TO CORRESPONDENTS

I take pleasure in presenting herewith my nineteenth annual catalogue and price list.

It has been my endeavor to list, as much as possible, only the very best and most satisfactory of both Fruit and Ornamental Trees and Plants. Whatever I am not able to grow on my own grounds, I procure from the most reliable Nurseries. My Nursery is located between Fifth Avenue and Center Street, about four blocks northwest from West End Station, San Rafael.

I warrant all trees and plants to be healthy, and true to label, but having no control over them after delivery, I do not GUARANTEE them to live and thrive, nor will I replace them, except any tree or plant should prove untrue to name; but in no case will I be liable for any sum greater than the original purchase price.

My customers are requested to notify me immediately of any error that may have occurred in filling their order, so that the same may be rectified, as I desire to give satisfaction to all, who favor me with their order.

All orders delivered free in San Rafael and Ross Valley; a small charge for packing, to cover cost of material, will be made for all orders shipped by express or freight. All articles are at the risk of the purchaser, after being shipped.

Orders from unknown correspondents must be accompanied by cash or satisfactory reference. All bills payable first of the month.

NOMENCLATURE

All plant names, both botanical and common, have been revised to conform with 1923 edition of "Standardized Plant Names" if listed in that book. The only exceptions are a few uncommon items and novelties which that work does not include. This standardized nomenclature should unquestionably be followed by everyone from now on.

See list of common plant-names on last page.

CONIFERS

Coniferous Trees are the grandest trees in existence. A good many of them are natives of the Pacific Coast, therefore at home in our climate. Though the most expensive varieties are of rather slow growth, until well established in the ground, they will grow into the finest specimen trees for the lawn in a few years. Prices are for small and medium sized plants. Quotations for larger plants on application.

Planting Season:

Field grown plants from October to March. Pot grown and boxed plants from September to June.

EVERGREEN TREES and SHRUBS

Broadleaved Evergreens vary in size from the largest trees to the smallest shrubs; unlike the coniferous Evergreens, whose flowers are insignificant, most of these excel in brilliancy and floriferousness, others through their shining berries and foliage. These plants give our California garden and parks their distinctive feature.

Planting Season:

October to April; pot-grown plants of this class can be planted any time during the year.

DECIDUOUS TREES and SHRUBS

The best street and avenue trees are decidedly deciduous trees; they will give the necessary shade in summer and admit sunshine in winter. In this class are also the most gorgeous spring and summer blooming shrubs. Deciduous weeping trees are beautiful specimen trees for the lawn.

Planting Season:

November to March, after leaves commence to fall and before they commence to bud in spring.

R O S E S :

The "Queen of Flowers" gives best results when planted in a sunny location and in a fairly heavy sediment soil. Be sure that the plants are set deep enough, at least one or two inches deeper, than were the bud has been inserted. Prune rather severe during the winter months, December to February, except the spring blooming climbing Roses like Banksias, Cherokees, and Ramblers. Prune these roses right after the blooming season is over, never in the fall.

Budded Roses are more vigorous and give better results than stock grown on its own roots, with the exception of a few climbing and strong growing varieties.

Planting Season:

January to March, also in the late fall, if stock is available.

*A New Golden Yellow Hybrid Cactus Dahlia
of my own introduction.*

Awarded Gold Medal for the best established Seedling at the Palace Hotel Show, San Francisco, 1925. Also Certificate of Merit at the Trial Gardens of the Dahlia Society of California, and at the Trial Gardens of the Dahlia Society of New Jersey. The form of the flower is perfect, always showing a full compact center: the giant flowers are held on strong stems well above the foliage. A first class exhibition flower and a good keeper as a cut flower.

Strong Tubers: \$2.00 each

DAHLIAS

The following list of Dahlias comprises the cream of numerous varieties in commerce. They have been selected for their superiority in purity of color, perfection of form, length of stem, continuous blooming, etc.

A new Miniature Decorative Dahlia JEWELTJE (Little Jewel)

This little Dahlia of Holland origin is the
outstanding novelty of recent years; not
over 3 inches in diameter; of perfect form;
a continuous bloomer, and the color, a clear
delicate pink, with no trace of purple in it;
the finest little Dahlia for cutting and florist
work75c each

POMPON DAHLIAS—

These produce small compact flowers of per-
fect form and free blooming qualities. They
are unequalled for cutting and garden dis-
play. Named varieties.....50c each
Mixed varieties.....35c each, \$3.50 per doz.

SINGLE DAHLIAS—

These miniature Dahlias are very attractive
and show remarkable color combinations.
Named varieties50c each

DAHLIA IMPERIALIS—

The Mexican Tree Dahlia grows to a height
from 8-10 feet, foliage very ornamental; the
light pink bell-shaped flowers appear in
November75c each

DAHLIA MAXONI—

Another Tree Dahlia, similar to foregoing;
of even stronger growth, flowers of a dark
lavender pink; also late in November; there-
fore only adapted for warmer parts of the
country.

WATER LILIES

The culture of Waterlilies is so simple that it might almost be said that "they just grow themselves." Their modest requirements are sun, water, and rich soil. In deciding on a place for a natural water-garden, one is naturally led to select a low spot.

It is not very difficult to construct an artificial pool. Any location that is available would be satisfactory, provided it is exposed to the full sun.

An artificial pool should be made as large as possible, and 2 feet deep. In California it is advisable to build the bottom and side-walls of 6 inch water-tight concrete. Make an artificial pool as natural as possible and avoid stern lines and too apparent masonry. A generous planting of moisture-loving plants around the edge of the pool or pond will furnish an added charm to the plants in the pool itself.

One foot of water over the soil is the most desirable depth in artificial pools. Some will thrive in shallower water, but few will stand a depth exceeding 2 or 3 feet. A continuous flow of water tends to keep the temperature in the pool low and must be avoided. After the pool is once filled it is only necessary to replenish that which evaporates.

A few Goldfish will serve to destroy the wrigglers that hatch into mosquitoes and larvae of other insects.

NYMPHAEAS

AURORA—

Flowers are rosy-yellow, turning to a red-orange and deep red, as they mature. The leaves are mottled brownish red.....\$2.00 each

COMANCHE—

Brilliant amber-red, overlaid with yellow. A steady, free bloomer; very hardy variety.....\$2.50 each

A vigorous grower, bright canary yellow; leaves deep green, blotched with brown
\$1.50 each

ODORATA SULPHUREA GRANDIFLORA—

Another very fine yellow variety, of a sulphur shade; leaves light green, mottled brown\$1.50 each

WATER-LILIES at the WEST END NURSERY
(Lilies planted June 1st, photo taken Oct. 15th)

PAUL HARIOT—

A magnificent variety, distinctive color: canary yellow, shaded with pink, which suffuses the flower entirely as it grows older.

A good grower\$2.50 each

ROSE-AREY—

Color a clear cerise pink; sweetly scented; free flowering

.....\$2.50 each

NELUMBIUMS

NUCIFERA

The most strikingly beautiful plant in the aquatic field is the Lotus or Nelumbium. The large concave leaves, resembling green shields, are borne on stout stems high above the water. The flowers are of an exquisite rose pink, like giant Tulips, changing to creamy tints when fully open.

The brown seed-pods, which remain long after the flower is gone, are very artistic.

The Nelumbiums are rampant growers and heavy feeders and must be supplied with a very rich soil.

Tubers ready in May.....\$2.00 each

IRIS

Iris germanica, commonly called German Iris, Flag-Lilies or Fleur de Lis, are amongst the most desirable and easiest grown of our spring flowering plants. The flowers fairly outrival the orchids in delicacy of structure and wide range of coloring. They are particularly adapted to our California climate, if planted in a well drained sunny location, requiring very little water during the summer. Avoid planting too deep and fresh manure.

Planting Season:

September-November, or later, if the ground is not too wet.

FLAVESCENS:25c each

A. delicate shade of soft yellow, sweet scented.

IRIS-KOENIG:25c each

Upper petals clear lemon, lower petals deep satiny brown, golden yellow border.

ISOLENE:25c each

Pale lavender, lower petals light purple overlaid with brown, yellow beard, very distinct.

LORELEY:25c each

Upper petals pale sulphur-yellow, lower petals deep ultra marine blue, veined creamy white, yellow border.

LOHENGRIN:25c each

A delicate shade of pale lavender blue, very large flowers.

MAORI-KING:25c each

Upper petals, golden yellow, lower petals velvety crimson, margined gold.

NIBELUNGEN:25c each

Upper petals olive green suffused with yellow, lower petals deep purple, edged creamy white.

NOTHUNG:25c each

Upper petals light olive colored, lower petals delicate lilac, golden yellow beard.

PRINCESSE VICTORIA LUISE:.....25c each

Upper petals sulphur yellow, lower petals rich plum color with creamy edges.

PALLIDA SPECIOSA:25c each

Lavender, shaded blue, very fragrant, one of the best.

QUEEN OF THE GYPSIES.....25c each

Old Gold, shaded pearl, lower petals maroon, marked yellow.

RHEIN-NIXE:25c each

Upper petals pure white, lower petals deep violet blue, margined white.

HARDY PERENNIALS

Herbaceous plants are indispensable for filling in and planting amongst shrubbery, in the rock gardens, for the old-fashioned perennial border, etc. Most varieties, after once planted, will live and bloom without much attention, for many years. Prices are for field grown, potted or transplanted seedling plants.

Planting Season:

October to March, as early as possible, whenever the soil is in good condition.
