NEW BEDFORD, MASSACHUSETTS

GREETINGS

To my friends and patrons:

It is with the greatest of pleasure that I present to you my 1929 catalogue and price list of Dahlias and Gladiolus.

I trust it may be of interest to you. I am offering only what I know to be varieties that have given only the best results.

I am anxious that you, as a customer, be perfectly satisfied. And promise that it will be so. If there is anything that is not just right I will be pleased to rectify it and will use every effort to have everything as it should be.

Yours very truly,

ALLEN A. LAMOND.

General Information

The different Dahlias I have abbreviated as follows: Cactus, C.; Decorative, Dec.; Peony, Peo.; Hybrid Cactus, H. C.; Show, S.

To insure satisfaction, order early, as the stock of some varieties is often limited, and ordering early may insure the reservation of some that may be later sold out.

Your order is filled only with the varieties called for, and unless instructed to do so, I never substitute, but return the amount to you. If you do not find the variety in the list that you may want; let me quote you. The stock of many new varieties is too limited to catalogue.

I guarantee all stock true to name and to arrive in good growing condition, and will cheerfully replace any that should not be so. Otherwise, no guarantee is given. **Kindly notify at once of any dissatisfaction.** All prices and quotations are subject to depletion of stock.

All orders must be accompanied by remittance; or reserve orders must be accompanied with 25 percent of the amount of order. No goods sent C. O. D. unless 50 percent of the amount accompanies order.

Remittances should be made by post office money order, registered mail, or personal check.

Unless otherwise ordered tubers will be shipped between April 20th and June 1st prepaid to your address.

Green plants will be sent parcel post prepaid to your address as soon after all danger of frost is over as considered practical.

Write name and address as plainly as possible.

The Dahlia requires no special soil, but will do well in most any location. Plant from May 1st to June 20th. Cultivate soil thoroughly. Dig hole 7 or eight inches deep. Lay tuber flat with eye up, and next to stake which should be driven firmly. Cover with two or three inches of soil, filling in as plant comes up. Do not water until plants are well above ground, and then only if very dry. A thorough soaking once a week should be enough. Keep the soil well cultivated until buds appear, and then only lightly after; just enough to keep the soil from baking. A good mulching will keep the ground moist. If soil is poor, well rotted stable dressing or a good fertilizer can be mixed thoroughly with the soil before planting, but not to excess.

To obtain extra large flowers, disbud freely, leaving only a few buds and branches on each plant.

Green plants should be planted at least twice as deep as they were grown in the pot; and should be watered and shaded a few days after planting.

On all orders amounting to \$25.00 or more, and received before this same date, you may select fifteen percent extra.

These extras may be selected from anything listed in the catalogue.

In this case only do I reserve the right to substitute any other variety, of equal or greater value, should the stock of the varieties you select be exhausted.

These offers are made in appreciation of receiving your orders early, so that they may be filled before the busy season.

Dahlias of Recent Introduction and Varieties of Special Merit

- X—Rising Mars** (Simmons). A Hybrid Cactus that for five years has been winning awards at the New England Dahlia Society Shows. It has won seven first prizes, two silver medals, and the Darling Cup. In December 1928 it was placed on the honor roll of the American Home Magazine. An abundant bloomer, early and late, natural flowers with a uniform size of nine inches, its color, as given in the chart, is pomegranate purple. In the sunlight the blooms have a three tone effect, never burns in the sun or sheds its petals. Can always be depended upon for blooms and a light centre. The plant stands five feet with dark green leaves and needs no pinning. The strong stems are long and slender. For the first time this five year old seedling is offered for sale. The tubers are all field grown from tubers. Tubers \$10.00 net. Plants \$5.00.
- X—White Empress** (Jost) (Dec.) No doubt the best white decorative to date. Very free on long stiff stems. Winner of Darnell Cup at A. D. S. Show at New York for the best keeper. When better known it will be the outstanding white decorative, scarce and limited. Plants only \$5.00 net.
- X—Brockton Beauty** (Carver) (Dec.) A very large flower which commands attention when seen growing in the garden. A profuse bloomer of great depth and size, flowers remain large all through the season. Color is a pinkish lavender shading to creamy white centre with reverse of petals pinkish lavender. A wonderful keeper with fine stiff stems holding the large flowers well above the foliage. Tubers \$10.00 net. Plants \$5.00.

Its form is much finer than Ambassador and the color is very unusual and pleasing. The habit is good. The flowers always standing perfectly erect—height 3 feet. Tubers \$15.00. Plants \$7.50.
- X—Netawaka** (H. D.) Orange yellow base shading to jasper red, reverse of petals bright carmine. The petals are twisted so that the reverse color is very much in evidence, the large flowers are borne on good stems. Tubers \$10.00. Plants \$5.00.

Free bloomer medium to tall habit of growth, perfectly stiff upright stem and heavy dark green foliage. Plants only \$3.50.

My Maryland (Downs.) This exhibition Hybrid Cactus is of a decidedly unique coloring, a blending of unusually delicate pink with the faintest suggestion of lavender, the pointed petals whorl and twist in such a manner as to blend the two colors. There are pinks and there are lavenders, but this flower is in a color class of its own. Excellent stems and leathery foliage. Awarded the Maryland Dahlia Society's gold medal for the best undisseminated seedling exhibited at the exhibition of the New Jersey Dahlia Society in Atlantic City, hence its name. Also awarded the Garden & Home Builder's Achievement medal. First prize at A. D. S. show in New York for Best undisseminated Hybrid Cactus. Certificate of Merit, A. D. S., at Storrs. Flower is full eight inches in diameter and 6 inches deep, and about the best keeper, both on the plant and when cut, of any Dahlia I know, the blooms usually lasting in good condition for a week or longer, after they are full blown. Never sheds its petals, neither on the plant or when cut. An early and prolific bloomer. Seedling of Shudows Lavender, but has more refined foliage. Plant is a strong vigorous grower, reaching a height of six feet and over. Tubers, each \$10.00. Plants, each \$5.00.

Adeline C. Lorbeer (Broomall.) One of the best pure bright red cactus dahlias. The medium large flowers are produced on fine stems. Color, clear spectrum red, without shading. Medium to tall plant. Plants only \$2.00.

Aztec Glory. (Broomall.) A Glorious Dahlia in every sense, color, form, size. This is one of the big fellows, and when the blooms attain large size the flower has an added distinction in the curl of the end of the petal. Color is rich clear golden yellow, without tints or blends. Flowers held erect on strong stiff stems. Plants only \$5.

X—Barbara Redfern (Redfern.) Color is a delightful blend of old rose and old gold. Size is immense, depth is very great. Flower is borne on heavy, stiff stem. Begins blooming early and continues until the end of the season. Bushes are fairly tall, vigorous growers, and are profuse bloomers.
