Gladiolus Seed

The gladiolus truly becomes a plaything of the Gods when it is grown from seed. There is no flower that will give as wide a variation of new colors, new markings, new forms and types in its seedlings as the gladiolus. Bulbs and bulblets will reproduce true to the variety, but seed will not, and therein lies the charm and fascination of growing the gladiolus from seed. The seed is as easily grown as that of any other flower, producing bulblets and many good sized bulbs the first year, most of which will bloom the second year.

Up to very recent years, this has been the exclusive work of gladiolus breeders and specialists, but since the culture of the gladiolus has become so universal, there has been an ever increasing demand for seed, and particularly so from gladiolus enthusiasts, flower lovers and gardeners who do not have the time and stock to raise their own seed, consequently gladiolus seed has been offered in greater volume, but strange to say, the sale of it seems to be taking about the same course that the sale of bulbs did in the beginning when they were offered in mixtures only.

Gladiolus seed is divided into two distinct different classes. Hand Pollinated and Self Pollinated. Hand pollinated gladiolus seed, means seed that is obtained by crossing two different varieties, one being the pollen parent and the other the seed bearing parent. The seed thus obtained is hand pollinated seed and should produce seedlings superior to the varieties from which it is obtained. The process is forward, to create new colors, forms and types, to unite the characteristics of two different varieties, to eliminate or to accentuate certain characteristics of one or the other parent. Knowing the names of the two varieties, and which one was the pollen parent, it being dominant, it is an easy matter to determine the value and the possible results of such a cross. The seedlings may not be perfect, but with a knowledge of the parent names it becomes possible to make further crosses to produce the perfect flower. Hand pollinated gladiolus seed without the parent names, becomes meaningless and worthless for any practical purposes, and it is difficult to understand why any hand pollinated gladiolus seed, if it is from fine crosses, should ever be offered in mixtures.

We would just as soon grow the less expensive Self Pollinated Gladiolus Seed, as hand pollinated seed without the parent names, because in either case there can be no indication whatever of what the seedlings are likely to be. With self pollinated gladiolus seed the movement is recessive. This is perhaps more noticeable in the *Primulinus* than in the large flowering types. The *Primulinus* is of comparatively recent discovery, and in its hybrid specimens, where the hooded characteristic has been bred away, the self pollinated seedlings and its seedlings in turn will show a return of the strong hooded characteristic of the species, but with the large flowering types this backward movement is not so noticeable, because there

has been so much cross breeding in the interval of the original crossing of two distinct species, its true hybrids, secondary hybrids and the highly developed large flowering types of today. In fact it is often very desirable and profitable to grow self pollinated seed of some of the newer outstanding varieties, the reversion may show up some fine characteristics the breeder did not have in mind at all when making the cross. Many of the well known standard varieties were obtained from self pollinated seed. There is, however, this difference in growing the seed, self pollinated seed must be grown in greater quantities than hand pollinated seed for good results.

A great many of the crosses we are offering this year, are the results of requests and orders we have received for such crosses. If you have any crosses in mind, that you think should give the results you desire, send us the names of the varieties you wish crossed and we will make the crosses both ways, if possible. There is positively no obligation or expense for this. If we get seed from such a cross, we will communicate with you, and you can then buy the seed or leave it alone, just as you wish. If we do not sell the seed, we will grow it. You may also order self pollinated seed of any named variety under these same conditions. All requests or orders for this, must be in and on file with us by April first to enable us to plant our stock accordingly.

If you are after outstanding fine new specimens, to be propagated and named and introduced into the Glad world, then grow the seed of crosses, hand pollinated seed with the names of the parent varieties given. If you feel more like experimenting, and it is less expensive, then grow self pollinated seed of named varieties with the parent names given, both of these methods provide an intelligent basis for further development and a pedigree for any outstanding seedlings. If you feel like gambling and want surprises good and bad, thrills and disappointments, then grow the self pollinated mixtures, and in quantity. Our prediction is, once you have enjoyed this fascinating and delightful gardening experience, you will never again be without a plot of gladiolus seedlings in your garden.

While we offer no warranty expressed or implied for our seed (as is the usual custom of the nursery and seed trade), we are nevertheless anxious that every purchaser of our seed shall receive entire satisfaction, and to that end we earnestly request a full report as to germination, bulblets and bulbs and blooms obtained.

Complete cultural directions with each order.

All orders delivered prepaid.

Cash with order. No orders accepted for less than \$1.00.

No Gladiolus Seed For Sale After April First

HAND POLLINATED SEED OF 1928 CROSSES

Please Order by Number and Name

The possible results, of this hand pollinated gladiolus seed, are indicated by the names and descriptions of the parent varieties. The first named parent variety being the pollen parent, the dominant one of the cross, and the second the seed bearing parent.

Last year we offered considerable seed of laciniated crosses, this year we are offering a far greater variety and quantity, because the latest developments in the breeding of the gladiolus, are to produce the fine, dainty, thin stemmed, open faced flowers, suitable for table and more intimate purposes. Gladiolus breeders the country over are working on these smaller types, and in offering this seed, we are simply offering the latest developments in the evolution of this wonderful flower.

Hand pollinated gladiolus seed, except in mixtures is of necessity expensive. The making of true crosses is exacting work, certain processes have to be performed at certain periods, weather conditions have to be just right, only two to four blossoms are employed on a spike for a cross. To emasculate and to pollinate the flower, each blossom has to be visited a number of times and the same in gathering the seed. These facts and the cost of the varieties crossed and the possible results of such crosses are the factors that determine the cost of the seed.

Stock of some of the crosses listed here is limited. Orders are filled in rotation. Money will be promptly returned when we cannot fill an order. In other words, if you want any of this seed, do not wait, but place your orders at once.

1928 SELF POLLINATED GLADIOLUS SEED

Please Order by Number and Name

The sexual organs of many varieties are such that self pollinization cannot take place naturally. These, AND ALL THE VARIETIES offered in this list are pollinated by hand with their own pollen, for the purpose of making certain of a seed set, and to minimize the possibilities of other agencies pollinating the flower, thus insuring as pure self pollinated seed as can be obtained.

There is no indication whatever of what will happen with this self pollinated gladiolus seed. The movement is backward, the names of the parent varieties are given for the purpose of providing a pedigree for any outstanding specimens produced from it.

1928 SELF POLLINATED GLADIOLUS HYBRID SEED IN MIXTURE

With this self pollinated gladiolus seed, nature has taken its own course, undisturbed. The bees, insects, humming birds, the winds may have selected our flower fields to perform miracles as only nature can, and it may not, we don't know, but we do know that all the

colors, forms and types, excepting the Primulinus and Laciniated types, are represented in this mixture.

We have priced it so low that everybody can grow it, and as we have said before, the more you plant of this seed, the better are the chances of getting outstanding specimens. The picture, on the front cover of this catalog, is one that came out of a general mixture. We think enough of every gladiolus seed in our possession to plant it, no matter if it is of our finest crosses, or from a general mixture.

1 Packet of 1000 Seeds.....	\$.75
3 Packets of 1000 Seeds.....	2.00
6 Packets of 1000 Seeds.....	3.75

1928 SELF POLLINATED PRIMULINUS HYBRID SEED IN MIXTURE

The original species G. Primulinus is of a pure primrose yellow color. The seed we are offering is from hybrids that have retained the hooded characteristic of the species. The colors are of all shades, we have avoided as far as possible, the color, yellow, in the gathering of this seed, to insure a wide range of color in its seedlings. These, as is well known, bloom earlier than the large flowering types and are very much more delicate in formation and coloring.

DECKLE EDGE TYPE

DECKLE EDGE TYPE

Our new Deckle Edge Type is a small, dainty, wiry thin stemmed, open faced flower, with the edges of the petals rough edged like the ragged edge of hand made paper--hence the name.

We are **NOT** offering bulbs of these types as yet, but are offering seed to produce this type.

UNBLOOMED HAND POLLINATED SEEDLING BULBS OF 1927 CROSSES

Please Order by Number and Name

Last year we offered unbloomed seedling bulbs grown from our 1926 Self Pollinated Seed Mixture. The demand was so great for these seedling bulbs, that we have decided this year, to offer our entire stock of 1928 seedling bulbs.

It is a rather unusual proceeding to offer hand pollinated seedling bulbs of fine crosses, with the names of the parent varieties given, especially in view of the fact that they will bloom for the first time this coming season, but we feel, as long as we are offering this seed in the first place, we might as well offer the bulbs grown from this seed. One fact, however, must be kept in mind, the seed comes first, if this is sold, we cannot, of course, grow bulbs from it. We do not hold over any unsold gladiolus seed; we plant all of it, thus assuring absolutely fresh gladiolus seed each year.

As with the seed, the possible results of these hand pollinated seedling bulbs, are indicated by the names and descriptions of the parent varieties, the first named being the pollen parent and the one to dominate the cross.

27C16

Mrs. Van Konynenburg (Pfitzer) Matchless Aniline Blue, on
The Orchid (Sprague) Lavender Pink, Laciniated

The Orchid is a really remarkable flower, its laciniated characteristic seems to hold true, as a pollen parent, as a seed bearing parent and when it is self pollinated. It is a wonderful seed bearer and as a pollen parent, in our observations, it imparts its characteristics in every cross where it is used.

We are strongly inclined to agree with Dr. A. R. Sprague, its originator, that it is a "break" and not the result of intensive breeding. Our experience with it has taught us to hold it in very high regard.

The Orchid (Sprague) Lavender Pink, Laciniated, on
Lavender Beauty (K) Pink Lavender, Laciniated

This is what we call a "sure fire" cross, the seedlings will be laciniated. Both parent varieties are of about the same color, Lavender Beauty being somewhat darker and open faced, this will influence the seedlings in color and shape.

No. 6 Bulbs \$1.00 Each

27C27

The Orchid (Sprague) Lavender Pink, Laciniated, on
Orange Delight (K) Bright Orange, Laciniated

This is another "sure fire" cross, the seedlings will be laciniated. Both parent varieties are vigorous and strongly individualistic, and it will be interesting to see what color combinations will come out of this cross.

No. 5 Bulbs \$1.50 Each

No. 6 Bulbs \$1.00 Each

27C31

The Orchid (Sprague) Lavender Pink, Laciniated, on
Sebesta (K) Creamy White

Sebesta, while it is a plain petaled variety, has aroused our interest because it does not always come plain petaled and yet these bulbs carefully segregated do not seem to come true to what we thought we saw in them. Its self pollinated seedlings have shown some laciniated traits, and coming from Mr. A. E. Kunderd as it does, it is very likely that there is some laciniated blood in this flower, as some of the laciniated varieties that are out on the market, come plain petaled one year and then laciniated again, color and size being the same each year. It may be that this trait is not firmly fixed in some varieties. However, knowing what The Orchid will do, we have used it upon Sebesta to develop the latent possibilities we have discovered in this flower.

No. 4 Bulbs	25c Each

No. 6 Bulbs	10c Each

27C24

The Orchid (Sprague) Lavender Pink, Laciniated, on
Anna Eberius (D) Deep Rhodamine Purple

The color possibilities are splendid and with the laciniated influence dominant, it is altogether a very desirable cross.

No. 4 Bulbs	50c Each
No. 5 Bulbs	35c Each
No. 6 Bulbs	25c Each

27C17

Orange Delight (K) Bright Orange, Laciniated, on
Avalon (K) Blush White, Heavily Ruffled

Orange Delight is one of Mr. Kunderd's splendid laciniated specimens. It always comes true, it is a strong grower and can always be depended upon to stamp its influence unmistakably wherever it is used. Avalon should have been named after Schubert's immortal "Unfinished Symphony," it is a marvelous flower, but the red in the throat never comes perfect with us, and we have never seen it perfect elsewhere. These heavily ruffled large flowers undergo a wonderful transformation when you can get the laciniated types to set seed on them and for that reason we consider this a very fine cross.

UNBLOOMED 1928 SELF POLLINATED SEEDLING BULBS OF NAMED VARIETIES

Please Order by Number and Name

These seedling bulbs are from self pollinated seed of named varieties, and have not bloomed. The parent names are given for the simple purpose of providing a pedigree for any outstanding specimens.

In the foregoing list of hand pollinated seedling bulbs, it will be noted, that we are able to offer only 11 out of 28 varieties offered as seed last year. In this list of self pollinated seedling bulbs, we are able to offer only 25 out of 79 varieties offered as seed last year.

We merely mention these facts to impress upon you the necessity of buying the seed of varieties you may want, at once, as there is no possible way to replace our supply of seed, once it is sold. It can not be bought in the open market, and a whole year must elapse before we can offer such seed again.

- S1 **Albania (Kemp)** One of the best Whites
Sizes, 4s, 5s, 6s, Assorted sizes, 4s to 6s \$1.20 per dozen (Prices for each size bulb, given at the end of this list.)
- S7 **Blue Lily (K)** Light Violet Blue
Sizes, 4s, 5s, 6s, Assorted sizes 4s to 6s, \$1.20 per dozen
- S8 **Chateau Thierry (Vos)** Orange Cerise
Sizes 3s, 4s, 5s, 6s, Assorted sizes 3s to 6s, \$1.50 per dozen
- S9 **Crimson Glow (Bet.)** Crimson
Sizes 3s, 4s, 5s, 6s, Assorted sizes 3s to 6s, \$1.50 per dozen
- S12 **E. B. Williamson (K)** Mallow Purple, Prim.
Sizes 3s, 4s, 5s, 6s, Assorted sizes 3s to 6s, \$1.50 per dozen
- S13 **E. J. Shaylor (K)** Deep Rose, Ruffled
Sizes 3s, 4s, 5s, 6s, Assorted sizes 3s to 6s, \$1.50 per dozen
- S14 **Elizabeth Tabor (Hinkle)** Pink with Carmine Blotch, Early
Sizes 3s, 4s, 5s, 6s, Assorted sizes 3s to 6s, \$1.50 per dozen

- S15 **Elora** (Burbank) White Flushed Pink, Early
 Sizes 3s, 4s, 5s, 6s, Assorted sizes 3s to 6s, \$1.50 per dozen
- S17 **Genesee** (Davis) Large Pale Yellow Prim.
 Sizes 3s, 4s, 5s, 6s, Assorted sizes 3s to 6s, \$1.50 per dozen
- S21 **Golden Swallow** (Austin) Clear Soft Yellow. Ruffled
 Sizes 5s, 6s, Assorted sizes 5s to 6s, 90c per dozen
- S23 **Halley** (Velthuys) Salmon Pink
 Sizes 3s, 4s, 5s, 6s, Assorted sizes 3s to 6s, \$1.50 per dozen
- S26 **Jack London** (D) Light Salmon
 Sizes 4s, 5s, 6s, Assorted sizes 4s to 6s, \$1.20 per dozen
- S28 **Jewell** (Zeestraten) Light Salmon Pink, Prim.
 Sizes 4s, 5s, 6s, Assorted sizes 4s to 6s, \$1.20 per dozen
- SE1 **Laciniated**, Seedling, Light Pink
 Sizes 5s. 50c each; 6s, 35c each; Assorted sizes 5s to 6s, \$4.25 per dozen
- S30 **Lacinatus** (K) Rose Pink, Laciniated
 Size 6 only, 50c per bulb, \$6.00 per dozen
- S31 **L'Immaculee** (Lemoine) Pure White
 Sizes 3s, 4s, 5s, 6s, Assorted sizes 3s to 6s, \$1.50 per dozen
- S32 **Los Angeles** (H) Shrimp Pink, The cut and come again Glad
 Sizes 5s, 6s, Assorted sizes 5s to 6s, 90c per dozen
- S37 **Muriel** (Pfitzer) True Lilac
 Sizes 3s, 4s, 5s, 6s, Assorted sizes 3s to 6s, \$1.50 per dozen
- S46 **Rev Ewbank** (Velthuys) Light Blue
 Sizes 3s, 4s, 5s, 6s, Assorted sizes 3s to 6s, \$1.50 per dozen
- S47 **1910 Rose** (K) Rose Pink
 Sizes 5s, 6s, Assorted sizes 5s to 6s, 90c per dozen
- S48 **Rose Ash** (D) Ashes of Roses
 Sizes 5s, 6s, Assorted sizes 5s to 6s, 90c per dozen
- S49 **Rose Mist** (Fischer) Large Light Red Prim.
 Sizes 5s, 6s, Assorted sizes 5s to 6s, 90c per dozen
- S52 **Sebesta** (K) Creamy White, Early
 Sizes 4s, 5s, 6s, Assorted sizes 4s to 6s, \$1.20 per dozen
- S56 **White Butterfly** (K) Dainty all White Prim.
 Sizes 4s, 5s, 6s, Assorted sizes 4s to 6s, \$1.20 per dozen
- S54 **Yellow Treasure** (Austin) Rich Clear Yellow
 Sizes 5s, 6s, Assorted sizes 5s to 6s, 90c per dozen

PRICES of each size bulb: No. 3s 20c, No. 4s 15c, No. 5s 10c, No. 6s 5c.

STOCK of some of the varieties listed here is limited. Orders are filled in rotation. Money will be promptly returned when we cannot fill an order.

UNBLOOMED 1928 SELF POLLINATED GLADIOLUS HYBRID SEEDLING BULBS IN MIXTURE

If you haven't ever grown the gladiolus from seed, then start with these seedling bulbs. This self pollinated mixture will give you a pretty fair insight into one of the most fascinating and interesting phases of all flower growing. A plot of these seedlings in your gar-

den will be a spot that will be visited many a time each day during the blooming season. Each morning new faces will greet you, some hauntingly familiar, no two alike, it may be a gem, or the worst you ever saw. Surprises, disappointments, thrills, curiosity, excitement, all these emotions come into full play in a patch of Glad seedlings blooming for the first time. These should be grown in quantity, a space 5 by 6 feet will easily grow a hundred bulbs. The more of these you grow the better are the chances of getting some worthwhile specimens.

The seed of this mixture was planted May 8 and 9, 1928, a great many of the No. 3 and 4 bulbs were in spike ready to bloom when we dug the bulbs, these will give full sized flowers this coming season. Seedling bulbs are precocious things and the No. 5s and 6s will bloom, but the flowers will very likely not be full sized, but the color, markings, and form will be apparent and you will know what you have.

No. 3 Bulbs	\$1.00 per dozen	12 dozen	\$10.00
No. 4 Bulbs	.75 per dozen	12 dozen	7.50
No. 5 Bulbs	.50 per dozen	12 dozen	5.00
No. 6 Bulbs	.25 per dozen	12 dozen	2.50

For a long blooming period, we would suggest a mixture of the above different size bulbs, at \$5.00 per 12 dozen.

UNBLOOMED 1928 SELF POLLINATED PRIMULINUS HYBRID SEEDLING BULBS IN MIXTURE

What was said about Gladiolus Hybrid Seedling Bulbs, is equally true of Primulinus Hybrid Seedling Bulbs. The seed of this mixture was sown May 10, 1928. All of the sizes listed here will bloom this coming season.

No. 4 Bulbs	\$.75 per dozen	12 dozen	\$7.50
No. 5 Bulbs	.50 per dozen	12 dozen	5.00
No. 6 Bulbs	.25 per dozen	12 dozen	2.50

For a long blooming period, we would suggest a mixture of the above different size bulbs, at \$4.00 per 12 dozen.

Gladiolus Bulbs

ALL BULBS ARE NO. 1 SIZE

One dozen bulbs of any variety at price of 10.

Cash with order. No orders accepted for less than \$1.00.

All orders delivered prepaid.

The American Gladiolus Society cultural instructions included with each order.

All bulbs are sound, disease free, up to size and true to name.

It will be noted that prices are omitted on quite a number of the varieties that are listed under this heading. These are varieties that we, wish to use for seed and hybridization purposes. A study of this list may reveal some very desirable crosses that we may not see

at all. Send us such suggestions, requests or orders, we will be very glad to try any such crosses. There is positively no obligation or expense for this. If we get seed from such a cross, we will communicate with you, and you can then buy the seed or leave it alone, just as you like. If we do not sell the seed, we will grow it. April first is the time limit for this, so we may be able to plant our stock accordingly.
