Special Collections of Rock Plants

MAY 13 1909

UPPER BANK NURSERIES
MEDIA, PA.

We Specialize in Rock Gardens

Groups of plants for rock gardens of various
sizes, and a supplemental list of plants,
—being an addition to our catalog

We are always glad to welcome visitors to our gardens. Take the street from Media that passes the railway station, to end at Creek Road. Turn left and take first entrance on right crossing Ridley Creek.

Rock Gardens Are Popular

MOST gardeners wish to make their own selection of plants for their rock gardens so that they will fit into the scheme already established. Here a little pink is needed, there in that shady portion a dark purple may be just the thing to look best. We cannot foresee what is needed for a particular garden.

Some gardeners are just coming to an appreciation of the peculiar beauty and attraction of a rock garden.

They have grown in popularity tremendously the last few years. And they deserve to be popular. They are easy to start and not hard to keep in good shape. They provide a touch of color all the season around trees, at the steep side of a drive or terrace, or around the foundation of the house. They can be of almost any size desired and are adapted to the modest plot and the large estate.

We at the Upper Bank Nurseries are anxious to help you start or enlarge your rock garden. We try to keep on hand a variety of odd and unusual plants, flowering and otherwise, which will help give to the gardens of our patrons a certain air of distinction and exclusiveness.

To those who would enlarge their gardens this summer, we recommend suitable combinations of plants in three groups, depending upon the size of the garden.

Upon the last pages you will find also listed a few special plants which are more or less uncommon, and of which we have a limited supply. The descriptions will enable the gardener to pick those which he needs to add to the charm of his garden.

We are continually adding to the varieties of rock plants in our nurseries. Once in a while we have some special bargains of small lots of plants which we offer to our friends. If you would like to have your name upon our special list to receive infrequent announcements of displays in our gardens, new plants or special items please tell us so. Just telephone or send us a note: "Please put my name on your Special List."
