Irises

that are growing

Over-the Garden-Wall

60 NO. MAIN ST., WEST HARTFORD, CONN.

Mrs. L. W. Kellogg, Owner

1929

Greetings —

Both to those who have already found the irises that are growing "Over-the-Garden-Wall", and to those who may find them for the first time, this year. We welcome you at any time, and as many times as you find opportunity to come — for an iris garden needs many visits.

Do you know the irises — their personal characteristics? Which will prove neighborly and appreciative, and which may refuse to feel "at home"? Do you revel in their color and texture? Such knowledge is possible without long and detailed study. First, let the dwarf irises greet you, some early May morning, with a fragrant carpet of garnet and gold and amethyst. A few days' later, the Intermediates will give you of their largess of blues and whites, yellows and purples. Have you seen the gleam of SOLEDAD, bringing sunshine to the garden, even during showers? And just at dusk, when many colors are disappearing feast your eyes on a planting of FIRMAMENT. Does LENT A. WILLIAMSON remind you of an old New England Sabbath — sombre and dependable — a good influence in the community? Can you stand high enough to look into ALCAZAR, and find it's heart of gold? Perhaps you have used strong language about MIDWEST, the border of whose beruffled petticoats is too intense a lilac to fit your color scheme? — and yet there's nothing like it. Have you seen the low-lying eastern sun lighting the blooms of MORNING SPLENDOR? (The western sun will give the same effect!) Have you tried planting MOTHER OF PEARL in partial shade, to retain its pearly tints? And CHASSEUR with AMBASSADEUR, that its black buds, opening into yellow flowers, may both tone with, and contrast with the rich blooms of the latter? Do you know the exquisite finish of HIPPOLYTE? and the metallic sheen of STEEPWAY, that rivals a beetle's wings? Can you keep your fingers away from the fushia-velvet falls of SILVER RIBBON? CANOPUS is a dull fellow by himself, but a clump will stay in bloom for weeks, proving a splendid foil for brighter neighbors. Perhaps you know these older irises, and wish an introduction to the newer ones? Adjectives are lacking to more than hint at the loveliness of the pastel colors of DOLLY MADISON and MIDGARD; CAMELIARD that might have been cut from cloth-of-gold; the eye-arresting KING TUT and the breath-taking BULO; the new clear whites and yellows that all have been asking for; — really, these new irises must be seen. So come for yourselves, and learn how the Dominion seedlings — stately and tall, with unbelievably velvety falls — provide the rich hangings of purple and brown and wine-colored velvets; — a fitting setting for the stage where the chorus, dressed in iridescent gleams of mauve and apricot, azure and gold and sapphire, charm the eye with their ever-changing and indescribably beautiful blends.

To turn to practical matters: last year's increase among the irises here was very heavy, in nearly all varieties. Prices have been lowered accordingly. Also, believing that a planting of three or six rhizomes gives a much more satisfactory effect, and knowing that orders of this kind are easier to fill, we make a further reduction in price for three of a kind, wherever stock permits.

The check-up after retail orders are received, will determine whether our stock of certain irises is larger than we care to carry over for another year. Also, notes made during the blooming season will show which varieties resemble others so closely, that a discontinuance of one seems advisable. Lists of such surplus stock will be ready early in July, and we shall be glad to hear from anyone who might be interested in quantity plantings.

While irises have been growing "Over-the-Garden-Wall", in large variety, for but few years, the casualties during this period lead to the conclusion that, at least here in New England, American introductions are more trustworthy than many of the French and English importations. There are notable exceptions, that we can easily have. Others are so lovely, we keep on attempting to acclimate them. But in accordance with the above conclusion, you will find each year as complete a showing as possible of the newest American irises, together with such few of the foreign as seem most hardy and desirable. Your comments, especially on the recent introductions, are most welcome, that estimates of their general appeal may be formed.

In this, our first attempt at a descriptive catalogue, you will find the irises divided into several lists. First come the additions to the garden last year, mostly 1928 introductions. The long, general list of tall bearded irises follows. This we hope to shorten each year, as those irises of less distinction are removed to the "reference garden", to be grown for reference only, and for the accommodation of those who wish to see certain varieties. This garden now contains about a hundred varieties not listed here. After the main listing comes that of the older, standard varieties, selling at a uniform price of 25c. Next, the few Dwarfs and Intermediates, as also the beardless irises.

FOLLOWING is the list of the new irises that will be found blooming, (we hope) Over-the-Garden-Wall, this year. They are grouped according to originators, both here, and in the garden planting. All are of American introduction.

Notice

It is more important than ever before, that customers see the irises before ordering them, there are so many varieties, differing very slightly in tone or carriage. Also, color terms do not convey the same ideas to everyone. Of many of the varieties listed, we have a very limited stock, so early orders are advisable. We reserve the right to withdraw from sale any irises of which the stock is depleted.

Shipments will be made by parcel post, as early in July as possible; or later, at the customer's convenience. Except for the dwarf irises, no plants will be dug during the blooming season. Irises will be guaranteed true to name, and in healthy condition when shipped. If an error does occur, we shall appreciate having you tell us of it. We cannot hold ourselves responsible for misfortunes that will happen in all gardens, tho' we are glad to offer advice as to which varieties should prove hardy.

Terms are cash with order, and refunds will be made for any varieties we are not able to supply.

Visitors are welcome at any time during the blooming season; on week days only, the rest of the summer. The garden is situated just north of West Hartford center.
