of the top of the plants to insure good lateral growth. Water thoroughly.

PLANTING HEDGES

A hedge gives privacy to the home yard.

Climbing Vines

For Shade and For Beauty

CLIMBING vines fill an important place in the planting of every home. Without them there frequently is ugliness and bareness. They will quickly drape themselves over suitable support or sprawl pleasingly over a wall or slope. Vines have beauty of leaf, flower and fruit. On new buildings they give shade quickly and are very cooling and cheerful. There is a vine for every purpose.

BITTERSWEET (*Celastrus scandens*). A hardy, native climber with glossy leaves. Red berries. Useful for trailing effects or banks, or for trellises, arbors, pergolas, fences, etc. Foliage has a bright yellow fall coloration. **Each**

Flowering Perennials

THE Perennials persist over winter and renew their growth with increased vigor in the spring. Their first cost is small, so that one can enjoy a good assortment at a modest outlay. When you consider their tendency to be permanent, giving flowers year after year with only minimum care, then their really small expense yet exceedingly great value is apparent.

Soil and Planting. Perennials are best arranged in beds or borders with varieties selected so that there will be some in bloom at all times. The time of blooming is given in the descriptions. The soil should be well worked up and fertilized if necessary. Surface cultivation of the ground between the plants should be practiced. A location free of tree roots and dense shade is desirable.

Cultural Note

For a long season of bloom, always keep the flowers picked. The formation of seed pods slows up the plant's flowering activity.

Iris—the Rainbow Flower

Fleur-de-Lis

A Very Hardy Perennial that is Sure to Bloom Every Spring.

PLANTING. Set the roots only deep enough to have them covered with soil and avoid any fresh manure as a fertilizer. Iris will thrive in any good soil and prefers a sunny location.

QUALITY. The 1-year plants are strong, thrifty roots; the 2-year stock is heavier and will produce results more quickly.

Quantity Rate. Ten or more of a variety will be supplied for 5c less per plant. Example, plants priced at 35c each are \$3.00 for ten.

NOTE. In the descriptions "S" or "Standards" refer to the three upright petals. The letter "F" or "Falls" refers to the three drooping or lower petals.

Gorgeous Peonies

The Flower of the Great Northwest

FEW choice plants of PEONIES will fill your garden with color and fragrance from late May through June. Even the rose cannot excel in beauty and charm the flowers of the modern Peony. Here, under our northern conditions, it is peer of all flowers in combining so well the qualities of absolute hardiness, great color variation, size, beauty and fragrance of bloom.

PLANTING. The roots should be set with the "eyes" 2 to 3 inches below the surface and the soil tightly packed about them. Allow a spacing of about 3 feet between the plants.

The soil should be of good substance and the location free of tree roots and dense shade. Bone meal is preferred as a fertilizer.

We list only those sorts suitable to our northern conditions and that have proven their value as producers under ordinary garden culture.

QUALITY. The "roots" are substantial plants with 3 to 5 strong eyes. "Clumps" or older stock that will produce immediate flowering results can be supplied at double the catalog price of "roots."

Phlox-Hardy Varieties

The Most Beautiful of the Late Summer Flowers

PHLOXES are very hardy floriferous perennials that give bold, brilliant color effects from July to frost. They can be had in pure white, pink, lavender and crimson and in varying combinations of these colors. Filling in, as they do, the period between the late spring and fall blooming plants when the general garden bloom is not abundant, they are practically indispensable to the well-arranged planting.

WHERE TO PLANT. They are exceedingly attractive when planted in masses of a single kind in a bed or border. Their mid-summer bloom makes them a most valuable addition to beds where such spring-blooming plants as Iris, Peonies, Poppies, etc., are located.

CULTURE. Phloxes are gross feeders and react quickly to plenty of rich soil and to abundant watering in dry seasons. The old clumps should be divided and re-planted at least every fourth year.

Hardy Phlox is the outstanding garden flower of late summer.

QUANTITY RATE. Ten or more plants of a variety will be supplied at 5c less per plant. Example: Plants priced at 35c each are \$3.00 for ten.

B. Comte. Bright purplish crimson with satiny sheen. Medium height. One of last to flower. 40 cts.; 2 yr., 60 cts.

Beacon. A bright cherry-red. Large flower heads carried on tall stems. 35 cts.; 2 yr., 50 cts.

You Can Grow Beautiful Roses The Queen of Flowers

YOU can grow very beautiful roses here in Minnesota, although this was once thought to be impractical. If you have not had roses to enjoy and to cut right in your own yard a real pleasure awaits you.

In the following lists will be found many choice varieties of both the old favorites and the newer sorts. Actual tests have shown all these to have real merit.

"H. & O. QUALITY" ROSES ARE SURE TO BLOOM

To off-set our short summer season we now offer the strong 2 year rose plants that are started in pots. These are ready to set right into the garden and will give splendid results.

TIME TO PLANT. Spring planting is the safest in our section. Our potted plants can be planted as soon as danger of heavy frost is past, about May 15, and from then on throughout the entire summer. Dormant stock should be planted in early spring.

How to Prune.

LOCATION. Roses require a good warm location where they will get plenty of sunlight; near large trees they suffer from shade and from the roots and never do well.

SOIL. They will grow in any rich soil. A liberal supply of well-decayed manure is a fine top dressing to the beds but must never touch the roots.

PRUNING. In the spring, cut out all short and spindly growth and remove winter-killed wood. Cut back the main shoots until they stand about 4 to 6 inches long. Watch carefully during

the summer for any shoots appearing to grow from below the graft and cut these away. These are sprouts from the wild root which, because of greater vigor, would starve out the grafted top. **Climbing Roses should not be cut back severely.** After blooming the poorer growths and very old wood can be removed.

WINTER PROTECTION. In late fall heap the ground up around the base of the plants 9 to 12 inches high. After freezing weather bind the tops with hay or straw and over this tie a covering of tar paper. **Climbing Roses** must be taken down and laid flat on the ground. Cover same as for the bush roses.

Plant Our "Potted Roses" And Be Sure of Flowers.

HYBRID PERPETUAL ROSES

These are the hardiest of the large-flowering garden roses. They make June the Month of Roses.

PRICE—\$1.50 each—strong 2 yr. old plants that are started in pots.

Anna de Diesbach. A very double brilliant crimson. A fine rose for the north.

Baron de Bonstetten. A rich dark red; quite fragrant. Excellent in growth and in color.

Capt. Hayward. A fragrant, crimson-carmine flower of large perfect form. Blooms almost constantly.

Clio. Flesh-color, with a center of rosy pink. Foliage is good and the bloom lavish.

Frau Karl Druschki. A large silvery white that is considered the best white of any of the roses.

General Jacqueminot. A brilliant crimson flower. A standard of perfection in color and fragrance.

George Arends. A large delicately scented rose pink. A most beautiful pure pink rose.

J. B. Clark. An intense scarlet flower on a tall thrifty bush.

Magna Charta. A brilliant pink shaded with carmine. Noted for its fragrance and hardiness.

Margaret Dickson. Pure white with a pale rosy center. Flowers perfectly formed.

Mrs. John Laing. A soft delicate pink. One of the best and excellent for cutting.

Paul Neyron. A fully double, large flower of beautiful, deep rose. A constant bloomer.

Prince Camille de Rohan. A dark velvety crimson, the darkest of all the roses.

Ulrich Brunner. A brilliant cherry-crimson flower of cupped form. Very fragrant.

Hybrid Tea Roses

Ever-Blooming or Monthly Type

Will Bloom for You All Summer

CLASS of roses originated by crossing the tender Tea Rose with the hardier Hybrid Perpetuals. They are not as hardy nor as heavy-growing as the Hybrid Perpetuals but have a longer blooming season. Winter covering is essential. Their rich coloring, fragrance and long blooming season makes them very popular.

PRICES—\$1.50 each. Strong 2 yr. old plants that are started in pots. They are sure to bloom.

Columbia. A lively bright pink. Sweetly scented. Exceptionally free blooming.

Betty Uprichard. A new and choice variety. Brilliant orange-carmine with salmon reflex. Spicy fragrance. Price \$2.00.

Golden Emblem. A rich deep golden yellow.

Gorgeons. Color deep orange-yellow flushed copper-yellow. A brilliant flower.

Gruss an Teplitz. Double blooms of brilliant crimson. The best of all for garden decoration.

Delicious Fruits

For Yard or Garden

*Know the joy of harvesting your own fruit off of your own place.
Fruits are easy to grow.*

THE planting of fruit trees and berry bushes in the home yard is a practical and worthwhile investment. The fruit trees not only give desirable shade, but further repay the planter for their modest cost by their beautiful masses of spring flowers and their yield of fruit.

Years of experience in growing fruit in Minnesota permits us to recommend the following varieties as reliable and sturdy sorts for our Northern conditions. We welcome your inquiries as to fruit culture and care.

Hardy Apples

H. & O.'s High Test Grass Seed

A SOFT carpet of grass over the yard—it's luxuriant green, restful and inviting—is the most sought after of all landscape embellishments. Even the most modest home has great charm and beauty when surrounded by a trim, neat lawn. Good lawns are the logical result of sowing good grass seed on fertile, prepared soil and bestowing a reasonable amount of after-care and consideration on its upkeep.

Seeding. The best quality seed costs only a few cents more per pound than unreliable, cheap mixtures. Use the best obtainable and realize the most from your work and planting. Sow one pound to every 200 square feet of area. Sow evenly, rake lightly and water thoroughly.

How to Make a Lawn

Our booklet—"The Principles of Lawn Making," will be mailed without charge to our customers who request it.

(Note. Add 8c per pound to prices listed on all grass seed wanted by Parcel Post.)

VELVET-SOD MIXTURE

A very high grade mixture of those hardy grasses that will combine to make a beautiful and lasting lawn. Especially prepared to withstand our Northern climatic conditions. Its weight, over 20 pounds per bushel, clearly indicates its purity and freedom from chaff and adulteration. We use this mixture on all our landscape contracts and recommend it highly.

Lb., 55 cts. 5 lbs., \$2.50 10 lbs., \$4.75 20 lbs., \$9.00

SHADY-SIDE MIXTURE

By using this seed it is possible to get a growth of lawn under trees and in shady places where the ordinary grasses will not grow. Has always proven satisfactory for such positions.

Lb., 60 cts. 5 lbs., \$2.75 10 lbs., \$5.25 20 lbs., \$10.00

TERRACE MIXTURE

A special mixture of spreading, deep-rooting grasses that will thrive and hold the soil on terraces and slopes. It is very resistant to drought and poor soils and gives results where the ordinary grasses fail.

Lb., 55 cts. 5 lbs., \$2.50 10 lbs., \$4.75 20 lbs., \$9.00

Sow "Velvet Sod"—the best grass seed.

A good lawn is of first importance. Our "Velvet Sod" seed produced this one.

WHITE CLOVER

The best Clover for lawn uses because of its small leaves and dense, close growth. It is often sown on new lawns for its protection to the tender grasses the first year. Admired by many for its fragrant dainty flowers.

½ lb., 40 cts. 1 lb., 75 cts. 5 lbs., \$3.50 10 lbs., \$6.75

RED TOP GRASS

A fine-leaved grass that is becoming popular when mixed with Blue Grass as a lawn seed. Develops very quickly.

Lb., 40 cts. 5 lbs., \$1.75 10 lbs., \$3.25 20 lbs., \$6.00

KENTUCKY BLUE GRASS

A beautiful grass that should be the main constituent of every good lawn here in the North. Sometimes used alone, but becomes better established if sown in mixtures. Our seed is choice grade carefully re-cleaned of the high average weight of 21 lbs. per bushel.

Lb., 60 cts. 5 lbs., \$2.75 10 lbs., \$5.30 20 lbs., \$10.00

We offer special service to parks and golf clubs. Let our lawn experts help you.

FERTILIZERS

For Lawn and Garden

Keep your lawn fresh and green by giving it the needed plant food each season. Healthy lawns have very few weeds.

Our specially prepared fertilizers are inexpensive and easy to apply and will give the grass new life.

ALWAYS THOROUGHLY WATER THE LAWN IMMEDIATELY AFTER SPREADING THE FERTILIZER.

"H. & O. LAWN FERTILIZER." A mixture of the best plant foods that will revive the grass growth and add nourishment. Sow evenly using 25 pounds per 1,000 square feet and wet down.

10 lbs., 85 cts. 50 lbs., \$2.50 100 lbs., \$4.75

BONE MEAL. A splendid fertilizer for Roses, Peonies, flower or shrub beds. High phosphate content. Frequently used on the lawn (30 pounds to 1,000 square feet).

10 lbs., 75 cts. 50 lbs., \$2.25 100 lbs., \$4.00

HARDWOOD ASHES. Valued as a lawn fertilizer because of its high potash content. Use 40 pounds per 1,000 square feet.

10 lbs., 50 cts. 50 lbs., \$1.75 100 lbs., \$3.00

SHEEP MANURE (Pulverized). A quick acting plant food for general use about the lawn, flower beds or garden. For lawns use 30 pounds per 1,000 square feet and wet down. This is a pure, natural manure rich in nitrogen and potash and free of weed seeds or litter.

10 lbs., 75 cts. 50 lbs., \$1.75 100 lbs., \$3.00

SULPHATE OF AMMONIA. A nitrogen fertilizer that will quickly stimulate grass or plant growth. For the lawn use one cupful in a large sprinkling can of water for an area of 100 sq. ft. Wet the sod with water immediately after applying.

10 lbs., \$1.00 50 lbs., \$4.00 100 lbs., \$7.50
