Washington Nursery Company

Toppenish, Washington

[In the Famous Yakima Valley]

Experienced.....Organized.....EquippedTo Render You Good Service

You benefit by the experience, organization and equipment of the nursery with which you deal. When you buy nursery stock you purchase a live, perishable commodity, the genuineness and quality of which cannot be fully determined by casual examination. Considerable dependence must be placed in your nurseryman.

EXPERIENCE—The men who grow, pack and ship our goods have spent years in the business. For twenty-three years we have been engaged exclusively in the nursery business at Toppenish.

ORGANIZATION—From the time young nursery stock is "lined out" in our nursery until it reaches you for planting, a trained, skilled organization is in charge of every stage of growing, digging, packing and shipping. Nothing is left undone and no proper expense spared to produce clean, thrifty, vigorous, well rooted stock.

EQUIPPED—The finest soils of the Yakima Valley are selected for our growing purposes. Not more than one crop of trees is ever produced on the same ground. Our climate conditions are right, the growing season is long, we have moisture under control. Two big insulated packing plants constructed with eight-inch insulated walls and roofs, covering over 30,000 square feet of area, afford the utmost protection during grading, packing and shipping.

GUARANTEE—Stock is guaranteed to arrive in a live, fresh condition for planting; to be true to name; and free from pest or plant disease. It is obvious that we cannot guarantee that customers will make trees live, as we have no control over conditions surrounding them and the care they will receive after leaving our hands. If by any chance any stock is not received in good condition please advise us at once.

HALF PRICE REPLACE

Stock failing to grow after receiving reasonable care will be replaced at half the regular retail price providing the Nursery is notified by August first following date of delivery.

WASHINGTON NURSERY COMPANY.

3½-5 ft.-----	1.25	1.00	.90	.70	.65
✓ Early Richmond		Late Duke		✓ Montmorency Large	
✓ English Morello		May Duke			

CHERRY POLLINATION: Probably in no class of fruits are the results of proper pollination more evident than in the case of the sweet cherry. Most varieties, such as Royal Ann, Lambert and Bing, are not sterile but intersterile. It is only by making about every ninth tree of the planting some such varieties as long-stemmed Waterhouse, Black Republican, Black Tartarian, Gov. Wood and Mazzard that best results can be obtained. Effective pollination of cherries has been known to double and even treble the production of otherwise less productive trees.

We suggest Early Richmond as pollenizer for the Montmorency.

✓ PLUMS

PLANT THE YAKIMA PLUM FOR ROADSIDE MARKETING

The selling of fruit from stands along roadsides is a new and rapidly developing phase of American life. Maximum prices are received for fresh farm products marketed in this manner. Many farmers are taking advantage of this situation and planting varieties particularly adapted to this purpose.

WINDBREAKS

(1 year whips)

Windbreaks are a necessity in many sections between the Cascades and Rocky Mountains. They protect the home, orchard, garden and barnyard, both in winter and summer and add greatly to the value of any property. At the prices quoted here you can plant a good windbreak at very little cost.

Box Elder, Carolina Poplar, Lombardy, Poplar and Canadian Poplar. (Not less than 25 of a variety sold)

	Per 25	Per 50	Per 100	Per 500	Per M
3-4 ft.....	\$5.00	\$8.00	\$15.00	\$65.00	\$125.00
4-6 ft.....	6.00	9.00	17.50	80.00	150.00
Chinese or Siberian Elm. Hardy, rapid growing, dry land elm, branches heavily from ground up. Not less than 25 sold.					
2-3 ft.....	5.00	8.00	15.00	65.00	125.00
3-4 ft.....	6.00	9.00	17.50	80.00	150.00

EVERGREENS

The use of Evergreens is increasing but a word of caution should be said about them. One should be careful to plant around foundations and under windows only the dwarf types, Juniper canadensis, Juniper Pfitzeriana, Juniper Savin and Mugho Pine. For planting at the corner of the house to give accent to the planting or in the side yard use the Arbor Vitae, Berckman Golden and Pyramidal; Juniper Irish and Virginian. For large yards where plenty of space is available or for windbreak or screen purposes use Arbor Vitae, American and Oriental; Fir, Concolor and Douglas; Spruce Colorado Blue, Colorado Green and Norway.

TIME OF DELIVERY—East of Cascades, **SPRING DELIVERY ONLY.**
West of Cascades, fall or spring delivery.

HARDINESS. All varieties listed are hardy east of the Cascades.

PROTECT FROM DOGS. Evergreens should be surrounded with a wire screen at least 2 ft. high to protect from dogs.

EVERGREEN ORDERS MUST BE ACCOMPANIED BY DEPOSIT.

ALL EVERGREENS ARE SOLD F. O. B. TOPPENISH.

Write orders for evergreens on a separate order blank. Customers should be instructed to give extra care to evergreen stocks in the way of liberal moisture, etc.

All evergreens carefully balled and burlapped.

ALMOND —Double pink. Beautiful, small shrub. Bears in May, small rose-white flowers, 4 to 5 ft.	\$1.00	\$10.00
ALMOND —Double White. Same as above except white flowers.	1.00	10.00
BARBERRY—JAPANESE (THUNBERGI) . Immune from wheat rust; beautiful, small, compact; somewhat thorny; bright red leaves in autumn; red berries all winter; fine for hedge, 3 feet.	.60	6.00
BARBERRY—REDLEAF . Same as above except foliage red. Should be planted in the sun.	1.00	10.00
BUTTERFLY BUSH —Rapid, spreading growth. Flowers are lilac marked with yellow, borne in spikes nearly a foot long, extremely fragrant; blooms August-September; 15 ft.	.85	8.50
CALYCANTHUS FLORIDUS (Sweet-scented Shrub). The wood is fragrant; foliage rich; flowers are of chocolate color, having a peculiarly agreeable odor, blooms in June and at intervals afterwards. Ultimate height 4 to 5 ft.	1.00	10.00

SHRUBS--Continued

CORALBERRY —Small graceful shrub attaining height of 2 to 4 ft. Leaves bright green and tinged with red-dish purple when young. Covered with red berries all summer.....	.50	5.00
COTONEASTER —Peking (Acutifolia). A dense growing shrub with small, oval glossy dark-green leaves, 7 ft.....	.75	7.50
CRANBERRY BUSH —European (Viburnum Opulus). Handsome dense foliage; flowers white in May; brilliant scarlet fruit in showy bunches all winter; NOT FOR EATING, 8 ft.....	1.00	10.00
DEUTZIA LEMOINE —Dwarf growing; white flowers; blooms in June; very hardy. 3 to 4 ft.....	.85	8.50
DEUTZIA—PRIDE OF ROCHESTER , Said to excel others in size of double white flowers; vigorous; 5 to 6 ft.....	.85	8.50
DEUTZIA—ROSE PANICLE . Flowers double white tinged rose outside. 6 ft.....	.85	8.50
DEUTZIA—SLENDER (GRACILIS) . Similar to Lemoine but not so large a grower. 2 to 3 ft.....	.85	8.50
DOGWOOD—CORAL (Redtwig) . Branches bright red particularly conspicuous in winter; growth erect. Flowers creamy; berries light blue. 8 to 10 ft.....	.75	7.50
DOGWOOD—GOLDENTWIG . Bush-like habit. Bright yellow branches. 8 ft.....	.75	7.50
EUONYMUS—WINGED (Alatus) Corky winged branches. Leaves bright green with gorgeous tones of red and crimson in autumn. 8 ft.....	1.00	10.00
ELDER—GOLDEN LEAVED . The finest golden coloring of all the hardy shrubs, entire foliage remaining bright, beautiful golden color throughout the summer. Ultimate height 8 to 10 ft.....	.85	8.50
FORSYTHIA—BORDER (INTERMEDIA) . Slender arching branches. Golden yellow, very showy flowers. 8 ft.....	.85	8.50
FORSYTHIA—WEeping (SUSPENSa) . Drooping, pendulous yellow flowers. Blooms in early spring, 6 to 7 ft.....	.85	8.50
HONEYSUCKLE—MORROW (Japanese Bush Honeysuckle). Flowers pure white changing to yellow. Berries red or yellow and showy. 8 ft.....	.85	8.50
HONEYSUCKLE—RED TARTARIAN . Pink flowers which contrast most beautifully with the foliage. Red fruit also ornamental. 10 ft.....	.85	8.50
HONEYSUCKLE—WINTER (FRAGRANTISSIMA) . Fine new variety. Spreading branches, bright green leaves persisting to midwinter. Flowers creamy white or light yellow. 6 to 8 ft.....	1.00	10.00
HOLLYGRAPE (OREGON GRAPE) —An ornamental evergreen shrub, with dark, lustrous green, spiny-toothed leaves and yellow flowers in dense clusters, followed by blue or nearly black berries. SELL IN WASHINGTON ONLY. 3 ft.....	2.00	20.00
HYDRANGEA—PEEGEE (PANICULATA GRANDIFLORA) . White flowers in panicles 1 foot long. July-October. 3½ ft.....	1.00	10.00
HYDRANGEA—SNOWHILL (ARBORESCENS) . Blooms from June till autumn frosts; 4 to 5 feet breadth and height.....	1.25	12.50
KERRIA—DOUBLE , Flowers clear yellow, similar to a small double rose. Branches long, slender, erect, with bright green bark. 2½ ft.....	1.00	10.00
LILAC—BELLE DE NANCY . Very large, double, brilliant satiny rose, white toward center.....	1.25	12.50
LILAC—Common Violet Free bloomer , very fragrant, 8 ft.....	.75	7.50

SHRUBS--Continued

LILAC—COMMON WHITE. Same only white bloom. 8 ft.	.75	7.50
LILAC—CHARLES THE TENTH. Reddish purple; single; trusses rather loose. A strong, rapid grower, 6 to 8 ft.	1.25	12.50
LILAC—CHAS. JOLY. Dark purplish red; double. One of the darkest	1.25	12.50
LILAC—MICHAEL BUCKNER. Dwarf plant; very double, light blue	1.25	12.50
LILAC—MADAM LUDWIG SPAETH. Single, large long panicles, flowers purplish-red; finest of its color	1.25	12.50
LILAC—PERSIAN. Medium size, small leaves, bright purple flowers	1.00	10.00
LILAC—PRESIDENT GREVY. A beautiful blue; individual flowers very double and very large. The panicle is magnificent and measures 11 inches in length and 5 inches across	1.25	12.50
LILAC—SENATOR VOLLAND. Double flowers. Rosy red	1.25	12.50
MOCKORANGE—SWEET (PHILADELPHUS CORONARIUS). White, sweet scented flowers; bloom in June. 10 ft.	.85	8.50
MOCKORANGE—GOLDEN. Medium size; golden yellow foliage; very pretty. 3 to 4 ft.	1.25	12.50
MOCKORANGE—LEMOINE. Upright growth; small yellowish white, fragrant flowers, completely covering bush. May and June. 4 to 5 ft.	.85	8.50
MOCKORANGE—VIRGINAL. Vigorous and tall; flowers in dense clusters, large and double; pure white, 6 ft.	1.00	10.00
PRUNUS CISTENA (Purple Leaf Sand Cherry). Cross between Purple Leaf Plum from Persia with the South Dakota Sand Cherry. Rich red foliage in early spring, later turning to purplish green during summer. Valuable for its color contrast. 5 ft.	1.00	10.00
QUINCE—FLOWERING (CYDONIA JAPONICA). Large brilliant blossoms, blooms early spring. Growth straggling but can be pruned to desired shape. 6 to 8 ft.	1.00	10.00
SNOWBALL—COMMON. Large size, pure white flowers, blooms in May. 8 ft.	1.00	10.00
SNOWBERRY—COMMON. A popular hardy shrub of medium size and bush form; leaves oval and smooth; small pink flowers in summer followed by large, waxy white berries in autumn; persisting into midwinter. 6 ft.	.50	5.00
SPIREA—ANTHONY WATERER. Dwarf grower, 24 in.; fine for edging; flowers magenta red, turning pink, blooms from June to October. 2½ ft.	.75	7.50
SPIREA—BRIDAL WREATH (PRUNIFOLIA). Very beautiful flowers like small white daisies. Early spring. 3 ft.	.85	8.50
SPIREA—BILLARDI. Long pink spike of feathery bloom. 5 ft.	.85	8.50
SPIREA—FROEBEL. Crimson flowers in flat panicles. Medium to dwarf in size. Excellent for shrub groups. 3 ft.	.85	8.50
SPIREA—GARLAND (ARGUTA). Free bloomer and showy shrub. Flowers small and pure white in early spring. 4 to 5 ft.	.85	8.50
SPIREA—GOLDEN. White flowers. Blooms in June. 2 to 3 ft.	.85	8.50
SPIREA—THUNBERG. Small white flowers; blooms early spring; rounded, dwarf bush; branches somewhat drooping; 4 to 5 ft.	.85	8.50

SHRUBS--Continued

SPIREA—VAN HOUTTE. One of the best shrubs; does well any location; very ornamental; dense clusters white flowers; fine single or in group or hedge; blooms early May. 5 to 6 ft.	.85	8.50
SYRINGA—GARLAND. (Same as Sweet Mockorange).		
TAMARIX HISPIDA. A very beautiful shrub or small tree; feathery green foliage; pink bloom, solid mass of color in June. Erect and shapely growth. Fine in sandy soil. Ultimate height 12 to 15 ft.	1.00	10.00
WEIGELA—EVA RATHKE. Carmine blooms in great profusion. 3 to 4 ft.	1.25	12.50
WEIGELA PINK (ROSEA). Elegant shrub; rose colored leaves; hardy. May. 5 to 6 ft.	1.25	12.50
WEIGELA—VARIEGATED. Leaves bordered yellowish white, pink flowers, June. 3 to 4 ft.	1.25	12.50

HEDGE PLANTS

BARBERRY—JAPANESE (THUNBERG) For untrimmed hedge—	25	50	100	500	1000
8 to 10 inches.	\$5.00	\$8.00	\$15.00	\$68.00	\$125.00
PRIVET—EUROPEAN— Fine for trimming if stiff, formal hedge is desired.					
12 to 18 inch.	5.00	8.00	15.00	68.00	125.00
18 to 24 inch.	6.00	9.50	18.00	82.50	150.00

NOTE—In planting hedges, the Privet should be planted 6 inches apart if set in a single straight row, or 12 inches apart if set in a double row and plants set "staggered" in the rows. Barberry can be set 12 to 18 inches apart for hedge purposes.

VINES

CLEMATIS—	Each	Dozen
HENRY (white flowers)	1.25	12.50

DAHLIAS

(Spring Planting Only)

CACTUS— Long, narrow, twisted, pointed petals. In either pink, red, white or yellow	.25	2.50
DECORATIVE— Large, open faced, flat petals. Free blooming. Pink, red, white or yellow	.25	2.50

PEONIES

(Fall Planting Preferred)

WHITE

ALBATRE. Ivory white. Late midseason.....	1.50	15.00
DUKE OF WELLINGTON. Sulphur white. Late.....	1.25	12.50
FESTIVA MAXIMA. Pure white. Early.....	1.00	10.00
MAD. DE VERNEVILLE. White suffused with blush.		
Free blooming. Early.....	.75	7.50
MARIE LEMOINE. Ivory white. Late.....	.75	7.50

PINK

ALBERT GROUSSE. Sea-shell pink. Late.....	1.50	15.00
DORCHESTER. Large, full, light pink. Late.....	1.00	10.00
FLORAL TREASURE. Delicate pink. Early midseason.....	.75	7.50
MONS. JULES ELIE. Very large flowers, clear pink.		
Early mid season.....	1.50	15.00

RED

FELIX CROUSSE. Rudy red. Medium late.....	1.50	15.00
FRAGRANS. Sulferino red. Very late.....	.75	7.50
L'ECLETANTE. red. Midseason.....	1.00	10.00

IRIS

"S" refers to the three standard or upright curling petals; "F" to falls or drooping petals.

	Each	Doz.
ALCAZAR. Large bicolor. S. Light violet-bronze; F. Deep reddish-purple. 3½ ft.....	\$.35	\$ 3.50
ISOLENE. A grand and distinct Iris. S. pinkish buff; F. Chinese violet, tinted yellow. 3 ft.....	.35	3.50
KOCHI. Very early flowering Iris, of deep, blackish purple. Very popular. 24 inches.....	.35	3.50
LOHENGRIN. S. light mauve; F. Chinese violet, both somewhat ruffled. 3 ft.....	.35	3.50
LORELEY. Very profuse bloomer. S. yellow, splashed purple; F. purple, bordered yellow.....	.35	3.50
MAY QUEEN. Delightfully fragrant, and the best of the old "pinks." 30 inches.....	.35	3.50
SANS SOUCI. Blooms medium size, standards clear, golden yellow; falls veined with maroon. Usually single bloom borne on sturdy straight stem. Very brilliant and showy		
SIBERIAN. One of the most beautiful and graceful of Iris. Flowers borne on strong erect stems, dark purple	.35	3.50

ROSES

CHOICE FIELD GROWN—NOT HOT-HOUSE GROWN

Do not confuse our choice stock with the small, tender, hothouse plants offered by mail order houses at cut prices—such plants always prove a disappointment, for if they do live one must wait two years before they bloom.

ABBREVIATIONS USED TO DESIGNATE THE VARIOUS CLASSES OF ROSES

H. P., HYBRID PERPETUAL—

Hardy, vigorous and easily grown. Though called perpetual, they are not such free bloomers as the Hybrid Teas and Teas, but bloom only at intervals during the summer and fall. Recommended for planting in any section east of the Cascades and in the higher elevations wherever roses can grow.

ROSES--Continued

H. T., HYBRID TEA—

A cross between the hardy Hybrid Perpetuals and the deliciously scented Tea Roses. Not so hardy as the Hybrid Perpetuals, but freer bloomers and more fragrant. This is the so-called "monthly blooming" class. Not recommended for planting where winter temperature gets below 15 degrees below zero unless one is prepared to give extra winter protection.

T. TEA—

These are the favorites where they can be successfully grown on account of their everblooming qualities, fragrance, delicate colors, and fine forms. Good for growing indoors in winter. Not hardy and recommended only for the milder sections west of the Cascades.

POLY. POLYANTHA—

Delightful for massing in beds, or as edges for borders or beds of taller growing roses. Their small, neat flowers are produced in large clusters, entirely covering the plant, through the summer and fall. They are useful for indoor as well as outdoor growing. With grow wherever the Hybrid Perpetuals will grow.

WICH. WICHURAIANA ROSES AND THEIR HYBRIDS—

An almost evergreen type that creeps along the ground and covered, when in bloom, with immense bunches of single roses. Some of them, such as Dorothy Perkins, are double, are good climbers and very beautiful. Excellently hardy.

PER. PERNETIANA—

A new race originated by Pernet-Ducher, famous rosarians of France, and which is becoming very popular, being absolutely hardy and free blooming.

PINK ROSES

	Each	Doz.
CHEERFUL—(H. T.)—Clear pink, shaded orange and yellow.....	\$.85	\$ 8.50
COLUMBIA—(H. T.)—True pink to glowing pink.....	1.00	10.00

GLORIE DE DIJON—(Nois.)—Lemon yellow.....	.85	8.50
PAUL'S SCARLET CLIMBER—(H. Wich.)—Vivid scarlet shaded crimson.....	.85	8.50
TAUSENDSCHOEN—(Poly.)—Pink or rosy carmine.....	.60	6.00

RUGOSA ROSES

ROSA RUGOSA—Hardy. Plant is ornamental and it flowers abundantly in June and from then till fall.....	.75	7.50
PRAIRIE ROSE (Rosa Setigera)—The plants are vigorous growers, 6 ft. or more high with long gracefully recurving branches completely covered with flowers.....	.75	7.50

HOW TO PLANT ROSES

Dig the hole eighteen inches deep; cut off broken or injured roots; hold the plant in position, spread out the roots so they do not cross or crowd one another at any point, fill in the holes carefully with the fertile top soil, pressing it firmly in about the roots. A small handful of finely ground bone meal sprinkled in is very helpful. Water should be used to wash the soil well in around the roots. After the hole has been filled and pressed in firmly and packed well, cut back the tops one-half to two-thirds, then mound loose dirt up about them for six to ten inches. This mound of dirt should be placed about the canes whether the roses are planted in the fall or spring, otherwise they are apt to dry out.

If the roses are planted in the fall, this mound should be covered with a thick mulch of straw and leaves. As soon as the buds start to grow, rake away the mound and cut back the canes leaving two to four buds to each cane. Make this cut just above a sound outside bud, so the new canes will grow outward and make a shapely bush.

When planting budded roses, the point where the bud was inserted in the stock (as shown by "A") should be set several inches below the surface of the ground.

Watch out for sucker growth which might spring up from the wild rose roots, cut it off as soon as it appears. You can easily distinguish it from the top growth as it is more thorny and has seven leaves on each leaf stem while most domestic roses have five leaves.

FUNDAMENTAL PRINCIPLES OF ARRANGEMENT

There are certain basic principles of landscaping easily mastered by anyone and with which we should all be familiar.

First: "Tie" the house to the ground with a planting of shrubs around the foundation which will break the sharp angle caused by the house meeting the ground and make it "melt" or nestle into its surroundings. For this purpose you will, of course, want the low growing shrubs, unless your house rests on a very high foundation. In corners where there are no windows you can plant some of the higher shrubs, massing the lower ones in front. As a general rule the prevailing height of the shrubs around the rest of the house should be no higher than the bottom windows. In order, however, to avoid monotony plant slightly higher shrubs between the windows.

Plant masses of shrubbery around the lawn or outer border of your place to give it a distinct outline. Use the larger ones for the background, working down to the smaller ones directly in front.

Our landscape department can help you. Tell us your planting problems.

TO HELP YOU SELECT WHAT SHRUBS YOU WILL NEED for the different purposes mentioned, the following table showing color, period of bloom and approximate height has been arranged, with this you can easily select just what shrubs are best suited for the purposes intended.

Blooming period given applies to Yakima Valley. Same relative periods will apply elsewhere.	Color of Bloom	Period of Bloom	App'imate Height
Almond, Pink	Pink	April	4 to 5 ft.
Almond, White	White	April	4 to 5 ft.
Barberry, Jap			3 to 4 ft.
Barberry, Redleaf			3 to 4 ft.
Butterfly Bush	Light purple	July-Sept.	12 to 15 ft.

Calycanthus Floridus	Brown	April-May	4 to 5 ft.
Coralberry			3 to 4 ft.
Cotoneaster Acutifolia			4 to 5 ft.
Cranberrybush	White	May-June	8 ft.
Deutzia, Lemoine	White	June	3 to 4 ft.
Deutzia, Pride of Rochester	White	May-June	5 to 6 ft.
Deutzia Rosea	Light pink	June	6 ft.
Deutzia Slendor	White	June	2 to 3 ft.
Dogwood Coral	Creamy white	April-May	8 to 10 ft.
Dogwood, Goldentwig			8 to 10 ft.
Euonymus Winged			6 to 8 ft.
Elder, Golden leaved			8 to 10 ft.
Forsythia Border	Yellow	March-April	8 ft.
Forsythia, Weeping	Yellow	March-April	6 to 8 ft.
Honeysuckle	White-lt. cream	April-May	8 ft.
Honeysuckle, Red Tartarian	Pink	April-May	10 ft.
Honeysuckle, Winter	White	April-May	6 to 8 ft.
Hollygrape			3 to 4 ft.
Hydrangea Peegee	White-bronze	July-Oct.	5 to 6 ft.
Hydrangea Snowhill	White	June-Oct.	4 to 5 ft.
Kerria Double	Yellow	May	2½ ft.
Lilac, Belle de Nancy	Rose pink	May	8 to 10 ft.
Lilac, Common Violet	Purple	May	8 to 10 ft.
Lilac, Common White	White	May	8 to 10 ft.
Lilac, Chas. the Tenth	Red	May	6 to 8 ft.
Lilac, Chas. Joly	Purplish red	May	6 to 8 ft.
Lilac, Michael Buckner	Light blue	May	3 to 4 ft.
Lilac, Mad. Ludwig Spaeth	Purplish red	May	6 to 8 ft.
Lilac, Persian	Light purple	May	8 to 10 ft.
Lilac, Pres. Grevy	Blue	May	8 to 10 ft.
Lilac, Senator Volland	Red	May	8 to 10 ft.
Mockorange, Sweet	White	June	19 ft.
Mockorange, Golden	White		3 to 4 ft.
Mockorange, Lemoine	White	June	4 to 5 ft.
Mockorange, Virginal	White	June & Oct.	6 ft.
Quince Flowering	Red or Pink	April	6 to 8 ft.
Snowball, Common	White	May-June	6 to 8 ft.
Snowball, Japanese	White	May-June	6 to 8 ft.
Snowberry, Common	Pink	June	6 ft.
Spirea Anthony Waterer	Red	July-Oct.	2 ft.
Spirea Bridal Wreath	White	April	3 ft.
Spirea Billardi	Pink	June-July	5 ft.
Spirea Froebel	Red	July-Oct.	3 ft.
Spirea Garland	White	May	4 to 5 ft.
Spirea Golden			2 to 3 ft.
Spirea Thunbergi	White	March	4 to 5 ft.
Spirea Van Houtte	White	May	5 to 6 ft.
Tamarix Hispida	Pink	July-Oct.	12 to 15 ft.
Weigela Eva Rathke	Red	May	3 to 4 ft.
Weigela Rosea	Pink	May	5 to 6 ft.
Weigela Variegated	Pink	May	3 to 4 ft.

WATER PLENTIFULLY ALL NEWLY PLANTED STOCK

Very few realize the importance of watering heavily when planting, whether fall or spring. The ground should be thoroughly **SOAKED** around the roots at planting time, so roots will become firmly imbedded in wet soil.

When planting in the spring, Never Let The Ground Get Dry for at least ten weeks after planting. It is not possible to water too much during that period.

PLEASANT WORDS FROM A FEW OF OUR MANY PLEASED CUSTOMERS

FREEWATER, OREGON—

"I am in the market for cherry trees, Bings and also peach trees, Early and Late Crawford peaches. Have you 2 yr. roots 6 ft. I have very rocky land and want good rooted trees. I bought trees from you about 8 years ago and they are doing fine."

OLYMPIA, WASHINGTON—

"I am writing to tell you how well pleased we are with the trees purchased from you last fall. They are nice, clean, straight stock and well rooted, and we are well pleased with them."

DEETH, NEVADA—

"We will probably be in the market for more of the trees for this ranch. The results which we got from your stock last year have been very satisfactory."

ELLENSBURG, WASHINGTON—

"I am very much pleased with the trees you sent. I have never had nicer ones. In fact I am so pleased that I have decided to put out a few more so kindly send me 36 Delicious apple trees and 32 Bosc pear trees similar to those recently sent me."

PENTICTON, B. C.—

"In conclusion I wish to state that the shipment of fruit trees obtained from your firm this spring was very satisfactory as out of 70 odd trees only two (Red Romes) failed to make good. The others are away to a good start."

LOON LAKE, WASHINGTON—

"The trees I sold in there (Peach) last year are sure doing just wonderfully. J. B. W. showed me over his orchard planted last spring, he tells me he has had several fruit growers, tree inspectors and horticulturists look it over and they all pronounce it the finest young orchard they have ever seen. Mr. B's trees, too, are doing wonderfully well, in fact all the trees that you shipped in there last season are just doing fine."

PHOENIX, ARIZONA—

"Mrs. D. of Wickenburg, Arizona, with one of your roses put out April 10, 1928, on June 4, 1928, and 12 good roses on it."

OMAHA, NEBRASKA—

"The fruit trees I purchased from you in January, 1926, have all done exceptionally well, much better than those I had bought through a land salesman the year before."

AUBURN, WASHINGTON—

"I have intended for a long time to write to you and let you know of the wonderful growth our cherries which we purchased from you a year ago have made. Of the one hundred and fifty-seven trees only one has died. Inasmuch as they are in very sandy, dry ground we think that is wonderful and they have made a new growth of from three and a half to four feet and some of them stand at least eight feet high, so all in all we are very much pleased and only too glad to recommend your trees and also for the very kind help and courteous treatment from your agent, Mr. S."

SANTAQUIN, UTAH—

"Those Siberian Elms I planted surely have made a wonderful growth."

GRANTSVILLE, UTAH—

"I was well pleased last spring with my trees and those that are alive and growing now look fine. I wish to say in closing that all that Mr. J., your salesman, has told me about your trees and business dealings are right up to the minute and I can vouch for his own personal good will toward his customers and company he represents."

Home Beautifying as an Investment

A few dollars invested now in trees and shrubs will be returned to you four-fold. As a conservative estimate your property will increase in value to that extent if properly planted.

Think of the real joy, the increasing pride of ownership that trees and shrubs will bring you each season—added beauty, greater comfort, higher property value. Buildings have to be kept in repair; plants don't—they improve in appearance and value each season.

The line of ornamental trees and shrubs we offer is large and complete. All stock is hardy field grown—vigorous and robust with plenty of good roots, which means quick, satisfactory results.

Use Our Landscape Department

Our Landscape Department, in charge of a trained expert, will gladly help plan your planting and recommend the right shrubs to use. This Department has planned small and large homes, school and other public grounds, and large city parks throughout the Northwest. We are conversant with western conditions and the plant materials best suited to the requirements.

Let us help you make your home a beautiful home. Write us.
