Bodger's

True Strain

IMPROVED

DAHLIA FLOWERED

Zinnias

Unusually good for summer and fall cut flowers. Numerous florists who have heretofore grown them in a large way tell us they would not be without a good sized planting of the same each season.

Florists who merchandise small plants to the public for garden planting will, no doubt, find these **Dahlia Flowered Zinnias** a most profitable line. Wherever shown, the blooms of above have created somewhat of a sensation.

JOHN BODGER

Founder of John Bodger & Sons Co. and Originator of Dahlia Flowered Zinnias

Excerpt from the *Florists Review*, issue April 25, 1929

ZINNIAS

"There are usually too few zinnia plants offered. Years ago these annuals were rather flouted at and despised, but today they stand much higher in the estimation of garden lovers. The habit of the plants is stiff, it is true, but there have been wonderful advances in both types and colors in late years and there is rarely any dying out in the open, as in the case of asters. Furthermore, zinnias flower over a much longer season than asters and are good for cutting and few annuals are more effective in the garden. There is still time to sow the seeds and have strong plants early in June, as it takes but a few days for the seeds to germinate. The dahlia-flowered types carry flowers of immense size and there is such a range of colors that one or more are sure to meet with the approval of even the most critical of color-scheme artists. For many folks, mixtures will answer admirably, but it is necessary to have separate shades of color to suit many buyers today."

BODGER'S IMPROVED DAHLIA FLOWERED ZINNIAS

(Illustrated in True Color on Opposite Page from a Painting by Winifred Walker)

Now the Most Popular Annual in the World of Gardening

Zinnias are among the most popular annuals in the market today. They are suitable for florists' use, for home gardens and household decoration. Their easy culture and long blooming season make them a profitable investment. Their varied forms and exquisite colors have brought them into prominence in flower shows both in the United States and other countries for the past ten years. The Dahlia Flowered type, introduced by the late Honorable John

Bodger, of California, in 1919, which received a Gold Medal and Award of Merit from the Royal Horticultural Society in London in 1924, set a new fashion in Zinnias. Since that time the firm of Bodger's have annually added to the varied forms and captivating colors in which Zinnias may be procured today. In the following pages are listed the latest novelties in Zinnias as well as some of the earlier introductions which should be better known.

List of Varieties and Prices of Bodger's Improved Dahlia Flowered Zinnias

Illumination. Similar to Exquisite, but a striking self color of deep rose. (Tyrian Rose.)

Meteor. A rich, glowing deep red (Spinal Red) and the darkest of all the red shades. Fine form, with good depths of petals. Very large.

Old Rose. This is adequately described by its name, as it is of the real old rose shade.

Oriole. An immense orange and gold bicolor, changing slightly as it ages, but at all times worthy of the beautiful bird for which it is named.

Polar Bear. A very large, pure white, the best white yet seen in Zinnias.

Scarlet Flame. A large, beautiful, bright scarlet, with a beautiful blending of orange throughout the petal. This is not a bicolor.

Buttercup. An immense, deep, creamy yellow. A very desirable flower.

Canary Bird. A delicate shade of primrose—very large and holds its color well until out of bloom.

Crimson Monarch. By far the largest and best of red shades.

Dream. A fine, deep lavender, turning to purple (Mallow Purple); a new, desirable shade in Zinnias.

Exquisite. Color, light rose with center a deep rose. (Tyrian Rose.)

Giant Attraction. A distinct shade of brick red (Spectrum Red) which carries its color well from the bud, and forms into an immense ball of color when in full bloom.

Golden State. A very rich orange-yellow (Cadmium). Yellow in the bud, turning to an attractive orange when in full bloom.

Price of each: Extra Size Trade Packet, 35c; ¼ oz., 60c; per oz., \$2.00.

Special Offer. One extra size Trade Packet, each of any seven varieties selected from above named list for \$2.00.

Special Mixture. A well-blended mixture containing the named varieties. Price Trade Packet, 25c; per oz., \$1.50.

A Message From Our President . . .

"THE LAW OF COMPENSATION"

We usually pay for exactly what we get—we get what we pay for, and in these days of mass production and sharp competition in many horticultural lines we believe it is imperative that the grower have care in his purchase of basic material to the end that he may realize a fair profit on his investment. We are jealous of our reputation for supplying to the trade "Supreme" quality

BULBS, SEEDS, AND PLANTS

at prices consistent with market values, and we shall leave no stone unturned to maintain this priceless possession. The success of this firm is due to that principle, real honest-to-goodness interest in their customers' needs, not for the dollar that it may bring, but because it is right.

We wish to take this opportunity to thank our many friends and clients for their past patronage, and hope for a continuance of their favors.

Awaiting your valued commands,

Faithfully yours,

AMERICAN BULB CO.

GRAFTED YOUNG ROSE PLANTS

FROM 2½ INCH POTS

The very satisfactory quality of grafted roses which Messrs. Bassett and Washburn supplied to our customers last season has induced us to again contract with this well known concern for delivery of a large quantity of same during 1930 season. Extensive and careful preparations are therefore now being made by said firm to graft for us, using especially Slocock's English Manetti. This is the best English Manetti

known to American rose growers.

Now is the time to order young grafted Rose plants. Early planting is the secret of success in growing Roses for the cut flower trade, as each Rose plant will only produce so many flowers and the early planting gives the young plant a chance to get well established to produce flowers during the winter months.

We list the following varieties:

PREMIER SUPREME—The finest of the Premier family.

JOANNA HILL—The new Yellow.

GOLDEN PERNET—This is much superior to Pernet.

RAPTURE—This variety is far superior to Butterfly, producing more flowers and a better color. It is also a healthier variety in every way.

MATCHLESS—This is the best Red—the ideal winter flower.

TEMPLAR—The old stand-by in Red.

MRS. FRANK PIERSON—The ideal of Christmas Red.

DOUBLE WHITE KILLARNEY—The true Budlong strain — comes pure White all during the hot weather months.

WILHELM KORDES—This is a great novelty Rose.

BRIARCLIFF—This is a great improvement over Columbia.

AMELIA GUDE—The most productive Yellow Rose of any variety of Rose.

\$25.00 per 100 .. \$225.00 per 1000

F. O. B., Hinsdale, Illinois

We can also furnish Talisman and Van Rossem in quantities if wanted. Prices quoted on application.

Grafted Plants will be ready for shipment during March.

Buying Imported and American Grown Forcing Bulbs in Advance of the Season

The general scarcity of Dutch, French, Japanese and other bulbs the past season is indicative, we believe, of a comparative like condition as regards supply of same for 1930 delivery and it would therefore appear to us that it behooves the trade to arrange for their needs along this line as early in the year as possible.

Such action on the part of the buyer enables us to anticipate requirements and take advantage of early quotations which are almost, if not always, invariably lower than prices ruling when shipping season opens.

Buyers should bear in mind that in making arrangements for their Bulb needs now they have all to gain since we guarantee market prices at time of shipment. Act at once for your own interests.

Why We Can Supply You with Bulb Stock to Advantage

Our establishments are located at central points, namely, New York and Chicago.

Personal inspection during growing and packing season.

A force of trained employees who "know bulbs," many of whom have had a lifetime training in this particular line.

We advance duty, forwarding, and all expenses, no charge is made for cases or packing, and our invoices show exactly the actual cost of produce placed on cars at American shipping point. Our terms of payment are liberal to buyers of time standing, such extension of time being allowed on duty and all expenses as well as on cost of bulbs (we do not collect for such at time of shipment as occurs when you import direct); shipping f. o. b. New York or Chicago, thus eliminating all worry and possibility of broker's overcharge to the buyer. Our experts visit the most prominent bulb forcing centers of this country during flowering season as well to keep in close touch with the public demand, thereby insuring our customers varieties that are in keeping with the times.

We can and will make it worth your while to look to us for your bulb needs each season.

SINGLE EARLY TULIP "PROSPERITY" EXCEPTIONAL FOR CUT FLOWERS OR POT PLANTS

FRITZ BAHR "HIMSELF"

For 40 years a successful grower and retail florist. He tells you, in his booklet (which we furnish free to customers) what is best to grow from seed for cut flowers.

ASSISTING OUR CUSTOMERS TO OBTAIN WORTH- WHILE RESULTS FROM A. B. C. "SUPREME" QUALITY FLOWER SEEDS

With the thought in mind of assisting our customers in obtaining highest possible germination from A. B. C. "Supreme" quality flower seeds, we arranged last year with Mr. Fritz Bahr of Highland Park, Ill., universally known florist and horticultural writer, to furnish us with cultural directions for the most important kinds now grown under glass. This up-to-the-minute work (Second Edition) has been published in pamphlet form and will be furnished free of charge to all of our

customers upon request. Mr. Bahr needs no introduction to the trade, his writings, "The Week's Work" in the Florists' Exchange, and his work, "Commercial Floriculture" (now being accepted as the florist text book), entitles him, we believe, to consideration as an authority in the premise. If you might be interested in securing the latest data on the subject aforementioned, don't fail to ask for a copy when ordering flower seeds.

*Early Orders, Will We Believe, Prove
Mutually Advantageous*

"Pure Stocks of Selected Florists' Types"

It has always been our sincere desire to furnish to the florist grower the HIGHEST POSSIBLE TYPES OF FLOWER SEEDS, and in order to consummate this ideal we spare no pains or expense to obtain from the world's specialist growers just that quality. We can, we believe, point with no little pride to the fact of our having introduced some of the most outstanding kinds, and which are "standard" today, amongst them being snapdragons, "Jennie Schneider," "Roman Gold," and "Sunburst"; Calendula "Sensation," "M. & M. Primula" Obconica, "Theodosia" Petunia, "Fischer's Cyclamen," "Private Stock" Pansy, and others.

Prices! They will be found to be consistent with the "quality you should have for best results," and the axiom "not how cheap, but how good," should predominate in the buyer's mind when arranging for supply of same.

We believe that in no other business is reliability and consistency more essential than in the seed business, and it will be our continued effort to conserve in every way the high reputation we now enjoy in this department.

A. B. C. SNAPDRAGON SEED HEADQUARTERS

The following varieties are especially recommended for Greenhouse Culture—desirable also for outdoor planting. However for this purpose they require staking because of tall growth.

"Jennie Schneider"

Beautiful Columbia Rose-Pink

Introduced to the trade by A. B. C. and which is today, we believe, the most popular variety of cut flower Snapdragon on the market.

Words of Critical Growers

Henry Smith Floral Co., Grand Rapids, Mich., says of the Jennie Schneider:

"An Early Bloomer"

"Wish you could see a bench of Jennie Schneider now in bloom. It is surely a sight. Color, stem and flower of this are all that could be desired. It is also an early flowering variety."

Price: Originator's Greenhouse Grown Seed (Exclusively Controlled by A. B. C.), per trade pkt., \$1.00; 3 pkts. for \$2.50; 6 pkts. for \$4.50.

Pierre Schneider's Information with Regard to Producing "Winter Flowering Snapdragons" Should Be in the Hands of Every Snapdragon Grower. Supplied Free to Customers.

Other Desirable Varieties of Snapdragons for Greenhouse Culture.

ROMAN GOLD

(Another A. B. C. Introduction)

An exceptionally early variety, and very popular on the Chicago cut-flower market. Color: A combination of pink, copper and golden yellow shades. We consider this on a par in value to the florist with the variety "Jennie Schneider."

Price: Originator's Greenhouse Grown Seed (Exclusively Controlled by A. B. C.), per trade pkt., \$1.50; 3 pkts., \$4.35; 6 pkts., \$8.50.

Improved Sunburst. An outstanding shade of yellow tinged with bronze copper color. Price per trade pkt., \$1.50; 3 pkts., \$4.35; 6 pkts., \$8.50.

Geneva Pink. An exceptionally good pink variety. Per trade pkt., \$1.00; 3 pkts., \$2.50; 6 pkts., \$5.00.

Indian Summer. A lovely, rich, velvety and glossy copper color, indescribably beautiful. Per trade pkt., \$1.00; 3 pkts., \$2.50; 6 pkts., \$5.00.

SNAPDRAGON "JENNIE SCHNEIDER"

The Pink Greenhouse Snapdragon Par-Excellence

A S T E R S

Realizing the importance of the Aster to cut flower growers, we secure our supply of seed from Bodger's of California, who unquestionably produces the choicest Asters in the world.

Following is statement of said firm and which we have fully verified through personal visits by members of our firm during growing period.

"We have under cultivation a large tract of land of an alluvial and peat composition which is sub-irrigated from mountain springs.

"We are able to grow Asters to perfection with no trouble from the diseases common to this plant. We have no overhead moisture from the time the fields are planted to the time the seed is harvested, and our even climate, together with our work in reselecting, is enabling us to improve our strains in Asters very materially as the seasons advance.

"Seed harvested under these conditions is of highest germination and more disease-resisting."

Treat Aster Seed With "SEMESAN"

**The Premier Seed Disinfectant
Improves Germination**

Controls Disease	Hastens Germination
Produces Sturdier Plants	Increases Crop Yield
Improves Quality	Prevents Damping Off

Florists write us such tributes as, "We used Semesan on poinsettia cuttings last summer with excellent results"; and "My Semesan-treated aster seeds gave an almost perfect stand as nearly every seed germinated."

(Booklet in connection with use of Semesan mailed free.)

Price: 2 oz., \$0.50; 1 lb., \$2.75.

Note: Semesan cannot be forwarded via mail.

Type of New Cut Flower Aster: Howard's "Swansdown" and "Maiden's Blush"

We are offering two new Asters obtained from Mr. Fred Howard of California (see illustration above).

Mr. Howard is renowned for his introduction of valuable cut flower annuals and we believe these two new sorts to be the "last word" in Asters for the florist.

Following is Mr. Howard's description of same:

"These Asters are both very fine cut flower varieties. They are non-lateral branching, wonderful keepers and shippers, coupled with large size for this particular class."

Swansdown, pure white.

Maiden's Blush, soft pink.

Price, each of above: Trade Pkt., 50c; Per oz., \$3.00.

Having observed these Asters in bloom, we do not hesitate to recommend them most highly for late flowering A. B. C.

ASTER—Mignon

Similar to Improved Victoria, but smaller in flower and very free blooming; fine for bedding and pot culture.

Aster Culture

(Excerpt from The American Florist, issue of May 11, 1929)

The asters for cut flowers this summer should be put into the field now. I know this is a busy time, but if the plants are left in the house they will grow too tall, will get pot bound or if in flats will be worse, will not get the water they need, will be bothered by aphids or spiders or both and thus will never have a chance when they do get out. They will suffer more from the shock of transplanting later, too, and the better care they get inside the worse will be the shock of the setting out when it is done. The only answer is to put them in the field now.

Asters will stand almost as much cold as cabbage or peas and, when young, dislike hot weather. Put them in a rich soil, use care in the transplanting, water them well, spray them regularly once a week with Bordeaux mixture and arsenate of lead and weed them when they need it. Weeding and watering can be cut down if one uses a mulch and if straw isn't available, use the paper mulches so widely advertised now.

CALENDULAS

A. B. C. IMPROVED SENSATION

(See Illustration Opposite)

Has proved to be a real money maker for the Florist.

Fritz Bahr states in The Florists' Exchange:

"For the Winter and Early Spring months, I don't know a better Catch Crop than Calendulas."

The principal value of A. B. C. Improved "Sensation" lies in the fact that it is much larger than any other calendula on the market and has a very distinct crimson or scarlet sheen which, with its orange base, provides a most outstanding and appreciable combination of coloring. Furthermore, the same is produced on unusually long stems.

Price of A. B. C. Improved Sensation Calendula. Bright Orange with Scarlet Sheen. **Trade Pkt., 50c; ¼ oz., \$1.00; ½ oz., \$1.75; 1 oz., \$3.00; 2 ozs., \$5.00; 4 ozs., \$9.00; 8 ozs., \$16.00.**

What Some of the Trade Think of This Valuable New Calendula

From the Dale Estate of Brampton, Ontario, Canada
(30 Acres Under Glass)

"You very kindly sent us a sample of calendula seed in September last in accordance with your letter September 12th. This improved type of calendula has proved to be very satisfactory, and our Mr. Dale thinks it better than anything he has ever had before."

One of the numerous Greenhouses utilized by Ferd. Fischer (Germany) for production of Giant Show Cyclamen Seed to supply American Bulb Company, Chicago and New York. Mr. Ferd Fischer in foreground.

A word about price: In comparison with other high grade stocks, Fischer's Cyclamen Seed cannot be sold at so-called bargain prices simply from the fact that seed for our supply is selected only from specimen plants which are true to type and color. Nevertheless, quotations as mentioned in list herewith will be found to be reasonable for "the kind you should have for best results."

If your trade demands the very best Cyclamen that can be obtained, plant Ferd. Fischer's True Strain. **Special Note:** Because of the high quality of Ferd. Fischer's Cyclamen Seed other strains are now being offered under name of "Fischer." We therefore suggest care be taken to insure obtaining the true "Ferd. Fischer" strain. All Cyclamen seed supplied by us is contained in Ferd. Fischer's original packages.

LARKSPUR

"LOS ANGELES"

(See illustration opposite) is being introduced this year for the first time and we believe that this grand new sort is a most desirable acquisition to the Annual Larkspur family for cut flowers.

Annual Stock Flowered Larkspur for Cut Flowers

"Los Angeles" illustrated below, was developed in response to the demand for a Larkspur of the same growing habit as La France, but with a richer color—something between La France and Rosy Scarlet.

In Los Angeles we have the same rich salmon ground, overlaid with a brilliant and pleasing rose. The type of growth is similar to La France, but the foliage of Los Angeles is a much darker green, making the large, double flowers stand out more prominently.

Both Los Angeles and La France are particularly lovely under artificial light. If your trade was pleased with La France last year, we feel they will welcome Los Angeles as a valuable addition to the Stock Flowered type. Per Pkt., 75c; Per Oz., \$3.00; Per ¼ Lb., \$10.00.

NEW ANNUAL LARKSPUR
"Los Angeles"

The introduction, a few years ago, of such colors as Lustrous Carmine, Rosy Scarlet and Ageratum Blue brought the stock-flowered Larkspur into popularity with florists for use as a cut flower and the same is now grown in large volume both under glass and out of doors. Provides exceptional cut flowers.

La France. The exceptional new salmon-pink which is considered one of the most outstanding varieties to date for cut flowers. Per Pkt., 75c; ¼ oz., \$1.00; oz., \$3.00.

Empress Rose. This new Larkspur has the same shade of color as La France with flowers more compact on the stems, the plant producing from 15 to 25 spikes 4 feet high from the base. The erect habit of this Larkspur allows close planting and makes it a first class cut flower which we recommend. ¼ oz., 75c; Tr. Pkt., 50c; oz., \$2.25.

Following is a list of other desirable colors and shades of true Stock-Flowered Annual Larkspur:

Improved Exquisite. Soft pink. ¼ oz., 75c; Tr. Pkt., 50c; oz., \$2.25; lb., \$5.40.

Exquisite Rose. New rose pink. ¼ oz., 75c; Tr. Pkt., 50c; oz., \$2.25.

Lilac. Tr. Pkt., 15c; oz., 60c; lb., \$5.40.

LINARIA—Macedonica Speciosa

Reselected. This is a very fine perennial, easily grown from seed, and is undoubtedly the best yellow perennial that can be grown for general use. It is hardy and can be used where medium height is needed in rock garden work. The flowers resemble large golden snapdragons, borne on stems averaging three feet. The foliage is rather attractive and has a silvery, medium-sized leaf which extends up the stems at the joint from where the flowers advance. Trade Pkt., 35c; per oz., \$2.00.

MARIGOLD "ROBERT BEIST"

MARIGOLD DWARF FRENCH "Robert Beist" Selected Strain

This dwarf French Marigold is very desirable as a cut flower. The blooms measuring about the equivalent of a fifty-cent coin and the color combination most pleasing, namely velvety reddish brown with small golden center. Robert Beist is a particularly free bloomer and for retail cut flower work should prove worth growing in some quantity.

Robert Beist. Tr. Pkt., 25c; per oz., \$1.00.

NEW GIANT FRENCH MARIGOLD "Pulchra-Plena"—Brown and Gold

Tall growing and excellent for culture, either under glass or in the open. We highly recommend this for cutting. Tr. Pkt., 25c; per oz., \$1.00.

AFRICAN MARIGOLDS

These require a somewhat different treatment from that of the French Marigolds. The seed may be sown in heat about the same time, and the plants pricked off into a good, rich compost. Care must be taken that they do not suffer from want of water, as when the roots become matted on the surface they are apt to cheat the cultivator, the soil on the top appearing damp after watering, while it may be dust dry beneath. Harden off, and plant out about the end of May, or in June, in well-prepared and rich soil, 15 inches apart. The after-treatment should be somewhat liberal till the bloom buds appear, when it may be moderate. The great point is to secure strong, healthy plants which may be expected to produce large, fine blooms. If exhibition blooms are desired not more than four branches should be allowed on each plant, and only one bloom on each branch.

MARIGOLDS

For Cut Flowers

Marigolds, Particularly

TALL AFRICAN

"ORANGE BALL" and "LEMON BALL"

have of recent years become immensely popular as cut flowers and are now grown in large volume—one florist in the Southwest cultivating yearly some six acres of "ORANGE BALL" and shipping several hundred thousand blooms to various parts of the U. S. A. Appreciating their value we have arranged with a California specialist grower for a particularly fine strain of the above named desirable kinds.

TWO PAGES of "De Luxe"

PETUNIA

New Dwarf California Giants
"RAMONA" STRAIN MIXED
(Illustrated Opposite)

By far the best strain of Giant Petunias for pot culture. Also exceptional for bedding. We have checked this type against many in our experimental grounds this season and consider it the most compact Giant Petunia with the largest and best formed flowers of any dwarf type of Petunia on the market today. As in the above illustration, when in full bloom the plant shows nothing but large, colorful flowers with open throats well marked and veined. Wherever this strain has been tested it has proved all that we say of it.

Trade pkt. (1,000 seeds), \$1.00; 3/2 oz., \$5.00.

DIENER'S CALIFORNIA PETUNIAS (Originator's Seed)

FOR POT PLANTS AND BEDDING

Giant Double Mixed. Broad petaled. A peculiarity of the doubles is that they are the slowest growers in the lot; in most cases the seedlings appearing first are the singles, while the latest are the double. Diener's Double Giant Mixed. Tr. Pkt., \$1.50; 3 Pkts., \$4.00.

Ruffled Monsters Mixed. A wonderful selection of single flowered varieties. Tr. Pkt., 75c; 3 Pkts., \$2.00.

DIENER'S SINGLE LARGE FLOWERING
Pink. Strong veined center. Exquisite color combinations. Tr. Pkt., 75c; 3 Pkts., \$2.00.

Florists' Money Makers

Of all the plants which the florist raises from seed, Petunias of "class," both single and double-flowered, probably give best returns. We pride ourselves on the fact that our complete list represents the "De Luxe" of this worthy plant family. All of the seed offered has been hand pollenized, consequently is true to type.

Double Petunia

Rosy Morn

This beautiful small flowered double pink petunia has come into the greatest favor. However, since seed produces only a nominal number of double flowers, it is well to sow early and take cuttings from the true double. The single flowers are invariably equal to high class Rosy Morn, consequently the crop is all available. Pkt., \$1.00; 6 pkts., \$5.00.

American Bulb Co.,
Gentlemen:

Our petunias this season, "Ruffled and Theodosia," from your seed, were a sight to see—consequence, could have easily sold as many more.

(Signed) Yours,

C. H. HELFRICH.

American Bulb Co.,
Chicago, Ill.

May 24, 1928.

Dear Sirs:

Your petunias are certainly a knockout, especially "Theodosia." We had over three thousand petunias all from A. B. C. seed, and at this date, May 24th, we have not a single one left for Memorial Day. The retail price these petunias are bringing is 35c from 4-inch pots, which beats geraniums to a standstill. Petunia seed from A. B. C. for me always.

(Signed) Yours truly,

JOHN HAUPRICHT.

PETUNIA "FLORETTA"
A NEW A. B. C. INTRODUCTION
(Illustrated in color on front cover of this catalogue.) Color, beautiful steel blue, veined black, flowers handsomely ruffled. A fitting companion to that grand variety, "Theodosia." Originator's strain. Price: 500 seeds, \$1.00; 1,000 seeds, \$1.75.

The "De Luxe" of Double Petunia Mixtures
We take considerable pride in offering SHEPHERD'S DOUBLE "SEED-PRODUCING" STRAIN OF PETUNIAS. They have never been surpassed in beauty, size, form or color—if ever equaled. Selection of every flower was made with the greatest care and thought and the results are a surprise to the world. It would be impossible to describe at length the many varieties in form and color, pink, snowy white, violet, lavender, mauve, crimson, plain and shaded with variegations in all these shades innumerable. Many of the flowers measure 5 inches across—none less than 3. They are fluted, ruffled and pinked. The combinations of color are exceedingly strange and beautiful.

This wonderful strain will without doubt revolutionize the growing of double petunias as the same not infrequently produces fully seventy-five per cent of very large double flowers in all colors, and with a high percentage of germination.

Price—500 seeds, \$1.00; 1,000 seeds, \$1.75; 6,000 seeds for \$10.00; 16,000 seeds for \$25.00. Marvelous Double Mixed. Similar to the preceding, but with fewer of the very large, peony-flowered type. 1,000 seeds, \$1.00.

New Carnation or Small Flowered Double. Free bloomer; excellent for pot plants. 500 seeds, \$1.50; 1,000 seeds, \$2.75.

New Double White "Madonna." Gives a large percentage of pure white. Deeply fluted flowers; a fine florist's flower. Comes remarkably true. 1,000 seeds, \$1.50.

"WHITE CLOUD"

Along with the tall and hanging Petunias, which are indispensable for window boxes and balcony decoration, the Dwarf Petunias are gaining the favor of the public more and more, since they are eminently suited for pot plants and bedding purposes and produces fine, compact bushes only 12 inches high, richly covered with pure white blooms 3 to $3\frac{1}{2}$ inches in diameter. This new variety, "White Cloud," works with strong and brilliant effect singly in pots and especially when bedded out. It is reproduced true from seed. Per Pkt., 50c; 3 for \$1.25.

American Stocks for Cut Flowers

A. B. C. Special Florists' Strains

STOCKS ARE ONE OF OUR PRINCIPAL SPECIALTIES

Our percentage of doubles equals the best European pot grown strains. Our grower received five "Awards of Merit" and two "Highly Commended" at the "Trial of Stocks" conducted by The Royal Horticultural Society of Great Britain, at Wisley, England.

IMPROVED BISMARCK

(Early Giant Imperial)

An especially meritorious class. These stocks are giant, growing from twenty-four to thirty inches tall, of branching habit, producing innumerable large spikes measuring twelve to sixteen inches long, coming into bloom in about twelve weeks after seedlings are planted.

	Tr. Pkt.	Oz.		Tr. Pkt.	Oz.

Canary Yellow (Golden Bell)	.50	3.00	Choice Mixed	.50	2.50

STOCK IMPROVED BISMARCK "GOLDEN ROSE"

A rich light rose enhanced by a pleasing golden effect in the center of each individual floret. Very double large flowers on long stems. A wonderful cut flower. Trade Pkt., 50c; per oz., \$6.00.

"OLD ROSE"

A very beautiful shade of old rose—this color has been lacking in the Bismarck group. It is very double and has very large individual florets. Pkt., 50c; per oz., \$6.00.

"ELK'S PRIDE"

Elk's Pride is a new shade in the Early Giant Imperial group, being an intense royal purple of vigorous growth, attaining a height of twenty-four to thirty inches. It is very early blooming, the florets are quite large and sweetly scented. The strain is very double. Pkt., 50c; per oz., \$6.00.

MAMMOTH BEAUTY OF NICE STOCKS

Particularly desirable because of their long stems and branching habit.

EARLY LARGE-FLOWERING WINTER STOCK

"ZEPHYR" (Benary)

This Stock stands out from all other known sorts on account of its especially charming delicate lavender blue coloring. In its habit Stock Zephyr resembles the favorite Beauty of Nice; it grows to a height of 24 to 28 inches, forms a fine long middle spike of bloom and numerous good side-shoots; it is eminently suited for cutting purposes. Tr. Pkt., 35c.

SCABIOSA CAUCASICA
"Isaac House" Strain

Hardy Scabiosa "Isaac House" Strain

(See Illustration opposite)

Scabiosa Caucasica is now becoming popular for growing under glass (seed produces blooming plants second year) and we prophesy that this strain of hybrids will greatly increase the popularity of Scabiosa Caucasica when it becomes known. Caucasica Hybrids are a great improvement over the Caucasica, being more vigorous with larger and longer stems and larger and heavier petals, which are ruffled and slightly frilled on the edges. In this hybrid strain you will find colors ranging from white to the darkest blue, but the predominating colors are of delicate lilac and mauve. We hope next season to offer this magnificent strain in separate colors, which will reproduce themselves true to name.

Price (Seed): Trade pkt., 50c; per ¼ oz., \$1.50; per ½ oz., \$2.50; per oz., \$4.00.

STATICE LATIFOLIA

The Flower Seed Novelty of the Year *for Culture Under Glass or in the Open*

"SWEET WIVELSFIELD"

An entirely distinct and novel hardy *Dianthus* known as "Sweet Wivelsfield." This new race resulted from a cross between *Dianthus Allwoodii* and Sweet William (*D. barbatus*) made seven years ago. For 200 years or so, crosses have been made between carnations and Sweet Williams, and pinks and Sweet Williams but the resulting hybrids have been sterile, producing no seed and have been difficult to propagate. However, this new race seeds reasonably well

Individual blossoms are nearly three times as large as those of Sweet Williams and are borne in loose cymes. The colors come in hundreds of various shades including rich reds and purples with black lacings, whites and pinks with flakes and many other colors with innumerable markings.

"SWEET WIVELSFIELD"
 The New Race of Hardy Annuals

HOW TO GROW "SWEET WIVELSFIELD"

Sow in heat from late January to mid-March for early flowering.

Transplant into boxes, grow in cold frames, and finally transplant in their flowering quarters in April or early May.

These plants will begin flowering in June and continue until November, especially if the old flowers are cut and seed pods are not allowed to form.

Sowing in the Open

Seed can be sown in April in the open for late summer flowering.

Grow as a Biennial

Sow from July to September in cold frames or in the open for next season's flowering, plant in their flowering quarters in October.

For Greenhouse Pot Culture

As Effective as *Schizanthus*
or Snapdragons

Sow thinly in boxes in frames during July or November, transplant into other boxes, pot off in September into 3 inch pots, grow on in a cool airy house or frames, potting into 6 inch flowering pots in January, in which they will flower from April until July. Flowering buds formed before January are best removed. A system of stopping to make extra large plants and regulate season of flowering is to stop the growth of the plant when 4 inches high.

Price Per Trade Pkt., \$1.00
 6 Packages for \$5.00

It is predicted that this new plant will become as popular as Asters, Stocks and Snapdragons. It is distinct in habit and freedom of Growth, method of flowering, and shows a greater variety of coloring than the so-called annual, Sweet William.

A Worthy Companion to
 "Sweet Wivelsfield"

THE MAGNIFICENT "ALLWOODII"

This race of hardy plants, "Allwoodii," is half Carnation and half Pink, being a hybrid between the Perpetual Flowering Carnation and the Hardy Garden Pink. Exceptional for cut flowers, treat as a biennial. Price per 100 seeds, \$1.25.

Regarding Com- parative Prices

Realizing the importance of Sweet Peas as a greenhouse crop, we do not attempt competition with the dealer who aims for cheapness of seed to the possible detriment of quality—the fact that we supply from year to year numerous of the largest growers in the U. S. A., is, we believe, proof positive that our "True-To-Name Thoroughly Rouged and Hand Picked Seed" is preferred to "bargain priced" stocks of doubtful value. A.B.C.

SWEET PEAS

Spencer's Late or Summer Flowering Sweet Peas

We recommend these for general outdoor growing throughout the United States except in the extreme South, where Sweet Peas flower during the winter and where the early flowering type gives best results. Many Sweet Pea lovers plant a short row of the early flowering kinds to get the advantage of early blooms, but we recommend the Summer flowering Sweet Peas for your principal crop for outdoor planting either during the Spring or Fall.

MORSE'S "PINKIE"

Pinkie is a very large, deep rose-pink, having four mammoth flowers well placed on long stems, very vigorous and continuous bloomer. This NOVELTY should be in every collection. Per oz., 65c; ¼ lb., \$2.00; lb., \$7.00.

SWEET PEA

Heavenly Blue, "The True Variety"

A fine new blue, of a most beautiful soft tone of delphinium blue.

It is a pure blue self that does not show a trace of violet.

The flowers are of immense size with four invariably well placed on long, stiff stems.

Per oz., 35c; lb., \$3.50.

SPECIAL NOTE!

We can recommend the above two varieties as being the best of their respective colors in summer flowering Sweet Peas.

BODGER'S True Strain DAHLIA FLOWERED ZINNIAS

Illustrated in color inside front cover of this catalogue.

DAHLIA FLOWERED VARIETIES

Buttercup. An immense, deep, creamy yellow. A very desirable flower.

Canary Bird. A delicate shade of primrose—very large and holds its color well until out of bloom.

Crimson Monarch. By far the largest and best of red shades.

Dream. A fine, deep lavender, turning to purple (Mallow Purple); a new, desirable shade in Zinnias.

Exquisite. Color, light rose with center a deep rose. (Tyrian Rose.)

Giant Attraction. A distinct shade of brick red (Spectrum Red), which carries its color well from the bud, and forms into an immense ball of color when in full bloom.

Golden State. A very rich orange-yellow (Cadmium). Yellow in the bud, turning to an attractive orange when in full bloom.

Illumination. Similar to Exquisite, but a striking self color of deep rose. (Tyrian Rose.)

Meteor. A rich, glowing deep red (Spinal Red) and the darkest of all the red shades. Fine form, with good depths of petals. Very large.

Old Rose. This is adequately described by its name, as it is of the real old rose shade.

Oriole. An immense orange and gold bicolor, changing slightly as it ages, but at all times worthy of the beautiful bird for which it is named.

Polar Bear. A very large, pure white, the best white yet seen in Zinnias.

Scarlet Flame. A large, beautiful, bright scarlet, with a beautiful blending of orange throughout the petal. This is not a bicolor.

Price of each of above: Extra Size Trade Packet, 35c; ¼ oz., 60c; per oz., \$2.00.

Special Offer. One extra size Trade Packet, each of any seven varieties selected from list above for \$2.00.

Giant Mammoth "ENCHANTRESS" Zinnia

This is the same pleasing color as Exquisite in the Dahlia Flowered type and is undoubtedly the most popular of all Zinnias today. This variety and "Cerise Queen," listed below, are worthy companions to "Miss Willmott" for cut flowers as well as garden show. Price per pkt., 25c; 1 oz., \$1.00.

Giant Mammoth CERISE QUEEN Zinnia

Another new color we have added which should be in all collections. It is very bright and very striking. Price per pkt., 25c; 1 oz., \$1.00.

ZINNIA

Pumila Picotee

"DELIGHT"

The Season's Novelty in Zinnias

For several years the pleasing shade of salmon-rose in the Dwarf Double Pumila type of Zinnia has been a favorite among florists for basket work and general cut flower use. Realizing that a variation in this type would be acceptable, Bodger's, the famous Zinnia specialists, crossed it with tall picotee and have now succeeded in perfecting a new type, which we prophesy will be of incalculable value to florists.

"Delight" can be classed as a Pumila type, very floriferous and of compact growth. The petals of the flowers are ruffled and curled, giving a light and dainty effect. In addition, each petal is beautifully picoteed, making it a most striking flower.

The assortment of colors is most suitable for florists. It includes salmon shades, cream, buff, biscuit, golden yellow, lavender, in fact a collection of colors that are most acceptable for florists' use. We highly recommend it for all who wish something of merit for the fancy florist trade. Price: Trade Pkt., 25c; per oz., \$3.00; per ¼ lb., \$10.00.

"MISS WILLMOTT"
(See Illustration Opposite)

This is a mutation from the Dahlia Flowered and is of the imbricated type. When in full bloom, it has a flattened appearance. The flowers when young are very graceful and are used for florists' work. When in full bloom they become show flowers of enormous size. One of the colors lacking in this type was a good, soft, salmon-pink. Our grower has been successful the past season in perfecting this shade and we take pleasure in offering Miss Willmott as the most delicate of soft, salmon-pinks. Unquestionably, it is a great acquisition to this collection of Zinnias. Do not forget to include this variety in your collection for the coming season. Price per pkt., 25c; ¼ oz., 75c; 1 oz., \$1.50.

Grow Perennial Plants for Cut Flower Production

PROVIDING FOR AN EMERGENCY

How many times during the Summer have you wished you had some hardy perennials growing, making it possible for you to make up a beautiful basket of cut flowers on some special order. **YOU CAN DO IT** and at little expense. By careful selection from this price list you can have hardy perennials to fall back on from early Summer until Jack Frost makes his visit with such flowers as Lily Regale, Achillea, Gypsophilla, Delphinium, Daisies and so forth. It is not necessary for you to stick to these varieties. Pick out the varieties that do best in your particular location and **PLANT THEM. YOU**

WILL BE SURPRISED at the dollars you will be able to take in, that have in the past been handed to you and you had to return to the customer with the sorrowful reply, "I'm sorry."

You will be doing your customers a favor by growing perennials and having the flowers on hand during the Summer months for making sprays, wreaths and even Wedding Bouquets. Not price alone, but the keeping qualities of baskets made up by using **HARDY PERENNIALS** are better.

OTHERS ARE DOING IT—SO CAN YOU.

AQUILEGIA, COLUMBINE

ACHILLEA—Ball of Snow

Boule de Neige. An improvement on the Pearl. Wonderful for cut flowers or garden. Flowers in June. A good filler. Per doz., \$1.50; per 100, \$10.00.

Perry's White. 1 to 2 feet. June to September. A choice new variety; pure white flowers; broad, overlapping petals. Nothing better for cutting. An excellent filler. Per doz., \$1.50; per 100, \$10.00.

ANTHEMIS—Hardy Marguerite

Kelwayii. 2 ft. Daisy-like yellow blossoms, produced all summer. Excellent for cutting. Per doz., \$1.50; per 100, \$10.00.

Kelway Alba. Hardy white Marguerite. 3 ft. Per doz., \$1.50; per 100, \$10.00.

AQUILEGIAS or COLUMBINES

Their period of flowering covers the late spring and early summer months. Taken as a whole they are the most important part of the hardy garden and should be grown in quantity by every lover of old-fashioned garden flowers.

AQUILEGIAS—Continued

The following varieties are all suitable for cutting and are attractive when used with other flowers.

Chrysantha Alba. A fine, long-spurred white. Per 10, \$1.75; per 100, \$12.00.

Chrysantha fl. pl. Double yellow. Per 10, \$1.75; per 100, \$12.00.

Coerulea. Sepals blue, petals white, dainty effect. Per 10, \$1.75; per 100, \$12.00.

Farquhar Pinks. A beautiful strain of nothing but clear pink colors. Per 10, \$1.75; per 100, \$12.00.

Long-Spurred Pink Hybrids. A beautiful and reliable strain comprising a large percentage of pink and rose shades. Long spurs. Per 10, \$1.75; per 100, \$12.00.

Nivea Grandiflora. Large, pure white. Per 10, \$1.75; per 100, \$12.00.

Field Grown, Healthy Plants Is What Is Supplied

No doubt you can buy some varieties cheaper, but the old adage, "Cheap stock is dear at any price" has proven itself true in hundreds of cases. Don't buy cheap, half-starved perennials; you will not be pleased with the results if you force them; your customers will be dissatisfied with the blooms they get from them after planting.

ARTEMISIA "SILVER KING"

(See next page for illustration of plant of above, also complete description)

When you need a "filler" for basket and bouquet work, sprays and wreaths, Artemisia "Silver King" will answer the purpose. Particularly desirable for intermingling in sprays of pink roses. Price: 25 for \$4.00, 50 for \$7.75; 100 for \$15.00.

Fritz Bahr Says:

"Plant Perennials for cutting during the Summer months; there is hardly a single variety which in some way the Florist can't use and frequently the flowers are much preferred over Annuals by your customers. Plant Perennials and Biennials suitable for flowering under glass for Spring flowering; plant them to be sold as plants during Spring and Fall to your customers for the hardy border; no other class of plants has gained more in public favor of late years, due to the great interest taken in gardening and it is up to the local Florist to supply the plants, in the handling of which there is worthwhile profit and as plants lifted from the field to be retailed are much to be preferred by those wishing to plant for immediate effect, plant Perennials to be potted up and sold in or out of pots during Summer, for those who come too late for field plants or those who, for some reason or other, were not ready in time and in order to obtain best results, plant A. B. C. Superior Stock, dependable and true to name, the same stock we are supplying to our clients."

ARTEMISIA

"Silver King"

TRUE

A Plant of Rare Beauty for Cutting or Landscape

(See illustration opposite)

NOTE: We have learned to our "financial sorrow" that an inferior type of so-called "SILVER KING" is being supplied to the trade and which is absolutely worthless for cutting.

THIS Artemisia is one of such rare beauty and so valuable for various purposes that a description can hardly do it full justice.

For landscape effect from early summer until late winter, it is a most outstanding plant. Its bright silver colored stems and foliage blend harmoniously with other foliage or blooming plants and its rich, striking beauty in form and color is first to attract attention regardless of its surroundings.

For the cut flower trade the foliage of Artemisia Silver King is one of the greatest values as a filler for sprays or designs. It matures early in the summer and quickly hardens to a state when it can be cut and used without moisture. The foliage does not wilt or shatter after hardening off and can be carried dry indefinitely without losing its color. Leading cut flower dealers who handled the foliage of this Artemisia last season stated there is no other material that will produce the same high-class effect and that when used in sprays with pink roses the effect is most striking.

It thrives in ordinary soil, growing to a height of about three feet in almost perfect symmetrical form. The stems are well branched and thickly covered with bright silver colored foliage, which first appears in the form of small narrow leaves, but these quickly divide into a delicate, lacy shape with the appearance of small flower buds all over the branches. Price, 25 for \$4.00; 50 for \$7.75; \$15.00 per 100.

ARTEMISIA

Lactiflora. An excellent hardy border plant, producing large, branching panicles of sweetly-scented, creamy flowers excellent for cutting. Three to four feet. August-September. A perennial you should have on hand for bouquets. Per doz., \$1.75; per 100, \$12.00.

Hardy Perennial Plants

ASCLEPIAS—Butterfly Flower

Tuberosa. Very showy native plants, about 2½ feet high, producing flowers of brilliant orange-scarlet during July and August. Nice for cutting. Per Doz., \$1.50; per 100, \$10.00.

ASTERS

If you don't plant Asters you are passing up some good orders for flowers the other fellow is getting.

Abendrothe. 2½ feet, very effective rosy red flowers. Per Doz., \$1.50; per 100, \$10.00.

Anita Ballard. Double flowers of a clear petunia violet. Per Doz., \$1.50; per 100, \$10.00.

Climax. One of the best and showiest, with large pyramidal spikes of large, light lavender-blue flowers. Very free. 5 feet. Per Doz., \$1.50; per 100, \$10.00.

Novae-Angeliae Rosea. Deep reddish violet. 4 ft. Per Doz., \$1.50; per 100, \$10.00.

St. Egin. One of the finest, covered with beautiful pink flowers. Per Doz., \$1.50; per 100, \$10.00.

Tartaricus. Large bluish-lilac. 6 feet. Per Doz., \$1.50; per 100, \$10.00.

White Climax. Like Climax, except in color, which is pure white. Per Doz., \$1.50; per 100, \$10.00.

BAPTISIA

Australis (False Indigo). A strong growing plant about 3 feet high, suitable either for the border or wild garden with dark green deeply cut foliage and spikes of dark blue, lupine-like flowers; good for cutting. Per Doz., \$1.50; per 100, \$10.00.

BOCCONIA

Cordata (Plume Poppy). 6 to 8 feet. Big, feathery heads of creamy white flowers. Tall, upright habit. Fine for backgrounds, also makes a nice filler in basket work. Per Doz., \$1.50; per 100, \$10.00.

BOLTONIA

Latisquama. Lavender-pink. 4 to 5 feet. Good for cutting. Per Doz., \$1.50; per 100, \$10.00.

Delphiniums (Hardy Larkspur), both the perennial varieties, particularly "Belladonna" and "Bellamosum," as well as the annual "Stock Flowered," are now considered indispensable to the cut flower trade. (See offering of plants in "Hardy Perennial Plant Pages" of this book.)

ARTEMISIA, "SILVER KING"

Indispensable to the Retail Florist, interspersed in a spray of pink roses or used as a filler in basket work the effect produced is incomparable. The plant of "Silver King" increases in value from year to year.

DELPHINIUM (PERENNIAL LARKSPUR)

Blackmore and Langdon's Strain of English Hybrids, Interspersed with Double Perennial "Ehrlei" Gypsophila

Delphiniums (Perennial Larkspur) represent today probably the most desirable of all Hardy Plants for the Florist, "Belladonna" having the largest call from a cut flower standpoint because of its beautiful turquoise color.

CHRYSANTHEMUM MAXIMUM

(Giant Moonpenny or Shasta Daisy.) In the garden they are classed among the most known hardy plants. They also hold an important position as desirable cut flowers.

Alaska. Extra large. Per doz., \$1.50; per 100, \$10.00.

Memorial. A strong growing variety with extra good stems. Large flowers in bloom for use on Decoration Day. Very good cut flower. Per doz., \$1.50; per 100, \$10.00.

COREOPSIS

Delphinifolia—Larkspur Coreopsis. Very floriferous, with yellow flowers a little smaller and later than lanceolata. Per doz., \$1.50; per 100, \$10.00.

Lanceolata Grandiflora. A beautiful hardy border plant, grows 15 to 18 inches high and produces its bright yellow flowers in great profusion. By cutting off old flowers, will bloom until fall. Per doz., \$1.50; per 100, \$10.00.

DELPHINIUM CHINENSIS

A very pretty variety with fine, feathery foliage and intense gentian-blue flowers in open panicles. Per doz., \$1.50; per 100, \$10.00.

Chinensis Alba. A pure white form of the above. Per doz., \$1.50; per 100, \$10.00.

DELPHINIUM

(Perennial Larkspur)

Belladonna. The most continuous blooming of all, never being out of bloom from June

1st until cut down by hard frost. The clear turquoise-blue of its flowers is not equalled for delicacy and beauty by any other flowers.

One year. Per doz., \$1.50; per 100, \$10.00. Select two-year-old clumps. Per doz., \$1.75; per 100, \$12.00.

Bellamosum. The dark blue form of the popular Belladonna.

One year. Per doz., \$1.50; per 100, \$10.00. Select two-year-old clumps. Per doz., \$1.75; per 100, \$12.00.

DELPHINIUM—English Hybrids

Blackmore and Langdon's best strain. (See illustration above.) For many years we have grown many different strains of Delphinium, having in mind to supply our customers with the best obtainable. This strain without a doubt stands in a class by itself. It has the range of colors well divided in the palest shades of blue to the deepest indigo with a strong run of the most delicate shades of rose, double and single. One year. Per doz., \$1.75; per 100, \$12.00.

Two-year plants. Per doz., \$2.10; per 100, \$14.00.

NOTE: We supply 25 plants of a variety at one hundred rate. We do not, however, furnish a smaller unit than twelve plants of a variety.

Hardy Perennial Plants

HARDY GAILLARDIA COMPACTA

DAISY ELDER

This Daisy is now recognized by all for its earliness of flower and it is being used for forcing. \$1.75 per doz.; \$12.00 per 100.

DIANTHUS

Barbatus (Sweet William). Old favorites, bearing their sweet, clover-scented flowers in the greatest profusion during May and June. They are indispensable for the edge of the hardy border and for cutting.

Latifolius Atrococcineus fl. pl. (Everlasting Hybrid Sweet William). Beautiful summer bedding variety producing masses of brilliant, fiery crimson flowers all season. \$1.50 per doz.; \$10.00 per 100.

White Beauty. Pure white. \$1.50 per doz.; \$10.00 per 100.

Pink Beauty. Improved fine, deep salmon-pink color. \$1.50 per doz.; \$10.00 per 100.

Scarlet Beauty. Rich, deep scarlet, bright green foliage, very fine. \$1.50 per doz.; \$10.00 per 100.

DICENTRA SPECTABILIS "BLEEDING HEARTS"

Particularly desirable as a pot plant for St. Valentine Day sales.

The public is "sold" on "Bleeding Hearts" and we believe that florists will find them profitable to sell as a pot plant with the suggestion to set plants in the garden after home blooming accomplishment. Our offering is for "HEAVY F O R C I N G GRADE" clumps (not Division).

Each, 50c.

Per doz., \$4.50.

Per 100, \$35.00;
\$325.00 per 1,000.

25 roots at 100 rate.

GYPSOPHILA EHRLEI, NOVELTY

Flowers are pure double white, larger than *Gypsophila paniculata* fl. pl. Wonderful for summer use as a filler. Excellent for drying for winter use. We highly recommend it, and we suggest that you try these plants this season. Our price for strong one-year field-grown grafted plants is \$3.50 per 10; \$25.00 per 100; \$200.00 per 1,000.

DICENTRA

Spectabilis (Bleeding Heart, or Seal Flower). An old-fashioned favorite; its long racemes of graceful heart-shaped pink flowers are always attractive. It is used largely for forcing. \$4.50 per doz.; \$35.00 per 100.

Eximia (Plumy Bleeding Heart). A dwarf-growing sort, with beautiful, finely cut foliage and showy racemes of pretty pink flowers throughout the season. \$2.00 per doz.; \$15.00 per 100.

DIGITALIS

Gloxiniiflora Alba. An exceptional variety with spotted flowers. 4 ft. \$1.50 per doz.; \$10.00 per 100.

Giant Shirley. A strain of worthwhile hybrids. \$1.50 per doz.; \$10.00 per 100.

FUNKIA VARIEGATA

Potted up about February this very hardy green and white variegated leaved plant will provide exceptional stock to "set-off" flowering plants in pans, baskets, etc., for Easter and Mothers' Day sales. \$1.75 per doz.; \$12.00 per 100.

GAILLARDIA

Grandiflora (Blanket Flower). This is considered one of the most beautiful and desirable plants in cultivation, beginning to bloom in June, they continue one mass the entire season. Base of petals are scarlet-crimson, bordered golden-yellow. A most beautiful combination. Fine for cutting. \$1.50 per doz.; \$10.00 per 100.

Sanguinea. Orange-red shades. \$1.75 per doz.; \$12.00 per 100.

HELENIUM

(Helen Flower.) This magnificent perennial, during its blooming season from early August until the middle of September, literally produces hundreds of beautiful yellow to bronze-colored flowers. The flowers on one and the same plant vary in colors according to their growth and different stages of development. Beautiful for the garden. Fine for cutting.

Autumnale (Sneezeweed). This handsome native perennial attains a height of three to five feet. It branches at the top and bears many large yellow flowers in autumn. \$1.75 per doz.; \$12.00 per 100.

Riverton Gem. Old gold, changing to wall-flower red. August and September. Four feet. \$1.75 per doz.; \$12.00 per 100.

Provide a supply of Hardy Perennial Plants for your customer's gardens. We believe you will find them a profitable adjunct to your business.

GYP SOPHILA "EHRLEI"

Desirable for use in fresh state or dried

Illustration showing one half of patch of one-year-old plants taken June 21st, yielding over 1,000 bunches, which found a ready market and brought a good price

Hardy Double-Flowered GYP SOPHILA EHRLEI STRONG GRAFTED PLANTS

Provides Exceptional Dried Flowers for Winter Cut Flower Work

GYP SOPHILA EHRLEI surpasses any that has ever been introduced. It is a distinct, new form, early, pure white, double flowering and not a variety of paniculata fl. pl. An additional feature of this novelty is that its flowers are produced before paniculata begins to bloom. After the main crop has been cut, flower spikes make their appearance until frost. It is far superior to Gypsophila pan. fl. pl. because of the enormous size of its pure white flowers. Flowers were cut as late as November fifteenth.

GYP SOPHILA EHRLEI will grow in any sunny position if location is not too wet. Lime in any form adds greatly to the vigor of the plant. This plant is a strong grower, so give plenty of room—should be planted three feet apart in three to four feet rows. Plants on their own roots do not grow well and produce no roots, while the grafted plants produce good, strong roots and healthier plants.

PRICES: 5 to 25 plants, each 35c; 25 to 100 plants, \$25.00 per 100; 250 to 1,000 plants, \$200.00 per 1,000.

DRYING GYP SOPHILA

Perennial gypsophila is easy to dry, but the flowers must not be cut too soon, as immature blooms are sure to wilt. On the other hand, do not wait until every flower is out, as the blooms already out may begin to turn brown if the weather is extremely hot. If you want the stems long, cut within eight inches of the ground, but be sure to leave some flowers or foliage standing, as this prevents the roots from becoming damaged by the hot sun. When you start, you cannot rush harvesting too fast, as rain, followed by hot, sultry weather, might ruin the whole crop.

Tie the gypsophila up in bunches of about six large stems and hang them upside down in a cool, dry place which has plenty of venti-

lation. Do not crowd the bunches, as this might cause the flowers to mildew. Gypsophila will dry within ten to twenty days and can then be stored away in boxes free from dirt and dust.

Additional Varieties of Gypsophila

Gypsophila (Baby's Breath). Does well in rather dry places. Valuable for "mist effect" in bouquets and in the garden where a mass of delicate, misty bloom will fill a bare place.

Acutifolia. Lilac-rose; height, 4 feet. Per doz., \$1.75; per 100, \$12.00.

Paniculata (Baby's Breath). A beautiful, old-fashioned plant possessing a grace not found in any other perennial and attracting the eye of everyone. Dense spreading bush, numerous tiny flowers in light, feathery panicles, delicate foliage, fine for cutting, excellent for border or large rock gardens. July and August. Strong roots. If cut and dried will make excellent filler for winter use. Per doz., \$1.50; per 100, \$10.00.

HEMEROCALLIS

Well known family resembling Lilies in character and bloom, usually sweet scented and bearing a great quantity of yellow flowers during long periods of summer varying with the variety. Are very showy in the garden. They run in height from 2 to 4 feet.

Aurantiaca. Bright orange Day Lily. 2½ to 3 feet. Blooms in July. Per doz., \$1.50; per 100, \$10.00.

Flava (Lemon Daylily). Fragrant yellow flowers in June. Grows 2 feet high with flowers on long stems for cutting. Per doz., \$1.50; per 100, \$10.00.

Kwanso Fl. Pl. Double orange flowers. July. 4 to 5 feet. Per doz., \$1.50; per 100, \$10.00.

Luteola (Golden Day Lily). Bright golden-yellow with Indian-yellow shadings; June and July. Per doz., \$1.50; per 100, \$10.00.

Minor. Dwarf lemon-yellow. First of June. Per doz., \$1.50; per 100, \$10.00.

Thunbergi. Much like Flava, but flowers in July, a month later, and 6 to 10 inches of the upper portion of the flower scapes are thickened and flattened. Per doz., \$1.50; per 100, \$10.00.

HIBISCUS

Crimson Eye. Of quick, shrubby growth to 5 feet, bearing quantities of large, open flowers like single Hollyhocks; white with prominent crimson throat. Per doz., \$1.50; per 100, \$10.00.

Moscheutos. Large, bright pink flowers, on bushes about 4 feet high. Per doz., \$1.50; per 100, \$10.00.

Mallow Marvels. A giant race derived from the common native Hibiscus, which has elevated this type almost to the dignity of shrubs. Massed in great groups or generously interspersed with shrubs, these "marvels" grow very rapidly, sometimes getting up to 8 or 10 feet in height; with plenty of broad foliage to furnish a rich setting for the mammoth flowers. Can supply in mixture of white, pink and red. Per doz., \$1.50; per 100, \$10.00.

HOLLYHOCKS. We have this season a fine lot of strong, clean, healthy, vigorous one-year-old flowering plants of the finest strains under Double Pink, Double Red, Double White, Double Yellow, Double Maroon. Per doz., \$1.50; per 100, \$10.00.

Double New Lilac. Per doz., \$1.75; per 100, \$12.00.

Lemon Yellow. Per doz., \$1.50; per 100, \$10.00.

New Allegheny. Immense semi-double flowers, with fringed edges. Per doz., \$1.50; per 100, \$10.00.

Hardy Perennial Plants

HEUCHERA

(Coral Bells.) Beautiful plants for front row of borders, with slender, fairy-like spikes of richly colored flowers; most striking in the garden and light and graceful for cutting.

Sanguinea (Coral Bells). Grow about two feet high, with scalloped purple-tinged round leaves; and throughout the summer throws up innumerable erect, slender flower stems, each crowned with a loose umbel of coral-red flowers. Per doz., \$2.25; per 100, \$14.00.

LATHYRUS

(Everlasting Pea)

Latifolius. These Everlasting Peas are but little known in this country, but are great favorites in England. They are extremely showy and fine. Charming climbers for covering trellises, arbors, etc.

Alba. Pure white. Per doz. \$1.75 Per 100 12.00

Pink Beauty. Large racemes of pleasing deep rose flowers. Per doz. 1.75 12.00

Red. The well-known red Everlasting Pea. Per doz. 1.75 12.00

White Pearl. A great improvement on the older white variety, the stems giving from 12 to 15 flowers each. Per doz. 1.75 12.00

LIATRIS

Pycnostacha (Blazing Star or Gayfeather). A perfectly hardy perennial of luxuriant growth, doing well in any kind of soil, poor or rich, moist or dry, producing richly colored purple flowers on stout stalks 6 feet high in graceful spikes one foot long. In bloom during July and August. First rate cut flower. Per doz., \$1.75; per 100, \$12.00.

LUPINUS

(Lupine.) Effective plants producing large spikes of flowers, blooming in May and June.

Polyphyllus. Blue, rose and white separate. Per doz., \$2.25; per 100, \$14.00.

Regal (Hybrids). A wonderful new strain of perennial Lupines. There are creamy shades, amber, coppery orange and almost canary yellow, mingled with bronze, bright rose, terra cotta, slate and lavender-blue. Some are distinctly bi-colored, having wings or standards of one solid color and keel of another, while in some the whole flower is suffused and overlaid with a glossy sheen of rose or copper over a groundwork of pale yellow or amber. Per doz., \$2.25; per 100, \$14.00.

LYCHNIS

Chalcedonica (Maltese Cross; Jerusalem Cross; Scarlet Lightning). Two to three feet high, with white or scarlet flowers in good-sized corymbose heads. Give it a rich soil and it will bloom all summer. June. A showy plant for the garden and a striking cut flower. Per doz., 1.50; per 100, \$10.00.

NOTE: We supply 25 plants at one hundred rate. We do not, however, furnish a smaller unit than 12 of a variety.

PHYSALIS FRANCHETI
"Chinese Lantern Plant"

PHYSOSTEGIA (FALSE DRAGON HEAD) Desirable for Cutting

PHLOX Phlox Decussata (Hardy Phlox)

Miss Lingard. Pearly white flower, with delicate pink eye. Very remarkable bloomer, producing two or three crops of flowers during the season; indispensable as a cut flower for florists' use. Per doz., \$1.75; per 100, \$12.00.

Named varieties red, pink, lavender or white; strong field stock. Per doz., \$1.50; per 100, \$10.00.

Physalis Francheti. This wonderful decorative plant is easy to grow and multiplies rapidly. A big money maker that will yield more than any other outside crop. The fruits are becoming more popular each year for decorative purposes in the early fall and winter. Per 25, \$3.00; per 50, \$5.50; per 100, \$10.00.

Physostegia—Virginiana (False Dragonhead). Flowers about an inch long. Per doz., \$1.50; per 100, \$10.00.

Alba. Pure white; very fine. Per doz., \$1.50; per 100, \$10.00.

Gigantea. New dwarf pink. Per doz., \$1.50; per 100, \$10.00.

GLOXINIAS, Crop Very Short This Season

Exceptional for Pot Plants. Large blooming bulbs. Separate colors. 1 1/4 to 1 1/2-inch, \$18.00; 1 1/2 to 2-inch, \$20.00.

25 of any of above at 100 rate.

CULTURE FOR TUBEROUS BEGONIAS AND GLOXINIAS

"For early flowering you plant the bulbs, or rather tubers, about January, in flats or sandy soil, barely covering the tops. Place on a propagating bench with a good bottom heat, or on the return pipes, and keep fairly moist—not soaking wet. As soon as growth appears, pot them up in 3 1/2-inch pots and place in a 55 degree house on a sunny bench. Such early started ones may flower for Easter, even if that day does come in April, and beautiful, attractive pans can be made up by using three or five plants to an 8-inch pan. For bedding purposes start about the early part of March and treat the same way, but during April and May carry the plants in an airy and rather cool house, to avoid a soft growth. Another batch can be started about April 1st, and the plants after being potted up, brought to a hotbed where later on the sashes can be removed and the plants hardened off."

Previous to the United States embargo, Tuberous-rooted Begonias and Gloxinias were in the greatest favor as a pot plant, likewise for bedding in partially shaded situations; however, until the present American growers had not succeeded in producing sufficient stock of first quality to anywhere near supply the demand. One of our specialist growers has, however, now furnished us with a fair number of both, and we might say that the quality is even superior to the majority of bulbs which were formerly imported from specialists in Belgium.

GLOXINIA, TRUE BELGIAN STRAIN

CANNA, THE PRESIDENT

The last word in red-flowered, green foliage large flowering Cannas.

A corner of one of our Texas Canna fields, annual production over 1,000,000 roots, comprising the best large flowering varieties.

**TRUE TO NAME

CANNAS

**THE IDEAL
BEDDING PLANT**

**Strong 2 to 3 Eye
Dormant Roots**

"The florist who says, 'We don't do much in Cannas, our trade calls for other plants for bedding,' would be far more correct if he blamed his condition on the fact that although Cannas are becoming more important as bedders each year,

he has but little call for them because by not handling them and pushing their sale he manages to have his patrons and himself get along without them."—Fritz Bahr in "Commercial Floriculture."

A. B. C. Northern Texas Grown Cannas are now recognized not only by the florist trade, but by dealers as well, as being of the choicest quality produced in this country.

The trade at large has come to demand "A. B. C. Texas Grown Cannas." They "Make Good" and are true to name.

TEXAS GROWN "ROOTS THAT QUALIFY"

Varieties That Stand Out Above All Others

Ambassador. Brilliant red, bronze foliage, 4 feet. Per 100, \$7.00; per 1,000, \$65.00.

A distinguished looking Canna. Flowers vivid cherry-red, has luxurious tropical foliage prettily bronzed and makes a splendid color contrast with its brilliant blossoms.

Apricot. Buff-yellow and salmon-pink. Per 100, \$4.50; per 1,000, \$40.00.

City of Portland. Deep pink. Green foliage. 3½ feet. Extra good flower. Does not fade. Per 100, \$6.50; per 1,000, \$60.00.

Hungaria. 3½ feet. La France pink. Per 100, \$5.00; per 1,000, \$45.00.

King Humbert. This remarkable Gold Medal Canna has been the sensation of the past ten years and is the greatest favorite today. It is a cross between the orchid-flowering and the French, or Crozy type, combining the large flowers of the one with the free-blooming

character of the other, with handsome, broad, tropical foliage. Scarlet flowers; bronze leaves. 4 feet. Per 100, \$4.00; per 1,000, \$35.00.

King Midas. Clear yellow, green foliage. Per 100, \$5.50; per 1,000, \$50.00.

Mrs. Alfred Conard. One of the very best Cannas in commerce today. Large, exquisitely shaded salmon-pink flowers are produced in great abundance on robust, upright stalks. We consider this as superior to all pink flowered Cannas. 4 feet. Per 100, \$6.50; per 1,000, \$60.00.

Orange Bedder. Green foliage. Bright orange with just enough scarlet suffusion to intensify the dazzling mass of color. A very free bloomer. 4 feet. Per 100, \$5.50; per 1,000, \$50.00.

The President. 4 feet. This immense new flaming scarlet has come into wider use more quickly than any other Canna. It is an offspring of the famous Firebird. The President leads the red varieties in the quality and also the quantity of its bloom. The flowers are 7

inches across; the individual petals are firm and long standing, and do not burn, and the trusses stand up stiff on strong stems. The foliage is rich green and burn-proof in the hottest weather. Per 100, \$4.00; per 1,000, \$35.00.

Saladin. New French novelty. Large flowering, watermelon-pink. Per 100, \$5.00; per 1,000, \$45.00.

Shenandoah. 4 feet, salmon-pink. Per 100, \$3.50; per 1,000, \$30.00.

Yellow King Humbert. 4 feet. An orchid-flowering sport of the well-known King Humbert. Has the same habit of growth as its parent; foliage a very dark green, with flowers measuring 5 to 7 inches across; individual petals measuring 3 to 3½ inches in diameter. Flower a deep, rich yellow, softly spotted and blotched with bright red. Some plants occasionally give a scarlet or scarlet striped flower, which we consider an improvement rather than a detriment. Per 100, \$4.00; per 1,000, \$35.00.

DAHLIA—JERSEY'S BEAUTY

"Jersey's Beauty"

The "True Pink" Dahlia

and the Variety Without a Competitor in its Respective Color

Jersey's Beauty is, today, without a doubt the most popular cut flower and garden show Dahlia in the various markets of the country and were one to confine their Dahlia culture exclusively to this variety we do not believe that by so doing any regrets would suggest themselves.

"Jersey's Beauty"

is a true decorative flower of real merit, excellent formation, strong, straight, stiff stems, large in size, good depth and good keeper; color, a beautiful, clear rose-pink, in short, the "Ideal" cut flower Dahlia. Price, each, 50c; per doz., \$5.00; per 100, \$35.00.

"SAGAMORE"

This exceptional variety is truly a worthy companion to "Jersey's Beauty," of the same type as the above. However, its color is of a beautiful golden-yellow suffused with orange. The habit of growth of "Sagamore", length of stem and free flowering qualities make it particularly valuable for early fall decorations. Price, each, 60c; per doz., \$6.00; per 100, \$40.00.

A. B. C. "SUPREME" QUALITY

Dahlia Roots

Produced under contract by a specialist grower who primarily confines his large crop to "Quality" cut flower sorts which are listed in these pages.

Fritz Bahr Says—

DAHLIAS

"Every Florist Grower should keep up-to-date on Dahlias, he should keep himself posted on the latest and best sorts, not so much on what he makes in dollars and cents from the flowers he cuts, but rather to be able to recommend and supply his customers with tubers and plants for their gardens. There is no better way for him to make Dahlias pay than to have a fine display of plants in bloom on his own grounds.

"True, many sorts and among them some of the most showiest of all, possess poor keeping qualities when cut, the gorgeous blooms have to be admired on the plants and a great army of Dahlia enthusiasts are doing it, but those are only a very few compared with those who are each spring in search of tubers and plants for their home garden, to be supplied by their local florist. If Dahlia tubers are started in a propagating bench during March and April the young growth will furnish many cuttings easily rooted in sand and in a short time develop into fine pot plants, often again furnishing another cutting, all of which by some of the most successful growers are considered equally as good as plants grown from tubers, planted direct into the field.

"A dozen or 18 real good ones, headed by Jersey's Beauty and Sagamore means more than 50 doubtful kinds. To insure a bigger and better 1930 Spring bedding business, become interested in Dahlias and thereby keep in step with the times."—Fritz Bahr, noted horticultural writer, retail florist and grower.

We handle the best there is in Dahlias, not only that, but supply the florist with full of life tubers ready for planting into the field of propagating bench.

THE CULTURE OF THE DAHLIA

The Dahlia thrives in an open, sunny location, though they will succeed in partial shade in some instances. They will grow in any kind of soil, but a rich, sandy loam is the best. To enrich poor ground in the fall spade in well-rotted manure or decayed vegetation. Use bone meal at planting time, working it well into the soil. Spade the soil thoroughly as deep as possible before the tuber is planted.

Watering. Use very little water until flowering buds appear, after which plants can be thoroughly watered about once a week. Soak the ground until moist at least six inches deep. Rake over the surface the following day. This conserves moisture and lets in air and sunshine.

To Preserve Cut Flowers. Flowers should be cut late in the afternoon or early in the morning. Place tips of the stems in water for about twenty seconds while boiling on the stove and immediately plunge the tips deep into cold water. If blooms droop prematurely place stems in hot water and allow them to remain until the water cools. This will usually revive them. A pinch of salt in the water helps.

A. B. C. "SUPREME" QUALITY DAHLIA ROOTS

(Continued)

Produced under contract by a specialist grower who primarily confines his large crop to "Quality" cut flower sorts which are listed in these pages.

SELL DAHLIAS NEXT SPRING

Dahlias are really coming into their own; more and more are they recognized as being among the most showy of all garden flowers, largely due to the introductions of so many fine sorts during the past few years. Every country florist should get acquainted with the latest kinds, have a nice display of them on his own grounds. If he will push the sale of tubers and small plants during the Spring it will pay him far better than what he will make by selling the flowers. Without doubt there will be a great demand for plants and tubers next Spring, so get ready now. A dozen or 18 real good ones, headed by Jersey's Beauty and Sagamore means more than 50 doubtful kinds. To insure a bigger and better 1930 Spring bedding business, become interested in Dahlias and thereby keep in step with the times.—Fritz Bahr, noted horticultural writer, in the Florists Exchange.

- Ideal. A very pretty yellow. Each, 25c; Doz., \$2.00; 100, \$12.00.
- Joe Fette. A very good white. Each, 25c; Doz., \$2.00; 100, \$12.00.
- Yellow Gem. A very nice yellow. Each, 20c; Doz., \$1.50; 100, \$10.00.
- Pansy. Color violet or King Tut purple, fine for retail florists. Each, 25c; Doz., \$2.50; 100, \$18.00.
- Snowclad. Pure white, another good florist variety. Each, 20c; Doz., \$1.50; 100, \$10.00.
- Elizabeth. Pompon, color golden-yellow edged with brownish red. Fine for cutting. Each, 25c; Doz., \$2.00; 100, \$12.00.
- Fairy Queen. Pompon, sulphur-yellow edged pink, free bloomer, fine for baskets and design work. Each, 20c; Doz., \$1.50; 100, \$10.00.
- Klein Domitea. Pompon, a beautiful autumn shade in great demand for retail stores in general, due to its wonderful use in basket work, table decorations, etc. Each, 20c; Doz., \$1.50; 100, \$10.00.
- Madeline. Pompon, pale primrose, edged with rose-purple. Each, 20c; Doz., \$1.50; 100, \$10.00.
- S. Van Glitter. Pompon, red suffused autumn shade. Each, 25c; Doz., \$2.00; 100, \$12.00.

A. B. C. "Supreme" Quality Gladiolus for Forcing and Open Ground

Bulbs are produced under A. B. C. personal supervision, on our contract farms in California, Indiana, Michigan and Iowa, from young, healthy corms and we guarantee that none of same have been under crop for cut flowers. Therefore, you can be assured of stock that contains full vigor and which has been scientifically treated, after harvest, especially for greenhouse culture.

The following varieties are generally conceded to be some of the most dependable for forcing. (For information relative to forcing Gladiolus see further Gladiolus page in this book.)

"THE WAY TO GROW GOOD GLADIOLUS"

Excerpt From *The Florists Exchange*, issue of August 31, 1929

The following cultural methods, approved by the American Gladiolus Society, appeared in the schedule of that organization for its big show at Springfield. They are so concise and to the point that despite their elementary nature, we feel they will prove useful to growers who desire high quality flowers and bulbs:

Care of New Bulbs. When bulbs arrive, open package at once to admit air. If not wanted to plant soon, store in cool, dry place. A canned fruit cellar is just right.

When to Plant. When the trees native to your vicinity are unfolding their leaves. Then all dangers of damaging frosts are past. From then until last of June.

Where to Plant. Plant in open, sunny places not too near buildings nor close to foundations. Buildings shade and retard development or reflect strong sunlight and burn. Lack of free drainage, sunshine and aeration as well as ingredients in mortar make unfertile and sour soils. Keep away from trees and heavy-rooted shrubs especially.

Kind of Soil. A sandy-loam is best. Works freely, retains moisture, and is productive. Any good garden soil will do, but some require more work to keep loose, to keep weeds down, etc.

How to Plant. In Spring at planting time, use only well rotted manures or commercial fertilizers. If manures are not available, use leaves sprinkled with sheep fertilizers and some line. Cow or hog better than chicken or horse manures. Will not burn if used heavy, and better chemical element content for flowers. Spade not less than 8 in. or 10 in. deep. Pulverize manures and soil thoroughly. Open rows or trenches 6 in. deep, 18 in. or 20 in. apart. Set large bulbs in trenches the width of the bulbs apart. Farther apart if you care to, but not closer. Smaller bulbs not set so deep.

Six inches is deep planting. Slows appearance of sprout through ground, but protects from late frosts, will stand heavy winds, and extreme hot or rainy weather better. Cover bulbs with an inch of soil, then sprinkle liberally with sheep fertilizer, bonemeal, or complete slaughter house tankage. Fill in rest of trench with soil and firm down to eliminate air pockets around bulbs. If soil is dry when planted, water thoroughly after planting. If planted in beds, set bulbs about 6 in. apart.

Cultivating. Keep soil loose and free from weeds always. Never permit caking or crusting of soil after rains or watering. Keep cultivating. The more you do, the better your plants and flowers for many reasons.

Fertilizing. Use plenty of sheep fertilizer, tankage or bonemeal. All or each. Each has some content the others lack. Bonemeal good, but slow. If nitrates and ammonias are used, be careful. Use them only between rows and never permit on plants. They are strong and stimulants more than foods.

Watering. Water when necessary, then soak them. Sprinkling has tendency to draw roots up for moisture. Send the water down to the roots. Unless very dry, once a week is usually enough.

Blooms. Cut flower spike when first bud is open. Keep spikes in water. Change water and cut end of spike off slanting, daily. Use a knife for all cutting. Shears crush and close channels in stem so water cannot pass through to buds. In cutting spike, leave four to six leaves on plant to mature bulbs.

Remember. Good bulbs, plenty of sun, food, water and cultivating is all you need to raise prize winning Glads.

GLADIOLUS "VIRGINIA"

Generally accepted as one of the most outstanding forcing Gladiolus of the day, as well as equally desirable for planting in the open.

IMPORTANT TO THE FORCER

Please bear in mind the fact that Gladiolus Bulbs which we supply for forcing under glass have been especially cultured and scientifically treated for that purpose. Under reasonably normal conditions growers should obtain worth-while results from such stock.

A. B. C. "Supreme" Quality Gladiolus

America. Color, soft lavender-pink. More flowers are open at one time on the symmetrical spike of this Gladiolus than any other we know of. The standard commercial pink. †First Size: \$2.30 per 100; \$18.00 per 1000. ‡Second Size: \$2.00 per 100; \$15.00 per 1000.

Arizona. Rose-pink; dark crimson blotch; grows erect, flowers beautifully placed. Early, good forcer, admired equally as much as Pendleton. †First Size: \$3.00 per 100; \$25.00 per 1000. ‡Second Size: \$2.35 per 100; \$20.00 per 1000.

Alice Tiplady (Prim). Rich orange; extra fine, a great favorite; about 50 per cent produce two flowers. †First Size: \$2.50 per 100; \$22.00 per 1000. ‡Second Size: \$2.30 per 100; \$18.00 per 1000.

Albania. Extra fine, pure white, large. †First Size: \$3.50 per 100; \$30.00 per 1000. ‡Second Size: \$3.00 per 100; \$25.00 per 1000.

Early Sunrise. Large-flowering Gladiolus; salmon-red; a favorite for indoor forcing in California and much thought of in the Chicago Market. †First Size: \$4.20 per 100; \$37.00 per 1000. ‡Second Size: \$3.90 per 100; \$34.00 per 1000.

E. J. Shaylor. †First Size: \$3.00 per 100; \$25.00 per 1000. ‡Second Size: \$2.50 per 100; \$20.00 per 1000.

Evelyn Kirtland. The color is a beautiful shade of rosy-pink, shading to light pink toward the center, with brilliant blotches of scarlet on lower petals. The whole flower overlaid with a glistening lustre that serves to harmonize the varied coloring. †First Size: \$3.50 per 100; \$30.00 per 1000. ‡Second Size: \$3.00 per 100; \$25.00 per 1000.

Fire Ribbon. Tall, with many blooms open at a time. The spike is a long fiery band of glowing red. Exceedingly rich and strikingly showy. †First Size: \$4.00 per 100; \$35.00 per 1000. ‡Second Size: \$3.50 per 100; \$30.00 per 1000.

Flaming Sword. Earliest of all reds, tinted salmon. A variety that is coming to the front very fast, of brilliant red color, opens well and comes into flower very early. We can recommend this sort very highly. †First

Excerpt from a Paper By PROF. A. M. S. PRIDHAM

Cornell University, Ithaca, N. Y.

(From the Gladiolus Review)

"The popularity of the gladiolus together with its high value as a cut flower has created a demand for this flower the year round. The problem of supplying this demand is not so simple as might appear on first thought. The complaint of florists that gladioli sometimes come blind is well known.

"An investigation of the problem was opened in 1926. Some five hundred varieties were grown under greenhouse conditions and the following generalizations reached. First, that plantings prior to February 15th require approximately twice as long to bloom as the normal period. Generally speaking, later plantings flower in a much shorter period but always longer than in normal field plantings.

"The second generalization drawn was that varieties will flower under greenhouse conditions in approximately the same sequence in which they flower outdoors. It should be added that the sequence of bloom among varieties grown under field conditions has been found to hold true one year with another and one location with another. Subsequent studies have tended to confirm the original results.

"It would, therefore, appear desirable to grow early flowering varieties under glass for a difference of 30 days in the time a crop occupies the greenhouse bench means money to the florist.

"In brief the phases of the subject are first to secure corms which are mature in the sense that they will start into growth when planted."

Note: A. B. C. "Supreme" Quality Forcing Gladioli are produced from young healthy corms and we guarantee that none of same have been under crop for cut flowers. Therefore you can be assured of stock that contains full vigor and which has been scientifically treated, after harvest, especially for greenhouse culture.

MRS. FRANK PENDLETON
The variety that popularized Gladioli as a cut flower.

E. J. SHAYLOR

(See Illustration on Previous Page)

A beautiful deep rose-pink; slightly ruffled; has created the greatest sensation during the past years, wherever shown. 1½ in. up per 100, \$3.00; per 1000, \$25.00; 1¼-1½ in., per 100, \$2.50; per 1000, \$20.00.

Louise. Wherever shown meets with favor; distinct in form; clear, pure lavender; a blotch of velvet red towards center; resembles the orchids grown by leading florists; this is one variety that differs from all others; big flower; free grower. †First Size: \$4.00 per 100; \$35.00 per 1000. ‡Second Size: \$3.70 per 100; \$32.00 per 1000.

Lena Graetz. Very meritorious as a cut flower, almost pure white. †First Size: \$3.35 per 100; \$30.00 per 1000. ‡Second Size: \$2.85 per 100; \$25.00 per 1000.

Los Angeles. Salmon-pink, large, early. Many flowers open at a time on long sturdy stem. †First Size: \$4.50 per 100; \$40.00 per 1000. ‡Second Size: \$4.00 per 100; \$35.00 per 1000.

One of the Exceptionally Good Kinds for Forcing

Maiden's Blush. (Prim.). Exquisite blush-pink; flowers finely formed on long straight stems; free flowering; about 50 per cent produce two flowers. †First Size: \$2.50 per 100; \$20.00 per 1000. ‡Second Size: \$2.20 per 100; \$17.00 per 1000.

Mary Pickford. Delicate creamy white, throat of finest sulphur yellow. †First Size: \$4.00 per 100; \$35.00 per 1000. ‡Second Size: \$3.50 per 100; \$30.00 per 1000.

Myrtle. The most beautiful pink yet introduced; clearest dainty ruffled rose-pink, softly dissolving into a throat of clear creamy white; early flowering; distinctive in form and color and of good size; Myrtle stands among the elite of "Wizard" Kunderd's many exquisite productions. †First Size: \$4.00 per 100; \$35.00 per 1000. ‡Second Size: \$3.50 per 100; \$30.00 per 1000.

Mrs. Geo. W. Moulton. A giant, violet-red or cerise. Many open, nicely placed on spike. An occasional blossom comes double. This variety was awarded first prize for the best rose colored gladiolus with markings at A. G. S. show, 1926. †First Size: \$4.00 per 100; \$35.00 per 1000. ‡Second Size: \$3.50 per 100; \$30.00 per 1000.

A. B. C. "Supreme" Quality Gladiolus

Mrs. Leon Douglas. Ground color begonia-rose striped with flame and brilliant scarlet, lip pale lemon slightly speckled with ruby. †First Size: \$8.00 per 100. ‡Second Size: \$7.00 per 100.

Marechal Foch. A very fine large ruffled pink. †First Size: \$5.50 per 100; \$50.00 per 1000. ‡Second Size: \$5.00 per 100; \$45.00 per 1000.

Midsummer Dream. Large beautiful geranium-red. †First Size: \$4.00 per 100; \$35.00 per 1000. ‡Second Size: \$3.50 per 100; \$30.00 per 1000.

Mrs. Francis King. Could we grow but a few varieties, Mrs. Francis King would be one of them; a beautiful "besnard shade" of flame-pink; flowers of giant size on a spike growing four feet high, with from 18 to 20 flowers, six to eight open at one time; a magnificent variety. †First Size: \$2.70 per 100; \$22.00 per 1000. ‡Second Size: \$2.40 per 100; \$19.00 per 1000.

Mrs. F. C. Peters. The blooms of this new variety are extra large, of a rich, rosy lavender, with a patch of bright crimson on lower petals. More beautiful than Mrs. Frank Pendleton and declared by experts to be the "last word" in the newest introduction of Gladioli. †First Size: \$4.00 per 100; \$35.00 per 1000. ‡Second Size: \$3.60 per 100; \$32.00 per 1000.

Mrs. H. E. Bothin. Flesh salmon-pink, flame-scarlet center. A large show flower. As a cut flower variety this is second to none and we predict that it will, before a long time, become as popular as that great favorite, Mrs. Frank Pendleton. †First Size: \$3.70 per 100; \$32.00 per 1000. ‡Second Size: \$3.50 per 100; \$30.00 per 1000.

Mrs. Frank Pendleton. The sensational beauty, winner of awards and prizes everywhere; the petals show beautiful rose-pink on a pure white ground, contrasting in a most striking way with the deep, rich, velvety blood-red blotch on the lower petals; as showy as an orchid; the most perfect and delicate coloring is produced when spikes are cut and carried indoors as soon as the first blossoms open; no grander variety in existence. †First Size: \$3.00 per 100; \$25.00 per 1000. ‡Second Size: \$2.50 per 100; \$20.00 per 1000.

Merton W. Wentworth (Plain Petaled). Outer petals delicate pink, shading to Marechal Niel yellow. Back of petals show a tint of very delicate lavender. Lower petals blotched. †First Size: \$3.50 per 100; \$30.00 per 1000. ‡Second Size: \$3.00 per 100; \$25.00 per 1000.

Mona Lisa. A Kunderd introduction. Strong plant. Many flowers open at a time. Of palest soft rose or blushed white. A magnificent almost pure self color. Gorgeous. †First Size: \$3.50 per 100; \$30.00 per 1000. ‡Second Size: \$3.10 per 100; \$26.00 per 1000.

Myra (Hybrid). Large flowering; deep salmon, yellow throated; early, good forcer. †First Size: \$2.50 per 100; \$20.00 per 1000. ‡Second Size: \$2.30 per 100; \$18.00 per 1000.

Niagara. A light crocus or primrose-yellow, slightly tinted, with rose-pink in throat; large open flowers on a strong spike; for color, texture and keeping qualities this Gladiolus is one of the very best. †First Size: \$3.60 per 100; \$32.00 per 1000. ‡Second Size: \$3.35 per 100; \$30.00 per 1000.

MRS. FRANCIS KING

A cut flower variety comparable to

are particularly recommended to the grower who merchandises his own product in a retail way. They obtain a real fitness as basket and vase decorative material. Especially such varieties as Alice Tiplady, Maiden's Blush, Primunella, Rose, Luisante, Souvenir and Salmon Beauty (see alphabetically arranged list in this book). They can be forced easily and in a comparatively short period of time—like-wise just as desirable for outdoor culture.

LILIAM GIGANTEUM. Mountain Grown

The Regale Lily

J. Horace McFarland, Noted
Horticulturist, Writes in
"Breeze Hill News"

LILIES, LILIES, LILIES!

All gardeners have suddenly begun to be interested in lilies. Just what started renewed attention to this great and neglected family it would be hard to determine. Possibly it was the advent of the true REGALE LILY which resulted from one of Mr. E. H. Wilson's productive journeys to Western China.

"FRITZ BAHR ADDS A WORD"

"This sweet-scented, graceful Lily is especially well adapted for basket work and for mixing with other flowers in an arrangement; its splendor stems render it charming in a floral spray. Get acquainted with Lilium Regale by flowering a few next season."

Prices of Regale Lilies True Northern Grown

The flowers are white, slightly suffused with pink, with a beautiful shade of canary-yellow at the center, blending out part way up the trumpet the fragrance is fascinating.

Small Plant Stock for the Florist Grower

AGERATUM, IMPROVED FRASERI

Through the medium of our twelve representatives, who canvass the U. S. A. from coast to coast throughout the year, we are able to locate with grower specialists many important plant items and likewise certify, through this personal observation, as to their quality. In consequence we have made this small plant line an important department of our business. In addition to the items listed in these pages we will advertise seasonal stock in The Florists' Review, classified pages. Growers having small plant stock to offer from time to time, will, we believe, do well to communicate with us.—A. B. C.

CHRYSANTHEMUM "EILEEN MASSON"

This extraordinary early-flowering Mum can be had for potted plant sales from June 15 to the middle of October. It is in bloom as early as June 15, but can be had for later date by removing the buds, as it grows a new lot of buds; these in turn can be removed again if bloom is wanted for the middle of October.

It grows only to a height of 12 inches and requires absolutely no pinching to keep it short. Ideal in every respect for a potted plant.

The color is a beautiful dark pink. It grows a double row of petals about two inches in diameter.

EILEEN MASSON received 83 points from The Chrysanthemum Society of America. Plants out of 2-inch pots.

"MUM," DOROTHY TURNER

FRITZ BAHR

Prominent Horticultural writer and Florist
Grower says of "Dorothy Turner":

"I think a great deal of this new-comer."

NEW LARGE FLOWERING "MUM" OF
EXCEPTIONAL VALUE

"MARIE DE PETRIS"

A closely incurved deep golden-yellow (shade of Golden Glory) measuring 6 to 8 inches across when grown, two to the plant. Flowers have great substance and keeping qualities. A variety which we can highly recommend. Rooted Cuttings per 100, \$15.00; per 1,000, \$140.00.

DOUBLE PETUNIA

"ROYAL PURPLE"

Is, we believe, the most outstanding and valuable double purple petunia on the market today. Price, 25 plants, \$3.50; 50 plants or more at \$12.00 per 100. From 2¼-inch pots.

New Pompon Chrysanthemum

DOROTHY TURNER

In the opinion of those who have seen it, the finest of all the late flowering pompons.

Perfection just in time for the Thanksgiving season; ideal in color, a lively combination of bronze and old gold. The broad, overlapping petals are evenly shaded with rich old gold, deepening to a chestnut-bronze at the center.

Its habit of growth is about commercially perfect, branching strongly from the base and producing freely stems that are rigid and wiry, requiring very little support. Its average growth is thirty inches or higher.

The arrangement of the flowers is ideal, the individual blossoms being well placed along the stem. The

flowers open more spontaneously than the average pompon and are spaced sufficiently tight to make a perfect bunch or spray variety. It keeps well and is first-class in every respect.

DOROTHY TURNER is the variety which, exhibited under number at the Annual Exhibition of the Chrysanthemum Society of America, held at Baltimore in 1927, captured the Silver Cup for the best seedling Pompon Chrysanthemum not disseminated. It was exhibited by A. N. Pierson, Inc., who will share its dissemination with the originators.

If you have not received colored illustrated circular, same will be mailed you upon request.

SPIRAEA CLUMPS FOR FORCING

Spiraeas, previous to the U. S. embargo, were in great favor with the trade, after which, because of the difficulty in obtaining satisfactory quality roots these desirable plants lost their vogue to a large extent. Now, however, roots equal, if not superior, to stock formerly imported are obtainable, and at a price that is bound to bring back this old favorite to popular demand. Spiraeas provide a very satisfactory blooming plant at very low cost, especially for Easter and Mothers' Day sales.

"The Better Varieties"—Stock Plants—Spring, 1930 Delivery
The Poinsettia Now Holds the Same Place in the Floral Kingdom at Christmas Time
as Does the Lily at Easter Time

We have contracted with a specialist grower in California to supply us with field plants for propagating purposes and offer same at prices indicated below which are F. O. B. CALIFORNIA, however, on ALL ORDERS PLACED PREVIOUS TO MARCH FIRST, 1930, the forwarding expense will not exceed two cents per pound to Chicago or New York, since we will bring stock through in Carload lot. Growers should, we believe, arrange for new "poinsettia blood" every second year at least and this, "full of pep" field-grown California stock is just what you should have to keep your plant quality up to the mark. Early orders advisable, particularly for Oak Leaf as this variety is none too plenty.

Packed 250 plants to the case and in such manner as to reach destination in prime condition.

Bench or Garden Roses

FOR SPRING DELIVERY

This is now an important department of our business, and we have in Chicago and tributary towns the largest field in the world to draw from. We are generally in position to supply all varieties grown for cut flowers such as Pernet, Columbia, Premier, Templar, Briarcliff, Kordes, etc. Write for latest market quotations or refer to list in classified columns of the Florists' Review, beginning March, 1930.

FICUS ELASTICA

(Rubber Plants) Moss Rooted Cuttings

Our source of supply for Ficus elastica, Moss Rooted Cuttings, is second to none. They are produced by a grower who specialized in this line in Europe for a long period and who has operated in Louisiana for several years. This grower is thoroughly conversant with the needs of the American trade and understands the packing of this item so that stock will reach customer in first class condition. We can supply above in large volume. Prices on application.

MISCELLANEOUS ROSES FOR POT PLANTS

Hybrid Perpetual. (Leading varieties such as Magna Charta, Paul Neyron, etc.)

Hybrid Tea. (Leading varieties.) 2-year-old budded stock.

All Orders for Roses Booked at Market Price.

Buying "Baby" and Other Forcing Roses in Advance of the Season

Since there is almost invariably at shipping time a pronounced shortage of XX stock we believe buyers of this line will find it much to their advantage to place order for same early in the year.—A. B. C.

Florists' Forcing Roses

Roses forced in pots for Easter and other spring holidays have increased greatly in number in the past few years. No plants are more attractive. Through contract arrangements with specialist growers we are in position to supply strong two-year-old budded stocks of the highest quality and in the most up-to-date varieties at market price.

BABY ROSES

Ideal. Color intense lustrous garnet; the flowers are produced in very large trusses and are very effective.

Baby Rambler (Mme. Levassieur). Crimson.

Baby Tausendschon. Pink, white shading.

Baby Orleans. Geranium-red.

Baby Erna Teschendorf. Rosy-pink.

Baby Ellen Poulson. Cherry-pink.

Edith Cavell. Deep bright red.

Gurley. Strong growing, deep red.

Magnifique (New). Bright pink, slightly fringed. Good forcer.

Susanne Miller. Brightest red.

Triomphe de Orleans. Cherry-red.

CLIMBING OR TRAILING VARIETIES

Eugene Jacquet. A vigorous growing Rose, producing large clusters of fragrant cherry-red flowers. We predict that Eugene Jacquet will be more freely grown for Easter forcing than any of the other sorts usually produced for this purpose.

Roserie. Sport from Tausendschon. Like a standard Tausendschon in habit with very charming pink or carmine flowers. An American introduction worthy of much attention. A favorite florists' forcing variety.

Tausendschon. The buds are cherry-pink, opening to very double flowers of softer shades that eventually fade to white.

Dorothy Perkins. Clear cherry-pink, slightly fragrant flowers, borne in great profusion and lasting for a long time.

Excelsa, H. W. (Walsh, 1908.) An intense crimson, with the edges of the petals a little lighter, produced in immense clusters.

Crimson Rambler. Great masses of crimson, semi-double flowers are borne by the vigorous plants.

Paul's Scarlet. The brightest and purest red of all pillar roses.

Marie Gouchalt (New). Deep pink.

BABY ROSES, Two Plants to the Pot. Ideal for Easter and Mother's Day Sales.

PALM, KENTIA FORSTERIANA

During past months we have handled six carloads of the above named stock, distributing same to various parts of the U. S. A. and with utmost satisfaction to our customers.

40 ACRES OF PALMS

PALMS

Of Exceptional Quality and Value

Having distributed to the trade the past year several carloads of Kentia Palms and to the utmost satisfaction of buyers we have again closed arrangements with Bassett and Washburn Kentia Nurseries, Sierra Madre, Calif., to handle their output from 40 acres for the year 1930. B. & W. quality Palms need no commendation on our part.

All of same have been grown from seed on to the largest sizes in pots and tubs. So they are thoroughly established when shipped, being from six to ten years old, depending on size and always grown in the pot or tub.

We suggest booking order now for such sizes as you may anticipate needing for your spring and summer work. Shipments will begin April-May next from Chicago.

All will be properly "hardened off" and "ready for business." Place order now for shipment the coming spring.

PHILODENDRON CORDATUM (ILLUSTRATED OPPOSITE)

This climbing genus has been grown in botanical gardens for the past twenty years and of recent years has been taken up by the florists' trade in a large way, since this plant adapts itself unusually well to the unnatural conditions of the average home better than most any other plant. A very large demand has ensued from the public. It is particularly suitable for sun parlor decoration, but does equally well in any part of the house, even in comparatively dark situations. Can be grown successfully in pots or hanging baskets, but seems particularly "happy" in wall pockets (see illustration on this page). Florists have found an unusually large demand for this valuable trailing vine and it can be merchandised with the assurance of giving utmost satisfaction with a minimum of care, when grown in pots and placed on brackets or shelves in the show window. It furnishes a beautiful "green atmosphere" and attracts no little attention. Try out this valuable plant in a merchandising way; we are sure you will follow with a repeat order in a short time.

PRIMULA OBCONICA

"M and M" LARGE FLOWERING STRAIN

Probably in no plant that at the present time is in large demand has there of late been so much improvement as in PRIMULA OBCONICA. THE "M and M" STRAIN "Rosea," a beautiful shade of rose and "Atrosanguinea," a brilliant clear red—the flowers of which are unusually large and well formed, foliage of heavy dark green texture—plants grow compact and bushy and altogether provides stock that usually "SELLS ON SIGHT." We doubt

much if there is any strain on the market today anywhere near comparable to "M and M." $2\frac{1}{2}$ inch strong plants supplied in season. Price, \$7.00 per 100; \$65.00 per 1000—250 plants at 1000 rate.

Verbenas Beauty of Oxford *Excerpt from Florists' Review*

"If you had this Verbena in bloom for Mother's Day, just past, you know that it was much admired and most likely you cleaned up on all the plants that were in bloom. There isn't a more showy Verbena, and even some of our lady customers who usually care only for what they call pastel shades, fall in love with them; the color of the flowers is so vivid and bright that everything else pales beside them. The plants for Mother's Day can either be grown on in $2\frac{1}{2}$ in. or 3 in. pots and when in bloom made up into pans or plant boxes, or five plants out of 2s or $2\frac{1}{4}$ s can be planted into 8 in. pans five weeks or so before Mother's Day; have it in mind next year. If you have small stock on hand in $2\frac{1}{2}$ s don't let it suffer in such; give it a shift into 3s or $3\frac{1}{2}$ s and pinch back. Such plants will quickly branch out and inside of a few weeks will be in full bloom. Of course, if you can dispose of your small stock in bloom now at a good price, let it go, but if you happen to have more than you need right away, it will pay you, even at this late date, to pinch back and shift.

The "Mother's Day" Verbena Beauty of Oxford, Cerise Red.

The large flowering, free blooming verbenas (especially Beauty of Oxford cerise red) are now indispensable to the florist doing a retail business.

Note: The following varieties, with possible exception of Grandiflora Royale, do not come true from seed.

"ARCHER GREENHOUSE WHITE" PAINT

"The white, high-hiding, high spreading rate, easy working, durable and fume resistant white."

Its dazzling whiteness makes your greenhouse stand out, its high hiding means fewer coats for complete coverage, its high-spreading rate gives more square feet per gallon, easy working means less labor cost and well pleased painters, and its durability means more paint value per dollar expended.

GATOR HIDE MULCH PAPER

Mulch Paper increases the temperature of the soil for a given moisture content. First, by absorbing solar heat and transferring it in large measure to the soil. Second, by checking the evaporation of moisture from the soil and thereby reducing the extent of the cooling action due to evaporation.

Mulch Papers increase the night temperature as well as the day temperature of the soil.

Experiments have shown an increase ranging from 2 to 6 degrees F. in the night temperature due to the Mulch Paper. The day temperature was increased to practically the same extent.

THERE IS REAL PROFIT FOR YOU WITH VIGORO

It isn't necessary to use a number of different materials to feed your greenhouse crops and nursery stock. For Vigoro, the complete plant food contains all the elements required. They are in a balanced ratio, too. That is why so many commercial growers and nurserymen are using Vigoro exclusively.

Each week sees a steadily increasing number of successful growers from coast to coast using Vigoro. They have found from actual count that it increases the cut from their

benches. Flowers are of better color, size and plants grow vigorously.

Vigoro is the complete plant food, supplying all the elements needed for sturdy healthy growth. It is clean, odorless and easy to apply. Factories are located conveniently to all territories.

Price, per 100-lb. bag, \$5.00; 500 lbs., \$18.50; 1,000 lbs., \$36.00; 2,000 lbs., \$70.00. For shipment to the Rocky Mountain States, West and New England States (minimum order 500 pounds), per 500 lbs., \$19.25; per 1,000 lbs., \$38.50; per 2,000 lbs., \$77.00. All prices F. O.
