Price-List of Gladioli For Spring 1930

Foreword

I HEREBY wish to express my thanks to my friends and patrons for the degree of success I have had in serving them, and hope by my added experience to improve this service as time passes. My bulbs are good and clean, all being dug before the fall rains—and are well matured, plump, and full of pep. The gladiolus as a cut-flower for the summer seasons is one of the foremost if not the very best, and is added to each year by worthy new ones, but the new ones are not all worthy of recognition. Therefore it is a wise thing to see them growing in the field, where their performance can be noted, and only the choice ones, with good habits selected. I therefore urge as many as can conveniently do so to visit my fields when they are in bloom, and make their selections, and at the same time feast their eyes on their beauty which can not be described by pen or painted by the brush of the artist.

In comparing prices, bear in mind, I pay delivery charges to your postoffice or express on all orders at prices quoted, and also that **price** is not all that counts in a purchase: quality, reliability, and prompt and efficient service weighs heavily in the scale.

If sold out of size of bulb ordered and a size smaller be used, extra bulbs will be added to insure full value.

Some varieties never produce as large bulbs as others do, under the same culture, also accounts for inequality in size of bulbs in any collection.

Collection A

Collection A. 30 blooming size bulbs carefully assorted in fifteen or more colors, unlabeled \$1.00, or 100 for \$3.00.

Collection B

Collection B. 20 bulbs one and one-half inches diameter, carefully assorted as to colors and all labeled for only \$1.00.

Collection C

Collection C. Customer's selection of bulbs ranging below 50c each, to the amount of \$3.50 for only \$3.00. Selections amounting to \$5.60 for \$5.00 net.

In considering these prices, remember they include prepaid transportation.

In order to keep our mailing list in live working order, those who cannot see their way clear to place an order this season, will do me a great favor by dropping me a card stating whether they wish their name continued on the list for future. Thanks.

Culture and Care of Gladioli

Gladioli will do well in any good garden soil. Like other plants, the better the soil and culture, the better will be the results. Plant in April or May owing to the latitude; or a safe rule is when the ground is in good condition to work and warm enough to induce growth.

Be sure to select an open sunny location, for they delight in full sunshine. Also avoid planting near the walls of a building or where roots of trees or shrubs absorb the moisture and fertility; this is sometimes far beyond the limits of their branches.

If for hand cultivation plant rows fifteen to eighteen inches apart and for horse culture from two and one half to three feet apart and place the corms from four to six inches apart in rows, covering them from three to four inches deep. Cultivate frequently.

Pennsylvania

Received my order of Oriental poppy roots and you certainly gave me a good plant compared to what you receive at other nurseries.

Keyser, W. Va.

Sept. 18, 1928

The gladioli bulbs that I received from you last spring was so much better than I expected them to be, that I feel that it is my duty to write you about them. They grew so well and such free bloomers; flowers fifteen bloom to each stalk very large and beautiful. Will want some more next spring.

“Flowers and woman to man were given
To bridge the span twixt earth and heaven.”

A Tree

I think that I shall never see
A poem lovely as a tree.

A tree whose hungry mouth is pressed
Against the earth's sweet flowing breast;

A tree that looks at God all day
And lifts her leafy arms to pray;

A tree that may in summer wear
A nest of robins in her hair;

Upon whose bosom snow has lain;
Who intimately lives with rain.

Poems are made by fools like me,
But only God can make a tree.

I am under the impression that the experienced planter prefers to select his own gladiolus from the catalogue, rather than buy a collection made by the vender, where one often buys some he does not want in order to get some he does want. To such I would say make your selection from my catalogue, and I will surprise you with extras in liberal count if the order is sufficient to warrant same. For those wanting a lot of blooms at low cost I offer:

Guarantee: While we exercise the greatest care to keep all stock true to name, we are only human and liable to mistakes, however in common with other growers, we do not assume any responsibility other than to replace any stock that may prove untrue to name or to refund the purchase price of same.

Prompt and efficient service is what we shall always endeavor to render, for your success means our success. We do not lose interest as soon as the bulbs or plants are shipped, but are always anxious to hear from our patrons, as to how they succeed. One of the best plans to make a selection of gladioli, or in fact any flower, is to see them growing in the field, where not only their colors are displayed, but the habits of the plants are also manifest.

Visitors are always welcome, no gate to open; just drive in. Location 2½ miles south-west of city.

I also have in limited supply the following perennials:

Hardy Phlox in variety, each 15 to 25 cents owing to size of plants. Can be planted fall or spring.

Gold Medal Delphiniums, plants ea.	.25
seed per packet	.50
Oriental poppies for fall only, 3 colors, ea.	
50c, or 3 for	1.00
Regal Lily Bulbs, fall only, 2 year old ea.	.50
Regal Lily seed, for spring planting	
100 seeds and over	.50

The parcel of wonderful "Glad" bulbs which you sent came safely to us yesterday.

Mich., March 20, 1929

The bulbs you sent have arrived. Many thanks for such nice healthy ones, and also for the extra sent. I had none of that variety and was especially glad to receive it.
