How often do we try to form an opinion from impressions gained through correspondence with a person just what they look like. There are few glad growers today who would need any introduction to such well known glad enthusiasts as Mrs. Austin, Doc. Bales or the Will Rogers of the glad world, our old friend in Boulder, Colorado, were they to meet them face to face. We see their faces so often not only on their catalogues but in horticultural publications that we all feel well acquainted with them.

It is not with the expectation or intention of advertising my business that the above likeness of "Yours Truly" appears on this page but that my many customers throughout the country may feel better acquainted with me.

INTRODUCING
SOME OF THE NEW PRIZE
WINNING GLADIOLUS
ORIGINATED BY
MRS. GEORGE KINYON

LARGE BULBS \$5.00 MEDIUM \$2.50 EACH

DR. MOODY is without doubt one of the most beautiful lavender Glads ever created. Not only is it almost unbeatable as a show flower but because of its splendid substance, keeping qualities and exquisite color make it unsurpassed as a florists variety. Those who were fortunate enough to obtain any blooms of it this past season were very enthusiastic over them as they would bring any price asked. As a propagator it is one of the best; most of the larger bulbs producing two or more bulbs and plenty of bulblets nearly all of which germinate and make wonderful growth. Note what one grower writes about that.

DR. MOODY was first introduced by me at the Boston show in 1926 where it was One of the Two seedlings shown to receive the award of Merit. In 1927 I exhibited it at the A. G. S. show at Hartford where it won First Prize for the Best Lavender.

In 1928 it was entered in the lavender class at The Regional Show, Portland, Oregon where it won both First and Second prizes. At the A. G. S. show at Toledo it was exhibited by G. W. Thacker who won First over the best Lavenders in the country. At Lansing, Michigan it again won First, exhibited by the originator Mrs. George Kinyon. At Boston it won First being entered by Mr. Arthur Mullen of Newton. Elmer Gove won First at the Vermont Show, and Mr. H. F. Good First at Iowa.

Here is what some of the growers say about it:

DR. MOODY is a great show lavender, I exhibited it at our show here where thousands of people saw it and most every one was wild about it and it sure is a wonderful propagator.

Elmer E. Gove, Burlington, Vt.

Last spring I purchased some bulbs and bulblets of **DR. MOODY** from you, I exhibited the blooms at our show here against the best lavenders in the country. It not only won first prize but also sweepstakes for the best bloom in the show. We had over Five Thousand blooms on exhibition, I think it is the best glad I have ever seen, it was the talk of the show, every one admired it. **MARY LOCKWOOD** was certainly fine. I want to thank you for your kind treatment and will send you another order soon.

H. F. GOOD, Iowa

Our **DR. MOODY** is fine, we are cutting 20 inch spikes from cormels cut above the foliage now, at the glad show First and Second prizes were won by **DR. MOODY**, Third going to M—— and there were some good spikes of M—— too. It looks as if we should do fine with this lovely glad.

Ralph J. Rooney, Portland, Oregon

I consider **DR. MOODY** so far ahead of any other lavender glad I have ever seen, there is no comparison.

Arthur Mullen, Needham, Mass.

DR. MOODY is a wonderful glad and easily worth \$25.00.

G. W. Thacker, Michigan

RESPLENDANT

Exhibited by me for the first time at the flower show of the North Shore Horticultural Society at Manchester, Mass. in 1927 where it was awarded First prize for the best seedling.

It won First prize at the Boston show in 1928 in the any other color class, also First prize at Lansing for the best ruffled variety. The combination of colors in this beautiful glad are so unlike any other creation it is hard to describe by comparison but here is my description. Creamy pink blending to rose pink at edges of petals, carmine blotches surrounded by blaze of gold on the two lower petals. Intensely ruffled. Many good size blooms out at one time, perfectly placed on a tall straight spike. Heavy dark green foliage.

Large bulbs \$2.00 Medium \$1.00 each.

MARY LOCKWOOD

Named for one of the dearest women that ever lived, my Mother. Shell pink with scarlet lines on lower petals. The color is similar to the well known Rita Beck. The spike is more of the Carmen Sylva type, tall and straight. Eight or more large well placed blooms out at one time. Blooms about as early as Dr. Moody. We had so many orders for bulbs of this variety last spring that we are obliged to withdraw the sale this year to increase stock.

FAITH (1928)

The most outstanding new introduction of the year, winner of the A. G. S. silver medal at Lansing for the most meritorious seedling. The color is the nearest to a clear blue ever created. Tall straight spike with eighteen Florets, five or six open at one time. Unlike other so called blue glads the color does not fade but remains true to the last bloom. After getting the opinion of several prominent growers we have decided to let a few large bulbs go this year at \$25.00 each. No small bulbs or bulblets for sale at any price and only 30 bulbs can be spared.

Here is what others say about it

Compared with other blue varieties that have so far been introduced it seems to me to be the best of all. I do not know your price but \$100.00 per bulb would not be out of the way.

C. E. Houdyshel

Your letter of recent date at hand, I am surely glad to get a bulb of **FAITH** for I think it is the finest blue glad I have ever seen.

Dr. B. R. Bales
