WHOLESALE PRICE LIST

SPRING 1929

JOSEPH VAVRA

P. O. BOX 728

HUNTINGTON BEACH

CALIFORNIA

TO THE TRADE

Our planting of dahlias for this season was very much below normal, owing to heavy losses last winter on account of excessive rainfall before the roots were dug, and the consequent shortage of planting stock in the spring. For this reason our wholesale list is not as complete as usual and the quantity of many varieties offered is comparatively small.

TERMS OF SALE

All quotations in this list are for strong divisions of field grown roots; we do not ship undivided clumps.

Three roots of one variety will be furnished at the dozen rate, and twenty-five at the hundred rate; these prices are f. o. b. Huntington Beach, no charge for packing.

When less than three roots of a variety are ordered they will be charged for at our regular retail rates, and will be shipped carriage charges prepaid.

Remittances should be made by draft, money order or check. Do not send stamps or currency unless the letter is registered. This is for your protection as we cannot be held responsible for money lost in the mail.

The prices quoted in this list are allowed only to those regularly established in any of the Horticultural Trades, so when ordering kindly use your business stationery or state your trade connections in order to avoid unnecessary delay.

NON-WARRANTY

While we exercise the greatest care to have our stock true to name, and hold ourselves in readiness, upon proper proof, to replace any found otherwise, we give no warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds, bulbs or plants we send out and will not be in any way responsible for the crop.

DAHLIA SEED

Raising dahlias from seed is becoming more and more popular every season both by commercial growers and home gardeners; probably the main reason for this is because a very high grade of dahlia seed is now available from Southern California at reasonable prices.

A few years back the only seed obtainable was European grown and was produced chiefly from single varieties, because, in countries where frosts kill the plants early in the season, single dahlias are about the only ones which will produce seed.

The climatic conditions in Southern California are such that dahlia seed produced here is superior to that grown anywhere else. Because of the long growing season, the seed need not be harvested until late in the year, usually during December; this condition allows the best and most double varieties to form seed, which is not possible in localities where the growth is stopped earlier in the season.

All our seed is carefully cleaned and hand picked, assuring the highest possible germination when grown. It is not hand pollenized as we depend entirely on natural agencies for crossing the pollen from different varieties.

STANDARD GRADE. This is the bulk of our crop and is a high grade seed containing all of the different types of dahlias. Every season we sell a large quantity of this grade to seedsmen for re-sale purposes. It may be had in separate types; **Decorative, Hybrid Cactus, Cactus, Peony, Show, Collarette, Pompon or Mixed.** Price in bulk: \$1.00 per trade packet; \$2.00 per ounce; \$24.00 per pound.

Regular retail packets: 25c size—\$2.00 per dozen.
 50c size—\$4.00 per dozen.
 \$1.00 size—\$8.00 per dozen.

EXTRA SELECTED MIXED. This is as choice a grade of seed as can be produced anywhere, and we are positive that it will produce as many fine seedlings as any strain of seed on the market today, no matter at what price it may be advertised. The utmost care is used in the selection of the parent plants for this mixture and the varieties are strictly limited to the decorative, hybrid cactus and peony types; all others are excluded, and only those are taken which have the largest flowers in the most desirable colors and with perfect stems. Price in bulk: \$1.00 per trade packet; \$4.00 per ounce.

Regular retail packets: 50c size—\$4.00 per dozen.
 \$1.00 size—\$8.00 per dozen.

SPECIAL GRADE. Many growers prefer to plant dahlia seed of known parentage. To supply this demand we keep separate, each season, the seed from about twenty-five different varieties, and offer it under the name of the parent plant. It is not possible to submit a list of these varieties at the time this is written, because our seed harvest has not started, and, of course, we cannot know what seed will be available. However, after January fifteenth we will be pleased to send, upon special request, the list of varieties to anyone interested.
