FOREWORD

THE issuing of this, our Annual Catalogue, is our effort to maintain that personal touch between our customers and ourselves, and we ask that each one of you consider this addressed to you personally.

This business was established in 1877, and we are proud to say one of the founders, F. H. WHIPPLE, is still guiding its activities and pointing the way that our organization may continue to hold as a priceless asset the confidence and good will of our customers and friends.

In the following pages we advertise:

Seeds which are secured only from most reliable sources.

Fertilizers, mixed in our own factory under most rigid supervision, which combine the scientific knowledge of the agronomist and the results of actual experiments over a long period on our own farms, and which are especially adapted to the needs of the crop for which they are designed.

Implements from reliable manufacturers only, that have been tested and tried, under conditions as they exist here in New England, and have not been found wanting, and behind the sale of our implements stands our service.

By SERVICE is meant such as can only be rendered because of experience gained, and knowledge obtained, during a period of more than fifty years of successful merchandising.

In this Catalogue, we have accurately described the various machines and farm supplies offered for your approval. Our prices are reasonable and we sincerely hope this book may be of value to our customers and promote friendly business relations.

Olds & Whipple, Inc.

List of Fertilizers and Raw Materials

for 1929

O. & W.'s Special Fertilizers

O. & W. Complete Tobacco Fertilizer	O. & W. High Grade Potato and Vegetable Fertilizer
O. & W. Blue Label Tobacco Fertilizer	O. & W. Special Potato Fertilizer
O. & W. High Grade Tobacco Starter	O. & W. Double Strength Fertilizer
O. & W. High Grade Tobacco Starter and Potash Compound	O. & W. General Crop Fertilizer
O. & W. Complete Market Garden Fertilizer	O. & W. Complete Grass Fertilizer
	O. & W. Lawn Fertilizer

FERTILIZING MATERIALS

Swift Sure Phosphate.	Super Phosphate. (acid phosphate)
Swift Sure Bone Meal.	Sulphate of Ammonia.
High Grade C. S. Meal guaranteed analysis.	Nitrate of Soda.
Castor Pomace guaranteed analysis.	Sheep Manure.
Tobacco stems in bales.	Dry Ground Fish.
High Grade Muriate Potash.	Tankage.
High Grade Sulphate Potash.	Steamed Bone.
Nitrate of Potash.	Precipitated Bone Phosphate.
Carbonate of Potash.	Lime for Agricultural use.
	Fine ground Nova Scotia Plaster.

We offer our usual list of Special Formulas for all crops. We would call especial attention to our O & W High Grade Starter and Potash Compound to be used in conjunction with Castor Pomace or Cotton Seed Meal and when so used making a complete tobacco fertilizer. This combination has been extensively used during the past few years with most satisfactory results.

We again urge our customers to order their fertilizer at once and allow us to deliver same at an early date and thus avoid the mad scramble that always comes late in the season. There is no good reason for delay.

Our Special Mixtures for all Crops

The following pages give you a list of the special fertilizers which we manufacture at our own factory.

These special mixtures are from tested formulae, proved out by practical growing tests. They are finely ground, and mechanically, in such condition, as to render them readily available to the growing crops.

Their use will repay you. They produce the kind of crops that pay. Used and endorsed by best growers.

Fertilizing Cigar Leaf Tobacco

for Bigger Yields and Better Burning Quality

A good cigar depends upon its burning quality and flavor for its reputation.

Leaf tobacco for making a good cigar must be of the best quality, must hold fire well, not burn too fast or too slowly. It must not coal on the cigar and it must leave a clear white or light gray ash, not a muddy ash.

Cigar smokers everywhere are complaining about the quality of the cigar being made today. Manufacturers cannot make good cigars unless they get good tobacco, and that is where the grower comes in.

Leaf-Wise

No matter how old a man is, if he is wise, he can still acquire more wisdom. No matter how old a grower is, he can still acquire more wisdom about a tobacco leaf.

The tobacco plant, perhaps more than any other plant, can be and is influenced for better or worse by proper or improper fertilization. In applying fertilizer, the grower must have two essential things in mind: 1, to preserve the productiveness of his soil; and 2, to produce leaf that has the most desirable qualities, namely, BURN — GRAIN — TEXTURE — and COLOR. This is a large order, but it can be successfully met by growers carefully studying the right fertilizers to use.

Fertilizers

The production of a good tobacco crop requires a large amount of plant food, especially nitrogen and potash.

Good cigar tobacco can be produced by the use of fertilizers without manure. In some tobacco areas manure is used. Experiments as conducted at the Pennsylvania Experiment Station show, however, that there is a great advantage and more profit by using complete fertilizer in addition to manure. Fertilizer improves both the yield and the quality. These points have been brought out in a very convincing way by a test in Lancaster County, Pa., from 1916 to 1921. Ten tons of manure produced 1,770 lbs. of tobacco, but with 1,750 lbs. of complete fertilizer, the yield was 2,270 lbs. of tobacco of much better quality and burn.

Potash not only greatly increases the yield, but it also has a marked effect on quality. Every complete fertilizer, whether used alone or with manure, should contain plenty of potash to improve the quality. Better quality and better yields must go together if the tobacco grower is to make the best profit.

O. & W. Complete Tobacco Fertilizer

Thousands of tons of this formula are used up and down the Connecticut Valley, proved to be the best by years of experience. While we make many special formulae to suit the ideas of our customers, O. & W. COMPLETE leads them all in popularity. This formula is the result of years of experimenting on our own farms and is endorsed by buyers of the leaf which is the strongest kind of recommendation.

GUARANTEED	{	5 to 6% Ammonia.
ANALYSIS		3 to 4% Available Phosphoric Acid.
		5 to 6% Actual Potash.

Our Blue Label Brand Tobacco Fertilizer

This fertilizer carries 1000 lbs. of C. S. Meal in every ton, put up for the grower who desires a large amount of meal under his tobacco crop. The phosphoric acid and potash are derived from the same high grade sources as our Complete Tobacco Fertilizer.

GUARANTEED ANALYSIS	{	6 to 7% Ammonia.
		3 to 4% Available Phosphoric Acid.
		6 to 7% Actual Potash.

O. & W. High-Grade Tobacco Starter

This high grade starter has been used with conspicuous success by some of our best growers in the valley. We recommend that it be applied after the first time hoeing. At that critical stage of growth an abundant supply of quickly available ammonia enables the plant to get a vigorous start, overcome and grow away from any unfavorable condition that may exist.

Experience has taught us that the crop that grows quickly, vigorously and does not stop until it reaches maturity produces the best goods.

Apply about 500 lbs. per acre.

GUARANTEED ANALYSIS { 10 to 11% Ammonia.
3 to 4% Available Phosphoric Acid.

O. & W. High Grade Tobacco Starter and Potash Compound

This formula with 5 per cent quickly soluble Ammonia and 15 per cent actual Potash should be used with C. S. Meal or Castor Pomace in growing the tobacco crop and when so used makes a complete fertilizer. The Ammonia of C. S. Meal or Pomace is slow acting and on most lands a more quickly soluble form of Ammonia is needed to start the crop. We recommend using 1000 to 1500 lbs. per acre with a ton of C. S. Meal or Pomace.

GUARANTEED ANALYSIS { 5 to 6% Ammonia.
4 to 5% Available Phosphoric Acid.
15 to 16% Actual Potash.

Fertility in Truck Farming

Success in commercial vegetable growing consists largely in maintaining the full productive power of the land at the lowest cost and with the least interruption of crop continuity. The increasing scarcity of stable manure and its nearly prohibitive cost have obliged most commercial growers to turn to commercial fertilizers for plant food, and to cover crops for their organic matter. Even where manure is available in quantity, growers are using considerable amounts of fertilizer.

O. & W. Complete Market Garden Fertilizer

This is one of our high grade special mixtures for use on Corn, Potato, Onion Crops, Market Garden and general purpose fertilizer.

The sources of plant food are such as are exceedingly available to the plant and best suited to promoting rapid and vigorous growth. Tested at our own farms we are able to speak authoritatively as to its merits. All growers will be repaid by using this special mixture on their Crop.

Our soils are well adapted to the culture of these Crops and to make them profitable as well, is an easy matter if the culture is supplemented and promoted by the use of our special fertilizer.

GUARANTEED ANALYSIS { 4 to 5% Ammonia.
8 to 9% Available Phosphoric Acid.
4 to 5% Actual Potash.

O. & W. General Crop Fertilizer

This special formula is well balanced for general crops. It is made of the best materials, the Nitrogen content is properly balanced between organic and ammonia salts and the potash is supplied in the form of sulphate.

We recommend this formula for general purpose.

GUARANTEED ANALYSIS { 4 to 5% Ammonia.
10 to 11% Available Phosphoric Acid.
4 to 5% Actual Potash in Sulphate Form.

O. & W. Grass Fertilizer

A complete fertilizer with all the essential elements for rapid and luxuriant growth, carrying both soluble salts and organic material, it is suitable both for top dressing or permanent seeding down mixture.

GUARANTEED ANALYSIS { 6 to 7% Ammonia.
6 to 7% Available Phosphoric Acid.
4 to 5% Actual Potash.

O. & W. High Grade Potato and Vegetable Fertilizer

This is a concentrated mixture running high in analysis in every ingredient, and as a formula, is extensively used in the potato growing sections of Maine. To produce large crops of potatoes you must feed heavily of Potash. This was thoroughly proven during the war, as even when Potash was extremely high and scarce some of the Maine potato growers paid the price for this ingredient and were well repaid by increased crop.

GUARANTEED ANALYSIS { 5 to 6% Ammonia.
8 to 9% Available Phosphoric Acid.
7 to 8% Actual Potash.

O. & W. Special Potato Fertilizer With 10% Potash in the Form of Sulphate

This formula was a great favorite a few years ago with potato growers and is still used extensively in the large potato growing sections. Potash is the plant food most closely associated with starch formation in the tuber. It helps to grow strong vines and improves the cooking quality. It is generally conceded that potash supplied in the form of Sulphate produces a dry mealy potato of most desirable quality.

GUARANTEED ANALYSIS { 4 to 5% Ammonia
6 to 7% Available Phosphoric Acid
10 to 11% Actual Potash in Sulphate form.

For 1929 we are adding to our list of formulas a double strength fertilizer. Such concentrated formulas are being used to a certain extent. Care should be exercised that fertilizer does not come in direct contact with seed.

GUARANTEED ANALYSIS { 10 to 11% Ammonia.
16 to 17% Available Phosphoric Acid.
14 to 15% Actual Potash.

DESCRIPTIVE CATALOGUE and PRICE LIST
OF
Garden and Farm Seeds,
Agricultural Implements and
Fertilizers
for 1929

Important Notice—Free Delivery of Seeds

We Deliver, Transportation Paid in the U. S. and Possessions, Vegetable Seeds by the packet, ounce, quarter-pound, pound.

On larger quantities purchaser pays transportation. We also deliver, transportation paid, all Lawn Grass Seed mixtures in any quantity.

In making this Free Delivery offer we reserve the right to ship goods either by Parcel Post, Express or Freight.

We reserve the right to advance prices without notice should current conditions require it.

REMITTANCES

May be made by Express Money Order, P. O. Money Order or Check.

NOTE:—If cash or stamps are sent by mail, REGISTER THE LETTER, otherwise it travels at owner's risk.

C. O. D. ORDERS

If goods are wanted C. O. D., 25 per cent of the amount must accompany the order. Charges for returning the money will be collected on delivery.

In accordance with the universal custom of the Seed Trade, Olds & Whipple, Inc. give no warranty, express or implied, as to description, quality, productiveness, or any other matter, of any Seeds they send out, and they will not be in any way responsible for the crop.

ASPARAGUS

An Asparagus bed may be made from one or two year old roots, planted in fall or spring. Plant the roots in rows four feet apart, leaving about twelve inches between plants in the row. Should be planted in trenches and gradually filled in as plants grow. Seeds may be sown in April in drills one foot apart and one inch deep. One ounce of seed will sow sixty feet of drill.

	Per Pkt.	Per $\frac{1}{4}$ lb.	Per lb.
Mary Washington (seed)	\$0.10	\$0.60	\$2.00
Mary Washington roots	2.00 per 100		

BEANS—Dwarf or Bush

To produce a regular succession of crops through the season, plant every two weeks, from about beginning of May to end of summer. Plant in rows 18 inches apart, two inches deep; cultivate only when soil is dry, as the scattering of earth on vines will cause them to rust. One quart will plant 100 feet of drill and one and one-half bushels for one acre.

BEANS

Owing to extremely unfavorable weather conditions, the bean crop is very short, some varieties were almost a total crop failure. Stocks are scarce and prices high.

Burpee's Bush Lima.

	Per lb.	5 lb. Lot Per lb.	15 lb. Lot Per lb.
Burpee's Bush Lima.—A true bush form and immense cropper,	\$0.40	\$0.30	\$0.27
Fordhook Bush Lima.—	.50	.45	.40

	Per lb.	5 lb. Lot Per lb.	15 lb. Lot Per lb.
Improved Rust Proof, Golden Wax. —Early, long, round, stringless pods,	\$.50	\$0.38	\$0.35
Early Golden Eyed Wax. —Hardy and prolific, flat pods, early,	.50	.38	.35
Black Wax, Pencil Pod. —Very early, round thick pods,	.50	.38	.35
Wardwell's Kidney Wax. —Early, flat long wax pods, very fine,	.50	.38	.35
Early Valentine. —Improved, true round green pod,	.50	.38	.35
Bountiful. —Flat Green pods, stringless,	.50	.40	.37
Burpee's Stringless. —Round Green pod, early,	.50	.40	.37
Horticultural Dwarf. —Green pod, a superior shell bean, medium early,	.40	.35	.30
Low's Champion. —Large green flat stringless pods,	.40	.35	.30
White Kidney. —An excellent shell bean and for baking, green pod,	.30	.25	.22
White Marrow. —A fine winter bean,	.30	.25	.22
Boston Favorite. —A large late dwarf horticultural,	.40	.35	.30
Red Kidney. —An excellent shell bean, similar to White Kidney,	.35	.30	.25

BEANS—Pole

Plant in hills three to four feet apart, putting four or five beans in a hill, and leaving space in the center for the pole. One quart of limas will plant 100 hills. One quart of the smaller seeded sorts will plant about 200 hills.

	Per lb.	5 lb. Lot Per lb.	15 lb. Lot Per lb.
Extra Early Jersey Lima. —An early and large variety,	\$.40	\$0.35	\$0.26
Lima, Large White. —An old and choice variety,	.40	.35	.26
Lima, King of the Garden. —Large and extremely productive,	.40	.35	.26
Horticultural Cranberry. —Excellent quality,	.35	.30	.25
Early Golden Cluster Wax Pole. —Early golden pods, large and tender,	.40	.35	.28
Kentucky Wonder. —Green pod, very prolific,	.35	.30	.27

BEETS—Table Varieties

Sow from April to beginning of July, in drills about one foot apart, covering seeds about one inch. Thin the young plants when suitable size for greens to six or eight inches apart. One ounce sows 50 feet of drill, 5 to 6 pounds to one acre.

	Per pkt.	Per oz.	Per lb.
Early Wonder. —Deep red, round, very popular with market gardeners,	\$.10	\$0.15	\$1.00
Crosby's Egyptian. —Early smooth and fine quality,	.10	.15	.90
Edman's Extra Early. —One of the best,	.10	.15	.90

	Per pkt.	Per oz.	Per lb.
Early Eclipse. —Very early, dark red color,	\$0.10	\$0.15	\$0.90
Early Egyptian. —Good color, a smooth turnip beet,	.10	.15	.90
Detroit Dark Red. —Smooth, bright red, good keeper,	.10	.15	.90

Dewing's Early Blood Turnip.

Dewing's Early Blood Turnip. —A standard variety of excellent quality,	.10	.15	.90
Long Smooth Blood. —An excellent late variety for winter use,	.10	.15	.90
Swiss Chard. —Fine for greens, cultivated solely for leaves,	.10	.15	1.00

MANGOLD WURZEL

Sow in May or June in rows, 18 inches to 2 feet apart, and thin to 8 inches in the row. The value of these for stock feeding cannot be over estimated. Sow 6 to 8 pounds to one acre.

	Per oz.	Per lb.
Carter's Mammoth Long Red. —A heavy cropper, one of the best,	\$0.10	\$0.60
Norbiton Giant Long Red. —Very productive,	.10	.60
Yellow Globe. —Large globular formed roots, good for shallow soils,	.10	.60
Giant Half Sugar —Rose shape and similar to Norbiton Giant,	.10	.60
Golden Tankard. —A half-long variety of bright yellow color,	.10	.60
White Sugar, Lane's Improved. —A well known variety,	.10	.60
Mangold seed in 5 pound lots, 50 cents a pound.		

BROCCOLI

A vegetable resembling Cauliflower but much hardier. Requires the same general culture as cabbage. One ounce of seed produces about 1,500 plants.

	Per pkt.	Per oz.
Purple Cape. —Medium size heads, hardy,	\$0.20	\$0.65
White Cape. —Like Purple Cape, but of cream white color,	20	.65
Early Green Italian — or Calabrese,	.30	1.25
Italian Broccoli Rape or Senaps for bunching,	.15	.65

BRUSSELS SPROUTS

A species of cabbage family and cultivated in about same manner. One ounce of seed will produce about 1,200 plants.

	Per pkt.	Per oz.
O. & W.'S Best	\$0.10	\$0.25

CABBAGE—Early

All Seasons.

All the Cabbage family require rich, deep, well-drained soil. For the early kinds, plant in rows 30 inches apart and 16 inches between the plants. For the late varieties, three feet between the rows and two feet between the plants. For very early use, sow in January or February in hot-beds. Set out when plants are strong enough into other hot-beds or set in cold frames in March. Transplant when danger from frost is past to open ground. The late, or winter crop seed can be sown in May and the plants set out when large enough.

To destroy the green worm that attacks the cabbage plant, use a solution of one ounce of saltpetre in three gallons of water. One ounce of seed will produce about 3,000 plants, one-quarter pound for one acre.

	Per pkt.	Per oz.	Per lb.
Golden Acre.—Extra early Copenhagen type,	\$0.20	\$0.60	\$7.00
Copenhagen Market.—Extra early round hard head,	.10	.40	4.00
Early Jersey Wakefield Extra.—A fine, very early medium sized market favorite,	.10	.30	3.25
Early Summer.—A superior, second early, heads large and solid,	.10	.30	3.25
Early Flat Dutch.—A fine early variety for family use,	.10	.30	3.25
All Seasons.—Medium early, very large and sure header,	.10	.30	3.25

CABBAGE—Late Varieties

	Per pkt.	Per oz.	Per lb.
O. & W. Premium Flat Dutch. —An extra fine selection of the large late Flat Dutch,	\$0.10	\$0.30	\$3.00
Improved American Drumhead Savoy. —Large, fine quality, excellent winter cabbage,	.10	.35	3.25
Stone Mason Drumhead. —A large round solid variety,	.10	.30	3.00
Red Dutch Drumhead. —Fine solid dark red heads,	.10	.30	3.25
Hollander, or Danish. —A superior winter variety, heads round, very hard, fine and tender,	.10	.30	3.25
Sure Head. —Large growing, fine heading, solid and large,	.10	.30	3.25
Chinese. —Select,	.10	.35	4.00

Paris Golden.

CELERY

Sow seed about the first of April in hot-bed or cold frame. Transplant four inches apart, when three inches high in rich soil; water and protect until well rooted, then transplant into rows 5 or 6 feet apart either on surface or in trenches 8 inches deep. Set the plants 10 or 12 inches apart. To blanch draw earth around the plants from time to time.

One ounce of seed will give about 4,000 plants.

	Per pkt.	Per oz.	Per lb.
Paris Golden, Self Blanching, (French.) —An early golden variety, very popular,	\$0.20	\$0.75	\$11.50
Boston Market. —One of the best varieties in cultivation,	.10	.30	3.00
Celeriac. —Turnip rooted, used for salads and soups,	.10	.25	3.00
White Plume. —Easily bleached, usually solid and of a pleasing nutty flavor,	.10	.30	3.00
Golden Plume. —Popular Golden self-blanching,	.40	1.25	15.00
Winter Queen. —One of the best winter varieties,	.10	.30	3.00
Giant Pascal. —Second early, crisp, fine quality,	.10	.25	2.50
Easy Blanching. —White, solid, easily bleached,	.20	.45	5.00

CARROT

Carrots thrive best in rather light loam; soil should be well cultivated and well fertilized. Plant in rows 14 inches apart, and thin plants to 3 to 5 inches in the rows. Plant from the middle of April to the middle of May.

One ounce will sow 100 feet of drill. 3 to 4 pounds to one acre.

	Per pkt.	Per oz.	Per lb.
Early Scarlet Horn. —An early short variety for forcing, excellent for table, color deep orange, . . .	\$0.10	\$0.20	\$1.50
Early Half Long Scarlet. —Stump-rooted, coreless, red color, . . .	.10	.20	1.00
Chantenay. —A half-long, one of the finest for table use, . . .	.10	.20	1.25
Danvers Half Long. —A most desirable variety, great keeper, . . .	.10	.20	1.25
Hutchinson. —Large stump rooted, . . .	.10	.20	1.50
Improved Long Orange. —A large long rooted variety, for stock purposes, . . .	.10	.20	1.00
White Belgian. —Large, white, productive, for stock, . . .	.10	.20	1.00

CAULIFLOWER

Is one of the most delicious varieties of the Cabbage family. Requires a rich deep soil, a low moist situation being desirable. Plants should be set in rows about 2 feet apart and 18 inches between the plants.

One ounce will sow a bed of 40 square feet and produce about 2,000 plants.

	Per pkt.	Per ¼ oz.	Per oz.
Henderson's Snowball. —This ranks extremely high among the early varieties, it is a reliable header of good size and of rich white color, . . .	\$0.20	\$0.75	\$2.00
Erfurt Early Dwarf. —A good variety, . . .	.20	.75	2.00
Early Paris. —A standard early variety, . . .	.10	.50	1.50

CORN—Field

(Prices subject to market changes.)

- Central Pennsylvania.**—A popular ensilage variety, . . .
- Eureka.**—A well known ensilage variety of White Corn. Very leafy, of extra large growth, and we believe will produce more tons of silage than any other variety. For Ensilage only, . . .
- Leaming's Early Dent.**—A very popular Dent Corn, grown for both grain and Ensilage. This variety will mature in this latitude, . . .
- Mastodon Early.**—Large, free growing, very productive, . . .
- Early Yellow Dent.**—Connecticut grown, a dent corn that will mature in this latitude, . . .
- Longfellow.**—A yellow flint corn, a well and favorably known variety, . . .
- 8 Row Yellow Flint.**—A blue ribbon corn, grown seed, . . .

at market prices.

CORN—Sweet

Requires a rich warm soil. For early varieties plant when ground has become well warmed; successive plantings may be continued until July. Plant in hills from 3 to 3½ feet apart, according to the height of variety.

One quart will plant 200 hills; 8 quarts for one acre in hills.

	Per lb.	5 lb. Lot Per lb.	15 lb. Lot Per lb.
Columbia.—Earliest white variety,	\$0.35	\$0.28	\$0.25
Whipple's White.—Early and good quality,	.35	.27	.23
Howling Mob.—Excellent quality early large ears,	.35	.25	.22
New Champion.—Fine early quality with large ears,	.35	.25	.22
Crosby's Early.—An old favorite, early and of excellent quality,	.35	.28	.25
Country Gentleman.—A rich, sweet, deep kerneled variety, with small cob,	.35	.28	.25
Long Island Beauty.—Large late and one of the best,	.35	.28	.25
Mammoth Sugar.—Extra large sweet variety, of good quality,	.35	.28	.25
Evergreen.—A standard late variety,	.35	.25	.22
Black Mexican.—An early, tender corn of fine flavor,	.35	.28	.25

Whipple's Yellow.

Golden Bantam.—A yellow sweet corn, extra early and extra hardy, very tender and sweet.	.35	.28	.25
Whipple's Yellow.—Early as golden bantam but much larger, fine quality,	.35	.28	.25
Golden Giant.—Cross between Golden Bantam and Howling Mob.	.35	.28	.25
Bantam Evergreen.—Yellow, medium early, large size,	.35	.28	.25

Use O. & W. Complete Market Garden Fertilizer for Corn

CRESS

To be planted in drills and sown quite thickly, on good rich ground, in early spring.

One ounce of seed will plant 100 feet of drill.

	Per pkt.	Per oz.	Per lb.
Curled.—	\$0.10	\$0.15	\$0.75

CUCUMBER

First planting should be made in May when ground is dry and warm, in hills about 4 feet apart; thin out to 3 to 4 plants to the hill when established. For pickles plant during the last two weeks in June.

One ounce will plant 50 hills; two pounds for one acre.

Improved Early White Spine.

	Per pkt.	Per oz.	Per lb.
Early Cluster. —Bears in clusters, early and productive, .	\$0.10	\$0.15	\$1.25
Early Russian. —The earliest variety, about 4 inches long, .	.10	.15	1.25
Snow Pickling. —One of the best pickling, .	.10	.15	1.25
Green Prolific. —The very best pickling sort, .	.10	.15	1.25
Boston Pickling. —Produces an abundant crop of dark green color, .	.10	.15	1.25
Improved Early White Spine. —A standard variety of uniform good size and color, .	.10	.15	1.25
Early Fortune. —Excellent for slicing or Pickling, .	.10	.15	1.25
Davis Perfect. —Dark green, good length, popular, .	.10	.15	1.50
Improved Long Green. —A large and late variety, .	.10	.15	1.50

DANDELION

Sow in May in drills 12 inches apart, covering seeds about one-half inch deep. Cultivate to keep down weeds during summer and the following spring leaves will be suitable for cutting. Must be covered in winter to protect from frost.

One ounce for 100 feet of drill. One pound for one acre.

	Per pkt.	Per oz.	Per lb.
Improved Thick-Leaved. —Standard sort, very productive, .	\$0.25	\$0.85	\$10.25
French Garden. —	.10	.35	3.25

DILL

	Per pkt.	Per oz.	Per lb.
Mammoth or Long Island. —	\$0.10	\$0.15	\$1.00

EGG PLANT

Plant the seed in hot beds early in spring. Transplant when two inches high into another bed, or small pots. Plant in garden when weather is settled and warm. Should be placed about 3 feet apart, and well watered for 2 or 3 days, until they show signs of being rooted.

	Per pkt.	Per oz.
New York Improved Purple. —The leading market variety, excellent and very productive, .		\$0.15 \$0.65
Black Beauty. —Early, fruit black, round and solid, .		.15 .65

ENDIVE

For early use, sow as soon as ground can be worked in spring in drills fifteen inches apart; thin plants to six inches in the row. Any ordinary soil will do, but a moist place is preferred. To blanch the leaves, gather them together when dry and tie with matting or cover with ordinary flower pots inverted.

One ounce will produce about 3000 plants.

	Per pkt.	Per oz.	Per lb.
Green Curled. —A standard sort,	\$0.10	\$0.20	\$1.50
Moss Curled. —Very ornamental,	.10	.20	1.50
Batavia Escarolle. —	.10	.20	1.25

KALE or German Greens

Plant the larger varieties in hills two by three feet apart and thin to one plant to the hill. Requires deep, rich soil. Set out plants in June and treat in same manner as for cabbage.

One ounce will produce 2,000 plants.

	Per pkt.	Per oz.	Per lb.
Green Curled Scotch. —Leaves of bright green, very tender and closely curled,	\$0.10	\$0.20	\$1.25
German Greens. —To be sown in fall for spring use,	.10	.20	1.25

KOHL RABI

An intermediate vegetable between the cabbage and turnip. Prepare as for cabbage. Sow in April in rows 18 inches apart and thin out to 8 inches apart.

One ounce gives 3,000 plants.

	Per pkt.	Per oz.	Per lb.
Early White Vienna. —A standard early,	\$0.10	\$0.20	\$2.00
Early Purple Vienna. —Very large and productive,	.10	.20	2.00

LEEK

Sow the seeds in April and transplant in July to rows 15 inches apart and 8 inches between plants.

One ounce will grow 1,000 plants.

	Per pkt.	Per oz.	Per lb.
American Flag. —A hardy and profitable sort, excellent for winter use,	\$0.10	\$0.20	\$2.00

Boston Market.

LETTUCE

Lettuce needs a rich and moist soil, should be sown in rows about 12 inches apart and the plants thinned to 10 inches apart for the heading varieties. When not grown for head they may be sown broadcast. The more rapid the growth, the better the quality.

One ounce for 3,000 plants.

	Per pkt.	Per oz.	Per lb.
May King. —Medium size, early, good heading, a popular sort,	\$0.10	\$0.25	\$1.75
Early Curled Silesia. —Sweet, early, good variety,	.10	.25	1.75
Early Simpson. —Early, compact mass of tender leaves,	.10	.25	1.60
Black-Seeded Simpson. —Large light-colored head variety,	.10	.25	1.75
Boston Market. —Early, small heads, very hardy,	.10	.25	1.75
Hanson. —Large, solid, crisp head, one of the best outdoor sorts,	.10	.25	1.60
True Iceberg. —Light green heads,	.10	.25	2.00
Tennis-Ball Black Seeded. —Excellent for early large heads,	.10	.25	1.75
Tomhannock. —One of the best varieties for broadcast cultivation, leaves slightly bronzed,	.10	.25	1.75
Crisp as Ice. (Bronzed) a fine bronze leaf lettuce,	.10	.25	2.00
New York —Head lettuce, commonly called Iceberg,	.10	.25	2.00
Big Boston. —A head lettuce, for forcing or open culture,	.10	.25	1.75
Cos or Romaine. —	.10	.25	1.75

MUSTARD

Sow from April to June in drills one foot apart and cover seed lightly. Used principally for salads.

	Per oz.	Per ¼ lb.	Per lb.
White or English. —For salad or medicinal purposes,	\$0.10	\$0.20	\$0.45
Brown. —More pungent than white,	.10	.25	.75

MELON—Water

Ice Cream.

A warm light sandy loam preferred. Being tender should not be planted before middle of May. Plant in hills 5 to 6 feet apart each way for the musk varieties and 8 feet apart for the water. Cover seeds about one-half inch deep and when well started thin out to 3 plants in a hill. One ounce will plant about 15 hills; 4 pounds to the acre.

	Per oz. pkt.	Per lb.
Cuban Queen. —Round, large, red meated and sweet,	\$0.15	\$1.00
Gray Monarch. —Very large, of exceptional fine quality, long, red color and very sweet,	.15	1.00
Cole's Early. —Round, striped, delicious flavor, red flesh, good size,	.15	1.00

	Per oz. pkt.	Per lb.
Kleckley's Sweet. —Oblong in form, dark green, thin rimmed, flesh bright scarlet, white seed, sweetest of all,	\$0.15	\$1.00
Mountain Sweet. —An old standard variety, early and solid,	.15	1.00
Phinney's Early. —Early, reliable, red fleshed, productive,	.15	1.00
Ice Cream. —White seeds, medium size, solid fine flavor, one of the most popular varieties grown,	.15	1.00
Kolb's Gem. —Flesh bright red, almost round, grows large, very choice,	.15	1.00
Citron for Preserves. —	.15	1.00

Rocky Ford Melon.

MELON—Musk

One ounce will plant 80 hills; 2 to 3 pounds for one acre.

	Per pkt.	Per oz.	Per lb.
Hackensack. —Large, productive and good flavor, green fleshed,	\$0.10	\$0.15	\$1.25
Rocky Ford. —A very popular variety, flesh light green, sweet and delicate flavor,	.10	.15	1.25
Bender's Surprise. —Large, slightly oval, good quality, pink flesh,	.10	.20	1.75
Hearts of Gold. —Round medium early, pink flesh,	.10	.15	1.25
Miller's Cream. —Thick meated and salmon colored flesh, delicious,	.10	.20	1.35
Paul Rose. —An extra quality, salmon flesh, medium size,	.10	.15	1.25
Emerald Gem. —Small, but prolific, yellow meated, superior quality,	.10	.15	1.25
"Lake Champlain." —Improved Emerald Gem,	.10	.20	1.75
Osage, Salmon Fleshed. —A deliciously sweet melon of fine flavor,	.10	.15	1.25

NASTURTIUM

Cultivated for both use and ornament. Young seeds may be used as capers and leaves for salad purposes. The beautiful flowers, blooming freely all summer add a charm to the garden and lawn. Plant in May.

	Per pkt.	Per oz.	Per ¼ lb.
Tall. —An ornamental climber,	.10	\$0.15	\$0.40
Dwarf. —Fine for borders and beds,	.10	.15	.40

OKRA

Plant in rows 2 feet apart, thinning plants to 1 foot apart in the row.

	Per pkt.	Per oz.	Per lb.
Dwarf Green. —Early and productive,	\$0.10	\$0.15	\$0.75

ONION

(Strictly new seed—Prices subject to change.)

Southport Red Globe.

O. & W. Complete Market Garden Fertilizer.

A fertilizer that will produce remarkable crops. Used by many of the best growers in Massachusetts and Connecticut.

The onion thrives best in deep, loamy soil, well fertilized. Sow the seeds thinly in drills 1 foot apart. Cover seeds about $\frac{1}{4}$ inch, roll and tread soil down solidly. When 3 inches high, thin out to 3 inches apart. Cultivate well and keep out weeds.

One ounce seed will sow 100 feet of drill. Six pounds for one acre.

	Per pkt.	Per oz.	Per lb.
Extra Early Red. —Early, of flat shape, mild,	\$0.10	\$0.25	\$2.50
Wethersfield Large Red. —A large yielder, excellent to keep,	.10	.20	2.00
Southport Red Globe. —Finest large red sort,	.10	.25	2.25
Southport Yellow Globe. —Handsome and late variety,	.10	.25	2.00
Southport White Globe. —Early, mild flavored, large, not a good keeper,	.15	.25	3.00
Yellow Globe Danvers. —One of the superior yellow globe varieties,	.10	.20	2.00
White Portugal. —Excellent for pickling, should be sown thick,	.10	.25	2.50
Prize Taker. —Yellow skin, white flesh, good cropper, large size,	.10	.25	3.00
Japanese or Ebenezer. —(For growing sets),	.10	.25	2.75

ONION SETS

Should be planted as early as the ground can be worked in rows 12 inches apart. Set each about 3 inches apart. When onions are grown from sets they can be used in the green state in June, or will ripen by July.

Red	.	.	.	.	.	.	.	.	.	} at market prices.
White	.	.	.	.	.	.	.	.	.	
Yellow	.	.	.	.	.	.	.	.	.	

PARSLEY

Sow early in spring in drills 1 foot apart, covering lightly; thin out the plants to 3 to 4 inches apart; used for flavoring and garnishing. A single row forms a good edging for flower-beds or walks.

	Per pkt.	Per oz.	Per lb.
Moss Curled. —Very ornamental and productive,	\$0.10	\$0.20	\$1.50
Curled, or Doubled. —A most beautiful variety, moss-like leaves of handsome bright green color,	.10	.20	1.50
"Plain" Leaved. —(Not curled),	.10	.15	.85
Hamburg. —Turnip rooted,	.10	.20	1.50

PARSNIP

Make the soil very fine and plant the seed very early, in rows eighteen inches apart, thinning plants to three or five inches in the rows; seeds should be covered about one-half inch deep.

Parsnips, aside from table use, have great value for stock feeding purposes. Are improved by allowing to remain in open ground through the winter.

One ounce to 150 feet of drill; five pounds for one acre.

	Per pkt.	Per oz.	Per lb.
Abbott's Improved Hollow Crown. —A great cropper, tender and sweet,	\$0.10	\$0.15	\$1.00
Long Smooth White. —One of the best for general cultivation,	.10	.15	1.00

PEAS

The wrinkled varieties, while the sweetest of all peas, are more liable to rot, being tender, and need to be planted thicker and later than the round, hard sorts. Soil needs to be well manured. Have the dwarf varieties in rows two and one-half feet apart; those kinds growing two to three feet high, in rows three feet apart, and the tallest in rows four feet apart. The smooth varieties may be sown as soon as ground can be worked; the wrinkled sorts when soil is well warmed.

One quart to 100 feet of drill; one and one-half bushels to an acre.

Carter's Premium Gem.

	Per lb.	5 lb. lots Per lb.	Lots of 15 lb. Per lb.
East Hartford Extra Early. —True stock, 2½ feet, best early variety in the market, smooth variety	\$0.35	\$0.30	\$0.23

	Per lb.	5 lb. lot Per lb.	15 lb. lot Per lb.
Alaska. —Hard, blue pea, 2½ feet, extra early, . . .	\$0.35	\$0.30	\$0.23
Gradus, or Prosperity. —An extra early wrinkled pea, very large pods, of magnificent quality, . . .	.40	.28	.25
Premium Gem. —Wrinkled pea, about 12 to 15 inches high, very productive, early, . . .	.35	.28	.24
American Wonder. —Very dwarf, early wrinkled pea, . . .	.35	.28	.24
Nott's Excelsior. —A wrinkled dwarf, of excellent variety, early, . . .	.35	.28	.25
Sutton's Excelsior. —Similar to Nott's Excelsior, but producing larger and more abundant pods, . . .	.40	.28	.25
Daisy or Dwarf Telephone. —Dwarf habit, wrinkled, large pods, second early, . . .	.35	.28	.24
Everbearing. —Very productive, peas large and wrinkled, two and one-half feet high, . . .	.35	.28	.24
Thomas Laxton. —Of similar growth to Gradus, a few days later, pods are deep rich green. In the judgment of many the Thomas Laxton is even sweeter and finer flavor than Gradus, . . .	.40	.28	.25
Telephone. —Four feet high, large peas of rich, sugary flavor, . . .	.35	.28	.24
Champion of England. —An old standard variety, late, five feet high, . . .	.35	.28	.24
Laxtonian. —Large dark green pod, best early dwarf, . . .	.40	.30	.26
Canada Field. —For stock purposes, (60 lbs. to the bushel,)	at market price		

PEPPER

Should be started in hot beds, and transplanted into open ground by end of May; set in rows eighteen inches apart and plants about twelve inches apart in the rows.

One ounce of seed will produce about 3,000 plants.

	Per pkt.	Per oz.
Sweet Mountain. —Largely grown for both market and home use, . . .	\$0.10	\$0.40
Bull Nose. —This has long been the standard sweet sort, . . .	.10	.40
Ruby King. —Most popular large red pepper in cultivation, . . .	.10	.40
Large Squash. —Thick fleshed, early hot variety, . . .	.10	.40
Long Red Cayenne. —The true Cayenne, hot and pungent, . . .	.10	.40
Small Red Cherry. —A small smooth and round variety; productive, . . .	.10	.40
World Beater. —Large mild, very prolific, . . .	.10	.40
Chinese Giant. —Large mild, . . .	.15	.75
California Wonder. —(New) Large size, thick shell, mild, . . .	.15	1.00

PUMPKIN

To be cultivated in same manner as squash.

	Per oz.	Per lb.
Small Yellow Sugar. —A handsome prolific variety, good keeper, best for pies,	\$0.15	\$1.00
Large Cheese. —Very large and good keeping variety,	.15	1.00
Connecticut Yellow Field. —Grown largely for stock purposes,	.10	.85

POTATOES—Northern Grown (MAINE CERTIFIED)

Use 12 to 15 bushels, or 5 barrels per acre. (See pages 34 and 35 for description of varieties.)

We offer only certified seed and the varieties listed below are the only varieties that are certified in Maine.

Here in Conn. nearly all markets demand Green Mountains for winter stock. This is the variety that agricultural authorities are always trying to improve and we believe it to be the best variety grown.

Irish Cobbler
Green Mountain
(Improved)
at Lowest Market
Prices.

Deep Scarlet Turnip.

RADISH

For early use sow in spring as soon as ground can be worked. Sow in drills six to ten inches apart and thin out to one inch apart in the rows; as the roots are more tender and brittle when grown quickly, a rich light soil is preferred. For a succession sow every two weeks.

One ounce will sow 100 feet of drill; eight pounds for one acre.

	Per pkt.	Per oz.	Per lb.
Early Scarlet Turnip. —Round red with white tip,	\$2.10	\$0.15	\$1.00

	Per pkt.	Per oz.	Per lb.
Deep Scarlet Turnip. —An all red standard variety,	\$0.10	\$0.15	\$1.00
Early Long Scarlet, Short Top. —The standard early long variety,	.10	.15	1.00
French Breakfast. —Most popular variety, of olive shape, red with white tip, quick growing,	.10	.15	1.00
Scarlet Globe. —One of the best; quite early, very crisp,	.10	.15	1.00
White Turnip. —For summer and winter use,	.10	.15	1.00
Black Spanish Long. —Black skin, white flesh—a winter variety,	.10	.15	1.00
Round Black Spanish. —The favorite German winter radish,	.10	.15	1.00
Rose Color China Winter. —Grows large and tender, good for winter use,	.10	.15	1.00

RHUBARB

Propagate from roots in richly prepared soil. Plants should be set five feet apart.

Victoria Giant— \$0.25 a root

SALSIFY, or Vegetable Oyster

Sow early in spring in light rich soil in drills fourteen inches apart and thin out to three inches apart in the row. The roots will be ready for use in October. When cooked the flavor resembles the oyster.

	Per pkt.	Per oz.	Per lb.
Sandwich Island Mammoth. —This variety grows to an unusually large size, roots tender and good flavor,	\$0.10	\$0.25	\$2.50

SPINACH

For very early spring use sow in August, for summer use sow in early spring, in drills about ten or twelve inches apart, covering the seed one inch deep. To obtain a succession sow at intervals of two weeks through the season. One ounce to 100 feet of drill, 10 pounds to one acre.

	Per oz.	Per ¼ lb.	Per lb.
Savoy Leaved. —Early, wrinkled and hardy, reselected,	\$0.10	\$0.20	\$0.50
Round Thick Leaf. —Produces dark thick leaves, somewhat crumpled,	.10	.20	.50
Large Viroflay. —Grows extra large size, reselected,	.10	.20	.50
Princess Juliana. —Improved long season one of the best summer spinach,	.10	.20	.50
King of Denmark. —Summer spinach,	.10	.20	.50
New Zealand. —A very productive spreading plant,	.15	.25	1.00

Ask for prices in larger quantities.

SQUASH

Requires rich, warm soil. Plant in hills nine to ten feet apart for running varieties, and five or six feet apart for bush sorts. Leave two or three plants to a hill. Cultivate frequently.

One ounce will sow twenty to forty hills; two to four lbs. per acre.

Summer Crookneck.

	Per pkt.	Per oz.	Per lb.
Giant Summer Straightneck.—	\$0.10	\$0.20	\$2.00
Early Summer Crookneck.—The finest bush variety,	.10	.15	1.00
Giant Summer Crookneck.—Larger than the early summer,	.10	.15	1.20
Early White Bush Scallop.—Matures early and bears continuously,	.10	.15	1.00
Hubbard.—The well known and most popular winter squash,	.10	.20	1.40
Boston Marrow.—A bright orange colored squash for autumn, very productive,	.10	.15	1.00
Mammoth Chili.—Extra large, grows upwards 100 pounds at times,	.10	.15	1.50
Golden Hubbard.—Similar to the standard Hubbard but smaller and earlier and of a golden red color,	.10	.15	1.50
Cocozele.—Compact bush growth, fruit oblong, foot or more in length, skin dark green with stripe,	.10	.20	1.50
Blue Hubbard.—Popular variety,	.10	.20	1.75
Table Queen.—Fine for baking,	.10	.20	2.00

Hubbard Squash.

TOMATO

Livingston's Beauty.

Sow the seed in March or April in hot bed. Transplant when plants are five inches high to open ground, after danger from frost has passed. Should be set four feet apart each way, on mounds of earth, to allow foliage to open and sun to reach the fruit.

	Per pkt.	Per oz.	Per ¼ lb.
Spark's Earliana. —The earliest large red grown, exceedingly productive,	\$0.10	\$0.30	\$1.00
Bonnie Best. —Very early, vigorous grower, smooth, brilliant, scarlet fruit, very prolific,	.10	.35	1.25
Margold. —(New) Midseason globe shaped scarlet,	.15	.60	2.00
Livingston's New Stone. —Large, smooth, solid, scarlet color,	.10	.30	1.00
Acme. —A standard variety, round, bright pink in color,	.10	.30	1.00
Ponderosa. —Largest variety grown,	.15	.60	2.00
New Dwarf Champion. —Most popular of dwarf varieties, fruit deep purplish red,	.10	.40	1.40
Yellow Plum. —Small, elegant, fine for preserves,	.15	.60	2.00

TURNIP

For early varieties sow as soon as the ground can be worked in spring.

For fall and winter use, seed should be sown from the middle of July to middle of August, seed generally sown broadcast, using one pound to the acre.

Early Flat Dutch.

	Per oz.	pkt.	Per ¼ lb.	Per lb.

Mr. O'Neil uses our Fertilizers.

How to Make a Better Lawn

Building for permanence requires the use of *good lawn seed*, but even the best of seed must have a fair chance. Neglect of proper preparation of the seed bed may not show the first few months, but sooner or later will make it necessary to do the whole job over again. Start right — prepare the soil well — *sow good seed* — and have a good lawn — from now on.

Re-Seeding

Every lawn, regardless of how thick the sod may be, is benefited by a light seeding Spring and Fall. Sow about half the quantity recommended for a new lawn. This is particularly advisable in the Fall which is Nature's seeding time. Bare spots should be dug up, fertilized and re-seeded. Thin spots may be scratched up with an iron rake, seeded, top dressed and rolled.

Choice of Seed

A good lawn grass mixture should be composed of nothing but true turf grasses in the right proportions, carefully re-cleaned to remove dirt, chaff and weed seeds as much as possible. Avoid mixtures containing cheap grasses which do not belong in a lawn. The cost of the seed is the smallest item in the making of a good lawn; it pays to choose good seed.

O. & W. Lawn Grass Mixture is composed exclusively of the best seeds of the choicest fine bladed grasses free from weeds. Sow a pound to every 200 sq. ft. (equals a space ten by twenty feet) double the quantity may be used without harm. Price per lb. 35¢., 5 lb. sacks \$1.50, 50 lb. sacks \$14.00, 100 lb. lots 26¢. per lb.

Sowing

Use plenty of seed. Remember a thick grass sod is the best protection against weeds. To insure even distribution, which is important, divide the seed in half and go over the ground twice, making the second sowing at right angles to the first. Sow on a calm day so the wind will not blow the seed.

Evergreen Lawn Grass Seed

Price per lb. package 45¢., 5 lb. bag, \$2.00, 50 lb. bags, \$18.50, 100 lb. bags, \$35.00.

Shady Places

In spots shaded by trees or buildings, give special attention to fertilizing and watering and sow a special shady place grass mixture. Remember that trees and shrubbery draw heavily on the food and water in the soil, so extra quantities of both must be provided to keep the grass supplied.

Shady Spot Lawn Grass Seed

Price per lb. package 60¢., 5 lb. bag, \$2.50.

O. & W. Special Lawn Fertilizer

For Spring and Early Summer Treatment

To maintain a luxuriant lawn, proper fertilizing is necessary.

The old method of applying stable manure, so objectionable because it carries weed seeds as well as being unsightly and odorous, is no longer practiced. We manufacture a lawn dressing carrying all the essential plant foods so necessary to produce luxuriant growth and dark, rich, green color so much desired.

We recommend for lawns that it be used at rate of 100 lbs. for 5,000 sq. ft.

PRICES (Delivered):

100 lbs.	50 lbs.	25 lbs.	10 lbs.	5 lbs.

Lōma
beautifies lawns and gardens

A scientifically prepared plant food—rich in nitrogen, potash, and phosphates—odorless—convenient to apply.

5 lb. cartons	Retail \$0.60
10 lb. bags	1.00
25 lb. bags	2.00
50 lb. bags	3.50
100 lb. bags	6.00

The smaller box is labeled: Lōma LA FLORE VEGETAL NITROGEN POTASH PHOSPHATE

Lōma is odorless, clean—many times more powerful than barnyard manures. So easy to apply. It is sown over the lawn like grass seed—then wet down. That's all there is to it. A 5-pound package fertilizes a 10 ft. x 10 ft. plot.

Water Weight Lawn Rollers

At least one rolling a year is necessary to preserve a healthy turf. This should be done early in the spring, as soon as the ground is dry, to re-firm the soil about the roots after it has been loosened and heaved up by the freezing and thawing of winter. The roller should weigh 150 to 300 pounds, depending on the texture of the soil.

The water weight lawn roller has almost entirely superseded the old fashioned cast iron roller. By regulating the amount of water it can be made to weigh as desired.

No.	Diameter	Width of Drum	Weight Empty	Weight Full	Net Price	Bearings
601	14"	24"	70 lbs.	175 lbs.	\$15.00	Roller

The Pennsylvania Ball Bearing Lawn Trimmer

This meets the demand for a serviceable tool to take the place of grass shears and other devices for cutting the grass left at the edge of lawns after mowing. The Trimmer will cut within three-eighths of an inch of wall or tree trunk and mow any border wide enough to run one wheel on. Its construction is similar to all the other Pennsylvania products — Crucible Tool Steel in both cylinder and stationary blades. Self-sharpening. Ball bearings with patented Pennsylvania adjustment. Built for service and long life. Light running. Easy to handle. **Price \$10.50 net.**

We carry a complete line of hose, sprinklers, shears, rakes, etc.

Lawn Mowers

The Standard Pennsylvania is the pioneer of all lawn mowers, having an open cylinder, open wheels and a train of gears.

Width of cut	15 in.	17 in.	19 in.	21 in.
Price	\$27.00	\$30.50	\$34.50	\$38.50

The Pennsylvania Jr. Ball Bearing has all the good points of the Standard Pennsylvania, with the addition of some features that make it the most perfect grass cutter in the world.

Width of cut	15 in.	17 in.	19 in.	21 in.
Price	\$27.00	\$30.50	\$34.50	\$38.50

The Great American Ball Bearing is the best all-round mower of its type made. The perfectly fitting ball cups and cones insure an easy running machine.

Width of cut	15 in.	17 in.	19 in.	21 in.
Price	\$17.50	\$19.50	\$22.50	\$25.00

Wm. Penn a type of lawn mower that will give good service and satisfaction on any kind of a lawn.

List of Grass, Clover and Millet Seed

(At market Prices)

Timothy, or Herd's Grass. One of, if not the commonest and best known grasses. Very valuable for hay. Perennial, fibrous and often bulbous rooted. (45 lbs. to the bushel.)

Red Top. Is a fine permanent grass. Often sown with timothy and red clover, in which case the clover soon disappears to be replaced by timothy, which in turn gives way to the red top. Very valuable in mixtures for permanent pastures.

Chaff Red Top 10 lbs. to the bushel. Fancy or cleaned 35 lbs. to the bushel.

Kentucky Blue Grass. Also called June grass. Root-creeping, perennial, flowers in June. It requires about two to three years to become well set and does not arrive at perfection as a pasture grass until the third or fourth season. (14 lbs. to the bushel.)

Orchard Grass. A perennial grass, flowers from June to July. Very valuable for pastures, also in connection with timothy and clover for hay crops. When used with timothy use one bushel orchard and 8 lbs. clover. If sown alone use three bushels to the acre. (14 lbs. to the bushel.)

Sudan Grass. A quick growing annual. A forage crop of great value. Stools freely. Grows 3 to 5 ft. tall, two and sometimes three crops can be cut. Grows until frost. When sown broadcast use 25 lbs. per acre.

Rhode Island Bent. Root-creeping, perennial, flowers in July. Very valuable for lawn purposes. Sow from three to four bushels to the acre. (10 lbs. to the bushel.)

Large Red, or Mammoth Clover. Grows from four to five feet high; stocks so coarse that cattle will eat but leaves only, but by its judicious use, exhausted lands may be reclaimed. (60 lbs. to the bushel.)

Medium Red Clover. The most important of all the varieties of clover for the practical purposes of agriculture. Sown with timothy and other grasses it produces desirable hay or pastures. (60 lbs. to the bushel.)

White Clover. The value of this clover is well known; it is found in most every natural pasture. It is adapted to all soils. Being deep-rooted it withstands drought when grown on dry, sandy sections. It should form a part of all mixtures for permanent pastures. (60 lbs. to the bushel.)

Alsike, (Clover). This is one of the hardy varieties. It resists cold, extreme drought and wet, and on rich warm soils yields immense crops of hay, or pasture of good quality. (60 lbs. to the bushel.)

Alfalfa (Clover). A heavy forage crop doing well in almost all localities. Requires well limed soil and good drainage.

Hungarian (grass) Millet. Splendid forage crop for light land. On rich land two crops may be grown the same season. Withstands drought and yields abundantly. (48 lbs. to the bushel.)

Golden, or German Millet. A heavier cropper than the Hungarian, and needs a longer season and a stiffer soil, stands up well, is easily cured, makes a coarse, harsh hay, which is greedily eaten by all kinds of stock. (50 lbs. to the bushel.)

Japanese Millet. This is by many considered the most valuable of all forage plants. It makes more hay than German millet or any other. Although it grows large, sometimes seven or eight feet high, the hay is of excellent quality. It is adapted to all sections.

Use O. & W. Special Grass Fertilizer
The Fertilizer That Makes Grass Grow.

Leguminous Plants as Soiling Crops

All the leguminous plants (peas, clovers and beans, etc.,) have the power of taking up the free nitrogen in the air and converting it into available forms of ammonia so very valuable as a fertilizing ingredient to the soil.

Therefore the roots (or, as in some cases where the entire plant is turned under) provides a large supply of available ammonia for the crops which are to follow.

Legume Inoculation HUMOGERM

The Best Inoculation for All Legume Seeds Means Better Crops, Better Soils, Less Fertilizer Expense

Seeds of all Legumes — Clovers, Alfalfa, Sweet Clovers, Garden Peas, Beans, and Sweet Peas, Vetches, Soy Beans, etc. — will yield far better results if inoculated with HUMOGERM, and in addition, leave in the soil a heavy deposit of nitrogen which benefits all succeeding crops. No other inoculant will produce the wealth of nodules obtained by using HUMOGERM. We believe in inoculation, we favor the soil medium, and we believe in HUMOGERM. Of all the inoculants manufactured, we believe it is the most effective, and cheapest, consistent with high quality.

WHAT HUMOGERM IS: A culture of bacteria especially selected and bred for maximum vitality and ability to take nitrogen from the air. They are carried in a sterilized, finely ground, porous humus medium that keeps them fresh, active and vigorous. Economical and easy to use, HUMOGERM is a sensible insurance and a profitable investment.

HOW TO ORDER: Specify crop and number of bushels you wish to inoculate (one-bushel size contains sufficient bacteria to thoroughly inoculate one bushel of designated variety of legume seed).

PRICES ARE LOW. For small seeds — Clovers, Sweet Clovers, Alfalfa, etc.

5-bus. size	 \$2.25		

Special Garden Size for Garden Peas, Beans, and Sweet Peas, 25 cts.

Northern Grown Certified Seed Potatoes

Certified Irish Cobbler.—An excellent extra early variety, will mature in seven weeks from time of planting; in color pure white with deep eyes, usually of good cooking quality.

Certified Improved Green Mountain.—This variety is too well known to require any description; it is recognized as the standard of excellence in all New England; white skinned, oval formed, smooth and attractive and a good yielder.

Don't waste labor and fertilizer on poor seed. Get the best.

Our certified seed potatoes have been carefully selected from fields in Aroostook County, Maine and Prince Edward Island.

Prince Edward Island Certified Seed Potatoes have set the standard for America. Beginning in 1918, when only one carload of Certified Seed Potatoes was shipped, the industry in Prince Edward Island has had a phenomenal growth until, during the season of 1926, over one thousand cars of Certified Seed were marketed in the United States. In 1926, 60% of all Certified Irish Cobbler Seed produced on the American continent, were grown on Prince Edward Island.

The climate of Prince Edward Island is ideal for the production of potatoes. There is rarely a drought, and never excessive rains. The temperature ranges from 64 to 80 degrees, and fogs are unknown. The soil is of a red sandstone formation, naturally somewhat acid, free from stones and rocks, has good drainage, all of which are favorable and important factors.

On the bottom of the next page is shown a field of potatoes grown by Thomas L. Burgess, of Wapping, planted with Certified Prince Edward Island Green Mountains. On a measured acre, digging every other row, the yield by weight was 523 bu. The harvesting was supervised by an official of the Hartford County Farm Bureau. We might add that Mr. Burgess used Olds & Whipple's High Grade Potato Fertilizer.

Harvesting Certified seed potatoes on an Aroostook Maine potato farm.

Harvesting a record crop on the farm of Thomas L. Burgess, Wapping, Conn.

THE IMPORTANCE OF SPRAYING

Our Agricultural Colleges and Experimental Stations backed by both the State and Federal Governments have been largely instrumental in awakening the general public to the real importance of spraying. This has been accomplished through numerous bulletins and circulars issued from time to time and distributed by tens of thousands, so that first hand and reliable spraying information has been sent out broadcast into every nook and corner of the United States. In fact, so thoroughly has the matter of spraying been investigated and advertised, that no one today is ignorant of its importance, but, there are yet those who have not given it attention for different reasons, while others are profiting by this neglect and getting better prices right along for their products.

"Better Fruit and more of it" has become the slogan of every fruitman for it means higher prices for his crops. But this also means better care of his trees and vineyards — higher cultivation and protection from the enemies of tree, plant and vegetable life by proper fertilization, pruning and spraying at the right periods. In fact, spraying is now considered so important that practically all fruit offered for sale today in the public markets is of the sprayed kind. No other will do. Unsprayed fruit is usually small, knotty and spotted and cannot compete with the sprayed article, even if sold at a much lower price.

PLANT AND TREE ENEMIES

Two kinds of enemies attack fruit trees and plants, namely; insects and fungous diseases. The application of substances, usually liquid, to the tree or plant for the purpose of preventing or destroying these constitutes spraying, insecticides being used for the insects and fungicides for the fungous growths. We spray to destroy insects and to prevent fungous diseases. For convenience, injurious insects are usually divided into two classes, based upon their feeding habits; eating or chewing insects and sucking insects.

FEEDING HABITS OF INSECTS

Chewing insects are those having jaws by means of which they bite off and eat portions of the tissues of the plant, such as foliage, fruit buds, tender bark, etc. Examples of this class are — the codling-moth which causes wormy apples, the plum curculio, the potato "bug" or beetle, caterpillars, etc. Most of the insects of this class are very easily controlled by applying to their food arsenical poisons, such as Paris green and arsenate of lead which is placed within their feeding range to be found by them sooner or later. It is with this class that success depends greatly upon spraying at the proper time; for example, the codling-moth caterpillar may be killed if there is some poison on the apple just as the insect eats its way in, but after once getting into the fruit it is safe.

Sucking insects are those furnished with a beak or slender tube with which they pierce the plant tissue and suck out the sap. Examples of this class are San Jose scale, oyster scale, scurfy scale, aphias, plant lice, etc. These insects are safe from poisons because we cannot get any poison into their food and must be killed by a direct application of such insecticides as will kill by contact, of which the most common is lime sulphur. In fighting this class of insects very thorough work is required, for every individual insect must be hit by the spray.

FUNGOUS DISEASES

Fungous diseases are parasitic consisting of plants or growths of low form, which live on other living plants. Examples, apple and pear scab; black, brown and bitter rot, mildew, etc. These diseases are disseminated almost wholly by the means of spores, which are extremely small, disk-like bodies corresponding to the seed of higher plants and are usually borne on the surface. These spores are produced in great abundance and each one is capable of starting a new fungus. They are carried from one plant to another by means of wind, water and insects. For fungous diseases, then, a spray is required which will kill the spores and the important point is to commence spraying with fungicides before the disease presents itself, as spraying for fungous diseases is a preventive rather than a cure. For this purpose the combination of lime and blue vitrol, known as Bordeaux mixture, is the principal remedy. Here again thoroughness is of the utmost importance.

Insecticides and Fungicides.

Arsenate of Lead Powder. Can be used for dusting (mixed with Hydrated Lime) or spraying to kill most chewing insects on Plants, Trees, Shrubs, etc.

Bee Brand Insect Powder. Ground from pyrethrum flowers, harmless to mankind and domestic animals. For use against mosquitoes, bed bugs, lice on fowls, ants, roaches, moths, flies, fleas, and many other insect pests.

Black-Leaf "40". A concentrated solution of Nicotine Sulphate — For spraying to destroy sucking insects.

Bordeaux Mixture. Powdered. A mixture of Copper Sulphate and Lime, used to control all fungus and blight on low crops and grapes.

Bug Death. A non-poisonous insect killing powder, for worms, bugs and caterpillars.

Calcium Arsenate Powder. A poison for chewing insects on potatoes and other low crops. (Do not use on trees or grapes).

Copper Sulphate. (Blue Stone).

Crow Repellent. Non-poisonous, used to protect corn after planting from birds and animal pests.

Dry Mix. A sulphur lime casein mixture used as a spray for diseases on fruit trees.

Emulso. An oil emulsion applied at dormant or delayed dormant on trees for the control of red mite, aphid, scale, etc.

Fly Spray Liquid. For protection of horses, cattle, dogs and hogs from flies, mosquitoes, fleas and lice.

Koloform. A superfine Dry Mix.

Lime Sulphur Solution or Lime Sulphur Powdered. For dormant spraying of fruit and shade trees also bushes against San Jose and Oyster Shell Scales, also for peach leaf curl and brown rot of peaches.

Monohydrated Copper Sulphate. Mixed with lime it is used as a dust for blight control, mostly on potatoes.

Paris Green. Used principally in poison bran mash for cut worms, etc.

Pyrethrol. A concentrated insecticide for killing the Japanese beetle, also useful against many other garden, hothouse, orchard, farm and house pests.

Pyrox For the control of insects and blights on low crops and grapes.

Red Arrow Insect Spray. A concentrated Liquid Insecticide.

Wetex. A superfine Dry Mix with Lead Arsenate for spraying all trees for the control of insects and diseases.

Dusting

The Modern Method Of Crop Protection

The rapid strides which the dusting method of crop pest control has made in the past four or five years is directly traceable to the efforts of the Niagara Sprayer Company. Its success, however, has come because it has done those things which were claimed for it, and brought results by the most direct route.

Dusts of infinite fineness have been perfected, containing those properties necessary to kill insect pests and prevent diseases. Not only do the Dusts do the work done by liquid sprays, but their development has opened new fields of Crop Pest Control.

Niagara Dusts are now being made that stick "through Wind and Rain," and exhibit toxic properties to many fungi and insects heretofore unequaled by either wet or dry materials.

Niagara Dusting Material

Standard Mixtures

DORMANT DUST. (In metal drums 50 lbs. each). Delayed dormant dusting for San Jose scale, red mite and aphid on apples, pears, and shade trees.

SULFODUST. (In bags). Dusting Sulphur with special spreader and sticker, fineness 95%, 200 mesh. For apple scab, brown rot, etc. Standard fruit dust fungicide.

KOLODUST. (In bags). A new dust developed by the Niagara Sprayer Co. It is sulphur fused with bentonite at high temperature and the product is koloized (a colloidal form). This produces a dust of infinite fineness much finer than 300 mesh, which experiment stations have proven more toxic to fungous diseases than any sulphur yet produced.

KOLOTEx. (In bags). A Sulphur Poison dust that will stick. The New Exclusive Niagara Sulphur Fungicide with Lead Arsenate.

KOLOKIL. (In bags). A Sulphur Heavy Poison Dust.

KOLOPEACH. (In bags). A Sulphur Small Poison content Dust suitable for dusting peaches and other stone fruits.

A-1 MIXTURE. (In metal drums). A Contact Poison Dust. High percentage of quickly volatile nicotine fumes. 3% actual 100% nicotine. For aphids, red bugs, pear psylla, etc. The best contact dust for sucking insects, both out doors and green-houses.

P. A. DUST. (In metal drums). Used same as A-1, contains 4% actual 100% nicotine.

VITIDUST. (In metal drums). Copper, Lime, Lead Arsenate. Mixture for grapes.

COPODUST. (In metal drums). A Copper-Lime Dust. The New Exclusive Niagara Copper Lime Fungicide for blights of potatoes, and other field crops.

COPOTEx. (In metal drums). A Copper Lime Dust, with Poison added for potato bugs, etc.

WILDFIRE DUST. (In metal drums). A Copper Lime Dust for tobacco.

NIAGARA DUSTING MACHINES

For Vegetable and Fruit Crops

The "Dri-Fog" Crop Duster (4 row, 8 nozzle) is the most recent addition to Niagara's complete line of Dusts and Dusters.

This great crop duster is a new machine in every respect — in design, construction and performance.

Nothing has been overlooked that would simplify the crop dusting method, reduce the time and labor necessary for each job, reduce the cost and give the utmost efficiency in preventing ravages of pests and diseases.

HERE ARE THE REASONS WHY —

The "Dri-Fog" Crop Duster is the Superior of All Crop Dusters

1. It will govern accurately the poundage of material to be distributed, and feed this dust to the distributing system at the rate of 5 pounds to 110 pounds of Niagara Potato Dust per acre.

2. The distributor will divide this dust so that each side of every row will be covered with the same amount of dust.

3. The DRI-FOG is constructed so simply that all units are easily accessible for adjustment and repair.

4. The DRI-FOG is substantially built for operation on rough lands, yet so lightly built that it will not be another "horse-killer" on the farm.

5. More than anything else the DRI-FOG will develop air velocity and air volume to break up the dust and carry it in a penetrating cloud to all parts of the plants, so that every part will be covered with the same thickness of dust film. **Price \$220.00. Discount for cash.**

Niagara Model F Fruit Duster mounted on truck equipped with a 5 H. P. New Way engine. Price complete as shown **\$440.00. Discount for cash.**

Model U Fruit Duster. A Duster well adapted for use in small orchards, equipped with a Cushman 3 H. P. motor. Price complete mounted on truck **\$315.75. Discount for cash.**

Niagara Blower Gun Crank Type, Brush Feed, Price **\$22.00.** 2 row "Y" attachment Price **\$2.00.** Niagara Hand Plunger Gun Price **\$1.25.**

Myers Barrel Spray Pumps

No. R318B — Myers Cog Gear Barrel Spray Pump, complete with one lead of 15 feet of $\frac{1}{2}$ inch 5 ply discharge hose, graduating Vermorel nozzle, and mechanical agitator for closed head barrel. **Price \$16.00.**
Discount for cash.

No. R305B — Myers Cog Gear Barrel Spray Pump with both jet and mechanical agitators, complete with 15 feet of $\frac{1}{2}$ inch 5 ply spray hose and Myers graduating Vermorel nozzle for open head barrel. **Price \$15.00.**
Discount for cash.

Myers No. 6 Overhead Four Row Adjustable Potato Sprayer, mounted on plank that bolts to bottom of wagon box, and is complete with all hose and nozzles. The adjustable features adapt it to any kind of work or condition — nozzles adjustable in width to suit any width row and are so arranged that they discharge the spray either directly downward on top of the plant or either forward or backward as desired — can be raised or lowered a distance of 20" for spraying small or large plants.

The Boom is adjustable in width from 6 ft. 1 in. narrowest point to 11 ft. 3 in. widest point, thus adapting itself to any and all conditions. Will pass through a 7 ft. gate. Can be used in connection with any Barrel Spray Pump. The cut at left shows Myers No. R318 Spray Pump being used with this sprayer.

No. 6 — Myers Hand Overhead 4 row adjustable sprayer complete with all necessary hose and nozzles. (Pump and Barrel not included)

Price \$20.00.
Discount for cash.

FIG. 480

Figure 480 illustrates iron pipe extension made of $\frac{1}{4}$ in. steel pipe threaded at both ends. Price 4 ft. length with coupling 50¢. Price 8 ft. length with coupling 80¢.

The Myers Cog Gear Spray Pump

(Double Acting)

With brass valves and ground bevel brass seats, 2" seamless brass removable cylinder, hemp packed plunger and double lever shut-off discharge.

No. R316 B Pump complete, 50 gallon barrel mounted as shown, with pressure gauge, one 15 ft. lead of $\frac{3}{8}$ in. 7 ply discharge hose, one Fembro nozzle, one 8 ft. pipe extension with lever shut-off and mechanical agitator.

Price \$54.00 Discount for cash

No. R316 C Pump complete, 50 gallon barrel mounted as shown, with pressure gauge, two 15 ft. leads of $\frac{3}{8}$ in. 7 ply discharge hose, two Fembro nozzles, two 8 ft. pipe extensions with lever shut-offs and mechanical agitator.

Price \$60.00 Discount for cash

No. R336 B. Myers Portable Sprayer

Complete as shown in illustration, with dasher agitator, 15 feet $\frac{1}{2}$ in. 5 ply discharge hose, 8 foot extension and Vermorel nozzle.

Price \$26.00 Discount for cash

No. R324 Myers Cog Gear Lever Bucket Spray Pump

With agitator, complete with detachable hose and graduating Vermorel fine sprinkling and solid stream nozzle.

Price \$6.50
Discount for cash

No. 327½ Myers Little Giant Brass Bucket Spray Pump

With agitator, complete with hose and imperial combination fine, coarse spray and solid stream nozzle, with malleable foot rest. - - - - -

Price \$4.30
Discount for cash

The Hudson Perfection Sprayer

Combines all the essential features of a successful compressed air sprayer. The tank is riveted and soldered, the pump is all brass, the nozzle is the most satisfactory shut-off nozzle made, it will close tight under any pressure and there is consequently no leakage. It will handle all solutions.

No. 110 Brass Perfection Price \$9.00

No. 140 " Junior Price \$7.00

Vermorel (Knapsack) Sprayer Price \$18.50

HARDIE

DEPENDABLE SPRAYERS

This Hardie Perfection traction row sprayer discharges 8 to 9 gallons per minute at 300 lbs. pressure yet the draft is so light that any ordinary team easily pulls it. The 4-row Nixon Boom holds the 12 nozzles right where you want them and is easily adjustable. This outfit is perfectly balanced and handles easily under all conditions. **Price \$300.00. Discount for cash.**

The Hardie Superior is a combination orchard and row power sprayer, discharging 9 gallons per minute at 300 lbs. pressure. It is powered with a 4 h.p. Cushman Engine. This machine is fitted with the famous 4-row Nixon Boom with 12 nozzles, 50 feet of high pressure hose and one orchard gun. **The price is \$450.00. Same outfit without hose and gun \$425.00. Discount for cash.**

The Hardie Magic Combination Row and Orchard Sprayer. A big high pressure six row power outfit, consists of No. 10 master mogul pump, 6 to 8 h.p. Novo Engine, magneto ignition, 150 gallon tank, 2" steel axle, 54" wheels with 5" tires — Nixon 6 row boom with 18 nozzles, two 50 ft. hose and two orchard guns. **Price \$650.00. Discount for cash.**

HARDIE

DEPENDABLE SPRAYERS

The Hardie No. 12 Mogul fully fills the order from growers for larger capacity, higher pressure, but no more weight. This 200 gallon sprayer, with a discharge capacity of 12 gallons per minute, mounted on the famous Hardie Autoplex truck, weighs only 1800 pounds and will do far more work than any other sprayer of equal weight. Complete **\$685.00. Discount for cash.**

The Hardie Spray Ring Special is the lightest, highest powered, lowest priced sprayer in its class. Powered with a 2 h.p. engine, the Hardie Duplex Pump is driven by automobile type roller chain, the most flexible and positive drive known. Material and workmanship of the highest quality only go into this sprayer. Price **\$350.00. Discount for cash.**

No. 357N Iron Age Traction Sprayer

is equipped with triplex pump, 100 gallon tank, Nixon 4 row spray bar with 12 nozzles. Price **\$265.00. Discount for cash.**

No. 354 Iron Age Traction Sprayer

is equipped with duplex pump, 55 gallon tank, 4 row spray bar with 4 nozzles. Price **\$207.00. Discount for cash.**

John Deere Syracuse No. 821 Series Truss Steel-Beam Hillside Plows

Ample throat room and close fitting joints prevent clogging. Choice of white iron or tempered steel mouldboards adapts them to a variety of soils. Steel and malleable iron give maximum strength and unusual light weight. Two-piece truss-style beam will not bend or break. Renewable shoe protects standard and serves as landside.

Discount for cash.

32-16" discs 8 ft. cut, **Price \$140.00.**
Discount for cash.

Meeker Smoothing Harrow

A perfect harrow and land roller combined. This harrow has become a great favorite among all classes of farmers and market gardeners.

It has four (4) sets of rollers containing 58 steel discs. These discs grind all lumps and save the work of raking and also mash small stones below the surface better than any field roller, leaving the land smooth and level.

6 ft. x 6 ft. 6 in. with 10 inch discs.

Price \$40.00. Discount for cash.

8 ft. x 6 ft. 8 in. (for tractor) with 10 inch discs. Price 50.00. Discount for cash.

Universal Steel Lever Harrow

Deere — 60 Tooth. (two section)

No. 16F 8 ft. 6 in. cut for 2 horses (two section). Price \$33.00. Discount for cash.

John Deere-Van Brunt Disc Fertilizer Drill With Grass Seed Attachment

Distributes any standard fertilizer and plants grain at the same time — also grass seed, when attachment is used; or it will handle any one of the three alone. All feeds can be thrown out of gear and discs used for stirring soil without seeding or fertilizing. Each wheel drives half the feeds, insuring positive and steady operation. One-half of grain feeds can be used for finishing a field or seeding narrow places. Van Brunt Adjustable Gate Force-Feed is one of the best seeding devices made. Drill handles fertilizer in quantities from 65 to 1250 pounds per acre. Plants wheat, oats, barley, flax, rye, rice, alfalfa, peas, beans, corn, etc.

Size 11 x 7 furnished regularly with 1-pole and 2-horse eveners.

Price complete with grass seed attachment **\$190.00.** Discount for cash.

John Deere-Van Brunt Lime and Fertilizer Sower

Covers 8 feet of ground; carrying capacity 10 bu. Direct wheel drive — each wheel drives half the machine.

Price with Agitator **\$92.00.**

Discount for cash.

Price less Agitator **\$85.00.**

Discount for cash.

If neckyoke and doubletrees are wanted add **\$4.00.**

McWhorter Fertilizer Sowers

No. 34 shown in the cut is a low-down type machine, which is intended for use with one horse. It can be used for broadcast or between the row sowing. Price **\$68.00.** Discount for cash.

No. 26 is a two-horse machine, equipped with six sets of spouts, with a hopper capacity of 540 lbs., the extreme width is 9 ft. Price **\$93.50.** Discount for cash.

Stevens Broadcast Fertilizer Sower

8 ft. 3 in. two horse size. Price **\$75.00.** Discount for cash.

Nonpareil Broadcast Fertilizer Sowers

8 ft. two horse size. **\$65.00.** Discount for cash.

5 ft. one " " **60.00.** " " "

Stevens Between the Row Sower

For sowing fertilizers between rows or for doing other surface work, as some tobacco growers claim that a part of the fertilizing should be done after the first hoeing. The machine is made with wheel inside the frame, and covers a space of 12 inches wide with fertilizer. It has three cultivator teeth, adjustably attached to back end of machine for covering. **Price \$32.00. Discount for cash.**

No. 21 McWhorter Wheelbarrow Sower

This machine has the same positive belt feed as used on the larger McWhorter Sowers. Sows any quantity from a few pounds up to forty to the hundred yards of row, or from 200 lbs. to a ton per acre. **Price \$22.00. Discount for cash.**

Planet Jr. No. 220 Fertilizer Distributor will distribute fertilizer in the middles of three rows 12 to 14 inches apart; it will side-dress one side each of two rows up to 36 inches apart (one complete row; and corn in wider rows). You can use it in very narrow rows — as close as 9 inches. **Price \$27.00. Discount for cash.**

Farm and Garden Implements

Planet Jr.

No. 4 Planet Jr. Combined Hill and Drill Seeder, Single Wheel Hoe, Cultivator and Plow. Very popular with owners of small gardens. **Price \$18.00. Discount for cash.**

No. 4D (seeder only) **Price \$14.25. Discount for cash.**

No. 25 Planet Jr. Combined Hill and Drill Seeder, Double and Single Wheel Hoe, Cultivator and Plow. Has long been known as the "Complete Gardener". **Price \$21.50. Discount for cash.**

No. 3 Planet Jr. Hill and Drill Seeder. For Market Gardeners, Onion Raisers and other large growers. Holds 3 qts. **Price \$17.50. Discount for cash.**

"A NEW DRILL SEEDER FOR ALL SOILS"

No. 26 Planet Jr. Drill Seeder is constructed almost entirely of steel, is substantial, and will give a great many years of satisfactory service. **Price \$20.00. Discount for cash.**

No. 16 Planet Jr. Single Wheel Hoe, Cultivator, Rake and Plow. Equipment (as shown): One pair of 6" hoes, three cultivator teeth, one garden plow, one 7" rake, one 4" rake, one leaf guard. **Price \$9.00. Discount for cash.**

No. 17 Planet Jr. Single Wheel Hoe. Equipment — one pair of 6 inch hoes, three steel cultivator teeth, one garden plow. **Price \$7.75. Discount for cash.**

No. 17½ Planet Jr. Single Wheel Hoe. Equipment — one pair of 6 inch hoes and three steel cultivator teeth. **Price \$6.75. Discount for cash.**

No. 18 Planet Jr. Single Wheel Hoe. Equipment — one pair of 6 inch hoes. **Price \$5.75. Discount for cash.**

No. 19 Planet Jr. Garden Plow and Cultivator. Equipment (as shown): One 2" cultivating tooth, one 10" sweep, one plow, one 5 prong cultivating attachment. **Price \$6.00. Discount for cash.**

No. 119 Planet Jr. High-Wheel Garden Plow and Cultivator. Has a wheel with $\frac{3}{16}$ " x $\frac{3}{8}$ " steel spokes, very strong, twenty-four inches in diameter nearly twice as high as the No. 19, making an easy running tool for any garden work but particularly where such crops as potatoes, corn, field beans or anything in wide rows must be cared for by hand rather than with a horse. **Price \$4.50. Discount for cash.**

No. 11 Planet Jr. Double and Single Wheel Hoe Combined. Equipment (as shown): One pair 6" hoes, one pair 4½" hoes, four steel cultivator teeth, one pair plows, two three tooth rakes, two five tooth rakes, two leaf lifters. **Price \$13.75. Discount for cash.**

No. 12 Planet Jr. Double and Single Wheel Hoe Combined. Equipment — one pair 6 inch hoes, four steel cultivator teeth, one pair plows, two leaf lifters. **Price \$10.75. Discount for cash.**

No. 13 Planet Jr. Double and Single Wheel Hoe Combined. Equipment — one pair 6 inch hoes. **Price \$8.00. Discount for cash.**

Planet Jr. Fire Fly Garden Plow. This substantial tool makes a splendid companion to any wheel hoe. It plows a furrow four to six inches wide and up to three inches deep or deeper by going a second time. **Price \$4.25. Discount for cash.**

Planet Jr. Star Pulverizer, Leveler and Weeder. This tool as its name implies, can be used both for pulverizing the seed bed in preparation for planting; and also for keeping down weeds after crops are up. The revolving star-shaped discs have a large cutting surface. Width of cut, 7½ in. **Price \$3.25. Discount for cash.**

Width of cut, 14 in. **Price \$6.00. Discount for cash.**

No. 35 Planet Jr. Seeder Attachment for Wheel Hoes and Garden Plows. Sows practically all vegetable seeds in straight even rows, at the right depth, and covers them accurately as our standard size seeders. **Price \$6.50. Discount for cash.**

No. 2 Planet Jr. Lawn Edger. **Net Cash Price \$1.75.**

No. 8 Planet Jr. Horse Hoe and Cultivator. Equipment (as shown): Four 3 x 8 in. cultivator steels, one 4 x 8 in. cultivator steel, two 6 in. hillers, one 7 in. shovel, lever wheel, lever expander and depth regulator. Price \$16.25. Discount for cash.

No. 7 Planet Jr. Horse Hoe — Same as No. 8 but has no depth regulator. Price \$15.75. Discount for cash.

No. 9 Planet Jr. Horse Hoe — Identical with No. 8 except that it has a plain wheel instead of a lever wheel; and is without depth regulator. Price \$14.25. Discount for cash.

No. 82 Planet Jr. Horse Hoe and Cultivator Combined. Equipment (as shown): Seven $2\frac{1}{4}$ x 8 in. cultivator steels, one pair 6 in. hillers, one 7 in. shovel steel, lever expander. Price \$15.75. Discount for cash.

No. 82 Planet Jr. Horse Hoe and Cultivator Combined with Lever Wheel. Price \$18.00. Discount for cash.

No. 83 Planet Jr. Seven Tooth Plain Cultivator. Equipment (as shown): Seven $2\frac{1}{4}$ x 8 in. cultivator steels, lever expander. Is the most profitable one-horse cultivator to use. The seven teeth make possible finer cultivation than can be had with a five-tooth cultivator. Price \$14.25. Discount for cash.

No. 83 Planet Jr. Seven Tooth Plain Cultivator with Lever Wheel. Price \$16.50. Discount for cash.

No. 90 Planet Jr. Twelve-Tooth Harrow, Cultivator and Pulverizer (as shown). Price \$17.00. Discount for cash.

No. 90B. Less Pulverizer. Price \$13.75. Discount for cash.

No. 90D. Less Pulverizer and wheel. Price \$10.75. Discount for cash.

Hallock Pattern Weeder

A Standard Weeder having curved teeth. Price \$16.00.

Discount for cash.

Planet Jr. Pivot Wheel Cultivator

The No. 72 as shown has five levers, and they simplify its control so that a boy can operate it with success. The center lever adjusts the hinged tongue regulating the depth of the front teeth and leveling up the machine to suit all heights of neck yoke. The outside levers regulate the depth of the teeth in the rear, while intermediate levers are used in changing the widths of the gangs to suit irregular planting without stopping the team. Price \$100.00. Discount for cash.

No. 70D Plain \$70.00.

Discount for cash.

John Deere K. C. Cultivator

Put your boy in the field on the K. C. He will like its operation; you will like the results. Every adjustment made quickly and accurately from the seat with handy levers. Lower the rigs with the master lever; shovels penetrate level. Space them with spread lever; then spread equally at front and back, shovels always point straight ahead and cut out full width — no weeds "get by".

K. C. 76-8 Shovel, Pin Break. Price \$67.00.

Discount for cash.

K. C. 156-8 Shovel, Spring Trip. Price \$74.00

Discount for cash.

Tobacco attachment for above Price \$12.00.

Discount for cash.

Rotary Shields (as shown) in place of solids, add \$3.00.

"KING OF THE CORNFIELD"

Corn, Bean and Pea Planter and Fertilizer Distributor

Every machine is warranted to be well made of good material, and guaranteed to do its work perfectly and satisfactorily with the different kinds of seeds, as we claim, if used according to directions.

Price \$45.00. Discount for cash.

JOHN DEERE No. 999 CORN PLANTER

Widely recognized as the most accurate planter on the market. The John Deere Natural Cell-Fill, Edge-delivery seed plates, sloping hopper bottom, improved metal cut-off and knocker insure positive feed and unfailing accuracy. Plants accurately whether the hopper is full or nearly empty. Seed plates for handling every kind of corn; also beans, and many other seeds. Variable drop plants two, three or four kernels in each hill as desired. The number of kernels per hill can be varied merely by shifting foot lever, without stopping the machine. Also varies the distance in drilling. Easy to

change from hilling to drilling. Underhung reel; a touch of the toe releases check wire, fertilizer can be checked with each hill or drilled along the row.

POTATO PLANTERS

Hoover Visible With Automatic Seed Control. With the operator on the seat at the rear the whole planting operation is before him. This enables him to make certain that each picker is working properly, thus assuring perfect planting.

Hoover No. 400 Plain, less eveners. **Price \$112.50. Discount for cash.**

Hoover No. 400 with No. 402 fertilizer attachment, less eveners. **Price \$145.00. Discount for cash.**

IRON AGE—Two Man, Assisted Feed

For many years it has been conceded that in its ground performance the Iron Age Planter exhibits the highest degree of perfection ever attained. By Iron Age ground performance is meant the opening of furrow, distributing of fertilizer, placing of the seed safely out of touch of the fertilizer and finally ideal covering and ridging. Equipped for large seed.

Iron Age No. 404 (without Fertilizer attachment.) Complete with neckyoke and eveners **Price \$130.00. Discount for cash.**

Iron Age No. 404R (with Fertilizer attachment.) Complete with neckyoke and eveners **Price \$155.00. Discount for cash.**

HOOVER POTATO CUTTER

This cutter meets the general demand for a first-class potato cutter. Provision is made to cut either large or small potatoes into the proper number of pieces. **Price \$19.50. Discount for cash.**

BOGGS STANDARD HAND POTATO GRADER

Boggs No. 3 machine permits long or round potatoes to be sorted and graded into No. 1 and No. 2 sizes with less than 3% variation in size from government grades, and cleans them of all dirt, trash and culls in one operation. No. 3 hand grader as illustrated has a capacity of 150 bushels per hour. **Price \$68.50. Discount for cash.**

When large quantities of potatoes are to be graded, the power equipments will be found most advantageous. They not only have much greater capacity than the hand machine, but effect a big labor saving. Prices on application.

Farquhar Success Jr. Potato Digger

The most popular plow-type digger on the market. Just the digger for the small grower—in fact no farmer can afford to be without this digger even if he raises only sufficient potatoes for his own consumption. In time and labor saving it pays for itself the first season. **Price \$17.00.**

Discount for cash.

Hitchcock Potato Digger. Price \$12.00. Discount for cash.

The "Hoover" Potato Diggers are made with rod type elevator, 6 and 7 foot frame, in 20, 22 or 24 inch widths, with chain, gear or engine drive, with agitating vine separating rear rack or extension elevator. All diggers can be furnished with either the Two-wheel (Double Action) or Single Roller Front Truck at same price. The 6 foot digger has 30 inch and the 7 foot 36 inch drive wheels with an extreme tread of 41 inches on the 22 inch chain drive and 39 inches on the 22 inch gear drive diggers and are practically of all steel construction.

No. 1522K gear driven with 5½ ft. 22 in. rod elevator and 3 ft. extension elevator built for the farmer with a small acreage.

Price with 2 Horse Evener, single or double front truck **\$120.00. Discount for cash.**

No. 622A chain driven with 6 ft. 22 in. rod elevator and vine separating rear rack.

Price with 2 Horse Evener, single or double front truck **\$145.00. Discount for cash.**

With 4 Horse Evener add **\$3.00.**

No. 10 Disc Hiller

The most practical and efficient implement of the disc type, has 20" discs. Especially good for hilling potatoes. Price less evener **\$18.00. Discount for cash.**

Engine Drive Diggers

The engine drive potato digger is the adaptation of the modern light-weight gasoline engine to the driving of the mechanism of the elevator potato digger.

The engine is mounted on the main frame of the potato digger and transmits the power to the main elevator shaft.

From the driver's seat, the operator controls the friction clutch lever, also the speed of the engine for varying conditions of digging.

The clutch sprocket automatically releases if stone or other hard substance should become clogged in the digger. This eliminates all possibility of damage to the engine or digger.

Hoover No. 4724A chain driven 7 ft. with 24 in. rod elevator, vine separating rear rack, and 5 Horse Power New Way Engine as shown.

Price with 2 Horse Evener, single or double front truck. **\$390.00. Discount for cash.**

John Deere-Dain Combination Rake

Price \$130.00

For the man who desires a combination rake, this machine will do satisfactory work. Moving one lever changes machine from rake to tedder. Angle of teeth easily changed, and either end of reel raised or lowered independently. Has ample clearance for heavy hay or large windrows. Left-hand wheel can be set in for turning windrows.

Discount for cash.

John Deere-Dain System Rake For Air-Curing Hay

This rake aids the hay-grower in producing hay that brings the highest market price. Air cures hay without loss of color, foliage or feeding value when used according to the John Deere-Dain System of Air-Curing Hay. Rake follows mower while leaves are still active and lays the hay in loose, fluffy windrows, leaves inside, butts out. The foliage thus protected cures properly, does not get brittle and break off. Inclined frame gives greater capacity as volume of hay increases. Curved teeth lift hay gently — no dragging or threshing. All adjustments are made from the seat.

Price \$125.00

Discount for cash.

John Deere Single-Cylinder Windrow Hay Loader

Very light draft and minimum number of working parts. Single drum mounted directly on the axle. Hinged carrier makes loading easy in windy weather. Furnished regularly with forecarriage — no lifting is necessary when coupling to wagon. Extra strong, well braced frame with hot-riveted corner plates. Gets all the hay when properly raked into windrows. Handles alfalfa and clover without knocking off valuable foliage parts. Capacity ample for all side-rake windrows. Made in 6 foot width with forecarriage.

Price \$130.00

Discount for cash.

Brillion Pulverizer

The new roller-bearing light draft Brillion Pulverizer consists of two gangs — the front gang with sections 15 inches in diameter and 4 inches wide; the rear gang 12 inches diameter and 4 inches wide with $\frac{3}{8}$ -inch concave. It is by far the most popular soil pulverizer and packing machine made. You will note by the end bracket that it consists of two castings assembled with a large bolt and a 150-pound pressure spring for additional pressure on rear gang. These brackets have openings to receive the roller-bearing boxes, which permits this boxing to be self-aligning and to endure all kinds of soil without excess of wear or draft.

Prices on Application

New Improved Tiger Transplanter

The lifting lever works on an eccentric. A child can lift the weight of two men and when the lever is operated it automatically throws machine out of gear.

Simply and strongly made with these new improvements this machine is rapidly coming into favor with discriminating buyers. This machine has $1\frac{1}{4}$ inch water connections. The flow of water is under perfect control and can be regulated to deposit as small a quantity as desired, or to discharge one pint to each plant.

Price \$105.00

Discount for cash.

Bemis Transplanter

Thirty-five years of practical experience is embodied in the Bemis.

Nearly every tobacco farm in the Conn. Valley is equipped with one or more of these implements.

Price with fertilizer attachment as shown \$125.00. Discount for cash.

Price less fertilizer attachment \$105.00. Discount for cash. Equipped with double truck \$2.00 extra.

John Deere Triumph Wagon

An attractive light-running wagon of moderate price having many of the features to be found on the more expensive John Deere wagons, among them the sand-and dust-proof skeins and malleable fifth-wheel bolster plate with corrugated coupling. Clipped gears; square wood front hounds of straight-grained oak; wheels are built strong of high grade material; hubs are oak or No. 1 black birch; oak or hickory spokes; box is firmly braced and strengthened with cross cleats and straps.

Prices on application.

John Deere Farm Truck

In price, strength, draft and finish, John Deere farm trucks give exceptional satisfaction. They stand hard usage year after year because they are built right and in a factory that has an established reputation for making only the best.

Prices on application.

The Old Reliable John Deere Manure Spreader

In 1911 came the greatest change ever made in spreader design — the invention of the John Deere Spreader — the spreader with the beater on the axle; a machine that combined a low easy loading box with high drive wheels. This still is the preferred spreader on thousands of farms.

John Deere Size "A" 30 Bushel with 2 Horse Hitch. Price \$182.50. Discount for cash.

John Deere Size "B" 40 Bushel with 2 Horse Hitch. Price \$185.00. Discount for cash.

John Deere Size "C" 50 Bushel with 3 Horse Hitch. Price \$195.00. Discount for cash.

The New John Deere Manure Spreader

Narrow Type — Tight Bottom with Wide Spread Attachment. The low down spreader with the beater on the axle and the box-roll turn. Because of these features, it is not necessary to set the rear axle underneath or cut the front wheels under the box therefore the New John Deere is easy to load from the front to the rear without pitching the manure over the rear wheels.

(See this new spreader set up on our showroom floor)

New John Deere Model "D" Spreader with 2 Horse Hitch and End Gate \$185.00. Discount for cash.

New John Deere Model "D" Spreader with 2 Horse Hitch less End Gate \$180.00. Discount for cash.

Moline No. 200 Manure Spreader

A new sturdy, but light weight spreader simple in design.

50 Bushel size with 2 Horse Hitch. Price \$175.00. Discount for cash.

John Deere Type E Farm Engines

Contain the greatest improvements in engine building made in years. All important working parts fully enclosed in dust-proof case are oiled automatically. Magneto equipped.

1½ Horse Power Engine Price \$70.00. 3 Horse Power Engine Price \$110.00. 6 Horse Power Engine. Price 178.50. Discount for cash.

John Deere 10-20 G P Farm Tractor

Now you can do all your farming with mechanical power — plowing, planting, cultivating, disking — all field work, all belt work, including jobs requiring power take-off service. All those operations are accomplished quickly, economically and efficiently with the John Deere General-Purpose Farm Tractor.

It is a tractor of standard, conventional design, light in weight, but remarkably powerful, that does high-grade work on any farm job within its power range.

In its construction are embodied the principles that have made the larger John Deere tractors famous for economy, durability and efficiency on the bigger farm jobs — its design has been thoroughly proven on thousands of farms.

With this tractor, farm work can now be done more timely and with less help — besides it does away with the drudgery of caring for horses — gives you more time for other farm duties and for recreation.

The John Deere General-Purpose Tractor meets the needs on the average-sized farm and makes farming with mechanical power both practical and profitable.

Quality Features

Heavy-Duty Motor. The John Deere is equipped with a heavy-duty two-cylinder motor — simpler, more powerful, longer-lasting — burns low-grade fuel efficiently and economically.

Responsive Governor. The governor responds instantly to the power load, resulting in immediate power from the tractor to meet all conditions.

Light Weight. The John Deere weighing only 3600 pounds has a rating of 10-20 H. P. with a surprising surplus of power to meet emergencies.

Compact. The John Deere is short, narrow and low, and has ample clearance for cultivating. It is provided with differential brakes which make possible turning it in its own length. Can be used successfully in small, irregular fields and orchards.

Extremely Simple. Hundreds of fewer parts in its design. This means less repair expense, fewer adjustments and it is easier to understand and operate.

Unusually Accessible. While all of the working parts are completely enclosed in a dust-proof case, all are accessible for adjustment without disturbing other working parts.

Full-Pressure Motor Lubrication. Oil is forced to main and connecting-rod bearings, to piston pins and to the governor parts by a full-pressure lubrication system. All other important parts, all of which are located within the dust-proof housing, run in oil. It is only a few minutes' job to oil outside parts with the pressure grease gun regularly furnished.

Simple Thermo-Siphon Cooling System. Motor is kept at the proper temperature for most efficient operation. No pump is required. Radiator cooled with gear-driven fan. A simple, effective cooling system that will not get out of order.

Price on Application

John Deere Model D 15-27 Farm Tractor

Ideal power for field, orchard and belt work. Unusually compact, only 56 in. high, 63½ in. wide and 109 in. long, easy to handle. Simple, two-cylinder, low speed, kerosene-burning engine. Weight 4164 lbs. Price on application.

MOLINE STEEL LAND ROLLER

The drums are heavy steel sheets not easily dented. The ends are closed to keep out dirt and trash. The frames are heavy angle steel securely bolted. Price \$50.00. Discount for cash.

GOSLEE IMPROVED FIELD MARKER

(Spread 2 to 4 feet)

This machine is designed to mark out rows any width for any crops grown in rows. Teeth are adjustable to any size and depth drill.

Price plain \$19.00. Discount for cash.

" with spacer bar \$20.50. Discount for cash.

THE JUMBO CONCRETE MIXER

Capacity from 27 to 45 cubic yards of well mixed concrete a day. Have you ever figured out just how much time and money a good concrete mixer would save you?

A Jumbo, for example, with a squad of four men will do the work of 8 to 10 at hand mixing, which means a saving of at least \$15 a day — and a better mix can be obtained. Can be operated by hand or engine. Price \$35.00. Discount for cash.

THE JUMBO CONCRETE MIXER Mounted on Truck With Jumbo 1 3/4 H. P. Engine

Several advanced and practical features of internal combustion engine design are embodied in the Jumbo construction. For example, the magneto is attached to the cylinder head directly over the intake valve, which insures positive ignition, and longer life to the igniter insulation, and complete utilization of the fuel.

Jumbo Concrete Mixer Complete with engine and truck, Price \$125.00. Discount for cash.

Jumbo Saw Frames

No. 700 With Tilting Table. Built especially for sawing cord wood. Mandrel of finest cold rolled steel $1\frac{1}{16}$ " dia., 49" long — fitted for saw with $1\frac{3}{8}$ " hole. Flywheel is accurately machined and carefully balanced, $15\frac{1}{2}$ " dia., weight 65 lbs. Standard pulley size 6 x 6". **Price \$30.00. Discount for cash.**

No. 701 With Pole Extension — One of the best frames obtainable for sawing long poles and heaviest cord wood. **Price \$32.00. Discount for cash.**

Curtis Guarantee Cord-Wood Saws

Always run the saw at proper speed, too high or too low is equally bad.

Dia.	No. Teeth	Speed	Price
20"	52	1800	\$4.00
22"	56	1636	4.50
24"	60	1500	5.00
26"	64	1384	5.75
28"	70	1285	6.50
30"	76	1200	7.50

Stover Saw Frame

Take the saw to the wood not the wood to the saw. With the Stover Rig attached to your Fordson, you can take your outfit wherever poles, etc., happen to be, saw them up, and go on. **Price Complete with 30" saw and 5" rubber belt \$50.00. Discount for cash.**

CLARK "CUTAWAY"

Farmer's Favorite Cider Mills — are made in three sizes — the Jumbo, Senior and Medium — two of which may be used with power if desired. Although varying greatly in size and capacity, each mill embodies all the essentials necessary to profitable and successful cider making. Because of the method of grinding the apples into a perfect paste-like pomace, these mills excel all others in quantity of cider which can be obtained. The grinder leaves none of the crushing to be done under the press.

Jumbo Mill — 4 ft. 6 in. wide, 4 ft. 2 in. long, 5 ft. 10 in. high, weight 1250 lbs.

Senior Mill — 2 ft. 4 in. wide, 4 ft. long, 3 ft. 10 in. high — 18 in. curb, weight 387 lbs.

Medium Mill — 2 ft. wide, 2 ft. 4 in. long, 3 ft. 2 in. high — 11 in. curb, weight 208 lbs.

CLARK "CUTAWAY" Fruit Presses

A Press without a grinder is much in demand for pressing grapes, berries, etc., made in four sizes.

The Fruit Press is similar in design to the press used on the cider mills and is just as sturdily made of selected oak and maple. The curb is made of clear, hard wood, the slats being riveted to strong steel hoops. It is a press that will give years of service.

No.	Width	Height	Height with screw raised	Diameter of curb (inside)	Depth of curb	Weight
1	1 ft. 9 in.	2 ft. 4 in.	3 ft. 4 in.	7½ in.	8 in.	50 lbs.
2	2 ft.	3 ft.	4 ft. 7 in.	11 in.	11 in.	75 lbs.
3	2 ft. 4 in.	4 ft. 1 in.	5 ft. 7 in.	15 in.	13½ in.	135 lbs.
4	2 ft. 4 in.	4 ft. 5 in.	6 ft.	18 in.	18 in.	195 lbs.

All-Wood Frame Steel Tray General Purpose BARROW

For the contractor, farm, garden and home use, cheapness and lightness have not been gained by sacrificed strength, rigidity or finish. And it has not been made by simply building it "child size". It is a real man's barrow and is made for real work. Price \$5.50 Net.

Corn Shellers

Frame—Of hard wood, well mortised together, and neatly painted.

Large Hopper—Adjustable to shell all sizes of ears, and large Dent corn as well.

Heavy Fly-Wheel—With shaft of cold rolled steel gives not only strength of construction, but smooth running with little power.

Separator—On the front of the machine, which separates the ears from the shelled corn.

Chaff Sieve—Assists in screening the corn which passes out through the small spout at the bottom. Weight 125 lbs.

Chicopee Corn Sheller

Price \$13.75. Discount for cash.

Chicopee Double Hole Corn Sheller

(Hand or Power)

Price \$34.38. Discount for cash.

Lion Corn Sheller

Price \$15.00. Discount for cash.

Red Chief Corn Sheller

Price \$3.50 Net.

Champion Vegetable Cutter

This is one of the best machines in the market for cutting all kinds of vegetables. It is made with a wrought shaft with sections of knives fastened to it, and arranged so that a rotation of knives is continually passing a bed knife with cross knives passing between the section of knives; cutting always near the center shaft, making it cut easy and fine enough for cattle or sheep; also making a very regular cut.

This machine will cut sixty bushels an hour.

No. 1½	Weight 132 lbs.	Price \$12.00
Discount for cash

Lever Feed Cutters

This is a simple and durable machine. The device for adjusting the lever, being removed from the pivot, enables us to have a stationary pivot firmly attached to the machine, and consequently not liable to get loose, as in all machines where the pivot is adjustable.

Myers Hay Unloading Tools

Directions for Erecting Myers Patent Steel Track. Scaffold by placing rope from rafter to rafter, say 6 feet from ridge pole or peak and about 10 feet apart. Then place extension ladder across the ropes with board to stand on. Now nail one rafter bracket at each end of barn and draw a line from one end to the other and stretch tight. Then nail all rafter brackets even with this line. You are now ready to put up the track, which can be done in sections. Hoist near to rafter brackets by ropes. Then place hanging hook over rafter bracket and finish by putting in bolt.

Material Required for a Steel Track Outfit for Different Length Barns.

For a 40 Foot Barn. One Hay Unloader. 36 feet Steel Track. 19 Hanging Hooks. 19 Rafter Brackets. 5 Knot Passing Pulleys. 1 Fork or 3 Slings. 6 Floor Hooks. 110 feet $\frac{3}{4}$ inch Manila Rope. 50 feet $\frac{3}{8}$ inch Check Rope. 40 feet $\frac{3}{8}$ inch Reverse Rope.

For a 50 Foot Barn. One Hay Unloader. 48 feet Steel Track. 25 Hanging Hooks. 25 Rafter Brackets. 5 Knot Passing Pulleys. 1 Fork or 3 Slings. 6 Floor Hooks. 130 feet $\frac{3}{4}$ inch Manila Rope. 55 feet $\frac{3}{8}$ inch Check Rope. 50 feet $\frac{3}{8}$ inch Reverse Rope.

For a 60 Foot Barn. One Hay Unloader. 54 feet Steel Track. 28 Hanging Hooks. 28 Rafter Brackets. 5 Knot Passing Pulleys. 1 Fork or 3 Slings. 6 Floor Hooks. 160 feet $\frac{3}{4}$ inch Manila Rope. 60 feet $\frac{3}{8}$ inch Check Rope. 60 feet $\frac{3}{8}$ inch Reverse Rope.

Different lengths of barns will use track, hanging hooks and rope in same ratio as above.

If required to take hay in at end of barn and have rope pass down at far end to horse, same amount of draft rope. If draft rope be returned to same end of barn and then down, this requires about one fourth more draft rope.

Give your Horses a Chance

How are you getting more milk from your cows or more pork from your hogs? Isn't it by balancing their rations?

Then why not give your horses the same chance? They deserve it, and will deliver the results.

A quart of Omolene mixed with your home grains makes them worth more to you and seldom adds to the cost of the ration. For instance, a quart of Omolene replaces 3 ears of corn.

Omolene supplies protein and ash for building muscle, tissue and bone and keeping horses' feet in condition.

Try it once and you will never be without it.

Sold in checkerboard bags only

At the Store with the Checkerboard Sign

MILK PAIL PROOF

Purina-fed cows have broken more than sixty state, national, and world records.

Yet these records don't tell the whole story after all. They only prove that Purina makes more milk. They don't prove anything about Purina producing a cheaper quart of milk and that's the thing that every dairyman wants.

But here's what does prove Purina produces a cheaper quart—twenty thousand more dairymen are feeding Purina this year than fed it last year! When twenty thousand dairymen—big and little—change to one feed in one year, it says a lot more than any feed salesman can say about the Purina quart being the cheapest!

Come in and let us show you what Cow Chow, Bulky-Las and Calf Chow will do for you

Fertilizers for the Dairy Farm

Better Pastures

Fertilizer is the dairy farmer's best insurance. A few dollars invested in fertilizers for top-dressing your pastures insure big dividends in reduced feed bills and more milk.

In New England, New York, and Pennsylvania there are over 20,000,000 acres of permanent pasture. The poor condition of these pastures seriously threatens the dairying enterprise. This condition is a direct result of pasture starvation.

Signs of Pasture Starvation

There are three stages of pasture starvation: first, weeds and moss replace grass and clover; second, brush comes in; third, weeds and brush take possession. Look at your pasture! Are weeds, moss, and brush coming in? If so, plant food is lacking.

Pasture starvation results from selling plant food and lime in the form of milk and livestock. As with a bank account, to increase your income, you must add to your principal. Increased profits from dairy farming therefore call for intelligent and liberal use of fertilizers and lime. Phosphorus is the first plant food to become exhausted. Next to go are lime, potash and nitrogen.

Top-Dress Annually after First Year

After the first year, clover largely gives way to the grasses which, unlike clover, can get no nitrogen from the air and which, furthermore, are one year further removed from the seeding-down application. Whether the grasses persist for several years in a clean, heavy-yielding stand or very soon become weedy and decline in yield is absolutely a matter of fertility. Practically every experiment station in the eastern half of the country has proven that point. Fertilize the grasses and they live, yield well, and show a profit; starve them and they run out, get weedy and show a loss.

An application of 300 to 600 pounds per acre of O. & W. top-dressing fertilizer in early spring as soon as grass starts vigorous growth will supply the right kinds and amounts of plant foods at the right time for maximum returns.

The Guide-Post to Profits!

What's the most practical way to lower the cost of producing eggs?

How can you get your hens to lay in the winter months when egg prices are at their peak?

What can you do to increase the hatchability of eggs and reduce the death loss of baby chicks?

How should you handle pullets to get them to reach maturity earlier so they will lay eggs when you want them?

The above questions are all answered in the Purina Poultry Book which is free. Write or phone us for a copy.

*Instead of
Fragile Glass
use Unbreakable
CEL-O-GLASS*

Cel-O-Glass is an unbreakable highly translucent material made by coating tough wire mesh with a transparent substance that lets through practically as much light as clear glass. Is very light in weight, absolutely weatherproof and extremely easy and economical to use. It is flexible, comes in rolls 3 ft. wide and can be used almost any place where fragile glass is required. Price 1 to 10 linear ft. 50¢. ft.; 10 to 50 linear ft. 45¢. ft.; 50 to 100 linear ft. 40¢. ft.; full roll 100 linear ft. 39¢. ft.

B - K

B-K is especially adapted for the prevention and treatment of poultry diseases such as Rouse, Canker, Cholera, Bacillary and White Diarrhea. B-K is also a Powerful Disinfectant.

Buy the Best

**MONEY SAVED IS
MONEY EARNED!**

SAVING two or three gallons of paint on the average house means something to the man who buys carefully.

B. P. S. Fine Grinding makes a paint which covers 350 to 400 square feet, two coats—25 per cent more than Lead and Oil.

True Economy in B. P. S.

If you are tempted to buy paint because of the low price per gallon, please consider that the application cost is usually twice the cost of the paint, also that it costs as much or more to apply a cheap paint as it does to apply the Best Paint Sold. In fact, it costs less to use B. P. S. than any other paint, because the covering and spreading qualities of B. P. S. are greater and more than offset any difference in price.

Measure the value of your paint by the years of service it will give you—plus the appearance and number of square feet it will cover to the gallon—and you will decide to use B. P. S.—the Best Paint Sold—and in the end, the lowest in cost.

We carry a full line of Brushes, Linseed Oil, Turpentine and Jewett White Lead.

Safe-coat Your Roof with

Safekote
more than waterproof

Roofing Products

It is part of our job — when you have a roofing problem to solve — to advise you how to solve it most economically and with the greatest amount of satisfaction.

We heartily recommend Safekote roofings, whatever the problem; Slate surfaced shingles, strip or individual for your home, — barn or garage and Safekote roll roofings for other buildings.

We will also be glad to refer you to a reliable local roofing contractor or builder whom we know will lay the roof properly. He will guarantee his workmanship — Safe-pack Mills guarantees their products and we stand back of both with our assurance of satisfaction.

This is a sweeping assurance of roofing insurance for you — but it's sincere.

That's why we sell Safekote Roofing — also why we sell so much of it.

If you contemplate building a home or re-roofing the old one — telephone, write or call on us, so that we may prove to you how economically — how beautifully — how permanently — Safekote roofings will meet your requirements.

Order Your Repairs Before the Rush Comes

Don't get caught this spring with implements that cannot be operated because of a few needed repairs.

A delay of a day or two in your busy season may result in big dollars-and-cents loss.

Here's a way to prevent delays later on. Right now, when you have plenty of time, take a complete inventory of your implement equipment. Go over every machine you plan to use this year—see if new boxes are not needed—if the plow shares are in usable shape—if all parts are whole. Jot down the needed parts on each machine, give us the list so that we can order such parts that we may not have in stock. We will supply the new parts to you quickly, so you can get your machines in ship-shape for your field work.

Don't forget, too, that genuine repair parts last longer, fit better and materially prolong the usefulness of your machinery.

While you are going over your equipment, you may find machinery that is beyond profitable repair. Remember, we have a full line of John Deere labor-saving, crop-producing implements. John Deere machinery, built to a high standard of quality, is the most economical in the long run.

Don't forget to order your repairs early. Last-minute ordering is usually costly.

Turnips,	" " " " " 1 to 1 1/2 lbs.	
Beans,	" " " " " 1 1/2 to 2 bu.	

Quantity of Corn Required to Plant an Acre, Five Grains in a Hill.

3 ft. x 2	18 qts.	3 ft. x 3	14 qts.
3 1/2 ft. x 3	10 qts.	3 3/4 ft. x 3	8 qts.
3 ft. x 4	7 qts.	4 ft. x 4	6 qts.

Number of Plants per Acre at Given Distances.

1 ft. x 1 ft.	43,560	9 ft. x 9 ft.	537
1 1/2 ft. x 1 1/2 ft.	19,360	12 ft. x 12 ft.	362
2 ft. x 2 ft.	10,800	15 ft. x 15 ft.	163
2 1/2 ft. x 2 1/2 ft.	6,969	18 ft. x 18 ft.	134
3 ft. x 3 ft.	4,840	20 ft. x 20 ft.	100
4 ft. x 4 ft.	2,722	25 ft. x 25 ft.	73
5 ft. x 5 ft.	1,742	30 ft. x 30 ft.	47
6 ft. x 6 ft.	1,210	40 ft. x 40 ft.	20

Quantity of Seed Required for a Given Number of Plants, or Number of Hills, or Length of Drill.

Asparagus,	1 oz. to 65 ft. of drill	Musk Melon,	1 oz. to 60 hills
Beets,	1 oz. to 50 ft. of drill	Okra,	1 oz. to 40 ft. of drill
Beans, Dwarf,	1 qt. to 100 ft. of drill	Onion,	1 oz. to 100 ft. of drill
Beans, Pole,	1 pt. to 150 hills	Onion Sets, small,	1 qt. to 4 ft. of drill
Carrot,	1 oz. to 150 ft. of drill	Parsley,	1 oz. to 150 ft. of drill
Cabbage,	1 oz. to 3,000 plants	Parsnip,	1 oz. to 200 ft. of drill
Cauliflower,	1 oz. to 3,000 plants	Peas,	1 qt. to 100 ft. of drill
Celery,	1 oz. to 4,000 plants	Pumpkin,	1 oz. to 40 hills
Cucumbers,	1 oz. to 50 hills	Pepper,	1 oz. to 2,000 plants
Corn,	1 qt. to 400 hills	Radish,	1 oz. to 100 ft. of drill
Dandelion,	1 oz. to 200 ft. of drill	Salsify,	1 oz. to 70 ft. of drill
Endive,	1 oz. to 150 ft. of drill	Spinach,	1 oz. to 100 ft. of drill
Egg Plant,	1 oz. to 2,000 plants	Squash, early,	1 oz. to 50 hills
Lettuce,	1 oz. to 4,000 plants	Squash, marrow,	1 oz. to 16 hills
Leek,	1 oz. to 100 ft. of drill	Tomato,	1 oz. to 3,000 plants
Watermelon,	1 oz. to 80 hills	Turnip,	1 oz. to 150 ft. of drill

One Gallon, by the U. S. Standard Unit of Liquid Measure contains 231 cubic inches.

The U. S. Bushel contains 2,150.42 cubic inches.

An Acre contains 43,560 square feet.

USEFUL CHEMICAL MEMORANDA

(Partly from the first annual report of the Connecticut Agricultural Experiment Station, 1876.)

Animal and vegetable substances, such as flesh, bone, wood, grain, manure, and the like, contain three classes of materials: Water, Organic Matters and Mineral Matter or Ash. If we heat a piece of wood, a whisp of hay, a bone, or a portion of manure or soil, in an oven, the water will be dried out. If we put the dried material in the fire, the *Organic Matter*, which consists mostly of the chemical elements, carbon, oxygen, hydrogen, and nitrogen will be burned away, and there will remain the *Mineral Matter or Ash*. The ash of these different materials generally contains more or less potash, soda, lime, magnesia, iron, alumina, silica, phosphoric acid, sulphuric acid, chlorine, or other ingredients. The proportions of these vary widely in different substances, from the large quantities to the merest traces.

Moisture.—All fertilizers contain more or less water, which, of course has no commercial value, and serves to make them heavier and relatively poorer in valuable ingredients. In the analysis that which is removed by heating to 212° Fahrenheit (or in some cases to a somewhat higher temperature), is designated as moisture. By subjecting the dried material to a higher temperature, the organic and volatile matters are driven off, and the ash remains. By treating this ash with strong acids, all that is of any value is dissolved.

Sand and Insoluble Matters.—The residue, which resists the action of both fire and strong acids, consists of silica and other mineral matters. These possess no fertilizing value, and are classified as sand, etc.

Nitrogen, Ammonia.—In our ordinary fertilizers, much or all of the nitrogen exists in unavailable forms. By more or less rapid alterations, by decay or otherwise which take place in the soil, these are changed to other compounds, which the plant can readily use as food. Of these latter nitric acid, which contains nitrogen combined with oxygen, is one; ammonia which consists of nitrogen and hydrogen and is represented by the chemical formula NH_3 is another. 14 parts by weight of nitrogen unite with 3 parts of hydrogen to form 17 parts of ammonia. Accordingly 14 parts of nitrogen are said to be equivalent to 17 of ammonia, or what is the same thing 100 parts of nitrogen are reckoned as equivalent to 121 parts of ammonia. In pure sulphate of ammonia, all the nitrogen is in the form of ammonia. In Peruvian guano, some of the nitrogen exists as ammonia also. In our ordinary fertilizers there is little or no ammonia. The very common practice of reckoning nitrogen as ammonia in fertilizers which do not contain it in this form is incorrect, misleading and therefore wrong, and ought to be abolished. Ammonia combined with sulphuric acid, forms sulphate of ammonia; nitric acid combined with soda, forms nitrate of soda.

Phosphoric Acid: SOLUBLE, REVERTED AND INSOLUBLE.—By phosphoric acid is understood the compound of phosphorous and oxygen, which is represented by the chemical formula, P_2O_5 . This combined with lime, forms phosphate of lime. The phosphate of lime which occurs in bone, and in South Carolina and other fossil and mineral phosphates, contains three parts of lime to one of phosphoric acid. This is often called bone phosphate, and is insoluble in water. When the bone phosphate is treated with sulphuric acid, the latter takes part of the lime to itself, forming sulphate of lime, and leaves the phosphoric acid in the form of a *Superphosphate*. This last is soluble in water, and when used as a fertilizer can be taken up by the plant at once, while the bone phosphate is slowly available as plant food. Phosphoric acid which has been rendered soluble, often enters into other forms of combination with lime, alumina, etc., which, though insoluble in water, are soluble in citrate of ammonia. The terms, reverted, reduced and precipitated, are applied to it when in this form,

The reverted phosphoric acid ranks in solubility, and consequently in values between the soluble and insoluble. The soluble and reverted are sometime, classed together as *Available* phosphoric acid.

In some analyses the percentage of phosphoric acid is not stated separately, that of "bone phosphate of lime" being given in its stead. Sometimes the expression "soluble bone phosphate of lime" is met with, which is certainly a misnomer. 142 parts by weight of phosphoric acid P_2O_5 unite with about 168 parts of lime CaO to form 310 parts of bone phosphate $Ca_3(PO_4)_2$; 100 parts or pounds of phosphoric acid are said, therefore, to be equivalent to 218 parts of bone phosphate. Special stress is laid on this point, because those not familiar with chemistry are apt to be deceived in comparing analyses, in some of which the term phosphoric acid, and in others the term bone phosphate, is used. It would be more accurate and clear, and in every way better to discard the term bone phosphate of lime in analyses of fertilizers, and speak only of phosphoric acid.

Potash, or potassa, is the compound of the metal potassium with oxygen, which is represented by the chemical formula K_2O or KO . This combined with sulphuric acid forms sulphate of potash. Potassium and chlorine together form chloride of potassium, or "muriate of potash," as it is called by dealers.

100 pounds of pure sulphate of potash contains about 54 pounds of "actual potash." 100 pounds of sulphate of potash are therefore said to be equivalent to 54 pounds of actual potash, and vice versa, 54 pounds of potash, in the sulphates are reckoned as equivalent to 100 pounds of sulphate of potash. In the "muriates" 100 pounds of chloride of potassium are reckoned equivalent to about 63 pounds of potash, and vice versa.

Carbonate of Potash, K_2CO_3 . — This fertilizer chemical is the ingredient which gives to wood ashes and cotton hull ashes their value as tobacco fertilizers, and it is practically free from magnesia. It was formerly prepared by extraction from wood ashes, and formed the "pearl ash" of commerce. It has been used with good effect as a tobacco fertilizer in the Poquonock experiments.

The following figures will be found useful in calculations of the composition of fertilizers.

NITROGEN COMPOUNDS

14.	parts of Nitrogen	are contained in	17.	parts of Ammonia.
